WASHINGTON HELICOPTER ROUTE CHART

A new Washington Helicopter Route Chart is available with a February 13 effective date. This chart is a joint FAA/DOD effort and is an updated version of the DOD chart of June 14, 1982.

Major helicopter and transition routes along with narrative descriptions are included. Pictorial symbols of prominent landmarks, tower frequencies, altitude changeover points, reporting points, and transponder codes are other features depicted on this chart. Further, this chart shows selected cultural features such as power transmission lines and prominent buildings which are depicted for landmark value only. The chart does not depict complete obstacle information due to the high concentration of objects in the area.

Military personnel may obtain copies from their appropriate authority. Civilians may obtain a free chart by writing:

OFFSHORE TECHNOLOGY CONFERENCE

SPECIAL TRAFFIC MANAGEMENT PROGRAM

HOUSTON, TEXAS

MAY 5 THROUGH 9, 1986

In anticipation of the large number of aircraft traveling to and from Houston, Texas during the Offshore Technology Conference, the following procedures will be used to enhance safety and minimize air traffic delays at Houston Intercontinental (IAH) and William P. Hobby (HOU) Airports.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily May 5 through 9, 1100-1659 UTC (0600-1159 local). Houston Center will assign Controlled Departure Times (CDT) for unscheduled IFR flights arriving Houston Intercontinental and William P. Hobby Airports.

CDT's may be obtained from any flight service station or by calling Houston Center (713) 230-5561 (IAH) or (713) 230-5566 (HOU) during the hours beginning Sunday May 4, 1300 - May 5 0300 UTC (0800-2200 local) and between 1000-0300 UTC (0500-2200 local) daily thereafter until 1659 UTC (1159 local) May 9. CDT's will not be assigned more than 24 hours in advance of proposed time of departure.

Adherence to CDT's within plus or minus 10 minutes is essential to the success of this program.

Except for emergency situations, Houston Center will not accept IFR flight plans from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

****FLIGHT PLANS****

Flight plans should be filed with the nearest flight service station, after receiving a CDT and at least 4 hours prior to proposed time of departure. Include CDT in the remarks section of the flight plan. (Flight plans may be filed concurrently with CDT request made with flight service stations.)

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL PROCEDURES PRIOR TO CONDUCTING FLIGHT.

EXPO '86

May 2, 1986, through October 13, 1986

In anticipation of a significant increase of aircraft activity to and from the Vancouver, British Columbia, Canada, area during the 1986 World Exposition, the following flight information is provided to enhance safety and minimize air traffic delays.

BELLINGHAM, WASHINGTON, AREA

The Bellingham area includes the following airports:

Bellingham International (BLI)
Blaine Municipal (WA09)
Lynden (WA33)

Bellingham International is a port of entry and customs services are available from 8 a.m. until 5 p.m., locally and at other times, upon 1 hours advance notice. U.S. Airmen departing Canadian airspace which intend to land and clear Customs at Bellingham International are reminded to annotate their Customs requests in the remarks section of their flight plan. The Customs office telephone number at Bellingham is (206) 734-5463 (local exchange). Responsibility for ensuring Customs notification rests with the pilot.

TEMPORARY FAA BELLINGHAM CONTROL TOWER

The control tower will be operated from 8 a.m. until 8 p.m., daily, from May 1, 1986, through October 25, 1986.

Bellingham frequencies:

Bellingham Tower - 124.9 MHz, 239.25 MHz
Bellingham Ground Control - 121.65 MHz

BELLINGHAM (BLI) AIRPORT TRAFFIC AREA

The Bellingham Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as that airspace within a 5 statute mile radius of the BLI airport up to, but not including, 3,000' AGL excluding that airspace known as the Abbotsford-Bellingham Flight Information area which lies north of the BLI airport. The Abbotsford-Bellingham Flight Information Area is delineated on aeronautical charts.

BELLINGHAM AIRPORT INFORMATION - GENERAL

The Port of Bellingham is the airport sponsor of the airport. The traffic pattern is 1,200' for fixed wing aircraft and 800' for helicopters. The sponsor has a local regulation which prohibits intersection departures at the airport. Abbotsford, British Columbia, Canada, tower provides limited traffic

information service on 119.4 MHz to VFR aircraft operating between 1,500' and 4,000' MSL in an area generally described as between the U.S./Canadian border and Ferndale, and between the shoreline and Highway 9.

VFR FLIGHT PLANS

All pilots are encouraged to file a flight plan. Arriving aircraft should close their flight plans by radio with Bellingham FSS, on 123.6 MHz or 122.3 MHz. If unable, pilots may call the Bellingham FSS at 734-6400 (local exchange) or 1-800-833-0310 upon arrival.

Canadian/U.S. rules require that all aircraft operating VFR must be on a VFR flight plan prior to crossing the Canadian/U.S. border. Airfiles are discouraged and pilots are requested to file their flight plans 1 hour in advance of proposed departure times.

Pilots departing the U.S. from the Bellingham area are reminded that significant differences exist between Canadian and U.S. rules and procedures. Canadian officials have requested all U.S. pilots be cognizant of the requirement that flight plans are mandatory while operating in Canadian airspace.

IFR TRAFFIC

Vancouver Area Control Center (ACC) is the controlling agency for IFR aircraft operating to/from the Bellingham International Airport. Due to the expected increase in the volume of traffic generated by Expo '86, some delays may be encountered for IFR arrival and departure traffic. The Vancouver ACC has requested that U.S. airmen not request VFR/IFR practice ILS Runway 16 approaches to the Bellingham International Airport during Expo '86.

IFR ARRIVALS BLI INTERNATIONAL

Be prepared to discontinue your approach based upon local traffic conditions and enter a VFR traffic pattern for landing sequence. Pilots arriving IFR are requested to be extremely vigilant as the instrument approaches serving the Bellingham International Airport enter an area of high traffic activity in the Abbotsford-Bellingham Flight Information area.

VFR FLIGHT

Aircraft landing in Vancouver, British Columbia, Canada, should be extremely alert while operating in the Vancouver Lower Mainland area. Numerous aerial demonstrations and other aviation related sport activities are planned for Expo '86. The majority of these events will take place in the Vancouver Harbour Central Zone. The following VFR egress/ingress routes are recommended for traffic operating to/from Canadian airspace:

Bellingham (BLI) to Abbotsford (YXX) northbound east of Lynden
Abbotsford (YXX) to Bellingham (BLI) southbound west of Lynden

BLI to Vancouver (YVR) via Interstate 5 (I-5) using right side separation east/west of the highway. Extreme caution should be taken in the vicinity of the Abbotsford Localizer.

U.S. Airmen desiring additional information on Canadian area airports, rules and regulations, and Custom services may request (in writing) an Air Tourist Information Guide which is available without charge from:

Transport Canada (EXPO Guide)
800 Burrard Street
P.O. Box 220
Vancouver, British Columbia, Canada V6Z2JB

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAM's ISSUED BY BOTH THE U.S. AND CANADA PRIOR TO CONDUCTING FLIGHT.

FAA TESTING CONSUMER HOTLINE IN 24 STATES:

The FAA is testing a toll-free Consumer Hotline in its Southern, Eastern and Great Lakes regions.

Citizens with complaints or problems concerning such FAA responsibilities as carry-on baggage, airport security procedures, child safety seats — or FAA user services including aeronautical charts, associated aeronautical information publications, pilot examinations, physicals, aircraft certification, FAA facility operations -- are encouraged to dial, toll-free (800) FAA-SURE direct to FAA Headquarters.

Consumers calling the FAA Consumer Hotline may expect a return call from an FAA official.

The Consumer Hotline operates from 8 a.m. to 4 p.m., Eastern Time, Monday through Friday, except Holidays. (In the District of Columbia, call (202) 426-9366.)

(FAA's Consumer Hotline is distinct from and supplements the FAA Safety Hotline introduced nationwide in July, 1985. The FAA toll-free Safety Hotline -- (300) 255-1111 -- is intended primarily for use by those having specific knowledge of alleged violations of the Federal Aviation Regulations. The identities of callers are held in confidence by FAA, protected from disclosure under the provisions of the Freedom of Information Act.)

SPECIAL TRAFFIC MANAGEMENT PROGRAM
CAPE COD AND ADJACENT ISLAND AREA AIRPORTS
MAY 15 THROUGH OCTOBER 30, 1986

In anticipation of the large number of aircraft operating to and from the Cape Cod and adjacent Island areas during the period May 15 through October 30, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****
CAPE COD AND ADJACENT ISLAND AREA

For the purpose of this Special Traffic Management Program, the Cape Cod and adjacent Island area includes the following airports:

Hyannis Barnstable Municipal-Boardman/Polando Field	**- HYA**
Nantucket Memorial Airport	**- ACK**
Martha's Vineyard Airport	**- MVY**

****VFR ENROUTE AND HOLDING****

Pilots are urged to become familiar with VFR holding and reporting points (SEE GRAPHIC).

Arriving aircraft are encouraged to monitor ATIS, where available, and then contact the appropriate tower when 10-15 miles from the airport. Advise receipt of ATIS information on initial contact. Aircraft landing Martha's Vineyard are requested to monitor tower frequency far enough out to obtain and advise the tower on initial contact, "HAVE NUMBERS".

Aircraft enroute Hyannis Airport from Sagamore Bridge, Martha's Vineyard and Cotuit areas should exercise caution due to high density military traffic on IFR approach to runway 23, Otis Air National Guard Base.

Arrival Points	Arrival Direction	Holding Direction
HYANNIS AIRPORT		
Sandy Neck	North	North
Dennis Drive In	Northeast	Northeast
Sagamore Bridge	Northwest	Northwest
Cotuit	West	Southwest
Dennisport	East	Southeast
MARTHA'S VINEYARD AIRPORT		
Woods Hole	North	Northwest
Oak Bluffs	Northeast	East
Bounre Bridge	North	West
Cuttyhunk Island	West	Southwest
Katama Airpark	Southeast	South
NANTUCKET AIRPORT		
Great Point	North	East
Tuckernuck Island	West	Southwest

****IFR ARRIVAL/DEPARTURE****

Otis Terminal Radar Approach Control (TRACON) may assign a Control Departure Time (CDT) for IFR flights arriving or departing Hyannis, Nantucket or Martha's Vineyard Airports, whenever marginal VFR or IFR weather conditions exist.

Implementation of this part of the Special Traffic Management Program will be by special notice to flight service stations and area airport traffic control towers. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions pilots are encouraged to contact the tower or flight service station, prior to engine start up, to obtain latest information.

To insure the success of this Special Traffic Management Program, aircraft departing Hyannis, New Bedford, Nantucket and Martha's Vineyard Airports are urged to depart within plus or minus 5 minutes of CDT. Departures from other airports should depart within 15 minutes before and not later than 5 minutes after CDT.

****FLIGHT PLANS****

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans may experience extensive delays awaiting integration into the IFR system while this program is in effect.

Commercial operators are requested to file flight plans for extra flight sections no less than 1 hour prior to proposed time of departure.

Pilots are encouraged to cancel VFR flight plans with Bridgeport Flight Service Station by radio. Transmit 122.1 mHz receive on appropriate VOR frequency. If unable to cancel by radio, contact appropriate flight service station by telephone.

INDIANAPOLIS 500 MILE RACE

SPECIAL TRAFFIC MANAGEMENT PROCEDURES

INDIANAPOLIS, INDIANA

MAY 23 THROUGH 26, 1986

In anticipation of the large number of aircraft operating to and from the Indianapolis, area during the Indianapolis 500, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily May 23-24, 1300-2359 UTC (0800-1859 EST) and May 25, 1100-1559 UTC (0600-1059 EST). Indianapolis Center will assign a Controlled Departure time (CDT) for unscheduled IFR flights arriving the Indianapolis, Indiana area. CDT's will be assigned to departing IFR flights May 25, 2100-0359 UTC May 26 (1600-2259 EST, May 25) and May 26, 1200-1859 UTC (0700-1359 EST).

Beginning May 20, 1300-0400 UTC (0800-2300 EST) daily, CDT's can be obtained from Indianapolis Center by calling (800) 322-5532. In Indiana (800) 922-4845, or any Flight Service Station.

****OVERFLIGHTS****

Aircraft not landing in the Indianapolis area are requested to avoid overflight below 10,000 feet MSL within a 20 nautical mile radius of Indianapolis International Airport.

****INDIANAPOLIS AREA****

For the purpose of this Special Traffic Management Program, the Indianapolis area includes the following airports:

Indianapolis International Airport - IND

Eagle Creek Airpark Airport - I14

Speedway Airport - 3SY

Skyway Airport - 5I1

****FLIGHT PLANS****

Pilots are urged to file VFR and IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station. Include date and CDT in remarks section of IFR flight plans filed with a flight service station.

Due to anticipated frequency congestion, Indianapolis Center and Approach Control, except for emergency situations, will not accept air filed flight plans to/from the Indianapolis Area while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

****VFR ARRIVALS****

Indianapolis Terminal Radar Service Area (TRSA)
Stage III Radar Service

May 25, 1100-1559 UTC (0600-1059 EST)

Airports within the Indianapolis TRSA: Pilot participation in Stage III radar service is recommended and will be provided to aircraft landing at airports within the Indianapolis TRSA. Radar sequencing will be provided to all aircraft landing at Indianapolis International. Contact Indianapolis VFR Arrival control on 124.65 mHz (220-070°) or 127.15 mHz (070-220°) prior to reaching an outer VFR entry point (SEE GRAPHIC).

Aircraft are requested to hold at an outer VFR entry point until advised by Indianapolis VFR Arrival Control to proceed to an inner check point. Aircraft will be cleared to depart VFR entry points on a first come, first serve basis.

After receiving clearance to an inner VFR check point, pilots should proceed at 3,000 feet MSL, VFR (weather permitting) and remain on the Indianapolis VFR Arrival Control frequency.

All aircraft will be provided Stage III radar service inbound unless specifically declined. Temporary frequencies will be used. Pilots should be alert to radio frequency assignments.

SET TRANSPONDER CODE TO 1200 AND SQUAWK ALTITUDE.

Pilots are encouraged to utilize one of the other Indianapolis area airports due to parking congestion at Indianapolis International Airport.

****IFR/VFR DEPARTURES****

May 25, 2100 through 0359 UTC May 26 (1600-2259 EST, May 25)

Indianapolis International Airport:

Stage III radar service is recommended and will be provided unless specifically declined. Before starting engines, monitor Indianapolis International Airport ATIS 125.35 mHz for departure information.

DO NOT TAXI FOR TAKEOFF UNTIL, taxi instructions and if appropriate IFR clearance are received. For Stage III radar, contact Clearance Delivery on 123.95 mHz and advise: aircraft identification, type aircraft, if transponder equipped, direction of flight and/or destination and initial cursing altitude. For IFR clearance contact Clearance Delivery on 128.75 mHz.

DO NOT CALL THE TOWER FOR TAKEOFF UNTIL in the number 1 position to take the active runway.

****RESTRICTED AREA ADVISORY****

Pilots should be aware of the existence of Restricted Area (R 3401A/B) to the southeast of Indianapolis VOR and plan their flight accordingly. These areas are intermittently activated by NOTAM. Pilots are cautioned that penetration of Restricted Areas without authorization from the using or controlling agency may be extremely hazardous.

****WAKE TURBULENCE****

Pilots should be aware that a significant amount of wake turbulence may exist due to the large number of heavy jet aircraft operating in the Indianapolis area. Pilots are urged to exercise caution when operating within 30 miles of Indianapolis.

PILOTS ARE URGED TO OBTAIN A COMPLETE WEATHER BRIEFING AND REVIEW ALL APPLICABLE NOTAMS PRIOR TO CONDUCTING FLIGHTS.

Page revised 4/8/86

VFR Arrivals
Indianapolis Intl. – Indianapolis, In.
Field Elev. 797' MSL
Monitor ATIS 125.35 MHZ

VFR aircraft landing at reliever airports and not desiring to participate in Stage III Service, may do so without contacting Indianapolis Approach or VFR Control. It is recommended they remain clear of the Indianapolis TRSA. (VFR below 2,000ft within a 15NM radius and outside the Indianapolis Control Zone.)

VFR CHECK POINT & HOLDING POINT

WATSONVILLE ANTIQUE FLY-IN
WATSONVILLE MUNICIPAL AIRPORT
WATSONVILLE, CALIFORNIA

MAY 23 THRU 26, 1986

In anticipation of the large number of aircraft traveling to and from Watsonville, the following procedures will be used to enhance safety and minimize air traffic delays.

NOTE: All times are Pacific Daylight Time (PDT).

TEMPORARY AIR TRAFFIC CONTROL TOWER

A Temporary Tower will be in effect at the Watsonville Airport during the following times:

MAY 23 FRIDAY	10AM - 6PM
MAY 24 SATURDAY	8AM - 6PM
MAY 25 SUNDAY	8AM - 6PM
MAY 26 MONDAY	8AM - 2PM

INBOUND PILOTS monitor the Salinas VOR, frequency 117.3, for arrival information, during the above times.

TOWER Frequency: 126.4

GROUND Frequency: 121.05

AIRPORT CLOSURE AND RESTRICTIONS

MAY 24 and 25 (Saturday and Sunday)

11AM - 12 NOON Arrivals ONLY

12 NOON - 4PM AIRPORT CLOSED

4PM - 5PM Departures ONLY

CAUTION ADVISORY

Caution advised in the vicinity of the Watsonville Airport for numerous aircraft, including many non-radio aircraft.

MAY 24 and 25 (Saturday and Sunday) 12 NOON to 4PM CAUTION ADVISED for ACROBATIC FLIGHT and PARACHUTE JUMPING within a 2 nautical mile radius of the Watsonville Airport from the Surface to 6,000 feet MSL.

TEMPORARY FLIGHT SERVICE STATION

The Oakland FSS will provide facilities on the Watsonville Airport, Friday afternoon May 23 and Saturday and Sunday, May 24 and 25 for CLOSING and FILING VFR Flight Plans ONLY. (Weather information will NOT be available. For weather and IFR flight Plans, contact Oakland FSS - phone (800) 345-4546.)

SPECIAL USE AIRSPACE
(Military Operations Area)

Effective June 3-5 and June 15-20, 1986

Camp Swift Temporary MOA, TX [New]

Boundaries. Beginning at lat. 30°16'00"N., long. 97°21'00"W.;

SPECIAL USE AIRSPACE
(Military Operations Area)

Effective June 17-21, 1986

Falls 2 Temporary MOA, WI [New]

Boundaries. Beginning at lat. 44°44'00"N., long. 91°05'00"W.;
to lat. 44°48'00"N., long. 90°59'00"W.;
to lat. 44°48'00"N., long. 90°22'00"W.;
to lat. 44°35'00"N., long. 90°18'00"W.;
to lat. 44°27'00"N., long. 89°59'00"W.;
to lat. 44°27'45"N., long. 90°27'54"W.;
to lat. 44°36'30"N., long. 90°31'30"W.;
thence to the point of beginning.

Altitudes. 500 feet AGL up to and including 8,500 feet above mean sea level. The airspace 1,500 feet AGL and below within a 3 nautical mile radius of the Neillsville Airport is excluded from the MOA.

Times of use. June 17, 1986, 0900-1100 (local time) and 1300-1500 (local time). On June 18-21, 1986, 0830-1630 (local time).

Controlling agency. FAA, Minneapolis ARTCC.

Using agency. Volk Field, Camp Douglas, WI

CEDAR CITY, UTAH, AUTOMATED FLIGHT SERVICE STATION

The Cedar City, Utah, Automated Flight Service Station (AFSS) will commission on June 5, 1986. All services now provided by the Cedar City Flight Service Station (FSS) will be transferred to the AFSS at that time. On that same day, the AFSS will also assume control of most of the enroute flight advisory servcice (EFAS) outlets now remoted to Salt Lake Flight Service Station. The remaining EFAS, remote communications outlet (RCO), and very-high omni (VOR) voice frequencies now controlled by SLC FSS will be gradually transferred to the Cedar City AFSS between June 5 and July 1, 1986. During the month of July, preflight and all remaining Salt Lake FSS functions will be transferred to Cedar City AFSS, as well as all eastern Utah facilities now controlled by Grand Junction, Colorado, Flight Service Station.

AREA SERVED: The Cedar City AFSS's geographic area of responsibility is the state of Utah for all services except EFAS. The EFAS area of responsibility covers a six-state area (see below).

RADIO AIDS

A. Navigational aids with voice capability, (pilots transmit on 122.1 and receive on the VOR frequency.)

Bonneville (BVL)	112.3
Delta (DTA)	116.1
Fairfield (FFU)	116.6
Hanksville (HVE)	115.9
Lucin (LCU)	113.6
Milford (MLF)	112.1
Myton (MTU)	117.9
Ogden (OGD)	115.7
Price (PUC)	115.5
Vernal (VEL)	108.2

B. VOR navigational aids with no voice capability.

Bryce Canyon (BCE)	112.8
Cedar City (CDC)	108.6
Logan (LGU)	109.8
Moab (OAB)	109.8
Provo (PVU)	108.4
Saint George (OZN)	109.8
Salt Lake City (SLC)	116.8

REMOTE COMMUNICATION OUTLETS (RCO'S)

VHF

Bryce Canyon (BCE)	122.2
Bull Frog Basin (U07)	122.4
Cedar City (CDC)	122.2
Cedar City (CDC)	122.6
Delle (4DL)	122.2
Francis Peak	122.2
Moab (OAB)	122.3
Richfield (RIF)	122.5
Saint George (SGU)	122.5
Salt Lake City (SLC)	122.2

UHF

Cedar City (CDC)	255.4
Salt Lake City (SLC)	255.4

EMERGENCY

Cedar City (CDC)	121.5
Cedar City (CDC)	243.0
Bryce Canyon (BCE)	121.5

DIRECTION FINDER SERVICE

Direction Finder Service (DF) will be available through the CDC AFSS with equuipment located at Cedar City and Hanksville, Utah. Contact Cedar City Radio on one of the published frequencies for DF service in those areas.

ENROUTE FLIGHT ADVISORY SERVICE (EFAS) OUTLETS

CDC AFSS will have 25 EFAS outlets on frequency 122.0 covering a six state area. In addition there will be one high altitude outlet (Battle Mountain, NV) on frequency 134.825, with five more high altitude outlets planned. Current and forecast high altitude outlets are indicated with an asterisk:

Ashton, ID. (4AS)
Helena, MT. (HLN)
Rome, OR. (REO)
Malad City, ID. (MLD)
Cedar City, UT. (CDC)*
Butte, MT. (BTM)
Big Piney, WY. (BPI)
Delta, UT. (DTA)
Great Falls, MT. (GTF)*
Thermopolis, WY. (THP)
Sunnyside, UT. (4SS)
Judith Mountain, MT (LWT)
Tonapah, NV. (TPH)

Wilson Creek, NV. (ILC)
Bliss, ID. (GNG)
Missoula, MT. (9UM)
Billings, MT. (BIL)
Squaw Butte, ID. (4EM)*
Delle, UT. (4DL)
Glasgow, MT. (GGW)
Rock Springs, WY. (RKS)
Provo, UT. (PVU)
Kalispell, MT. (FCA)
Battle Mountain, NV. (BAM)*
Francis Peak, UT. (SLC)*
(high altitude only)
Miles City, MT. (MLS)*

PREFLIGHT BRIEFING

Local Cedar City pilots may call 586-3806. All others within Utah dial:

1-800-WX BRIEF (1-800-992-7433)

After calling this toll-free number pilots will receive prerecorded instructions to access the following:

1. Pilot Briefer

2. Fast File - for filing flight plans without talking to a briefer.

3. Pilots Automatic Telephone Answering Service (PATWAS) - PATWAS is a continuous recording of meterological and aeronautical information. The system has a capability of 24 recordings, but initially only three will be used to provide significant weather information.

Automatic access to Fast File and PATWAS is limited to those with touch tone phones. Those calling from rotary phones will be connected directly to a briefer.

TRANSCRIBED WEATHER BROADCAST (TWEB)

A TWEB will be broadcast between 5 a.m. and 10 p.m. local time on the following outlets:

a. OGD VORTAC
b. FFU VORTAC
c. CDC VOR

Pilots in the Salt Lake City area may also listen to the TWEB by dialing 364-5571.

NOTICE TO AIRMEN

MERCED ANNUAL ANTIQUE FLY-IN
JUNE 6, 7, and 8, 1986

AIR TRAFFIC/AIRPORT INFORMATION, MERCED TERMINAL AREA. The Annual Merced Antique Fly-in (June 6,7, & 8, 1986) will generate a large volume of air traffic, with peak arrival traffic occurring Friday afternoon and Saturday morning. The heaviest arrival period is expected to be between 1000 and 1200 on Saturday morning. Peak departure periods will be immediately following the air show on Saturday and Sunday.

To accommodate the expected heavy departure demand, arrivals to the Merced Airport will not be permitted for the first one and one/half (1 1/2) hours following the Saturday airshow.

ARSA INFORMATION. ARSA SERVICES WILL BE SUSPENDED DURING THE FOLLOWING TIME PERIODS:

FRIDAY	JUNE 6	1200 PDT to 2000 PDT
SATURDAY	JUNE 7	0700 PDT to 2000 PDT
SUNDAY	JUNE 8	0700 PDT to 1600 PDT

MERCED TOWER HOURS OF OPERATION DURING FLY-IN

JUNE 6, 7, and 8 0700 PDT until 2000 PDT

ARRIVAL PROCEDURES. All arriving aircraft should listen to ATIS on Merced VOR frequency 114.2 MHz prior to entering the airport traffic area. All traffic should make a normal entry from the west to the left downwind leg for Runway 30 or the right downwind leg for runway 12, whichever is in use. Aircraft should sequence themselves when entering downwind and listen to the tower on frequency 121.0 MHz. Do not initiate contact with Merced Tower until on final approach. If the preceding aircraft is landing on the left side of the runway, plan to land on the right side, and vice-versa. After landing, taxi off the runway as soon as possible due to aircraft landing behind you.. Make sure the runway is clear before crossing over to the other side as you clear. Follow instructions of ground personnel for parking.

IFR arrivals can expect lengthy delays.

DEPARTURES. Immediately following the airshow on Saturday, the field will be open only for departures for the first 1 1/2 hours. The exact time periods will be included in a local NOTAM. All takeoffs must be made from the end of the runway. WATCH FOR FLAGMAN. Do not call the tower for clearance. Departures on left side of runway 30, make left turn out. Departures on right side of runway 30, make straight out or right downwind departure. Right turn outs - remain within 1 mile of runway on downwind. IFR departures can expect lengthy delays. While taxiing out, monitor ground frequency 121.8 MHZ. Change to tower frequency 121.0 MHZ prior to taking the runway.

FLY BY'S. All pilots must be briefed in advance on procedures for fly-by's at Merced, by the Fly-By Committee. All fly-by's should be made at least 300' west of the runway.

FLIGHT PLAN AND WEATHER SERVICES. VFR aircraft are requested to cancel flight plans with Fresno Flight Service Station when approaching the Merced Airport or immediately after landing. Use 122.1 MHZ and receive on MCE VOR FQCY 114.2 MHZ. If on the ground, flight plans may be closed, filed, or weather briefings received from Fresno FSS by dialing local telephone number 722-2691.

SAFETY BULLETIN. All participating pilots should be ALERT, CAUTIOUS, and OBSERVANT to all aspects of safe operation. The following items are emphasized for safety:

1. Sequence yourself when entering downwind. Remember: many aircraft may not have two-way radio capability; there will be numerous aircraft types and airspeeds from the slower home-builts to the larger and faster WAR BIRDS.
2. After landing, taxi off the runway as soon as possible and follow the signals and directions of the Parking Officials.
3. Remember, many spectators may not realize the fatal power of an invisible prop. DO NOT OPERATE ENGINE in display parking areas. Follow the instructions provided by the Parking Officials.
4. If you do not have a radio, follow the traffic pattern and watch for light signals from the tower.

FIELD CLOSURE PERIODS. The airport will be closed for an air show on Saturday and Sunday afternoons. The exact closure times will be issued via NOTAM.

Immediately following the airshow on Saturday, the field will be CLOSED TO ARRIVALS AND OPEN ONLY FOR DEPARTURES for the first 1 1/2 hours.

GENERAL

FDC 6/1087 FDC THE FEDERAL AVIATION ADMINISTRATION HAS PARTICIPATED IN GOVERNMENT ACTIVITIES TO ASSESS AVIATION PROBLEMS WHICH MIGHT OCCUR AS A RESULT OF THE SOVIET NUCLEAR ACCIDENT. NONE OF THE DATA WE HAVE SEEN PROVIDES ANY CONCERN FOR ANY FLIGHTS OF ANY U.S. CARRIERS ANYWHERE IN THE WORLD. THE ONLY AREA WE WOULD BE POTENTIALLY CONCERNED ABOUT IS FLIGHT IN THE VICINITY OF THE REACTOR SITE NEAR KIEV AT ALTITUDES BELOW 20,000 FEET. FLIGHT ABOVE 20,000 FEET AT THIS LOCATION NEAR KIEV OR OTHER FLIGHTS AT ANY ALTITUDE ANYWHERE IN THE WORLD IS NOT EXPECTED TO PRESENT ANY PUBLIC HEALTH OR SAFETY PROBLEMS DUE TO RADIATION CONTAMINATION WHICH MIGHT EXIST AS A RESULT OF THE ACCIDENT. THERE IS NO REASON FOR SPECIAL FLIGHT PRECAUTIONS. NO FURTHER NOTIFICATIONS ON THIS SUBJECT ARE PLANNED.

FDC 6/995 U.S. CUSTOMS REGULATORY CHANGES. AIRCRAFT PENETRATING THE INNER ADIZ FM ANYWHERE IN THE WESTERN HEMISPHERE SOUTH OF THE U.S. MEXICAN BORDER, SOUTH OF 33 DEG NORTH LATITUDE ON THE PACIFIC COAST, SOUTH OF 30 DEGREES NORTH LATITUDE ON THE ATLANTIC COAST, OR SOUTH OF THE INNER ADIZ ON THE GULF COAST, MUST PROVIDE U.S. CUSTOMS AT LEAST ON EHOUR ADVANCE NOTICE OF PENETRATION OF U.S. AIRSPACE, EFFECTIVE APRIL 30. THIS REQUIREMENT WILL BE EXTENDED TO AIRCRAFT THAT HAVE NOT LANDED IN A FOREIGN PLACE AND AIRCRAFT FROM PUERTO RICO THAT ARE NOT FLYING UNDER IFR FLIGHT RULES. FILING A FLIGHT PLAN WITH THE NOTATION "ADCUS" WITH THE U.S. FAA AT LEAST ONE HOUR IN ADVANCE OF PENETRATION OF THE ADIZ WILL SATISFY THIS REQUIREMENT. CONTRACTING U.S. CUSTOMS AT 305-536-6591, MIAMI, FL, OR 714-351-6674, RIVERSIDE, CA, AT LEAST ONE HOUR IN ADVANCE WILL ALSO MEET THE REQUIREMENT. LANDING AND INSPECTION REQUIREMENTS FOR AIRCRAFT ARRIVING FROM FOREIGN PLACES REMAIN UNCHANGED.

FDC 6/505 FI/P CORRECT U.S. GOVT ENROUTE LOW ALTITUDE CHART L-18 PANEL F DTD 13 MAR 1986. CHANGE WIREGRASS VORTAC IDENT RRS FREQ 116.1 TO READ 111.6.

FDC 6/421 FI/P CORRECT U.S. GOVT ENROUTE HIGH ALTITUDE CHART /SOUTHWEST H2/PANEL F, DTD 16 JAN 1986. CHANGE TWENTYNINE PALMS TACAN IDENT /NXP/TO READ PALMS TACAN IDENT /NXP/.

FDC 6/231 FI/P CORRECT U.S. GOVT HAWAIIAN ISLAND SECTIONAL CHART 33RD EDITION DTD 21 NOV 85. CHANGE HONOLULU VORTAC /HNL/FREQ 115.3 CHANNEL 100 TO FREQ 114.8 CHANNEL 095X.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 18TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7806/CHICAGO 312-283-2875 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/2193 FI/P MTR CORRECT IR-501 MILITARY TRAINING ROUTE/POINT AJ. CHANGE FAC/RAD/DIST POINT AJ TO GLD 354/35.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED.
NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

- Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.
- Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.
- Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

The Interim Voice Response System

The Federal Aviation Administration has leased an Interim Voice Response System (IVRS) that enables pilots throughout the country to obtain selected weather information directly from a computer. The pilot enters requests for specific weather reports for locations of interest by depressing the keys on a Touchtone $^{(R)}$ telephone or keypad adapter on non-Touchtone $^{(R)}$ telephones. The computer will "listen" to telephone signalling tones and will respond with a spoken message derived from stored human speech.

The IVRS is a national system consisting of a network of 16 locations with "speaking" computers, and prepaid telephone access from an additional 8. The locations and telephone numbers are listed below. Call the telephone number nearest you at any time day or night, using any standard 12-key touch-tone phone. For long distance numbers outside your area code, call 1 plus Area Code and number. For assistance or trouble reporting call toll free 1-800-FOR-IVRS at any time.

IVRS Weather Products

1. SEVERE WEATHER FORECAST ALERTS (AWW) inform pilots of forthcoming severe thunderstorms or tornadoes. They are available automatically when you enter a location identifier (LOCID) or TWEB route number for a state in which a Severe Weather Forecast Alert is in effect.

   ISSUED: As necessary.

2. **CONVECTIVE SIGMETS (WST) concern thunderstorms and related phenomena. They are available automatically when you enter a LOCID or TWEB route number for a state in which a Convective SIGMET is in effect.**

   ISSUED: Hourly at 55 minutes past the hour and as needed.

3. **SURFACE OBSERVATIONS (SA) provide observed surface weather conditions for the LOCIDs entered.**

   ISSUED: Hourly on the hour and as needed.

4. **TERMINAL FORECASTS (FT) provide a forecast of weather conditions for the LOCIDs entered.**

   ISSUED: Approximately 1000, 1500, and 2200 GMT and as necessary.

5. **WINDS ALOFT FORECASTS (GF) describe winds and temperatures for the LOCIDs entered. You specify the altitude and number of hours into the future and receive winds and temperatures at your requested altitude plus an altitude above and one below the requested altitude.**

   ISSUED: Unscheduled, but typically at 0400 and 1600 GMT.

6. **TWEB ROUTE FORECASTS (TR) provide a forecast of weather conditions within a 50-mile-wide corridor along a route and within a 50-mile radius for local vicinity forecasts.**

   ISSUED: Approximately 1200, 1800, and 2400 GMT and as needed.

How to Use IVRS

The instructions on how to use IVRS are contained in A Pilot's Guide to IVRS published by the Federal Aviation Administration. You may obtain a copy from any FAA Flight Standards District Office or Flight Service Station.

Comments, questions and requests for more information may also be directed to :

IVRS Project Office
Federal Aviation Administration
APM-230
Washington, D.C. 20591

COORDINATED UNIVERSAL TIME (UTC)

Coordinated Universal Time (UTC) has replaced Greenwich Mean Time (GMT) as the accepted international standard for clock time. UTC is the basis for civil time in most countries of the world rather than GMT. The Federal Aviation Administration has concurred with this change and advised the International Civil Aviation Organization that the conversion would become effective January 16, 1986. The letter "Z" will be retained to indicate "UTC". All United States Government Aeronautical charts and publications that are effective on January 16, 1986, will indicate UTC vice GMT.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective April 10, 1986.

Beale Air Force Base, CA
Birmingham Municipal Airport, AL
Burlington International Airport, VT
Castle Air Force Base, CA
Charlotte/Douglas International Airport, NC
Columbus Metropolitan Airport, GA
Mather Air Force Base. CA
McClellan Air Force Base, CA
Nashville Metropolitan Airport, TN
Sacramento Metropolitan Airport, CA

ARSA's have been designated at the following locations to be effective May 8, 1986.

Adams Field, Little Rock, AR
General Mitchell Field, Milwaukee, WI
Greater Buffalo International Airport, NY
Memphis International Airport, TN
Michiana Regional Airport, South Bend, IN
Salt Lake International Aitport, UT

ARSA's have been designated at the following locations to be effective June 5, 1986.

Albuquerque International Airport, NM
Greater Cincinnati International Airport, KY
Indianapolis International Airport, IN
Phoenix Sky Harbor International Airport. AZ
Tucson International Airport, AZ
Davis-Monthan Air Force Base, AZ
Wichita Mid-Continent Airport, KS

KALAMAZOO INTERNATIONAL AIRSHOW
SPECIAL TRAFFIC MANAGEMENT PROCEDURES
KALAMAZOO, MICHIGAN; JUNE 14 THROUGH 15, 1986

In anticipation of a large number of aircraft operating to/from Kalamazoo County Airport on June 14 and 15, 1986, special traffic management procedures will be used to enhance safety and minimize delays. Pilots are advised of the increased volume of VFR traffic operating in the vicinity of the Kalamazoo airport and designated VFR holding/reporting points (see graphic). Pilots may expect arrival/departures delays.

NOTAMS

Kalamazoo TRSA may not be in effect, and STAGE III service may not be available June 14, and 15, 1986 between 1000 UCT (0600 EDT) and 0300 UCT (2300 EDT).

Kalamazoo Airport will be closed June 14 and 15, 1986 between 1545 UCT (1145 EDT) and 2130 UCT (1730 EDT). Airshow in progress from the surface to 15,000 feet AGL within a 5 NM radius. Aircraft should remain clear of the airspace during this period.

ATIS

Arriving/departing aircraft are encouraged to obtain the ATIS 127.25 mhz. prior to contacting Kalamazoo Approach Control/Ground Control.

VFR ARRIVALS/HOLDING

Contact Kalamazoo Approach Control on 121.2 mhz approaching one of the depicted VFR reporting points or at least 20 miles from the airport.

Pilots will be issued a transponder code, directed to a VFR holding point,(see graphic), and instructed to change to and monitor another frequency for arrivalsequencing. Pilots of non-transponder equipped aircraft will be routed to Paw Paw for VFR holding and arrival sequencing.

Pilots can expect routing via U.S.131 until reaching I-94 and then turn east along I-94, pass over and across the airport and enter downwind for the active runway on the east side of the airport. When requested to proceed direct to the airport, pilots are expected to maintain at least 2000 MSL (weather permitting). Pilots will be instructed to change and monitor the tower frequency 118.3 mhz for landing clearance.

Pilots are requested to exit the runway at the first available intersection speed permitting after landing. After clearing the runway, observe flagmen directions and not contact Ground Control unless specifically requested to do so by the Tower.

CLOSING VFR FLIGHT PLANS

Pilots are urged to close their flight plans with South Bend FSS via radio by transmitting on 122.2 mhz and receiving on the appropriate VOR. If unable to close your flight plan via radio, contact the South Bend FSS via telephone 343-2608.

DEPARTURES

No taxiing will be permitted prior to the re-opening of the airport at 1730 EDT. All aircraft will be expected to depart runway 17/35 from the intersection of runway 9/27 unless full length is specifically requested. VFR aircraft that do not require the full length are to follow the flagmen directions and are not to contact Ground Control or Tower.

VFR aircraft requesting full runway length are to contact Ground Control 121.9 mhz for taxi instructions.

IFR clearances may be requested from Clearance Delivery 121.75 mhz up to thirty minutes prior to departure. Gate hold procedures will be in effect and expect departure clearance times (EDCT) will be issued. Pilots should obtain their clearance and (EDCT) prior to engine start.

IFR aircraft contact Ground Control 121.9 mhz for taxi instructions.

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

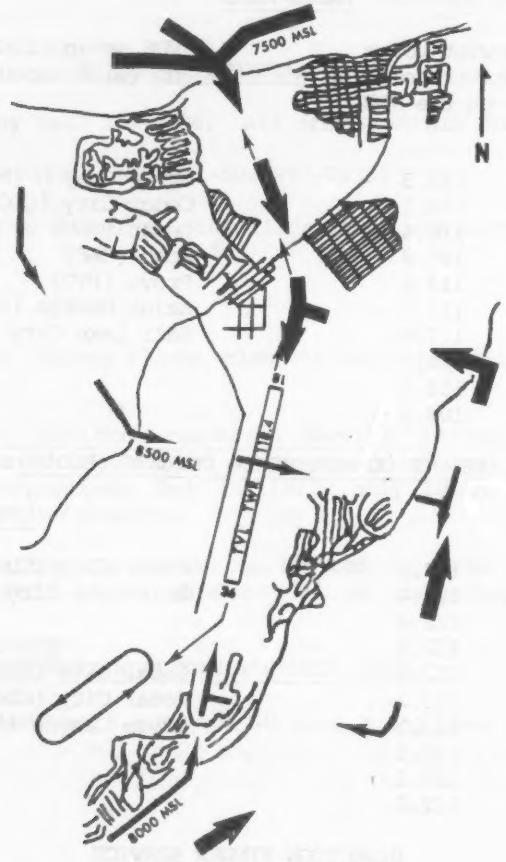
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



CEDAR CITY, UTAH, AUTOMATED FLIGHT SERVICE STATION

The Cedar City, Utah, Automated Flight Service Station (AFSS) will commission on June 5, 1986. All services now provided by the Cedar City Flight Service Station (FSS) will be transferred to the AFSS at that time. On that same day, the AFSS will also assume control of most of the enroute flight advisory servcice (EFAS) outlets now remoted to Salt Lake Flight Service Station. The remaining EFAS, remote communications outlet (RCO), and very-high omni (VOR) voice frequencies now controlled by SLC FSS will be gradually transferred to the Cedar City AFSS between June 5 and July 1, 1986. During the month of July, preflight and all remaining Salt Lake FSS functions will be transferred to Cedar City AFSS, as well as all eastern Utah facilities now controlled by Grand Junction, Colorado, Flight Service Station.

AREA SERVED: The Cedar City AFSS's geographic area of responsibility is the state of Utah for all services except EFAS. The EFAS area of responsibility covers a six-state area (see below).

RADIO AIDS

A. Navigational aids with voice capability, (pilots transmit on 122.1 and receive on the VOR frequency.)

Bonneville (BVL)	112.3
Delta (DTA)	116.1
Fairfield (FFU)	116.6
Hanksville (HVE)	115.9
Lucin (LCU)	113.6
Milford (MLF)	112.1
Myton (MTU)	117.9
Ogden (OGD)	115.7
Price (PUC)	115.5
Vernal (VEL)	108.2

B. VOR navigational aids with no voice capability.

Bryce Canyon (BCE)	112.8
Cedar City (CDC)	108.6
Logan (LGU)	109.8
Moab (OAB)	109.8
Provo (PVU)	108.4
Saint George (OZN)	109.8
Salt Lake City (SLC)	116.8

REMOTE COMMUNICATION OUTLETS (RCO'S)

VHF

Bryce Canyon (BCE)	122.2
Bull Frog Basin (U07)	122.4
Cedar City (CDC)	122.2
Cedar City (CDC)	122.6
Delle (4DL)	122.2
Francis Peak	122.2
Moab (OAB)	122.3
Richfield (RIF)	122.5
Saint George (SGU)	122.5
Salt Lake City (SLC)	122.2

UHF

Cedar City (CDC)	255.4
Salt Lake City (SLC)	255.4

EMERGENCY

Cedar City (CDC)	121.5
Cedar City (CDC)	243.0
Bryce Canyon (BCE)	121.5

DIRECTION FINDER SERVICE

Direction Finder Service (DF) will be available through the CDC AFSS with equipment located at Cedar City and Hanksville, Utah. Contact Cedar City Radio on one of the published frequencies for DF service in those areas.

ENROUTE FLIGHT ADVISORY SERVICE (EFAS) OUTLETS

CDC AFSS will have 25 EFAS outlets on frequency 122.0 covering a six state area. In addition there will be one high altitude outlet (Battle Mountain, NV) on frequency 134.825, with five more high altitude outlets planned. Current and forecast high altitude outlets are indicated with an asterisk:

Ashton, ID. (4AS)
Helena, MT. (HLN)
Rome, OR. (REO)
Malad City, ID. (MLD)
Cedar City, UT. (CDC)*
Butte, MT. (BTM)
Big Piney, WY. (BPI)
Delta, UT. (DTA)
Great Falls, MT. (GTF)*
Thermopolis, WY. (THP)
Sunnyside, UT. (4SS)
Judith Mountain, MT (LWT)
Tonapah, NV. (TPH)

Wilson Creek, NV. (ILC)
Bliss, ID. (GNG)
Missoula, MT. (9UM)
Billings, MT. (BIL)
Squaw Butte, ID. (4EM)*
Delle, UT. (4DL)
Glasgow, MT. (GGW)
Rock Springs, WY. (RKS)
Provo, UT. (PVU)
Kalispell, MT. (FCA)
Battle Mountain, NV. (BAM)*
Francis Peak, UT. (SLC)*
(high altitude only)
Miles City, MT. (MLS)*

PREFLIGHT BRIEFING

Local Cedar City pilots may call 586-3806. All others within Utah dial:

1-800-WX BRIEF (1-800-992-7433)

After calling this toll-free number pilots will receive prerecorded instructions to access the following:

1. Pilot Briefer

2. Fast File - for filing flight plans without talking to a briefer.

3. Pilots Automatic Telephone Answering Service (PATWAS) - PATWAS is a continuous recording of meterological and aeronautical information. The system has a capability of 24 recordings, but initially only three will be used to provide significant weather information.

Automatic access to Fast File and PATWAS is limited to those with touch tone phones. Those calling from rotary phones will be connected directly to a briefer.

TRANSCRIBED WEATHER BROADCAST (TWEB)

A TWEB will be broadcast between 5 a.m. and 10 p.m. local time on the following outlets:

a. OGD VORTAC
b. FFU VORTAC
c. CDC VOR

Pilots in the Salt Lake City area may also listen to the TWEB by dialing 364-5571.

EXPO '86

May 2, 1986, through October 13, 1986

In anticipation of a significant increase of aircraft activity to and from the Vancouver, British Columbia, Canada, area during the 1986 World Exposition, the following flight information is provided to enhance safety and minimize air traffic delays.

BELLINGHAM, WASHINGTON, AREA

The Bellingham area includes the following airports:

Bellingham International (BLI)
Blaine Municipal (WA09)
Lynden (WA33)

Bellingham International is a port of entry and customs services are available from 8 a.m. until 5 p.m., locally and at other times, upon 1 hours advance notice. U.S. Airmen departing Canadian airspace which intend to land and clear Customs at Bellingham International are reminded to annotate their Customs requests in the remarks section of their flight plan. The Customs office telephone number at Bellingham is (206) 734-5463 (local exchange). Responsibility for ensuring Customs notification rests with the pilot.

TEMPORARY FAA BELLINGHAM CONTROL TOWER

The control tower will be operated from 8 a.m. until 8 p.m., daily, from May 1, 1986, through October 25, 1986.

Bellingham frequencies:

Bellingham Tower - 124.9 MHz, 239.25 MHz
Bellingham Ground Control - 121.65 MHz

BELLINGHAM (BLI) AIRPORT TRAFFIC AREA

The Bellingham Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as that airspace within a 5 statute mile radius of the BLI airport up to, but not including, 3,000' AGL excluding that airspace known as the Abbotsford-Bellingham Flight Information area which lies north of the BLI airport. The Abbotsford-Bellingham Flight Information Area is delineated on aeronautical charts.

BELLINGHAM AIRPORT INFORMATION - GENERAL

The Port of Bellingham is the airport sponsor of the airport. The traffic pattern is 1,200' for fixed wing aircraft and 800' for helicopters. The sponsor has a local regulation which prohibits intersection departures at the airport. Abbotsford, British Columbia, Canada, tower provides limited traffic

information service on 119.4 MHz to VFR aircraft operating between 1,500' and 4,000' MSL in an area generally described as between the U.S./Canadian border and Ferndale, and between the shoreline and Highway 9.

VFR FLIGHT PLANS

All pilots are encouraged to file a flight plan. Arriving aircraft should close their flight plans by radio with Bellingham FSS, on 123.6 MHz or 122.3 MHz. If unable, pilots may call the Bellingham FSS at 734-6400 (local exchange) or 1-800-833-0310 upon arrival.

Canadian/U.S. rules require that all aircraft operating VFR must be on a VFR flight plan prior to crossing the Canadian/U.S. border. Airfiles are discouraged and pilots are requested to file their flight plans 1 hour in advance of proposed departure times.

Pilots departing the U.S. from the Bellingham area are reminded that significant differences exist between Canadian and U.S. rules and procedures. Canadian officials have requested all U.S. pilots be cognizant of the requirement that flight plans are mandatory while operating in Canadian airspace.

IFR TRAFFIC

Vancouver Area Control Center (ACC) is the controlling agency for IFR aircraft operating to/from the Bellingham International Airport. Due to the expected increase in the volume of traffic generated by Expo '86, some delays may be encountered for IFR arrival and departure traffic. The Vancouver ACC has requested that U.S. airmen not request VFR/IFR practice ILS Runway 16 approaches to the Bellingham International Airport during Expo '86.

IFR ARRIVALS BLI INTERNATIONAL

Be prepared to discontinue your approach based upon local traffic conditions and enter a VFR traffic pattern for landing sequence. Pilots arriving IFR are requested to be extremely vigilant as the instrument approaches serving the Bellingham International Airport enter an area of high traffic activity in the Abbotsford-Bellingham Flight Information area.

VFR FLIGHT

Aircraft landing in Vancouver, British Columbia, Canada, should be extremely alert while operating in the Vancouver Lower Mainland area. Numerous aerial demonstrations and other aviation related sport activities are planned for Expo '86. The majority of these events will take place in the Vancouver Harbour Central Zone. The following VFR egress/ingress routes are recommended for traffic operating to/from Canadian airspace:

Bellingham (BLI) to Abbotsford (YXX) northbound east of Lynden
Abbotsford (YXX) to Bellingham (BLI) southbound west of Lynden

BLI to Vancouver (YVR) via Interstate 5 (I-5) using right side separation east/west of the highway. Extreme caution should be taken in the vicinity of the Abbotsford Localizer.

U.S. Airmen desiring additional information on Canadian area airports, rules and regulations, and Custom services may request (in writing) an Air Tourist Information Guide which is available without charge from:

Transport Canada (EXPO Guide)
800 Burrard Street
P.O. Box 220
Vancouver, British Columbia, Canada V6Z2JB

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAM's ISSUED BY BOTH THE U.S. AND CANADA PRIOR TO CONDUCTING FLIGHT.

FAA TESTING CONSUMER HOTLINE IN 24 STATES:

The FAA is testing a toll-free Consumer Hotline in its Southern, Eastern and Great Lakes regions.

Citizens with complaints or problems concerning such FAA responsibilities as carry-on baggage, airport security procedures, child safety seats -- or FAA user services including aeronautical charts, associated aeronautical information publications, pilot examinations, physicals, aircraft certification, FAA facility operations -- are encouraged to dial, toll-free (800) FAA-SURE direct to FAA Headquarters.

Consumers calling the FAA Consumer Hotline may expect a return call from an FAA official.

The Consumer Hotline operates from 8 a.m. to 4 p.m., Eastern Time, Monday through Friday, except Holidays. (In the District of Columbia, call (202) 426-9366.)

(FAA's Consumer Hotline is distinct from and supplements the FAA Safety Hotline introduced nationwide in July, 1985. The FAA toll-free Safety Hotline -- (300) 255-1111 -- is intended primarily for use by those having specific knowledge of alleged violations of the Federal Aviation Regulations. The identities of callers are held in confidence by FAA, protected from disclosure under the provisions of the Freedom of Information Act.)

SPECIAL TRAFFIC MANAGEMENT PROGRAM
CAPE COD AND ADJACENT ISLAND AREA AIRPORTS
MAY 15 THROUGH OCTOBER 30, 1986

In anticipation of the large number of aircraft operating to and from the Cape Cod and adjacent Island areas during the period May 15 through October 30, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****
CAPE COD AND ADJACENT ISLAND AREA

For the purpose of this Special Traffic Management Program, the Cape Cod and adjacent Island area includes the following airports:

Hyannis
Barnstable Municipal-Boardman/Polando Field - HYA
Nantucket Memorial Airport - ACK
Martha's Vineyard Airport - MVY

****VFR ENROUTE AND HOLDING****

Pilots are urged to become familiar with VFR holding and reporting points (SEE GRAPHIC).

Arriving aircraft are encouraged to monitor ATIS, where available, and then contact the appropriate tower when 10-15 miles from the airport. Advise receipt of ATIS information on initial contact. Aircraft landing Martha's Vineyard are requested to monitor tower frequency far enough out to obtain and advise the tower on initial contact, "HAVE NUMBERS".

Aircraft enroute Hyannis Airport from Sagamore Bridge, Martha's Vineyard and Cotuit areas should exercise caution due to high density military traffic on IFR approach to runway 23, Otis Air National Guard Base.

Arrival Points	Arrival Direction	Holding Direction
HYANNIS AIRPORT		
Sandy Neck	North	North
Dennis Drive In	Northeast	Northeast
Sagamore Bridge	Northwest	Northwest
Cotuit	West	Southwest
Dennisport	East	Southeast
MARTHA'S VINEYARD AIRPORT		
Woods Hole	North	Northwest
Oak Bluffs	Northeast	East
Bounre Bridge	North	West
Cuttyhunk Island	West	Southwest
Katama Airpark	Southeast	South
NANTUCKET AIRPORT		
Great Point	North	East
Tuckernuck Island	West	Southwest

****IFR ARRIVAL/DEPATRTURE****

Otis Terminal Radar Approach Control (TRACON) may assign a Control Departure Time (CDT) for IFR flights arriving or departing Hyannis, Nantucket or Martha's Vineyard Airports, whenever marginal VFR or IFR weather conditions exist.

Implementation of this part of the Special Traffic Management Program will be by special notice to flight service stations and area airport traffic control towers. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions pilots are encouraged to contact the tower or flight service station, prior to engine start up, to obtain latest information.

To insure the success of this Special Traffic Management Program, aircraft departing Hyannis, New Bedford, Nantucket and Martha's Vineyard Airports are urged to depart within plus or minus 5 minutes of CDT. Departures from other airports should depart within 15 minutes before and not later than 5 minutes after CDT.

****FLIGHT PLANS****

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans may experience extensive delays awaiting integration into the IFR system while this program is in effect.

Commercial operators are requested to file flight plans for extra flight sections no less than 1 hour prior to proposed time of departure.

Pilots are encouraged to cancel VFR flight plans with Bridgeport Flight Service Station by radio. Transmit 122.1 mHz receive on appropriate VOR frequency. If unable to cancel by radio, contact appropriate flight service station by telephone.

Bridgeport FSS (MA & RI)	800-242-2377
(CT)	800-972-2271

INDIANAPOLIS 500 MILE RACE

SPECIAL TRAFFIC MANAGEMENT PROCEDURES

INDIANAPOLIS, INDIANA

MAY 23 THROUGH 26, 1986

In anticipation of the large number of aircraft operating to and from the Indianapolis, area during the Indianapolis 500, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily May 23-24, 1300-2359 UTC (0800-1859 EST) and May 25, 1100-1559 UTC (0600-1059 EST). Indianapolis Center will assign a Controlled Departure time (CDT) for unscheduled IFR flights arriving the Indianapolis, Indiana area. CDT's will be assigned to departing IFR flights May 25, 2100-0359 UTC May 26 (1600-2259 EST, May 25) and May 26, 1200-1859 UTC (0700-1359 EST).

Beginning May 20, 1300-0400 UTC (0800-2300 EST) daily, CDT's can be obtained from Indianapolis Center by calling (800) 322-5532. In Indiana (800) 922-4845, or any Flight Service Station.

****OVERFLIGHTS****

Aircraft not landing in the Indianapolis area are requested to avoid overflight below 10,000 feet MSL within a 20 nautical mile radius of Indianapolis International Airport.

****INDIANAPOLIS AREA****

For the purpose of this Special Traffic Management Program, the Indianapolis area includes the following airports:

Indianapolis International Airport - IND

Eagle Creek Airpark Airport - I14

Speedway Airport - 3SY

Skyway Airport - 5I1

****FLIGHT PLANS****

Pilots are urged to file VFR and IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station. Include date and CDT in remarks section of IFR flight plans filed with a flight service station.

Due to anticipated frequency congestion, Indianapolis Center and Approach Control, except for emergency situations, will not accept air filed flight plans to/from the Indianapolis Area while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

****VFR ARRIVALS****

Indianapolis Terminal Radar Service Area (TRSA)
Stage III Radar Service

May 25, 1100-1559 UTC (0600-1059 EST)

Airports within the Indianapolis TRSA: Pilot participation in Stage III radar service is recommended and will be provided to aircraft landing at airports within the Indianapolis TRSA. Radar sequencing will be provided to all aircraft landing at Indianapolis International. Contact Indianapolis VFR Arrival control on 124.65 mHz (220-070°) or 127.15 mHz (070-220°) prior to reaching an outer VFR entry point (SEE GRAPHIC).

Aircraft are requested to hold at an outer VFR entry point until advised by Indianapolis VFR Arrival Control to proceed to an inner check point. Aircraft will be cleared to depart VFR entry points on a first come, first serve basis.

After receiving clearance to an inner VFR check point, pilots should proceed at 3,000 feet MSL, VFR (weather permitting) and remain on the Indianapolis VFR Arrival Control frequency.

All aircraft will be provided Stage III radar service inbound unless specifically declined. Temporary frequencies will be used. Pilots should be alert to radio frequency assignments.

SET TRANSPONDER CODE TO 1200 AND SQUAWK ALTITUDE.

Pilots are encouraged to utilize one of the other Indianapolis area airports due to parking congestion at Indianapolis International Airport.

****IFR/VFR DEPARTURES****

May 25, 2100 through 0259 UTC May 26 (1600-2259 EST, May 25)

Indianapolis International Airport:

Stage III radar service is recommended and will be provided unless specifically declined. Before starting engines, monitor Indianapolis International Airport ATIS 125.35 mHz for departure information.

DO NOT TAXI FOR TAKEOFF UNTIL, taxi instructions and if appropriate IFR clearance are received. For Stage III radar, contact Clearance Delivery on 123.95 mHz and advise: aircraft identification, type aircraft, if transponder equipped, direction of flight and/or destination and initial cursing altitude. For IFR clearance contact Clearance Delivery on 128.75 mHz.

DO NOT CALL THE TOWER FOR TAKEOFF UNTIL in the number 1 position to take the active runway.

****RESTRICTED AREA ADVISORY****

Pilots should be aware of the existence of Restricted Area (R 3401A/B) to the southeast of Indianapolis VOR and plan their flight accordingly. These areas are intermittently activated by NOTAM. Pilots are cautioned that penetration of Restricted Areas without authorization from the using or controlling agency may be extremely hazardous.

****WAKE TURBULENCE****

Pilots should be aware that a significant amount of wake turbulence may exist due to the large number of heavy jet aircraft operating in the Indianapolis area. Pilots are urged to exercise caution when operating within 30 miles of Indianapolis.

PILOTS ARE URGED TO OBTAIN A COMPLETE WEATHER BRIEFING AND REVIEW ALL APPLICABLE NOTAMS PRIOR TO CONDUCTING FLIGHTS.

VFR Arrivals
Indianapolis Intl. – Indianapolis, In.
Field Elev. 797' MSL
Monitor ATIS 125.35 MHZ

VFR aircraft landing at reliever airports and not desiring to participate in Stage III Service, may do so without contacting Indianapolis Approach or VFR Control. It is recommended they remain clear of the Indianapolis TRSA. (VFR below 2,000ft within a 15NM radius and outside the Indianapolis Control Zone.)

WATSONVILLE ANTIQUE FLY-IN
WATSONVILLE MUNICIPAL AIRPORT
WATSONVILLE, CALIFORNIA

MAY 23 THRU 26, 1986

In anticipation of the large number of aircraft traveling to and from Watsonville, the following procedures will be used to enhance safety and minimize air traffic delays.

NOTE: All times are Pacific Daylight Time (PDT).

TEMPORARY AIR TRAFFIC CONTROL TOWER

A Temporary Tower will be in effect at the Watsonville Airport during the following times:

MAY 23 FRIDAY	10AM - 6PM
MAY 24 SATURDAY	8AM - 6PM
MAY 25 SUNDAY	8AM - 6PM
MAY 26 MONDAY	8AM - 2PM

INBOUND PILOTS monitor the Salinas VOR, frequency 117.3, for arrival information, during the above times.

TOWER Frequency: 126.4

GROUND Frequency: 121.05

AIRPORT CLOSURE AND RESTRICTIONS

MAY 24 and 25 (Saturday and Sunday)
11AM - 12 NOON Arrivals ONLY
12 NOON - 4PM AIRPORT CLOSED
4PM - 5PM Departures ONLY

CAUTION ADVISORY

Caution advised in the vicinity of the Watsonville Airport for numerous aircraft, including many non-radio aircraft.

MAY 24 and 25 (Saturday and Sunday) 12 NOON to 4PM CAUTION ADVISED for ACROBATIC FLIGHT and PARACHUTE JUMPING within a 2 nautical mile radius of the Watsonville Airport from the Surface to 6,000 feet MSL.

TEMPORARY FLIGHT SERVICE STATION

The Oakland FSS will provide facilities on the Watsonville Airport, Friday afternoon May 23 and Saturday and Sunday, May 24 and 25 for CLOSING and FILING VFR Flight Plans ONLY. (Weather information will NOT be available. For weather and IFR flight Plans contact Oakland FSS - phone (800) 345-4546.)

SPECIAL USE AIRSPACE

SPECIAL USE AIRSPACE
(Military Operations Area)

Effective June 17-21, 1986

Falls 2 Temporary MOA, WI [New]

Boundaries. Beginning at lat. 44°44'00"N., long. 91°05'00"W.;
to lat. 44°48'00"N., long. 90°59'00"W.;
to lat. 44°48'00"N., long. 90°22'00"W.;
to lat. 44°35'00"N., long. 90°18'00"W.;
to lat. 44°27'00"N., long. 89°59'00"W.;
to lat. 44°27'45"N., long. 90°27'54"W.;
to lat. 44°36'30"N., long. 90°31'30"W.;
thence to the point of beginning.

Altitudes. 500 feet AGL up to and including 8,500 feet above mean sea level. The airspace 1,500 feet AGL and below within a 3 nautical mile radius of the Neillsville Airport is excluded from the MOA.

Times of use. June 17, 1986, 0900-1100 (local time) and 1300-1500 (local time). On June 18-21, 1986, 0830-1630 (local time).

Controlling agency. FAA, Minneapolis ARTCC.

Using agency. Volk Field, Camp Douglas, WI

NOTICE TO AIRMEN

MERCED ANNUAL ANTIQUE FLY-IN
JUNE 6, 7, and 8, 1986

AIR TRAFFIC/AIRPORT INFORMATION, MERCED TERMINAL AREA. The Annual Merced Antique Fly-in (June 6,7, & 8, 1986) will generate a large volume of air traffic, with peak arrival traffic occurring Friday afternoon and Saturday morning. The heaviest arrival period is expected to be between 1000 and 1200 on Saturday morning. Peak departure periods will be immediately following the air show on Saturday and Sunday.

To accommodate the expected heavy departure demand, arrivals to the Merced Airport will not be permitted for the first one and one/half (1 1/2) hours following the Saturday airshow.

ARSA INFORMATION. ARSA SERVICES WILL BE SUSPENDED DURING THE FOLLOWING TIME PERIODS:

FRIDAY	JUNE 6	1200 PDT to 2000 PDT
SATURDAY	JUNE 7	0700 PDT to 2000 PDT
SUNDAY	JUNE 8	0700 PDT to 1600 PDT

MERCED TOWER HOURS OF OPERATION DURING FLY-IN

JUNE 6, 7, and 8	0700 PDT until 2000 PDT

ARRIVAL PROCEDURES. All arriving aircraft should listen to ATIS on Merced VOR frequency 114.2 MHz prior to entering the airport traffic area. All traffic should make a normal entry from the west to the left downwind leg for Runway 30 or the right downwind leg for runway 12, whichever is in use. Aircraft should sequence themselves when entering downwind and listen to the tower on frequency 121.0 MHz. Do not initiate contact with Merced Tower until on final approach. If the preceding aircraft is landing on the left side of the runway, plan to land on the right side, and vice-versa. After landing, taxi off the runway as soon as possible due to aircraft landing behind you.. Make sure the runway is clear before crossing over to the other side as you clear. Follow instructions of ground personnel for parking.

IFR arrivals can expect lengthy delays.

DEPARTURES. Immediately following the airshow on Saturday, the field will be open only for departures for the first 1 1/2 hours. The exact time periods will be included in a local NOTAM. All takeoffs must be made from the end of the runway. WATCH FOR FLAGMAN. Do not call the tower for clearance. Departures on left side of runway 30, make left turn out. Departures on right side of runway 30, make straight out or right downwind departure. Right turn outs - remain within 1 mile of runway on downwind. IFR departures can expect lengthy delays. While taxiing out, monitor ground frequency 121.8 MHZ. Change to tower frequency 121.0 MHZ prior to taking the runway.

FLY BY'S. All pilots must be briefed in advance on procedures for fly-by's at Merced, by the Fly-By Committee. All fly-by's should be made at least 500' west of the runway.

FLIGHT PLAN AND WEATHER SERVICES. VFR aircraft are requested to cancel flight plans with Fresno Flight Service Station when approaching the Merced Airport or immediately after landing. Use 122.1 MHZ and receive on MCE VOR FQCY 114.2 MHZ. If on the ground, flight plans may be closed, filed, or weather briefings received from Fresno FSS by dialing local telephone number 722-2691.

SAFETY BULLETIN. All participating pilots should be ALERT, CAUTIOUS, and OBSERVANT to all aspects of safe operation. The following items are emphasized for safety:

1. Sequence yourself when entering downwind. Remember: many aircraft may not have two-way radio capability; there will be numerous aircraft types and airspeeds from the slower home-builts to the larger and faster WAR BIRDS.

2. After landing, taxi off the runway as soon as possible and follow the signals and directions of the Parking Officials.

3. Remember, many spectators may not realize the fatal power of an invisible prop. DO NOT OPERATE ENGINE in display parking areas. Follow the instructions provided by the Parking Officials.

4. If you do not have a radio, follow the traffic pattern and watch for light signals from the tower.

FIELD CLOSURE PERIODS. The airport will be closed for an air show on Saturday and Sunday afternoons. The exact closure times will be issued via NOTAM.

Immediately following the airshow on Saturday, the field will be CLOSED TO ARRIVALS AND OPEN ONLY FOR DEPARTURES for the first 1 1/2 hours.

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

a. GENERAL

b. AIRWAYS

c. FLIGHT RESTRICTIONS

d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.

GENERAL

FDC 6/1197 OMEGA STATION C HAWAII WILL BE OFF AIR FOR ANNUAL MAINTENANCE FROM 021800 TO 131200 GMT JUNE 1986.

FDC 6/1087 FDC THE FEDERAL AVIATION ADMINISTRATION HAS PARTICIPATED IN GOVERNMENT ACTIVITIES TO ASSESS AVIATION PROBLEMS WHICH MIGHT OCCUR AS A RESULT OF THE SOVIET NUCLEAR ACCIDENT. NONE OF THE DATA WE HAVE SEEN PROVIDES ANY CONCERN FOR ANY FLIGHTS OF ANY U.S. CARRIERS ANYWHERE IN THE WORLD. THE ONLY AREA WE WOULD BE POTENTIALLY CONCERNED ABOUT IS FLIGHT IN THE VICINITY OF THE REACTOR SITE NEAR KIEV AT ALTITUDES BELOW 20,000 FEET. FLIGHT ABOVE 20,000 FEET AT THIS LOCATION NEAR KIEV OR OTHER FLIGHTS AT ANY ALTITUDE ANYWHERE IN THE WORLD IS NOT EXPECTED 13 PRESENT ANY PUBLIC HEALTH OR SAFETY PROBLEMS DUE TO RADIATION CONTAMINATION WHICH MIGHT EXIST AS A RESULT OF THE ACCIDENT. THERE IS NO REASON FOR SPECIAL FLIGHT PRECAUTIONS. NO FURTHER NOTIFICATIONS ON THIS SUBJECT ARE PLANNED.

FDC 6/995 U.S. CUSTOMS REGULATORY CHANGES. AIRCRAFT PENETRATING THE INNER ADIZ FM ANYWHERE IN THE WESTERN HEMISPHERE SOUTH OF THE U.S. MEXICAN BORDER, SOUTH OF 33 DEG NORTH LATITUDE ON THE PACIFIC COAST, SOUTH OF 30 DEGREES NORTH LATITUDE ON THE ATLANTIC COAST, OR SOUTH OF THE INNER ADIZ ON THE GULF COAST, MUST PROVIDE U.S. CUSTOMS AT LEAST ON EHOUR ADVANCE NOTICE OF PENETRATION OF U.S. AIRSPACE. EFFECTIVE APRIL 30, THIS REQUIREMENT WILL BE EXTENDED TO AIRCRAFT THAT HAVE NOT LANDED IN A FOREIGN PLACE AND AIRCRAFT FROM PUERTO RICO THAT ARE NOT FLYING UNDER IFR FLIGHT RULES. FILING A FLIGHT PLAN WITH THE NOTATION "ADCUS" WITH THE U.S. FAA AT LEAST ONE HOUR IN ADVANCE OF PENETRATION OF THE ADIZ WILL SATISFY THIS REQUIREMENT. CONTRACTING U.S. CUSTOMS AT 305-536-6591, MIAMI, FL, OR 714-351-6674, RIVERSIDE, CA, AT LEAST ONE HOUR IN ADVANCE WILL ALSO MEET THE REQUIREMENT. LANDING AND INSPECTION REQUIREMENTS FOR AIRCRAFT ARRIVING FROM FOREIGN PLACES REMAIN UNCHANGED.

FDC 6/321 FI/P CORRECT U.S. GOVT HAWAIIAN ISLAND SECTIONAL CHART 33RD EDITION DTD 21 NOV 85. CHANGE HONOLULU VORTAC /HNL/FREQ 115.3 CHANNEL 100 TO FREQ 114.8 CHANNEL 095X.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 18TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2506 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM. /AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS. 617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7806/CHICAGO 312-203-2575 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FLIGHT RESTRICTIONS

ONLY NOTICES OF SIGNIFICANT DURATION ARE LISTED. (7/85)

| FDC 6/1238 FLIGHT RESTRICTIONS - THE STATUE OF LIBERTY CENTENNIAL CELEBRATION JULY 2 THROUGH JULY 7, 1986. PURSUANT TO SECTIONS 91.104 AND 91.91 (A) (3) OF THE FEDERAL AVIATION REGULATIONS (FAR) FLIGHT IS RESTRICTED. UNLESS OTHERWISE AUTHORIZED BY ATC. IN THE AREA AND DURING THE PERIOD DESCRIBED BELOW TO PROVIDE CONTROLLED ENTRY OF THE AIRSPACE AND PREVENT UNSAFE CONGESTION OF SIGHT SEEING AIRCRAFT. OVER THE STATUE OF LIBERTY CENTENNIAL CELEBRATION. THE AFFECTED AREA: BEGINNING AT THE KENNEDY (JFK) VORTAC 257 DEGREE RADIAL. EIGHT-MILE DME. THENCE CLOCKWISE VIA THE EIGHT-MILE DME ARC TO THE SIX-MILE DME ARC OF THE LAGUARDIA (LGA) VOR; THENCE CLOCKWISE VIA THE SIX-MILE DME ARC TO THE EASTERN SHORELINE OF THE HUDSON RIVER; THENCE NORTHEAST VIA THE SHORELINE TO THE GEORGE WASHINGTON BRIDGE; THENCE WESTWARD VIA THE GEORGE WASHINGTON BRIDGE TO WESTERN SHORELINE OF THE HUDSON RIVER; THENCE DIRECT TO THE JFK VORTAC 318 DEGREE RADIAL, SIXTEEN-MILE DME; THENCE DIRECT TO THE INTERSECTION OF THE JFK 304 DEGREE RADIAL AND THE FOUR-MILE RADIUS ARC OF THE NEWARK AIRPORT; THENCE CLOCKWISE VIA THE FOUR-MILE RADIUS ARC TO THE JFK 280 DEGREE RADIAL; THENCE DIRECT TO THE INTERSECTION OF THE COLTS NECK VORTAC (COL) 360 DEGREE RADIAL AND THE TEN-MILE RADIUS ARC OF THE NEWARK AIRPORT; THENCE COUNTERCLOCKWISE VIA THE TEN-MILE RADIUS ARC TO THE COL 017 DEGREE RADIAL; THENCE VIA THE COL 017 DEGREE RADIAL TO THE NORTHERN SHORELINE OF THE STATE OF NEW JERSEY; THENCE EASTWARD VIA THE SHORELINE TO THE

FLIGHT RESTRICTIONS

INTERSECTION OF ROUTE 36 AND THE GATEWAY NATIONAL PARK; THENCE DIRECT TO JFK 257 DEGREE RADIAL EIGHT-MILE DME. THE EFFECTIVE PERIOD: JULY 3, 0800 LCL TIME, UNTIL 1200 LCL TIME ON JULY 7, 1986. THE AFFECTED ALTITUDES: WITHIN THE AFFECTED AREA FROM THE SURFACE TO THE FLOOR OF THE NEW YORK TCA. THE RESTRICTIONS: 1) ONLY THOSE OPERATIONS THAT WOULD OTHERWISE BE PERMITTED UNDER SECTION 91.91 (D) WILL BE CONSIDERED FOR ATCT AUTHORIZATION TO OPERATE IN THE AFFECTED AREA. FURTHER, ALL OPERATIONS PLANNED UNDER VFR MUST HAVE BEEN PRE-SCREENED BY THE APPROPRIATE SECURITY AGENCY BEFORE ATC WILL GRANT AUTHORIZATION. HOWEVER, THERE WILL BE SOME PERIODS DURING CERTAIN EVENTS ASSOCIATED WITH THE CENTENNIAL CELEBRATION WHEN NO FLIGHTS WILL BE PERMITTED. 2) REQUESTS FOR PRE-SCREENING MUST BE SENT TO: U.S. NAVAL INVESTIGATIVE SERVICE, 90 CHURCH STREET, ROOM 603, NEW YORK, NEW YORK 10007. TELEPHONE: 718-834-2777. 3) REQUESTS FOR PRE-SCREENING MUST CONTAIN THE FOLLOWING INFORMATION AND BE RECEIVED AT THE ABOVE ADDRESS BY JUNE 20, 1986 IN ORDER FOR CONSIDERATION TO BE GIVEN TO OPERATE IN THE AFFECTED AREA: ...AIRCRAFT REGISTRATION NUMBER.....AIRCRAFT TYPE AND EQUIPMENT.....AIRCRAFT COLOR.....PROPOSED TIME OF ENTRY AND EXIT.....NAME OF NEWS MEDIA OR ORGANIZATION FOR WHICH THE OPERATION IS BEING CONDUCTED.....SPECIFIC NAMES OF FLIGHT CREW MEMBERS AND PASSENGERS. 4) ALL AIRCRAFT OPERATIONS MUST BE CONDUCTED UNDER A FLIGHT PLAN. VFR FLIGHT PLANS MAY ONLY BE FILED WITH TETERBORO FLIGHT SERVICE STATION AND MAY ONLY BE FILED BETWEEN JUNE 28 AND JUNE 30, 1986. NO VFR FLIGHT PLANS FOR OPERATIONS IN THE AFFECTED AREA WILL BE ACCEPTED AFTER 1700 LCL, JUNE 30. 5) AIR TRAFFIC CONTROL (ATC) SEPARATION OR TRAFFIC ADVISORY SERVICES WILL NOT BE PROVIDED OUTSIDE THE NEW YORK TCA. RECEIPT OF AN AUTHORIZATION TO OPERATE IN THE AFFECTED AREA DOES NOT CONSTITUTE AUTHORIZATION TO ENTER THE NEW YORK TCA. 6) ALL PILOTS CONDUCTING OPERATIONS UNDER VFR IN THE AFFECTED AREA SHALL SQUAWK THE ASSIGNED TRANSPONDER CODE, MAINTAIN A LISTENING WATCH ON THE RADIO FREQUENCY ASSIGNED BY ATC, AND COMPLY WITH ANY ATC INSTRUCTION. RELATED AERONAUTICAL INFORMATION: LETTER TO AIRMEN NO. 86-01, ISSUED BY THE EASTERN REGION AIR TRAFFIC DIVISION, HAS BEEN REVISED WITH SUPPLEMENTAL INFORMATION REFLECTING THIS NOTAM.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

* Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

* Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

* Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective April 10, 1986.

- Beale Air Force Base, CA
- Birmingham Municipal Airport, AL
- Burlington International Airport, VT
- Castle Air Force Base, CA
- Charlotte/Douglas International Airport, NC
- Columbus Metropolitan Airport, GA
- Mather Air Force Base. CA
- McClellan Air Force Base, CA
- Nashville Metropolitan Airport, TN
- Sacramento Metropolitan Airport, CA

ARSA's have been designated at the following locations to be effective May 8, 1986.

- Adams Field, Little Rock, AR
- General Mitchell Field, Milwaukee, WI
- Greater Buffalo International Airport, NY
- Memphis International Airport, TN
- Michiana Regional Airport, South Bend, IN
- Salt Lake International Aitport, UT

ARSA's have been designated at the following locations to be effective June 5, 1986.

- Albuquerque International Airport, NM
- Greater Cincinnati International Airport, KY
- Indianapolis International Airport, IN
- Phoenix Sky Harbor International Airport. AZ
- Tucson International Airport, AZ
- Davis-Monthan Air Force Base, AZ
- Wichita Mid-Continent Airport, KS

KALAMAZOO INTERNATIONAL AIRSHOW
SPECIAL TRAFFIC MANAGEMENT PROCEDURES
KALAMAZOO, MICHIGAN; JUNE 14 THROUGH 15, 1986

In anticipation of a large number of aircraft operating to/from Kalamazoo County Airport on June 14 and 15, 1986, special traffic management procedures will be used to enhance safety and minimize delays. Pilots are advised of the increased volume of VFR traffic operating in the vicinity of the Kalamazoo airport and designated VFR holding/reporting points (see graphic). Pilots may expect arrival/departures delays.

NOTAMS

Kalamazoo TRSA may not be in effect, and STAGE III service may not be available June 14, and 15, 1986 between 1000 UCT (0600 EDT) and 0300 UCT (2300 EDT).

Kalamazoo Airport will be closed June 14 and 15, 1986 between 1545 UCT (1145 EDT) and 2130 UCT (1730 EDT). Airshow in progress from the surface to 15,000 feet AGL within a 5 NM radius. Aircraft should remain clear of the airspace during this period.

ATIS

Arriving/departing aircraft are encouraged to obtain the ATIS 127.25 mhz. prior to contacting Kalamazoo Approach Control/Ground Control.

VFR ARRIVALS/HOLDING

Contact Kalamazoo Approach Control on 121.2 mhz approaching one of the depicted VFR reporting points or at least 20 miles from the airport.

Pilots will be issued a transponder code, directed to a VFR holding point,(see graphic), and instructed to change to and monitor another frequency for arrival sequencing. Pilots of non-transponder equipped aircraft will be routed to Paw Paw for VFR holding and arrival sequencing.

Pilots can expect routing via U.S.131 until reaching I-94 and then turn east along I-94, pass over and across the airport and enter downwind for the active runway on the east side of the airport. When requested to proceed direct to the airport, pilots are expected to maintain at least 2000 MSL (weather permitting). Pilots will be instructed to change and monitor the tower frequency 118.3 mhz for landing clearance.

Pilots are requested to exit the runway at the first available intersection speed permitting after landing. After clearing the runway, observe flagmen directions and not contact Ground Control unless specifically requested to do so by the Tower.

CLOSING VFR FLIGHT PLANS
Pilots are urged to close their flight plans with South Bend FSS via radio by transmitting on 122.2 mhz and receiving on the appropriate VOR. If unable to close your flight plan via radio, contact the South Bend FSS via telephone 343-2608.

DEPARTURES
No taxiing will be permitted prior to the re-opening of the airport at 1730 EDT. All aircraft will be expected to depart runway 17/35 from the intersection of runway 9/27 unless full length is specifically requested. VFR aircraft that do not require the full length are to follow the flagmen directions and are not to contact Ground Control or Tower.

VFR aircraft requesting full runway length are to contact Ground Control 121.9 mhz for taxi instructions.

IFR clearances may be requested from Clearance Delivery 121.75 mhz up to thirty minutes prior to departure. Gate hold procedures will be in effect and expect departure clearance times (EDCT) will be issued. Pilots should obtain their clearance and (EDCT) prior to engine start.

IFR aircraft contact Ground Control 121.9 mhz for taxi instructions.

TERMINAL AREA GRAPHIC NOTICE
(NOT TO BE USED FOR NAVIGATION)

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

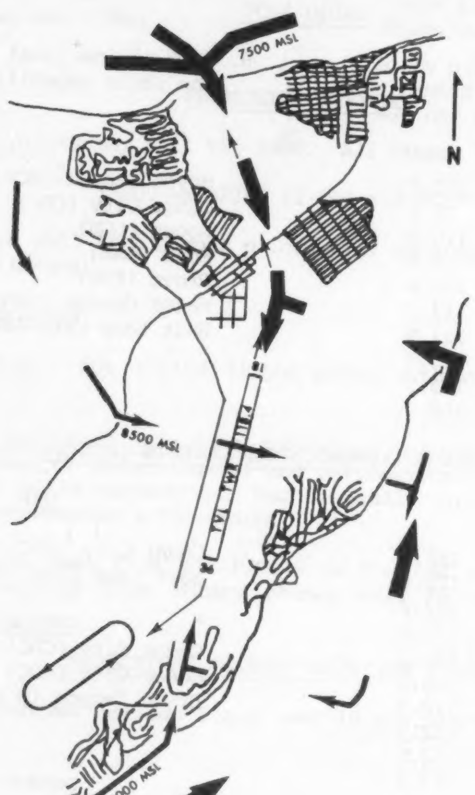
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



CEDAR CITY, UTAH, AUTOMATED FLIGHT SERVICE STATION

The Cedar City, Utah, Automated Flight Service Station (AFSS) will commission on June 5, 1986. All services now provided by the Cedar City Flight Service Station (FSS) will be transferred to the AFSS at that time. On that same day, the AFSS will also assume control of most of the enroute flight advisory servcice (EFAS) outlets now remoted to Salt Lake Flight Service Station. The remaining EFAS, remote communications outlet (RCO), and very-high omni (VOR) voice frequencies now controlled by SLC FSS will be gradually transferred to the Cedar City AFSS between June 5 and July 1, 1986. During the month of July, preflight and all remaining Salt Lake FSS functions will be transferred to Cedar City AFSS, as well as all eastern Utah facilities now controlled by Grand Junction, Colorado, Flight Service Station.

AREA SERVED: The Cedar City AFSS's geographic area of responsibility is the state of Utah for all services except EFAS. The EFAS area of responsibility covers a six-state area (see below).

RADIO AIDS

A. Navigational aids with voice capability, (pilots transmit on 122.1 and receive on the VOR frequency.)

Bonneville (BVL)	112.3
Delta (DTA)	116.1
Fairfield (FFU)	116.6
Hanksville (HVE)	115.9
Lucin (LCU)	113.6
Milford (MLF)	112.1
Myton (MTU)	117.9
Ogden (OGD)	115.7
Price (PUC)	115.5
Vernal (VEL)	108.2

B. VOR navigational aids with no voice capability.

Bryce Canyon (BCE)	112.8
Cedar City (CDC)	108.6
Logan (LGU)	109.8
Moab (OAB)	109.8
Provo (PVU)	108.4
Saint George (OZN)	109.8
Salt Lake City (SLC)	116.8

REMOTE COMMUNICATION OUTLETS (RCO'S)

VHF

Bryce Canyon (BCE)	122.2
Bull Frog Basin (U07)	122.4
Cedar City (CDC)	122.2
Cedar City (CDC)	122.6
Delle (4DL)	122.2
Francis Peak	122.2
Moab (OAB)	122.3
Richfield (RIF)	122.5
Saint George (SGU)	122.5
Salt Lake City (SLC)	122.2

UHF

Cedar City (CDC)	255.4
Salt Lake City (SLC)	255.4

EMERGENCY

Cedar City (CDC)	121.5
Cedar City (CDC)	243.0
Bryce Canyon (BCE)	121.5

DIRECTION FINDER SERVICE

Direction Finder Service (DF) will be available through the CDC AFSS with equuipment located at Cedar City and Hanksville, Utah. Contact Cedar City Radio on one of the published frequencies for DF service in those areas.

ENROUTE FLIGHT ADVISORY SERVICE (EFAS) OUTLETS

CDC AFSS will have 25 EFAS outlets on frequency 122.0 covering a six state area. In addition there will be one high altitude outlet (Battle Mountain, NV) on frequency 134.825, with five more high altitude outlets planned. Current and forecast high altitude outlets are indicated with an asterisk:

Ashton, ID. (4AS)
Helena, MT. (HLN)
Rome, OR. (REO)
Malad City, ID. (MLD)
Cedar City, UT. (CDC)*
Butte, MT. (BTM)
Big Piney, WY. (BPI)
Delta, UT. (DTA)
Great Falls, MT. (GTF)*
Thermopolis, WY. (THP)
Sunnyside, UT. (4SS)
Judith Mountain, MT (LWT)
Tonapah, NV. (TPH)

Wilson Creek, NV. (ILC)
Bliss, ID. (GNG)
Missoula, MT. (9UM)
Billings, MT. (BIL)
Squaw Butte, ID. (4EM)*
Delle, UT. (4DL)
Glasgow, MT. (GGW)
Rock Springs, WY. (RKS)
Provo, UT. (PVU)
Kalispell, MT. (FCA)
Battle Mountain, NV. (BAM)*
Francis Peak, UT. (SLC)*
(high altitude only)
Miles City, MT. (MLS)*

PREFLIGHT BRIEFING

Local Cedar City pilots may call 586-3806. All others within Utah dial:

1-800-WX BRIEF (1-800-992-7433)

After calling this toll-free number pilots will receive prerecorded instructions to access the following:

1. Pilot Briefer

2. Fast File - for filing flight plans without talking to a briefer.

3. Pilots Automatic Telephone Answering Service (PATWAS) - PATWAS is a continuous recording of meterological and aeronautical information. The system has a capability of 24 recordings, but initially only three will be used to provide significant weather information.

Automatic access to Fast File and PATWAS is limited to those with touch tone phones. Those calling from rotary phones will be connected directly to a briefer.

TRANSCRIBED WEATHER BROADCAST (TWEB)

A TWEB will be broadcast between 5 a.m. and 10 p.m. local time on the following outlets:

a. OGD VORTAC
b. FFU VORTAC
c. CDC VOR

Pilots in the Salt Lake City area may also listen to the TWEB by dialing 364-5571.

EXPO '86

May 2, 1986, through October 13, 1986

In anticipation of a significant increase of aircraft activity to and from the Vancouver, British Columbia, Canada, area during the 1986 World Exposition, the following flight information is provided to enhance safety and minimize air traffic delays.

BELLINGHAM, WASHINGTON, AREA

The Bellingham area includes the following airports:

Bellingham International (BLI)
Blaine Municipal (WA09)
Lynden (WA33)

Bellingham International is a port of entry and customs services are available from 8 a.m. until 5 p.m., locally and at other times, upon 1 hours advance notice. U.S. Airmen departing Canadian airspace which intend to land and clear Customs at Bellingham International are reminded to annotate their Customs requests in the remarks section of their flight plan. The Customs office telephone number at Bellingham is (206) 734-5463 (local exchange). Responsibility for ensuring Customs notification rests with the pilot.

TEMPORARY FAA BELLINGHAM CONTROL TOWER

The control tower will be operated from 8 a.m. until 8 p.m., daily, from May 1, 1986, through October 25, 1986.

Bellingham frequencies:

Bellingham Tower - 124.9 MHz, 239.25 MHz
Bellingham Ground Control - 121.65 MHz

BELLINGHAM (BLI) AIRPORT TRAFFIC AREA

The Bellingham Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as that airspace within a 5 statute mile radius of the BLI airport up to, but not including, 3,000' AGL excluding that airspace known as the Abbotsford-Bellingham Flight Information area which lies north of the BLI airport. The Abbotsford-Bellingham Flight Information Area is delineated on aeronautical charts.

BELLINGHAM AIRPORT INFORMATION - GENERAL

The Port of Bellingham is the airport sponsor of the airport. The traffic pattern is 1,200' for fixed wing aircraft and 800' for helicopters. The sponsor has a local regulation which prohibits intersection departures at the airport. Abbotsford, British Columbia, Canada, tower provides limited traffic

information service on 119.4 MHz to VFR aircraft operating between 1,500' and 4,000' MSL in an area generally described as between the U.S./Canadian border and Ferndale, and between the shoreline and Highway 9.

VFR FLIGHT PLANS

All pilots are encouraged to file a flight plan. Arriving aircraft should close their flight plans by radio with Bellingham FSS, on 123.6 MHz or 122.3 MHz. If unable, pilots may call the Bellingham FSS at 734-6400 (local exchange) or 1-800-833-0310 upon arrival.

Canadian/U.S. rules require that all aircraft operating VFR must be on a VFR flight plan prior to crossing the Canadian/U.S. border. Airfiles are discouraged and pilots are requested to file their flight plans 1 hour in advance of proposed departure times.

Pilots departing the U.S. from the Bellingham area are reminded that significant differences exist between Canadian and U.S. rules and procedures. Canadian officials have requested all U.S. pilots be cognizant of the requirement that flight plans are mandatory while operating in Canadian airspace.

IFR TRAFFIC

Vancouver Area Control Center (ACC) is the controlling agency for IFR aircraft operating to/from the Bellingham International Airport. Due to the expected increase in the volume of traffic generated by Expo '86, some delays may be encountered for IFR arrival and departure traffic. The Vancouver ACC has requested that U.S. airmen not request VFR/IFR practice ILS Runway 16 approaches to the Bellingham International Airport during Expo '86.

IFR ARRIVALS BLI INTERNATIONAL

Be prepared to discontinue your approach based upon local traffic conditions and enter a VFR traffic pattern for landing sequence. Pilots arriving IFR are requested to be extremely vigilant as the instrument approaches serving the Bellingham International Airport enter an area of high traffic activity in the Abbotsford-Bellingham Flight Information area.

VFR FLIGHT

Aircraft landing in Vancouver, British Columbia, Canada, should be extremely alert while operating in the Vancouver Lower Mainland area. Numerous aerial demonstrations and other aviation related sport activities are planned for Expo '86. The majority of these events will take place in the Vancouver Harbour Central Zone. The following VFR egress/ingress routes are recommended for traffic operating to/from Canadian airspace:

Bellingham (BLI) to Abbotsford (YXX) northbound east of Lynden
Abbotsford (YXX) to Bellingham (BLI) southbound west of Lynden

BLI to Vancouver (YVR) via Interstate 5 (I-5) using right side separation east/west of the highway. Extreme caution should be taken in the vicinity of the Abbotsford Localizer.

U.S. Airmen desiring additional information on Canadian area airports, rules and regulations, and Custom services may request (in writing) an Air Tourist Information Guide which is available without charge from:

Transport Canada (EXPO Guide)
800 Burrard Street
P.O. Box 220
Vancouver, British Columbia, Canada V6Z2JB

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAM's ISSUED BY BOTH THE U.S. AND CANADA PRIOR TO CONDUCTING FLIGHT.

SPECIAL TRAFFIC MANAGEMENT PROGRAM
CAPE COD AND ADJACENT ISLAND AREA AIRPORTS
MAY 15 THROUGH OCTOBER 30, 1986

In anticipation of the large number of aircraft operating to and from the Cape Cod and adjacent Island areas during the period May 15 through October 30, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****
CAPE COD AND ADJACENT ISLAND AREA

For the purpose of this Special Traffic Management Program, the Cape Cod and adjacent Island area includes the following airports:

Hyannis
  Barnstable Municipal-Boardman/Polando Field - HYA
Nantucket Memorial Airport - ACK
Martha's Vineyard Airport - MVY

****VFR ENROUTE AND HOLDING****

Pilots are urged to become familiar with VFR holding and reporting points (SEE GRAPHIC).

Arriving aircraft are encouraged to monitor ATIS, where available, and then contact the appropriate tower when 10-15 miles from the airport. Advise receipt of ATIS information on initial contact. Aircraft landing Martha's Vineyard are requested to monitor tower frequency far enough out to obtain and advise the tower on initial contact, "HAVE NUMBERS".

Aircraft enroute Hyannis Airport from Sagamore Bridge, Martha's Vineyard and Cotuit areas should exercise caution due to high density military traffic on IFR approach to runway 23, Otis Air National Guard Base.

Arrival Points	Arrival Direction	Holding Direction
HYANNIS AIRPORT		
Sandy Neck	North	North
Dennis Drive In	Northeast	Northeast
Sagamore Bridge	Northwest	Northwest
Cotuit	West	Southwest
Dennisport	East	Southeast
MARTHA'S VINEYARD AIRPORT		
Woods Hole	North	Northwest
Oak Bluffs	Northeast	East
Bounre Bridge	North	West
Cuttyhunk Island	West	Southwest
Katama Airpark	Southeast	South
NANTUCKET AIRPORT		
Great Point	North	East
Tuckernuck Island	West	Southwest

****IFR ARRIVAL/DEPARTURE****

Otis Terminal Radar Approach Control (TRACON) may assign a Control Departure Time (CDT) for IFR flights arriving or departing Hyannis, Nantucket or Martha's Vineyard Airports, whenever marginal VFR or IFR weather conditions exist.

Implementation of this part of the Special Traffic Management Program will be by special notice to flight service stations and area airport traffic control towers. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions pilots are encouraged to contact the tower or flight service station, prior to engine start up, to obtain latest information.

To insure the success of this Special Traffic Management Program, aircraft departing Hyannis, New Bedford, Nantucket and Martha's Vineyard Airports are urged to depart within plus or minus 5 minutes of CDT. Departures from other airports should depart within 15 minutes before and not later than 5 minutes after CDT.

****FLIGHT PLANS****

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans may experience extensive delays awaiting integration into the IFR system while this program is in effect.

Commercial operators are requested to file flight plans for extra flight sections no less than 1 hour prior to proposed time of departure.

Pilots are encouraged to cancel VFR flight plans with Bridgeport Flight Service Station by radio. Transmit 122.1 mHz receive on appropriate VOR frequency. If unable to cancel by radio, contact appropriate flight service station by telephone.

NOTICE TO AIRMEN

MERCED ANNUAL ANTIQUE FLY-IN
JUNE 6, 7, and 8, 1986

AIR TRAFFIC/AIRPORT INFORMATION, MERCED TERMINAL AREA. The Annual Merced Antique Fly-in (June 6,7, & 8, 1986) will generate a large volume of air traffic, with peak arrival traffic occurring Friday afternoon and Saturday morning. The heaviest arrival period is expected to be between 1000 and 1200 on Saturday morning. Peak departure periods will be immediately following the air show on Saturday and Sunday.

To accommodate the expected heavy departure demand, arrivals to the Merced Airport will not be permitted for the first one and one/half (1 1/2) hours following the Saturday airshow.

ARSA INFORMATION. ARSA SERVICES WILL BE SUSPENDED DURING THE FOLLOWING TIME PERIODS:

FRIDAY	JUNE 6	1200 PDT to 2000 PDT
SATURDAY	JUNE 7	0700 PDT to 2000 PDT
SUNDAY	JUNE 8	0700 PDT to 1600 PDT

MERCED TOWER HOURS OF OPERATION DURING FLY-IN

JUNE 6, 7, and 8 0700 PDT until 2000 PDT

ARRIVAL PROCEDURES. All arriving aircraft should listen to ATIS on Merced VOR frequency 114.2 MHz prior to entering the airport traffic area. All traffic should make a normal entry from the west to the left downwind leg for Runway 30 or the right downwind leg for runway 12, whichever is in use. Aircraft should sequence themselves when entering downwind and listen to the tower on frequency 121.0 MHz. Do not initiate contact with Merced Tower until on final approach. If the preceding aircraft is landing on the left side of the runway, plan to land on the right side, and vice-versa. After landing, taxi off the runway as soon as possible due to aircraft landing behind you.. Make sure the runway is clear before crossing over to the other side as you clear. Follow instructions of ground personnel for parking.

IFR arrivals can expect lengthy delays.

DEPARTURES. Immediately following the airshow on Saturday, the field will be open only for departures for the first 1 1/2 hours. The exact time periods will be included in a local NOTAM. All takeoffs must be made from the end of the runway. WATCH FOR FLAGMAN. Do not call the tower for clearance. Departures on left side of runway 30, make left turn out. Departures on right side of runway 30, make straight out or right downwind departure. Right turn outs - remain within 1 mile of runway on downwind. IFR departures can expect lengthy delays. While taxiing out, monitor ground frequency 121.8 MHZ. Change to tower frequency 121.0 MHZ prior to taking the runway.

FLY BY'S. All pilots must be briefed in advance on procedures for fly-by's at Merced, by the Fly-By Committee. All fly-by's should be made at least 500' west of the runway.

FLIGHT PLAN AND WEATHER SERVICES. VFR aircraft are requested to cancel flight plans with Fresno Flight Service Station when approaching the Merced Airport or immediately after landing. Use 122.1 MHZ and receive on MCE VOR FQCY 114.2 MHZ. If on the ground, flight plans may be closed, filed, or weather briefings received from Fresno FSS by dialing local telephone number 722-2691.

SAFETY BULLETIN. All participating pilots should be ALERT, CAUTIOUS, and OBSERVANT to all aspects of safe operation. The following items are emphasized for safety:

1. Sequence yourself when entering downwind. Remember: many aircraft may not have two-way radio capability; there will be numerous aircraft types and airspeeds from the slower home-builts to the larger and faster WAR BIRDS.

2. After landing, taxi off the runway as soon as possible and follow the signals and directions of the Parking Officials.

3. Remember, many spectators may not realize the fatal power of an invisible prop. DO NOT OPERATE ENGINE in display parking areas. Follow the instructions provided by the Parking Officials.

4. If you do not have a radio, follow the traffic pattern and watch for light signals from the tower.

FIELD CLOSURE PERIODS. The airport will be closed for an air show on Saturday and Sunday afternoons. The exact closure times will be issued via NOTAM.

Immediately following the airshow on Saturday, the field will be CLOSED TO ARRIVALS AND OPEN ONLY FOR DEPARTURES for the first 1 1/2 hours.

GATEWAY ARCH, ST. LOUIS, MISSOURI
(STL VORTAC 143R/18NM)

During the period July 3 through July 6, 1986, caution be advised within a 3 NM radius of the Gateway Arch at altitudes 10,000 feet MSL and below. Aerial activities including skydiving, aerobatics, hot air balloons, blimps, military flybys, and fireworks will be conducted at various times, with July 4 scheduled to have the most activity. Aircraft operating to and from St. Louis Downtown-Parks Airport should avoid entering and exiting the airport traffic area in the Gateway Arch area. St. Louis Downtown-Parks Airport Traffic Control Tower will be in operation from 0700 through 2100 CDT daily and may be contacted on 120.9 MHz. At other times, flights below the St. Louis Terminal Control Area should contact St. Louis Approach Control on 126.7 MHz for the status of activities near the Gateway Arch.

REDDING AIR SHOW
REDDING MUNICIPAL AIRPORT
REDDING. CALIFORNIA

JUNE 14 THUR 15, 1986

IN ANTICIPATION OF THE LARGE NUMBER OF AIRCRAFT TRAVELING TO AND FROM REDDING, THE FOLLOWING PROCEDURES WILL BE USED TO ENHANCE SAFETY AND MINIMIZE AIR TRAFFICDELAYS.

NOTE: ALL TIMES ARE PACIFIC DAYLIGHT TIME (PDT).

AIRPORT CLOSURE AND RESTRICTIONS

JUNE 14 AND 15 (SATURDAY AND SUNDAY)
10AM - 4PM AIRPORT CLOSED

CAUTION ADVISORY

CAUTION ADVISED IN THE VICINITY OF THE REDDING AIRPORT FOR NUMEROUS AIRCRAFT, INCLUDE MANY NON-RADIO AIRCRAFT.

JUNE 15 (SUNDAY) 9:30 AM TO 10:30 AM AND 3:30 PM TO 4:30 PM CAUTION ADVISED FOR USAF THUNDERBIRDS PERFORMANCE WITHIN A 5 NAUTICAL MILE RADIUS OF THE REDDING AIRPORT FROM THE SURFACE TO 15,000 MSL.

FARGO-MOORHEAD AIRSHOW

JUNE 14-22, 1986

FARGO TOWER FREQUENCIES:

Fargo Ground Control	121.9
Fargo Tower	118.6
Fargo Approach East	120.4
Fargo Approach West	127.7
Fargo ATIS	124.5
Fargo VOR	116.2

All inbound aircraft monitor the Fargo ATIS on 124.5 MHz when not less than 35 miles from Fargo.

Complete flight services will be provided through the Grand Forks FSS on a 24 hour basis.

For Pilot Briefing or Flight Plans...
...701-293-0900 or 1-800-732-4247

AEROBATIC DEMONSTRATIONS

Aerobatic flight demonstrations will be conducted daily on June 14 and June 15 and June 19, 20, 21, & 22, 1986. The Air Show Operations Area is from the surface to 15,000 AGL within a 5 nautical mile radius of Fargo Hector Field and will be in effect during the following periods:

Saturday June 14, 1986	1200-1500 CDT
Sunday June 15, 1986	1200-1500 CDT
Thursday June 19, 1986	1400-1600 CDT
Friday June 20, 1986	1200-1600 CDT
Saturday June 21, 1986	1000-1600 CDT
Sunday June 22, 1986	1000-1600 CDT

Aircraft inbound to Fargo, except scheduled Air Carrier aircraft, which are not able to land prior to the above indicated air show times, will have to land at outlying airports or remain airborne, clear of the above described "Air Show Operation Area." Pilots on VFR flight plans are reminded to extend, cancel, or change their flight plan destination if unable to land at Fargo Hector Field due to airport being closed during the air shows.

MONITOR YOUR FUEL STATUS CLOSELY.

AIRPORT MANAGER SPECIAL NOTICE

Runways 03/21 will be closed to landing and takeoffs from 1200 CDT on Thursday June 19, 1986 until 1200 CDT on Monday June 23, 1986.

All light, single, and multi-engine aircraft may be required to exit runways, taxi, and park on grass areas of the airport. Hazard areas will be marked by cones and/or flags. Pilots are cautioned to be alert for, and remain clear of all marked areas. Pilots should exercise caution in operating aircraft on unimproved or grass areas due to rough ground and signs. Taxi operations on other than paved areas are at pilot's own risk. ALL MISHAPS, INCIDENTS OR ACCIDENTS SHOULD BE REPORTED TO AIRPORT MANAGEMENT IMMEDIATELY UPON ITS OCCURRENCE.

All aircraft pilots and operators are reminded that any incidents, accidents, or injuries arising out of the operation of any aircraft on Fargo Hector Field Airport are the responsibility of the aircraft owner or operator.

AIRPORT CLOSING

Fargo Hector Field is subject to being closed to arriving VFR aircraft on Saturday June 14 and Sunday June 15, Friday June 20, Saturday June 21, and Sunday June 22, 1986 due to non available transient parking. Aircraft based at Fargo and scheduled carrier activity will be accomodated on a priority basis after airport closing.

Limited overnight tie down space is available at the FBO's for a nominal charge. No camping will be permitted on airport property.

Pilots of large or heavy aircraft requiring hard surfaced parking area are required to make prior arrangments with the FBO's. Telephone: ...701-237-6882.

STUDENT PILOT TRAINING

No student training flights will be authorized at Fargo Hector Field June 14 and 15 and June 20, 21, and 22, 1986 during the Airshow period. This includes student solo cross country flights, touch and go landings, and practice instrument approaches.

FUEL REQUIREMENTS

FBO advised only cash, Texaco, American Express, PHH, Mid Continent, VISA, Master Charge, and Multi-Service will be accepted for fuel purchases. Jet A and 100LL octane fuel is available.

ALL NO-RADIO ARRIVALS AND DEPARTURES will be required to contact the Control Tower for prior approval. Call 701-235-8894.

Prepared by the National Ocean Survey
at the direction of the
FEDERAL AVIATION ADMINISTRATION

THE STATUE OF LIBERTY CENTENNIAL CELEBRATION

JULY 2 THROUGH JULY 7, 1986

PURSUANT TO SECTIONS 91.104 AND 91.91(A)(3) OF THE FEDERAL AVIATION REGULATIONS (FAR), FLIGHT IS RESTRICTED, UNLESS OTHERWISE AUTHORIZED BY ATC, IN THE AREA AND DURING THE PERIOD DESCRIBED BELOW TO PROVIDE CONTROLLED ENTRY OF THE AIRSPACE, AND PREVENT UNSAFE CONGESTION OF SIGHT SEEING AIRCRAFT, OVER THE STATUE OF LIBERTY CENTENNIAL CELEBRATION.

THE AFFECTED AREA:

BEGINNING AT THE KENNEDY (JFK) VORTAC 257 DEGREE RADIAL, EIGHT-MILE DME,
THENCE CLOCKWISE VIA THE EIGHT-MILE DME ARC TO THE SIX-MILE DME ARC OF THE LAGUARDIA (LGA) VOR;
THENCE CLOCKWISE VIA THE SIX-MILE DME ARC TO THE EASTERN SHORELINE OF THE HUDSON RIVER;
THENCE NORTHEAST VIA THE SHORELINE TO THE GEORGE WASHINGTON BRIDGE;
THENCE WESTWARD VIA THE GEORGE WASHINGTON BRIDGE TO THE WESTERN SHORELINE OF THE HUDSON RIVER;
THENCE DIRECT TO THE THE JFK VORTAC 318 DEGREE RADIAL, SIXTEEN-MILE DME;
THENCE DIRECT TO THE INTERSECTION OF THE JFK 304 DEGREE RADIAL AND THE FOUR-MILE RADIUS ARC OF THE NEWARK AIRPORT;
THENCE CLOCKWISE VIA THE FOUR-MILE RADIUS ARC TO THE JFK 280 DEGREE RADIAL;
THENCE DIRECT TO THE INTERSECTION OF THE COLTS NECK VORTAC (COL) 360 DEGREE RADIAL AND THE TEN-MILE RADIUS ARC OF THE NEWARK AIRPORT;
THENCE COUNTERCLOCKWISE VIA THE TEN-MILE RADIUS ARC TO THE COL 017 DEGREE RADIAL;
THENCE VIA THE COL 017 DEGREE RADIAL TO THE NORTHERN SHORELINE OF THE STATE OF NEW JERSEY;
THENCE EASTWARD VIA THE SHORELINE TO THE INTERSECTION OF ROUTE 36 AND THE GATEWAY NATIONAL PARK;
THENCE DIRECT TO JFK 257 DEGREE RADIAL, EIGHT-MILE DME.

THE EFFECTIVE PERIOD:

JULY 2, 0800 LOCAL TIME, UNTIL 1200 LOCAL TIME ON JULY 7, 1986.

THE AFFECTED ALTITUDES:

WITHIN THE AFFECTED AREA FROM THE SURFACE TO THE FLOOR OF THE NEW YORK TCA.

THE RESTRICTIONS:

1. ONLY THOSE OPERATIONS THAT WOULD OTHERWISE BE PERMITTED UNDER SECTION 91.91(D) WILL BE CONSIDERED FOR ATC AUTHORIZATION TO OPERATE IN THE AFFECTED AREA. FURTHER, ALL OPERATIONS PLANNED UNDER VFR MUST HAVE BEEN PRE-SCREENED BY THE APPROPRIATE SECURITY AGENCY BEFORE ATC WILL GRANT AUTHORIZATION. HOWEVER, THERE WILL BE SOME PERIODS DURING CERTAIN EVENTS ASSOCIATED WITH THE CENTENNIAL CELEBRATION WHEN NO FLIGHTS WILL BE PERMITTED.

2. REQUESTS FOR PRE-SCREENING MUST BE SENT TO:

U.S. NAVAL INVESTIGATIVE SERVICE
90 CHURCH STREET, ROOM 803
NEW YORK, NEW YORK 10007
TELEPHONE 718-834-2777

3. REQUESTS FOR PRE-SCREENING MUST CONTAIN THE FOLLOWING INFORMATION AND BE RECEIVED AT THE ABOVE ADDRESS BY JUNE 20, 1986 IN ORDER FOR CONSIDERATION TO BE GIVEN TO OPERATE IN THE AFFECTED AREA:

- AIRCRAFT REGISTRATION NUMBER.
- AIRCRAFT TYPE AND EQUIPMENT.
- AIRCRAFT COLOR.
- PROPOSED TIME OF ENTRY AND EXIT.
- NAME OF NEWS MEDIA OR ORGANIZATION FOR WHICH THE OPERATION IS BEING CONDUCTED.
- SPECIFIC NAMES OF FLIGHT CREW MEMBERS AND PASSENGERS.

4. ALL AIRCRAFT OPERATIONS MUST BE CONDUCTED UNDER A FLIGHT PLAN. VFR FLIGHT PLANS MAY ONLY BE FILED WITH TETERBORO FLIGHT SERVICE STATION, AND MAY ONLY BE FILED BETWEEN JUNE 26 AND JUNE 30, 1986. NO VFR FLIGHT PLANS FOR OPERATIONS IN THE AFFECTED AREA WILL BE ACCEPTED AFTER 1700 LOCAL, JUNE 30.

5. AIR TRAFFIC CONTROL (ATC) SEPARATION OR TRAFFIC ADVISORY SERVICES WILL NOT BE PROVIDED OUTSIDE THE NEW YORK TCA. RECEIPT OF AN AUTHORIZATION TO OPERATE IN THE AFFECTED AREA DOES NOT CONSTITUTE AUTHORIZATION TO ENTER THE NEW YORK TCA.

6. ALL PILOTS CONDUCTING OPERATIONS UNDER VFR IN THE AFFECTED AREA SHALL SQUAWK THE ASSIGNED TRANSPONDER CODE, MAINTAIN A LISTENING WATCH ON THE RADIO FREQUENCY ASSIGNED BY ATC, AND COMPLY WITH ANY ATC INSTRUCTION.

RELATED AERONAUTICAL INFORMATION:

LETTER TO AIRMEN NO. 86-01, ISSUED BY THE EASTERN REGION AIR TRAFFIC DIVISION, WILL BE REVISED WITH SUPPLEMENTAL INFORMATION REFLECTING THIS NOTAM.

Navigational Facilities	Commissionings (including Ident and Frequency), Decommissionings (including Ident and Frequency), Frequency Changes, Changes in Monitoring Facility and/or Status, Restrictions, Outages (with Effective Dates).
Air Traffic Control Towers, Approach Controls	Commissionings (including Frequencies), Hours of Operation, Decommissionings.
Flight Service Stations	Commissionings, Decommissionings, Hours of Operation; Commissionings, Decommissionings of RCO; Changes in Monitoring Status of RCO; Outages of RCO (with Effective Dates).
Weather	AWOS (System and Frequency).

For sale by the Superintendent of Documents, U.S. Government Printing Office Washington, D.C. 20402

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

a. GENERAL

b. AIRWAYS

c. FLIGHT RESTRICTIONS

d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator
FI/T	Flight information of a temporary nature
FI/P	Flight information of a permanent nature

GENERAL

| FDC 6/1300 OMEGA STATION /D/NORTH DAKOTA WILL BE OFF THE AIR FOR ANNUAL MAINTENANCE EFFECTIVE 07 JULY THRU 31 JULY 1200-2200 UTC DAILY.

FDC 6/1197 OMEGA STATION C HAWAII WILL BE OFF AIR FOR ANNUAL MAINTENANCE FROM 021800 TO 131200 GMT JUNE 1986.

FDC 6/1087 FDC THE FEDERAL AVIATION ADMINISTRATION HAS PARTICIPATED IN GOVERNMENT ACTIVITIES TO ASSESS AVIATION PROBLEMS WHICH MIGHT OCCUR AS A RESULT OF THE SOVIET NUCLEAR ACCIDENT. NONE OF THE DATA WE HAVE SEEN PROVIDES ANY CONCERN FOR ANY FLIGHTS OF ANY U.S. CARRIERS ANYWHERE IN THE WORLD. THE ONLY AREA WE WOULD BE POTENTIALLY CONCERNED ABOUT IS FLIGHT IN THE VICINITY OF THE REACTOR SITE NEAR KIEV AT ALTITUDES BELOW 20,000 FEET. FLIGHT ABOVE 20,000 FEET AT THIS LOCATION NEAR KIEV OR OTHER FLIGHTS AT ANY ALTITUDE ANYWHERE IN THE WORLD IS NOT EXPECTED TO PRESENT ANY PUBLIC HEALTH OR SAFETY PROBLEMS DUE TO RADIATION CONTAMINATION WHICH MIGHT EXIST AS A RESULT OF THE ACCIDENT. THERE IS NO REASON FOR SPECIAL FLIGHT PRECAUTIONS. NO FURTHER NOTIFICATIONS ON THIS SUBJECT ARE PLANNED.

FDC 6/995 U.S. CUSTOMS REGULATORY CHANGES. AIRCRAFT PENETRATING THE INNER ADIZ FM ANYWHERE IN THE WESTERN HEMISPHERE SOUTH OF THE U.S. MEXICAN BORDER, SOUTH OF 33 DEG NORTH LATITUDE ON THE PACIFIC COAST, SOUTH OF 30 DEGREES NORTH LATITUDE ON THE ATLANTIC COAST, OR SOUTH OF THE INNER ADIZ ON THE GULF COAST, MUST PROVIDE U.S. CUSTOMS AT LEAST ON EHOUR ADVANCE NOTICE OF PENETRATION OF U.S. AIRSPACE. EFFECTIVE APRIL 30, THIS REQUIREMENT WILL BE EXTENDED TO AIRCRAFT THAT HAVE NOT LANDED IN A FOREIGN PLACE AND AIRCRAFT FROM PUERTO RICO THAT ARE NOT FLYING UNDER IFR FLIGHT RULES. FILING A FLIGHT PLAN WITH THE NOTATION "ADCUS" WITH THE U.S. FAA AT LEAST ONE HOUR IN ADVANCE OF PENETRATION OF THE ADIZ WILL SATISFY THIS REQUIREMENT. CONTRACTING U.S. CUSTOMS AT 305-536-0591, MIAMI, FL, OR 714-351-6674, RIVERSIDE, CA, AT LEAST ONE HOUR IN ADVANCE WILL ALSO MEET THE REQUIREMENT. LANDING AND INSPECTION REQUIREMENTS FOR AIRCRAFT ARRIVING FROM FOREIGN PLACES REMAIN UNCHANGED.

FDC 6/321 FI/P CORRECT U.S. GOVT HAWAIIAN ISLAND SECTIONAL CHART 33RD EDITION DTD 21 NOV 85. CHANGE HONOLULU VORTAC /HNL/FREQ 115.3 CHANNEL 100 TO FREQ 114.8 CHANNEL 085X.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 16TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7808/CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/2193 FI/P MTR CORRECT IR-501 MILITARY TRAINING ROUTE/POINT AJ. CHANGE FAC/RAD/DIST POINT AJ TO GLD 354/35.

FDC 5/894 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED. NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

FLIGHT RESTRICTIONS

ONLY NOTICES OF SIGNIFICANT DURATION ARE LISTED. (7/85)

FDC 6/1238 FLIGHT RESTRICTIONS - THE STATUE OF LIBERTY CENTENNIAL CELEBRATION JULY 2 THROUGH JULY 7, 1986. PURSUANT TO SECTIONS 91.104 AND 91.91 (A) (3) OF THE FEDERAL AVIATION REGULATIONS (FAR) FLIGHT IS RESTRICTED UNLESS OTHERWISE AUTHORIZED BY ATC IN THE AREA AND DURING THE PERIOD DESCRIBED BELOW TO PROVIDE CONTROLLED ENTRY OF THE AIRSPACE

AND PREVENT UNSAFE CONGESTION OF SIGHT SEEING AIRCRAFT. OVER THE STATUE OF LIBERTY CENTENNIAL CELEBRATION. THE AFFECTED AREA: BEGINNING AT THE KENNEDY (JFK) VORTAC 257 DEGREE RADIAL, EIGHT-MILE DME; THENCE CLOCKWISE VIA THE EIGHT-MILE DME ARC TO THE SIX-MILE DME ARC OF THE LAGUARDIA (LGA) VOR; THENCE CLOCKWISE VIA THE SIX-MILE DME ARC TO THE EASTERN SHORELINE OF THE HUDSON RIVER; THENCE NORTHEAST VIA THE SHORELINE TO THE GEORGE WASHINGTON BRIDGE; THENCE WESTWARD VIA THE GEORGE WASHINGTON BRIDGE TO WESTERN SHORELINE OF THE HUDSON RIVER; THENCE DIRECT TO THE JFK VORTAC 318 DEGREE RADIAL, SIXTEEN-MILE DME; THENCE DIRECT TO THE INTERSECTION OF THE JFK 304 DEGREE RADIAL AND THE FOUR-MILE RADIUS ARC OF THE NEWARK AIRPORT; THENCE CLOCKWISE VIA THE FOUR-MILE RADIUS ARC TO THE JFK 280 DEGREE RADIAL; THENCE DIRECT TO THE INTERSECTION OF THE COLTS NECK VORTAC (COL) 360 DEGREE RADIAL AND THE TEN-MILE RADIUS ARC OF THE NEWARK AIRPORT; THENCE COUNTERCLOCKWISE VIA THE TEN-MILE RADIUS ARC TO THE COL 017 DEGREE RADIAL; THENCE VIA THE COL 017 DEGREE RADIAL TO THE NORTHERN SHORELINE OF THE STATE OF NEW JERSEY; THENCE EASTWARD VIA THE SHORELINE TO THE INTERSECTION OF ROUTE 36 AND THE GATEWAY NATIONAL PARK; THENCE DIRECT TO JFK 257 DEGREE RADIAL, EIGHT-MILE DME. THE EFFECTIVE PERIOD: JULY 2, 0800 LCL TIME, UNTIL 1200 LCL TIME ON JULY 7, 1986. THE AFFECTED ALTITUDES: WITHIN THE AFFECTED AREA FROM THE SURFACE TO THE FLOOR OF THE NEW YORK TCA. THE RESTRICTIONS: 1) ONLY THOSE OPERATIONS THAT WOULD OTHERWISE BE PERMITTED UNDER SECTION 91.91 (D) WILL BE CONSIDERED FOR ATCT AUTHORIZATION TO OPERATE IN THE AFFECTED AREA. FURTHER, ALL OPERATIONS PLANNED UNDER VFR MUST HAVE BEEN PRE-SCREENED BY THE APPROPRIATE SECURITY AGENCY BEFORE ATC WILL GRANT AUTHORIZATION. HOWEVER, THERE WILL BE SOME PERIODS DURING CERTAIN EVENTS ASSOCIATED WITH THE CENTENNIAL CELEBRATION WHEN NO FLIGHTS WILL BE PERMITTED. 2) REQUESTS FOR PRE-SCREENING MUST BE SENT TO: U.S. NAVAL INVESTIGATIVE SERVICE, 90 CHURCH STREET, ROOM 603, NEW YORK, NEW YORK, NEW YORK 10007. TELEPHONE: 718-834-2777. 3) REQUESTS FOR PRE-SCREENING MUST CONTAIN THE FOLLOWING INFORMATION AND BE RECEIVED AT THE ABOVE ADDRESS BY JUNE 20, 1986 IN ORDER FOR CONSIDERATION TO BE GIVEN TO OPERATE IN THE AFFECTED AREA:...AIRCRAFT REGISTRATION NUMBER.... AIRCRAFT TYPE AND EQUIPMENT....AIRCRAFT COLOR....PROPOSED TIME OF ENTRY AND EXIT....NAME OF NEWS MEDIA OR ORGANIZATION FOR WHICH THE OPERATION IS BEING CONDUCTED....SPECIFIC NAMES OF FLIGHT CREW MEMBERS AND PASSENGERS. 4) ALL AIRCRAFT OPERATIONS MUST BE CONDUCTED UNDER A FLIGHT PLAN. VFR FLIGHT PLANS MAY ONLY BE FILED WITH TETERBORO FLIGHT SERVICE STATION AND MAY ONLY BE FILED BETWEEN JUNE 26 AND JUNE 30, 1986. NO VFR FLIGHT PLANS FOR OPERATIONS IN THE AFFECTED AREA WILL BE ACCEPTED AFTER 1700 LCL, JUNE 30. 5) AIR TRAFFIC CONTROL (ATC) SEPARATION OR TRAFFIC ADVISORY SERVICES WILL NOT BE PROVIDED OUTSIDE THE NEW YORK TCA. RECEIPT OF AN AUTHORIZATION TO OPERATE IN THE AFFECTED AREA DOES NOT CONSTITUTE AUTHORIZATION TO ENTER THE NEW YORK TCA. ENTER THE NEW YORK TCA. 6) ALL PILOTS CONDUCTING OPERATIONS UNDER VFR IN THE AFFECTED AREA SHALL SQUAWK THE ASSIGNED TRANSPONDER CODE, MAINTAIN A LISTENING WATCH ON THE RADIO FREQUENCY ASSIGNED BY ATC, AND COMPLY WITH ANY ATC INSTRUCTION. RELATED AERONAUTICAL INFORMATION: LETTER TO AIRMEN NO. 86-01, ISSUED BY THE EASTERN REGION AIR TRAFFIC DIVISION, HAS BEEN REVISED WITH SUPPLEMENTAL INFORMATION REFLECTING THIS NOTAM.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

- Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

- Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

- Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective April 10, 1986.

- Beale Air Force Base, CA
- Birmingham Municipal Airport, AL
- Burlington International Airport, VT
- Castle Air Force Base, CA
- Charlotte/Douglas International Airport, NC
- Columbus Metropolitan Airport, GA
- Mather Air Force Base. CA
- McClellan Air Force Base, CA
- Nashville Metropolitan Airport, TN
- Sacramento Metropolitan Airport, CA

ARSA's have been designated at the following locations to be effective May 8, 1986.

- Adams Field, Little Rock, AR
- General Mitchell Field, Milwaukee, WI
- Greater Buffalo International Airport, NY
- Memphis International Airport, TN
- Michiana Regional Airport, South Bend, IN
- Salt Lake International Aitport, UT

ARSA's have been designated at the following locations to be effective June 5, 1986.

- Albuquerque International Airport, NM
- Greater Cincinnati International Airport, KY
- Indianapolis International Airport, IN
- Phoenix Sky Harbor International Airport. AZ
- Tucson International Airport, AZ
- Davis-Monthan Air Force Base, AZ
- Wichita Mid-Continent Airport, KS

SPECIAL USE AIRSPACE
(Military Operations Area)

Effective July 25-August 3, 1986

1. Gallant Eagle 86 Area A Temporary MOA, CA [New]

Boundaries. Beginning at lat. 34°40'30"N., long. 116°29'30"W.;
to lat. 34°36'00"N., long. 116°34'00"W.;
to lat. 34°14'00"N., long. 116°19'00"W.;
to lat. 34°14'00"N., long. 116°17'00"W.;
to lat. 34°30'00"N., long. 116°26'30"W.;
to lat. 34°36'00"N., long. 116°28'00"W.;
thence to point of beginning.

Altitudes. 1,000 feet AGL to, but not including, FL 180.

Times of Use. Continuous July 25-August 3, 1986.

Controlling Agency. FAA, Los Angeles ARTCC.

Using Agency. U.S. Air Force, USCENTAF Battlestaff (USCENTAF/DOJ)
Shaw AFB, SC

2. Gallant Eagle 86 Area B Temporary MOA, CA [New]

Boundaries. Beginning at lat. 34°14'00"N., long. 116°19'00"W.;
to lat. 34°14'00"N., long. 115°44'00"W.;
to lat. 34°08'00"N., long. 115°53'00"W.;
to lat. 34°03'00"N., long. 116°11'00"W.;
thence to the point of beginning.

Altitudes. 5,000 feet MSL to 11,000 feet MSL.

Times of Use. Continuous July 25-August 3, 1986.

Controlling Agency. FAA, Los Angeles ARTCC.

Using Agency. U.S. Air Force, USCENTAF Battlestaff (USCENTAF/DOJ)
Shaw AFB, SC

3. Gallant Eagle 86 Daggett Corridor Temporary MOA, CA [New]

Boundaries. Beginning at lat. 35°39'00"N., long. 115°53'00"W.;
to lat. 34°34'21"N., long. 115°53'00"W.;
to lat. 34°35'30"N., long. 115°58'00"W.;
to lat. 34°41'00"N., long. 116°03'00"W.;
to lat. 34°43'00"N., long. 116°17'00"W.;
to lat. 34°43'00"N., long. 116°26'20"W.;
to lat. 34°36'00"N., long. 116°34'00"W.;
to lat. 34°38'00"N., long. 116°35'30"W.;
to lat. 35°19'00"N., long. 116°18'30"W.;
thence to point of beginning.

Altitudes. 100 feet AGL to 7,500 feet MSL.

Times of Use. 0500 to 0200 local time, July 25-August 3, 1986.

Controlling Agency. FAA, Los Angeles ARTCC.

Using Agency. U.S. Air Force, USCENTAF Battlestaff (USCENTAF/DOJ)
Shaw AFB, SC

TERMINAL AREA GRAPHIC NOTICE
(NOT TO BE USED FOR NAVIGATION)

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

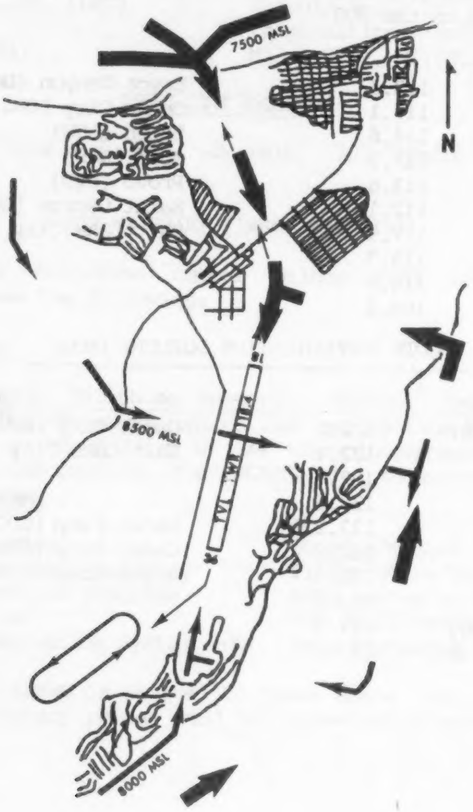
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



CEDAR CITY, UTAH, AUTOMATED FLIGHT SERVICE STATION

The Cedar City, Utah, Automated Flight Service Station (AFSS) will commission on June 5, 1986. All services now provided by the Cedar City Flight Service Station (FSS) will be transferred to the AFSS at that time. On that same day, the AFSS will also assume control of most of the enroute flight advisory service (EFAS) outlets now remoted to Salt Lake flight Service Station. The remaining EFAS, remote communications outlet (RCO), and very-high omni (VOR) voice frequencies now controlled by SLC FSS will be gradually transferred to Cedar City AFSS, as well as all eastern Utah facilities now controlled by Grand Junction, Colorado, Flight Service Station.

Area Served: The Cedar City AFSS's geographic area of responsibility is the state of Utah for all services except EFAS. The EFAS area of rsponsibility covers a six-state area (see below).

RADIO AIDS

A. Navigational aids with voice capability, (pilots transmit on 122.1 and receive on the VOR frequency.)

Bonneville (BVL)	112.3
Delta (DTA)	116.1
Fairfield (FFU)	116.6
Hanksville (HVE)	115.9
Lucin (LCU)	113.6
Milford (MLF)	112.1
Myton (MTU)	117.9
Ogden (OGD)	115.7
Price (PUC)	115.5
Vernal (VEL)	108.2

B. VOR navigational aids with no voice capability.

Bryce Canyon (BCE)	112.8
Cedar City (CDC)	108.6
Logan (LGU)	109.8
Moab (OAB)	109.8
Provo (PVU)	108.4

Saint George (SGU)	122.5
Salt Lake City (SLC)	122.2

UHF

Cedar City (CDC)	255.4
Salt Lake City (SLC)	255.4

EMERGENCY

Cedar City (CDC)	121.5
Cedar City (CDC)	243.0
Bryce Canyon (BCE)	121.5

ENROUTE FLIGHT ADVISORY SERVICE (EFAS) OUTLETS

CDC AFSS will have 25 EFAS outlets on frequency 122.0 covering a six state area. In addition there will be one high altitude outlet (Battle Mountain, NV) on frequency 134.825, with five more high altitude outlets planned. Current and forecast high altitude outlets are indicated with an asterisk:

Ashton, ID. (4AS)
Helena, MT. (HLN)
Rome, OR. (REO)
Malad City, ID. (MLD)
Cedar City, UT. (CDC)*
Butte, MT. (BTM)
Big Piney, WY. (BPI)
Delta, UT. (DTA)
Great Falls, MT. (GTF)*
Thermopolis, WY. (THP)
Sunnyside, UT. (4SS)
Judith Mountain, MT. (LWT)

Tonapah, NV. (TPH)

Wilson Creek, NV. (ILC)
Bliss, ID. (GNG)
Missoula, MT. (9UM)
Billings, MT. (BIL)
Squaw Butte, ID. (4EM)*
Delle,UT. (4DL)
Glasgow, MT. (GGW)
Rock Springs, WY. (RKS)
Provo, UT. (PVU)
Kalispell, MT. (FCA)
Battle Mountain, NV. (BAM)*
Francis Peak, UT. (SLC)*
(high altitude only)
Miles City, MT.(MLS)*

PREFLIGHT BRIEFING

Local Cedar City pilots may call 586-3806. All others within Utah dial:

1-800-WX BRIEF (1-800-992-7433)

After calling this toll-free number pilots will receive prerecorded instructions to access the following:

1. Pilot Briefer

2. Pilots Automatic Telephone Answering Service (PATWAS). PATWAS is a continuous recording of meteorlogical and aeronautical information. The PATWAS system has a capability of 24 recordings. Besides providing significant weather information, the PATWAS will be providing aeronautical information such as:

NOTAM D/L Information
Military Training Route Activity
Current FSS Automation Progress
FDC NOTAMS for Utah
High Altitude Reservation System Info

Sunrise/Sunset for the Week
Flight Watch Usage
AFSS Accessing Process
VOR VOICE Radio Usage
TWEB Routes/SA Reports

Automatic Access to PATWAS is limited to those users with touch tone phones. Users calling from Rotary phones will be connected directly to a briefer.

EXPO '86

May 2, 1986, through October 13, 1986

In anticipation of a significant increase of aircraft activity to and from the Vancouver, British Columbia, Canada, area during the 1986 World Exposition, the following flight information is provided to enhance safety and minimize air traffic delays.

BELLINGHAM, WASHINGTON, AREA

The Bellingham area includes the following airports:

Bellingham International (BLI)
Blaine Municipal (WA09)
Lynden (WA33)

Bellingham International is a port of entry and customs services are available from 8 a.m. until 5 p.m., locally and at other times, upon 1 hours advance notice. U.S. Airmen departing Canadian airspace which intend to land and clear Customs at Bellingham International are reminded to annotate their Customs requests in the remarks section of their flight plan. The Customs office telephone number at Bellingham is (206) 734-5463 (local exchange). Responsibility for ensuring Customs notification rests with the pilot.

TEMPORARY FAA BELLINGHAM CONTROL TOWER

The control tower will be operated from 8 a.m. until 8 p.m., daily, from May 1, 1986, through October 25, 1986.

Bellingham frequencies:

Bellingham Tower - 124.9 MHz, 239.25 MHz
Bellingham Ground Control - 121.65 MHz

BELLINGHAM (BLI) AIRPORT TRAFFIC AREA

The Bellingham Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as that airspace within a 5 statute mile radius of the BLI airport up to, but not including, 3,000' AGL excluding that airspace known as the Abbotsford-Bellingham Flight Information area which lies north of the BLI airport. The Abbotsford-Bellingham Flight Information Area is delineated on aeronautical charts.

BELLINGHAM AIRPORT INFORMATION - GENERAL

The Port of Bellingham is the airport sponsor of the airport. The traffic pattern is 1,200' for fixed wing aircraft and 800' for helicopters. The sponsor has a local regulation which prohibits intersection departures at the airport. Abbotsford, British Columbia, Canada, tower provides limited traffic

information service on 119.4 MHz to VFR aircraft operating between 1,500' and 4,000' MSL in an area generally described as between the U.S./Canadian border and Ferndale, and between the shoreline and Highway 9.

VFR FLIGHT PLANS

All pilots are encouraged to file a flight plan. Arriving aircraft should close their flight plans by radio with Bellingham FSS, on 123.6 MHz or 122.3 MHz. If unable, pilots may call the Bellingham FSS at 734-6400 (local exchange) or 1-800-833-0310 upon arrival.

Canadian/U.S. rules require that all aircraft operating VFR must be on a VFR flight plan prior to crossing the Canadian/U.S. border. Airfiles are discouraged and pilots are requested to file their flight plans 1 hour in advance of proposed departure times.

Pilots departing the U.S. from the Bellingham area are reminded that significant differences exist between Canadian and U.S. rules and procedures. Canadian officials have requested all U.S. pilots be cognizant of the requirement that flight plans are mandatory while operating in Canadian airspace.

IFR TRAFFIC

Vancouver Area Control Center (ACC) is the controlling agency for IFR aircraft operating to/from the Bellingham International Airport. Due to the expected increase in the volume of traffic generated by Expo '86, some delays may be encountered for IFR arrival and departure traffic. The Vancouver ACC has requested that U.S. airmen not request VFR/IFR practice ILS Runway 16 approaches to the Bellingham International Airport during Expo '86.

IFR ARRIVALS BLI INTERNATIONAL

Be prepared to discontinue your approach based upon local traffic conditions and enter a VFR traffic pattern for landing sequence. Pilots arriving IFR are requested to be extremely vigilant as the instrument approaches serving the Bellingham International Airport enter an area of high traffic activity in the Abbotsford-Bellingham Flight Information area.

VFR FLIGHT

Aircraft landing in Vancouver, British Columbia, Canada, should be extremely alert while operating in the Vancouver Lower Mainland area. Numerous aerial demonstrations and other aviation related sport activities are planned for Expo '86. The majority of these events will take place in the Vancouver Harbour Central Zone. The following VFR egress/ingress routes are recommended for traffic operating to/from Canadian airspace:

Bellingham (BLI) to Abbotsford (YXX) northbound east of Lynden
Abbotsford (YXX) to Bellingham (BLI) southbound west of Lynden

BLI to Vancouver (YVR) via Interstate 5 (I-5) using right side separation east/west of the highway. Extreme caution should be taken in the vicinity of the Abbotsford Localizer.

U.S. Airmen desiring additional information on Canadian area airports, rules and regulations, and Custom services may request (in writing) an Air Tourist Information Guide which is available without charge from:

Transport Canada (EXPO Guide)
800 Burrard Street
P.O. Box 220
Vancouver, British Columbia, Canada V6Z2JB

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAM's ISSUED BY BOTH THE U.S. AND CANADA PRIOR TO CONDUCTING FLIGHT.

SPECIAL TRAFFIC MANAGEMENT PROGRAM
CAPE COD AND ADJACENT ISLAND AREA AIRPORTS
MAY 15 THROUGH OCTOBER 30, 1986

In anticipation of the large number of aircraft operating to and from the Cape Cod and adjacent Island areas during the period May 15 through October 30, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****
CAPE COD AND ADJACENT ISLAND AREA

For the purpose of this Special Traffic Management Program, the Cape Cod and adjacent Island area includes the following airports:

Hyannis Barnstable Municipal-Boardman/Polando Field	- HYA
Nantucket Memorial Airport	- ACK
Martha's Vineyard Airport	- MVY

****VFR ENROUTE AND HOLDING****

Pilots are urged to become familiar with VFR holding and reporting points (SEE GRAPHIC).

Arriving aircraft are encouraged to monitor ATIS, where available, and then contact the appropriate tower when 10-15 miles from the airport. Advise receipt of ATIS information on initial contact. Aircraft landing Martha's Vineyard are requested to monitor tower frequency far enough out to obtain and advise the tower on initial contact, "HAVE NUMBERS".

Aircraft enroute Hyannis Airport from Sagamore Bridge, Martha's Vineyard and Cotuit areas should exercise caution due to high density military traffic on IFR approach to runway 23, Otis Air National Guard Base.

Arrival Points	Arrival Direction	Holding Direction
HYANNIS AIRPORT		
Sandy Neck	North	North
Dennis Drive In	Northeast	Northeast
Sagamore Bridge	Northwest	Northwest
Cotuit	West	Southwest
Dennisport	East	Southeast
MARTHA'S VINEYARD AIRPORT		
Woods Hole	North	Northwest
Oak Bluffs	Northeast	East
Bounre Bridge	North	West
Cuttyhunk Island	West	Southwest
Katama Airpark	Southeast	South
NANTUCKET AIRPORT		
Great Point	North	East
Tuckernuck Island	West	Southwest

****IFR ARRIVAL/DEPARTURE****

Otis Terminal Radar Approach Control (TRACON) may assign a Control Departure Time (CDT) for IFR flights arriving or departing Hyannis, Nantucket or Martha's Vineyard Airports, whenever marginal VFR or IFR weather conditions exist.

Implementation of this part of the Special Traffic Management Program will be by special notice to flight service stations and area airport traffic control towers. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions pilots are encouraged to contact the tower or flight service station, prior to engine start up, to obtain latest information.

To insure the success of this Special Traffic Management Program, aircraft departing Hyannis, New Bedford, Nantucket and Martha's Vineyard Airports are urged to depart within plus or minus 5 minutes of CDT. Departures from other airports should depart within 15 minutes before and not later than 5 minutes after CDT.

****FLIGHT PLANS****

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans may experience extensive delays awaiting integration into the IFR system while this program is in effect.

Commercial operators are requested to file flight plans for extra flight sections no less than 1 hour prior to proposed time of departure.

Pilots are encouraged to cancel VFR flight plans with Bridgeport Flight Service Station by radio. Transmit 122.1 mHz receive on appropriate VOR frequency. If unable to cancel by radio, contact appropriate flight service station by telephone.

Bridgeport FSS (MA & RI)	800-242-2377
(CT)	800-972-2271
Concord FSS	800-325-1202
Lebanon FSS (Toll)	603-298-8360
Bangor FSS (Toll)	207-947-4028
Montpelier FSS	800-227-1840
Augusta FSS (Toll)	207-622-6491

****AIRPORT TRAFFIC CONTROL TOWERS****

HYANNIS TOWER

1100-0300 UTC (0600-2300 local) daily

WILLIAMSBURG-JAMESTOWN AIRPORT, VIRGINIA
TEMPORARY TOWER

JUNE 29, 1986 and July 4, 1986

Due to the volume of air traffic expected at the Williamsburg-Jamestown Airport (W70) on June 29, 1986 and July 4, 1986, the following procedures have been established to maintain a safe, orderly flow of traffic.

FAA TEMPORARY CONTROL TOWER AT WILLIAMSBURG, VIRGINIA

A temporary control tower will be operated from 0900L thru 1900L on June 29, 1986 and from 0800L thru 1800L on July 4, 1986.

WILLIAMSBURG-JAMESTOWN AIRPORT TRAFFIC AREA

The Williamsburg-Jamestown Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as the airspace within a five statute mile radius of the Williamsburg-Jamestown Airport, up to but not including three thousand feet AGL.

WILLIAMSBURG-JAMESTOWN AIRPORT GENERAL INFORMATION

Williamsburg-Jamestown Airport is a privately owned airport. The operating procedures shown in paragraphs 1 through 9 below, are published by the owner/operator of the airport. The owner/operator is requesting all pilots and aircraft owners using the airport to comply with these procedures. The following procedures will be used to avoid the noise/low flying sensitive residential area, located adjacent to the airport, in the northwest through northeast quadrants.

1. A standard left hand traffic pattern will be used for Runway 31 and a nonstandard right hand traffic pattern will be used for Runway 13.

2. Traffic pattern altitudes are 800 feet AGL for all single engine piston aircraft and 1500 feet AGL for all twin engine and turbine powered aircraft.

3. The calm wind runway (less than five knots) will be Runway 13 for departures and Runway 31 for arrivals, weather and traffic permitting.

4. All pilots will fly their traffic patterns as near to the airport and use an approach power setting as low as safety permits.

5. Runway 13 will be used by all departing aircraft when weather and traffic permit.

6. All departing aircraft will climb at Vx (best angle of climb airspeed) until reaching 400 feet, and then make a 45 degree turn in the proper direction to exit the pattern. (Vy; best rate of climb may be used after the 45 degree turn.)

7. All arriving twin engine and turbine powered aircraft will use Runway 31 when weather and traffic permit.

8. All aircraft will remain at their appropriate traffic pattern altitude until necessary to initiate a descent for a safe landing. In no case will any aircraft descend below the VASI approach slope which is set at 5 degrees.

9. No touch-and-go operations are permitted.

TEMPORARY TOWER PROCEDURES

*****VFR ARRIVALS/DEPARTURES*****

Aircraft landing at the Williamsburg-Jamestown Airport are requested to contact the Williamsburg Tower approximately ten (10) miles from the airport for landing instructions on frequency 120.0. All taxiways and the runway are controlled movement areas. Aircraft on VFR flight plans may close their flight plans by radio with Newport News FSS on frequency 122.65, while airborne, or by telephone at 877-0209 or 1-800-582-1013 (toll free), upon landing.

VFR aircraft departing the Williamsburg-Jamestown Airport are requested to contact Williamsburg Ground Control on 121.6 for departure instructions. All taxiways and the runway are controlled movement areas. Departing aircraft may file flight plans with Newport News FSS by telephone at 877-0209 or 1-800-582-1013.

*****VFR ADVISORY SERVICE*****

Aircraft desiring VFR advisory service may contact Norfolk Approach on frequency 119.45.

*****IFR TRAFFIC*****

Norfolk Approach Control is the controlling facility for IFR traffic operating to/from the Williamsburg-Jamestown Airport. Departing IFR aircraft shall contact Williamsburg Ground Control (121.6) for their ATC clearance. Norfolk Approach will not accept air files. Due to the expected increase in the volume of traffic, some delays may be encountered. Aircraft may file IFR flight plans with Newport News FSS on 877-0209 or 1-800-582-1013. Williamsburg Tower will not be able to file IFR/VFR flight plans. Pilots are encouraged to use Patrick Henry International Airport as an alternate in case delays are encountered due to weather.

GATEWAY ARCH, ST. LOUIS, MISSOURI
(STL VORTAC 143R/18NM)

During the period July 3 through July 6, 1986, caution be advised within a 3 NM radius of the Gateway Arch at altitudes 10,000 feet MSL and below. Aerial activities including skydiving, aerobatics, hot air balloons, blimps, military flybys, and fireworks will be conducted at various times, with July 4 scheduled to have the most activity. Aircraft operating to and from St. Louis Downtown-Parks Airport should avoid entering and exiting the airport traffic area in the Gateway Arch area. St. Louis Downtown-Parks Airport Traffic Control Tower will be in operation from 0700 through 2100 CDT daily and may be contacted on 120.9 MHz. At other times, flights below the St. Louis Terminal Control Area should contact St. Louis Approach Control on 126.7 MHz for the status of activities near the Gateway Arch.

FIRECRACKER 400

DAYTONA BEACH, FLORIDA AREA

JULY 4, 1986

In anticipation of the large number of aircraft traveling to and from the Daytona Beach area for the Firecracker 400, the following procedures will be used to enhance safety and minimize air traffic delays.

Aircraft not landing in the Daytona Beach area are requested to avoid overflight in the Daytona Beach Airport Radar Service Area (ARSA). IFR overflights can expect routing to avoid the Daytona Beach area.

VFR ARRIVALS: Radar sequencing will be provided to aircraft landing at Daytona Beach Regional Airport. Contact Daytona Beach Approach Control on the appropriate frequency at least 15 miles from the Daytona Beach Regional Airport. Aircraft landing at other airports within the Daytona Beach ARSA will be provided radar service. Contact Daytona Beach Approach Control on the appropriate frequency prior to reaching the Daytona Beach ARSA.

IFR AND VFR DEPARTURES: Both IFR and VFR aircraft operating at Daytona Beach Regional Airport may be issued taxi times. BEFORE STARTING YOUR ENGINE, monitor ATIS on 120.05 MHz for the latest information. Please comply with the taxi signs posted near runways. DO NOT CONTACT THE TOWER for departure until you are in the number one position for takeoff, then give your location and runway.

SPECIAL ACTIVITY ALERT AND OPERATIONS OVER THE SPEEDWAY

Aircraft operating in the vicinity of the Daytona International Speedway should remain alert for numerous special aviation activities associated with race events. Activities may include: sky diving, banner towing, helicopter operations, hot air balloons, military fly-bys, and blimps.

Continuous aircraft operations over the speedway will be permitted only with prior approval from Daytona Beach Regional Tower. Approval to operate over the speedway may be obtained from the Daytona Beach Regional Air Traffic Control Tower by telephoning 904/255-3216.

VFR ARRIVAL AIRCRAFT are requested to cancel their flight plans with Orlando FSS via radio on 122.4 (or transmit on 122.1 and receive on Ormond Beach VOR 112.6) and not request Jacksonville Center, Daytona Beach Approach, or Daytona Beach Ground Control to forward the cancellation.

RESTRICTED AREA ADVISORY

Pilots should be aware of the existence of restricted airspace to the south, west, and northwest of Daytona Beach and plan their flights accordingly. These areas may be continuously active or may be intermittently activated by NOTAM. Pilots are cautioned that penetration of Restricted Areas without authorization from the using or controlling agency may be extremely hazardous.

FARGO-MOORHEAD AIRSHOW

JUNE 14-22, 1986

FARGO TOWER FREQUENCIES:

Fargo Ground Control	121.9
Fargo Tower	118.6
Fargo Approach East	120.4
Fargo Approach West	127.7
Fargo ATIS	124.5
Fargo VOR	116.2

All inbound aircraft monitor the Fargo ATIS on 124.5 MHz when not less than 35 miles from Fargo.

Complete flight services will be provided through the Grand Forks FSS on a 24 hour basis.

For Pilot Briefing or Flight Plans...
...701-293-0900 or 1-800-732-4247

AEROBATIC DEMONSTRATIONS

Aerobatic flight demonstrations will be conducted daily on June 14 and June 15 and June 19, 20, 21, & 22, 1986. The Air Show Operations Area is from the surface to 15,000 AGL within a 5 nautical mile radius of Fargo Hector Field and will be in effect during the following periods:

Saturday June 14, 1986	1200-1500 CDT
Sunday June 15, 1986	1200-1500 CDT
Thursday June 19, 1986	1400-1600 CDT
Friday June 20, 1986	1200-1600 CDT
Saturday June 21, 1986	1000-1600 CDT
Sunday June 22, 1986	1000-1600 CDT

Aircraft inbound to Fargo, except scheduled Air Carrier aircraft, which are not able to land prior to the above indicated air show times, will have to land at outlying airports or remain airborne, clear of the above described "Air Show Operation Area." Pilots on VFR flight plans are reminded to extend, cancel, or change their flight plan destination if unable to land at Fargo Hector Field due to airport being closed during the air shows.

MONITOR YOUR FUEL STATUS CLOSELY.

AIRPORT MANAGER SPECIAL NOTICE

Runways 03/21 will be closed to landing and takeoffs from 1200 CDT on Thursday June 19, 1986 until 1200 CDT on Monday June 23, 1986.

All light, single, and multi-engine aircraft may be required to exit runways, taxi, and park on grass areas of the airport. Hazard areas will be marked by cones and/or flags. Pilots are cautioned to be alert for, and remain clear of all marked areas. Pilots should exercise caution in operating aircraft on unimproved or grass areas due to rough ground and signs. Taxi operations on other than paved areas are at pilot's own risk. ALL MISHAPS, INCIDENTS OR ACCIDENTS SHOULD BE REPORTED TO AIRPORT MANAGEMENT IMMEDIATELY UPON ITS OCCURRENCE.

All aircraft pilots and operators are reminded that any incidents, accidents, or injuries arising out of the operation of any aircraft on Fargo Hector Field Airport are the responsibility of the aircraft owner or operator.

AIRPORT CLOSING

Fargo Hector Field is subject to being closed to arriving VFR aircraft on Saturday June 14 and Sunday June 15, Friday June 20, Saturday June 21, and Sunday June 22, 1986 due to non available transient parking. Aircraft based at Fargo and scheduled carrier activity will be accomodated on a priority basis after airport closing.

Limited overnight tie down space is available at the FBO's for a nominal charge. No camping will be permitted on airport property.

Pilots of large or heavy aircraft requiring hard surfaced parking area are required to make prior arrangments with the FBO's. Telephone: ...701-237-6882.

STUDENT PILOT TRAINING

No student training flights will be authorized at Fargo Hector Field June 14 and 15 and June 20, 21, and 22, 1986 during the Airshow period. This includes student solo cross country flights, touch and go landings, and practice instrument approaches.

FUEL REQUIREMENTS

FBO advised only cash, Texaco, American Express, PHH, Mid Continent, VISA, Master Charge, and Multi-Service will be accepted for fuel purchases. Jet A and 100LL octane fuel is available.

ALL NO-RADIO ARRIVALS AND DEPARTURES will be required to contact the Control Tower for prior approval. Call 701-235-8894.

FLIGHT RESTRICTIONS

THE STATUE OF LIBERTY CENTENNIAL CELEBRATION

JULY 2 THROUGH JULY 7, 1986

PURSUANT TO SECTIONS 91.104 AND 91.91(A)(3) OF THE FEDERAL AVIATION REGULATIONS (FAR), FLIGHT IS RESTRICTED, UNLESS OTHERWISE AUTHORIZED BY ATC, IN THE AREA AND DURING THE PERIOD DESCRIBED BELOW TO PROVIDE CONTROLLED ENTRY OF THE AIRSPACE, AND PREVENT UNSAFE CONGESTION OF SIGHT SEEING AIRCRAFT, OVER THE STATUE OF LIBERTY CENTENNIAL CELEBRATION.

THE AFFECTED AREA:

BEGINNING AT THE KENNEDY (JFK) VORTAC 257 DEGREE RADIAL, EIGHT-MILE DME,
THENCE CLOCKWISE VIA THE EIGHT-MILE DME ARC TO THE SIX-MILE DME ARC OF THE LAGUARDIA (LGA) VOR;
THENCE CLOCKWISE VIA THE SIX-MILE DME ARC TO THE EASTERN SHORELINE OF THE HUDSON RIVER;
THENCE NORTHEAST VIA THE SHORELINE TO THE GEORGE WASHINGTON BRIDGE;
THENCE WESTWARD VIA THE GEORGE WASHINGTON BRIDGE TO THE WESTERN SHORELINE OF THE HUDSON RIVER;
THENCE DIRECT TO THE THE JFK VORTAC 318 DEGREE RADIAL, SIXTEEN-MILE DME;
THENCE DIRECT TO THE INTERSECTION OF THE JFK 304 DEGREE RADIAL AND THE FOUR-MILE RADIUS ARC OF THE NEWARK AIRPORT;
THENCE CLOCKWISE VIA THE FOUR-MILE RADIUS ARC TO THE JFK 280 DEGREE RADIAL;
THENCE DIRECT TO THE INTERSECTION OF THE COLTS NECK VORTAC (COL) 360 DEGREE RADIAL AND THE TEN-MILE RADIUS ARC OF THE NEWARK AIRPORT;
THENCE COUNTERCLOCKWISE VIA THE TEN-MILE RADIUS ARC TO THE COL 017 DEGREE RADIAL;
THENCE VIA THE COL 017 DEGREE RADIAL TO THE NORTHERN SHORELINE OF THE STATE OF NEW JERSEY;
THENCE EASTWARD VIA THE SHORELINE TO THE INTERSECTION OF ROUTE 36 AND THE GATEWAY NATIONAL PARK;
THENCE DIRECT TO JFK 257 DEGREE RADIAL, EIGHT-MILE DME.

THE EFFECTIVE PERIOD:

JULY 2, 0800 LOCAL TIME, UNTIL 1200 LOCAL TIME ON JULY 7, 1986.

THE AFFECTED ALTITUDES:

WITHIN THE AFFECTED AREA FROM THE SURFACE TO THE FLOOR OF THE NEW YORK TCA.

THE RESTRICTIONS:

1. ONLY THOSE OPERATIONS THAT WOULD OTHERWISE BE PERMITTED UNDER SECTION 91.91(D) WILL BE CONSIDERED FOR ATC AUTHORIZATION TO OPERATE IN THE AFFECTED AREA. FURTHER, ALL OPERATIONS PLANNED UNDER VFR MUST HAVE BEEN PRE-SCREENED BY THE APPROPRIATE SECURITY AGENCY BEFORE ATC WILL GRANT AUTHORIZATION. HOWEVER, THERE WILL BE SOME PERIODS DURING CERTAIN EVENTS ASSOCIATED WITH THE CENTENNIAL CELEBRATION WHEN NO FLIGHTS WILL BE PERMITTED.

2. REQUESTS FOR PRE-SCREENING MUST BE SENT TO:

U.S. NAVAL INVESTIGATIVE SERVICE
90 CHURCH STREET, ROOM 803
NEW YORK, NEW YORK 10007

TELEPHONE 718-834-2777

3. REQUESTS FOR PRE-SCREENING MUST CONTAIN THE FOLLOWING INFORMATION AND BE RECEIVED AT THE ABOVE ADDRESS BY JUNE 20, 1986 IN ORDER FOR CONSIDERATION TO BE GIVEN TO OPERATE IN THE AFFECTED AREA:

- AIRCRAFT REGISTRATION NUMBER.
- AIRCRAFT TYPE AND EQUIPMENT.
- AIRCRAFT COLOR.
- PROPOSED TIME OF ENTRY AND EXIT.
- NAME OF NEWS MEDIA OR ORGANIZATION FOR WHICH THE OPERATION IS BEING CONDUCTED.
- SPECIFIC NAMES OF FLIGHT CREW MEMBERS AND PASSENGERS.

4. ALL AIRCRAFT OPERATIONS MUST BE CONDUCTED UNDER A FLIGHT PLAN. VFR FLIGHT PLANS MAY ONLY BE FILED WITH TETERBORO FLIGHT SERVICE STATION, AND MAY ONLY BE FILED BETWEEN JUNE 26 AND JUNE 30, 1986. NO VFR FLIGHT PLANS FOR OPERATIONS IN THE AFFECTED AREA WILL BE ACCEPTED AFTER 1700 LOCAL, JUNE 30.

5. AIR TRAFFIC CONTROL (ATC) SEPARATION OR TRAFFIC ADVISORY SERVICES WILL NOT BE PROVIDED OUTSIDE THE NEW YORK TCA. RECEIPT OF AN AUTHORIZATION TO OPERATE IN THE AFFECTED AREA DOES NOT CONSTITUTE AUTHORIZATION TO ENTER THE NEW YORK TCA.

6. ALL PILOTS CONDUCTING OPERATIONS UNDER VFR IN THE AFFECTED AREA SHALL SQUAWK THE ASSIGNED TRANSPONDER CODE, MAINTAIN A LISTENING WATCH ON THE RADIO FREQUENCY ASSIGNED BY ATC, AND COMPLY WITH ANY ATC INSTRUCTION.

RELATED AERONAUTICAL INFORMATION:

LETTER TO AIRMEN NO. 86-01, ISSUED BY THE EASTERN REGION AIR TRAFFIC DIVISION, WILL BE REVISED WITH SUPPLEMENTAL INFORMATION REFLECTING THIS NOTAM.

NOTICES TO AIRMEN
CONTENT CRITERIA

Revised 1985

ALL AIRPORTS

TABLE 1

Information Category	Content Criteria
Airports	Abandonments (If currently listed in Airport/Facility Directory), Openings, Closings.
Runways	Openings, Closings, Commissionings, Permanent Closures.

NOTAM D AIRPORTS

TABLE 2

Information Category	Content Criteria
Airport Operating Restriction	CFR, ACR, etc.
Approach Light Systems	Commissionings, Changes, Decommissionings, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).
Control Zones	Hours of Operation (in Local Time).
Displaced Thresholds	Implementation and Changes.
Runways	Ident Changes, Length, Width, Surface Composition Changes.
Runway Light Systems	Commissionings, Changes, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).

NAVAIDS, COMMUNICATIONS, OTHER SERVICES

TABLE 3

Information Category	Content Criteria
Navigational Facilities	Commissionings (including Ident and Frequency), Decommissionings (including Ident and Frequency), Frequency Changes, Changes in Monitoring Facility and/or Status, Restrictions, Outages (with Effective Dates).
Air Traffic Control Towers, Approach Controls	Commissionings (including Frequencies), Hours of Operation, Decommissionings.
Flight Service Stations	Commissionings, Decommissionings, Hours of Operation; Commissionings, Decommissionings of RCO; Changes in Monitoring Status of RCO; Outages of RCO (with Effective Dates).
Weather	AWOS (System and Frequency).

TD4.12/2:

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

   a. GENERAL

   b. AIRWAYS

   c. FLIGHT RESTRICTIONS

   d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

   The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

Phone: Commercial—(202)426-3813/3390.

Phone: FTS— 426-3813/426-3390.

ADDRESSING INFORMATION FOR SECTION 2

Federal Aviation Administration, ATO-200, 800 Independence Ave, SW., Washington, DC 20591.

Phone: Commercial—(202)426-3731.

Phone: FTS—426-3731.

SUBSCRIPTION INFORMATION

HOW TO ORDER

The Notices to Airmen publication is available by subscription through the Superintendent of Documents. Subscriptions are accepted for a 1 year period. Remittance must be made in advance of shipment. Your check or money order must be made payable to the Superintendent of Documents. Orders can also be charged to your VISA or MASTERCARD account. Orders should be addressed to:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402,

or

Phone: (202)783-3238 (Order Desk).

ABBREVIATIONS

The following abbreviations are those most commonly used within this publication. Other abbreviations may be found in the Contraction Handbook, 7340.1.

Note: An "s" may be added for plural. Abbreviations used in FDC NOTAMs are italicized.

A	
/	and
AAS	Airport Advisory Service
A/C	Approach Control
acft	aircraft
ACR	Air Carrier
ADF	Automatic Direction Finder
AER	Approach End Runway
AGL	above ground level
AIM	Airman's Information Manual
ALS	Approach light system
ALSF-1	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category I Configuration
ALSF-2	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category II Configuration
alt	altitude
altm	altimeter
altn	alternate
ALSTG	altimeter setting
amdt	amendment
apch	approach
apchg	approaching
aprx	approximate
arpt	airport
arr	arrive or arrival
ARSR	Air Route Surveillance Radar
ARTCC	Air Route Traffic Control Center
ASDE	airport surface detection equipment
ASR	Arpt Surveillance Radar
ATC	air traffic control
ATCT	air traffic control tower
ATIS	Automatic Terminal Information Service
avbl	available
awy	airway
B	
BC	back course
bcn	beacon
bcst	broadcast
bldg	building
brg	bearing
btn	between
byd	beyond
C	
cat	category
CFR	crash fire rescue
clnc	clearance
clsd	closed
cmsnd	commissioned
cntr	center
cntrln	centerline
Comlo	Compass locator
const	construction
cpty	capacity
crs	course
ctc	contact
CTLZ	Control Zone
D	
dalgt	daylight
dcmsnd	decommissioned
degs	degrees
dep	depart, departure
DF	direction finder
DH	decision height
DME	UHF standard TACAN compatible distance measuring equipment
dsplcd	displaced
dist	distance
durg	during
DVFR	Defense Visual Flight Rule
E	
E	east
EFAS	Enroute Flight Advisory Service
elev	elevation
emerg	emergency
equip	equipment
excp	except
F	
FAF	final approach fix
FAR	Federal Aviation Regulation
FDC	Flight Data Center
FI/P	flight information (permanent)
FI/T	flight information (temporary)
FL	Flight Level
FM	from
freq	frequency
FSS	Flight Service Station
ft	feet/foot
G	
govt	government
GS	glide slope
GWT	gross weight
H	
HAA	height above airport
HAT	height above touchdown
HIRL	High intensity Runway Lights
hol	holiday
hwy	highway
I	
IAF	Initial approach fix
IAP	Initial approach procedure
ident	identification
IF	intermediate fix
IFR	Instrument Flight Rules
IFSS	International Flight Service Station
ILS	instrument landing system
info	information
inop	inoperative
int	intersection
intl	international
intst	intensity
ISMLS	Interim Standard Microwave Landing System
J	
J-bar	jet runway barrier
K	
kHz	kilohertz
L	
L	left (used only to designate rwys) eg. rwy 12L
lat	latitude
lb	pounds (weight)
lctd	located
LDA	Localizer type directional aid
LDIN	Lead-in Lighting System
lgtd	lighted
LMM	compass locator at middle marker ILS
ldg	landing
loc	localizer
LOM	compass locator at outer marker ILS
long	longitude
M	
MAA	maximum authorized altitude
mag	magnetic
maint	maintain, maintenance
MALS	Medium Intensity Approach Light System
MALSR	Medium Intensity Approach Light System with Runway Alignment Indicator Lights
MAP	missed approach point
max	maximum
MCA	minimum crossing altitude
MDA	minimum descent altitude
MEA	minimum enroute IFR altitude
MHz	megahertz
min	minimum or minute
MIRL	Medium Intensity Runway Edge Lights
MLS	Microwave Landing System
MM	middle marker ILS
MOCA	minimum obstruction clearance altitude
MRA	minimum reception altitude
MSA	minimum safe altitude
MSL	mean sea level
muni	municipal
N	
N	north
NA	not authorized
natl	national
navaid	navigational aid
NDB	Non-directional Radio Beacon
NM	nautical mile(s)
NOPT	no procedure turn required
Nr	number
O	
obstn	obstruction
ODALS	Omnidirectional Approach Lighting System
OM	outer marker ILS
oper	operate
opn	operation
orig	original
OTS	Out of Service
ovrn	overrun
P	
PAR	Precision Apch Radar
ptn	pattern
permly	permanently
PPR	Prior Permission Required
proc	procedure
Q	
quad	quadrant
R	
R	right (used only to designate rwys) eg. rwy 19R
RAPCON	radar approach control (USAF)
RCAG	Remote Center air/ground
RCLS	Runway Centerline Lights System
RCO	Remote Communications Outlet
rcv	receive
rcvg	receiving
REIL	Runway End Identifier Lights
req	request
RNAV	Area Navigation
RRP	Runway Reference Point
rstrd	restricted
RTS	returned to service
RVR	runway visual range
RVRM	Runway Visual Range Midpoint
RVRT	Runway Visual Range Touchdown
RVRR	Runway Visual Range Rollout
RVV	runway visibility values
rwy	Runway
S	
S	south/snow
SDF	Simplified Directional Facility
sec	second
sfc	surface
SFL	Sequenced Flashing Lights
SI	straight-in approach
SM	statute mile(s)
SR	sunrise
SS	sunset
SSAFL	Simplified Short Approach Lighting System with Sequenced Flashers
SSALS	Simplified Short Approach Lighting System
SSALR	Simplified Short Approach Lighting System with Runway Alignment Indicator Lights
STOL	Short take-off & landing runway
svc	service
T	
T	true (after a bearing)
TAC	Terminal Area Chart
TACAN	UHF navigational facility—omnidirectional course and distance information
TCA	Terminal Control Area
TCH	Threshold Crossing Height
tfc	traffic
thr	threshold
thru	through
tkof	take-off
tmprly	temporarily
tmpry	temporary
TPA	Traffic Pattern Altitude
TRACON	Terminal Radar approach control
trml	terminal
TRSA	Terminal Radar Service Area
tsnt	transient
TWEB	transcribed weather bcst
twr	tower
twy	taxiway
U	
UHF	Ultra high frequency
unavbl	unavailable
unlgtd	unlighted
unmon	unmonitored
unusbl	unusable
V	
VASI	Visual Approach Slope Indicator
VDP	visual descent point
VFR	visual flight rules
VHF	Very high frequency
vis	visibility
VOR	VHF Omni-Directional Radio Range
VORTAC	Combined VOR and TACAN System
VOT	a VOR Receiver testing facility
vsby	visibility
W	
W	west
wea	weather
wkday	weekday
wkend	weekend
wp	waypoint
wt	weight
Z	
Z	Coordinated Universal Time (UTC)

GENERAL

FDC 6/1300 OMEGA STATION /D/NORTH DAKOTA WILL BE OFF THE AIR FOR ANNUAL MAINTENANCE EFFECTIVE 07 JULY THRU 31 JULY 1200-2200 UTC DAILY.

FDC 6/1067 FDC THE FEDERAL AVIATION ADMINISTRATION HAS PARTICIPATED IN GOVERNMENT ACTIVITIES TO ASSESS AVIATION PROBLEMS WHICH MIGHT OCCUR AS A RESULT OF THE SOVIET NUCLEAR ACCIDENT. NONE OF THE DATA WE HAVE SEEN PROVIDES ANY CONCERN FOR ANY FLIGHTS OF ANY U.S. CARRIERS ANYWHERE IN THE WORLD. THE ONLY AREA WE WOULD BE POTENTIALLY CONCERNED ABOUT IS FLIGHT IN THE VICINITY OF THE REACTOR SITE NEAR KIEV AT ALTITUDES BELOW 20,000 FEET. FLIGHT ABOVE 20,000 FEET AT THIS LOCATION NEAR KIEV OR OTHER FLIGHTS AT ANY ALTITUDE ANYWHERE IN THE WORLD IS NOT EXPECTED TO PRESENT ANY PUBLIC HEALTH OR SAFETY PROBLEMS DUE TO RADIATION CONTAMINATION WHICH MIGHT EXIST AS A RESULT OF THE ACCIDENT. THERE IS NO REASON FOR SPECIAL FLIGHT PRECAUTIONS. NO FURTHER NOTIFICATIONS ON THIS SUBJECT ARE PLANNED.

FDC 6/995 U.S. CUSTOMS REGULATORY CHANGES. AIRCRAFT PENETRATING THE INNER ADIZ FM ANYWHERE IN THE WESTERN HEMISPHERE SOUTH OF THE U.S. MEXICAN BORDER, SOUTH OF 33 DEG NORTH LATITUDE ON THE PACIFIC COAST, SOUTH OF 30 DEGREES NORTH LATITUDE ON THE ATLANTIC COAST, OR SOUTH OF THE INNER ADIZ ON THE GULF COAST, MUST PROVIDE U.S. CUSTOMS AT LEAST ON EHOUR ADVANCE NOTICE OF PENETRATION OF U.S. AIRSPACE. EFFECTIVE APRIL 30, THIS REQUIREMENT WILL BE EXTENDED TO AIRCRAFT THAT HAVE NOT LANDED IN A FOREIGN PLACE AND AIRCRAFT FROM PUERTO RICO THAT ARE NOT FLYING UNDER IFR FLIGHT RULES. FILING A FLIGHT PLAN WITH THE NOTATION "ADCUS" WITH THE U.S. FAA AT LEAST ONE HOUR IN ADVANCE OF PENETRATION OF THE ADIZ WILL SATISFY THIS REQUIREMENT. CONTRACTING U.S. CUSTOMS AT 305-536-6591, MIAMI, FL, OR 714-351-6674, RIVERSIDE, CA, AT LEAST ONE HOUR IN ADVANCE WILL ALSO MEET THE REQUIREMENT. LANDING AND INSPECTION REQUIREMENTS FOR AIRCRAFT ARRIVING FROM FOREIGN PLACES REMAIN UNCHANGED.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 16TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.8 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7808/CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY

WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED. NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

FLIGHT RESTRICTIONS

ONLY NOTICES OF SIGNIFICANT DURATION ARE LISTED. (7/85)

FDC 6/1238 FLIGHT RESTRICTIONS - THE STATUE OF LIBERTY CENTENNIAL CELEBRATION JULY 2 THROUGH JULY 7, 1986. PURSUANT TO SECTIONS 91.104 AND 91.91 (A) (3) OF THE FEDERAL AVIATION REGULATIONS (FAR) FLIGHT IS RESTRICTED UNLESS OTHERWISE AUTHORIZED BY ATC IN THE AREA AND DURING THE PERIOD DESCRIBED BELOW TO PROVIDE CONTROLLED ENTRY OF THE AIRSPACE AND PREVENT UNSAFE CONGESTION OF SIGHT SEEING AIRCRAFT. OVER THE STATUE OF LIBERTY CENTENNIAL CELEBRATION. THE AFFECTED AREA: BEGINNING AT THE KENNEDY (JFK) VORTAC 257 DEGREE RADIAL. EIGHT-MILE DME. THENCE CLOCKWISE VIA THE EIGHT-MILE DME ARC TO THE SIX-MILE DME ARC OF THE LAGUARDIA (LGA) VOR; THENCE CLOCKWISE VIA THE SIX-MILE DME ARC TO THE EASTERN SHORELINE OF THE HUDSON RIVER; THENCE NORTHEAST VIA THE SHORELINE TO THE GEORGE WASHINGTON BRIDGE; THENCE WESTWARD VIA THE GEORGE WASHINGTON BRIDGE TO WESTERN SHORELINE OF THE HUDSON RIVER; THENCE DIRECT TO THE JFK VORTAC 318 DEGREE RADIAL. SIXTEEN-MILE DME; THENCE DIRECT TO THE INTERSECTION OF THE JFK 304 DEGREE RADIAL AND THE FOUR-MILE RADIUS ARC OF THE NEWARK AIRPORT; THENCE CLOCKWISE VIA THE FOUR-MILE RADIUS ARC TO THE JFK 280 DEGREE RADIAL; THENCE DIRECT TO THE INTERSECTION OF THE COLTS NECK VORTAC (COL) 360 DEGREE RADIAL AND THE TEN-MILE RADIUS ARC OF THE NEWARK AIRPORT; THENCE COUNTERCLOCKWISE VIA THE TEN-MILE RADIUS ARC TO THE COL 017 DEGREE RADIAL; THENCE VIA THE COL 017 DEGREE RADIAL TO THE NORTHERN SHORELINE OF THE STATE OF NEW JERSEY; THENCE EASTWARD VIA THE SHORELINE TO THE INTERSECTION OF ROUTE 36 AND THE GATEWAY NATIONAL PARK; THENCE DIRECT TO JFK 257 DEGREE RADIAL. EIGHT-MILE DME. THE EFFECTIVE PERIOD: JULY 2, 0800 LCL TIME, UNTIL 1200 LCL TIME ON JULY 7, 1986. THE AFFECTED ALTITUDES: WITHIN THE AFFECTED AREA FROM THE SURFACE TO THE FLOOR OF THE NEW YORK TCA. THE RESTRICTIONS: 1) ONLY THOSE OPERATIONS THAT WOULD OTHERWISE BE PERMITTED UNDER SECTION 91.91 (D) WILL BE CONSIDERED FOR ATCT AUTHORIZATION TO OPERATE IN THE AFFECTED AREA. FURTHER, ALL OPERATIONS PLANNED UNDER VFR MUST HAVE BEEN PRE-SCREENED BY THE APPROPRIATE SECURITY AGENCY BEFORE ATC WILL GRANT AUTHORIZATION. HOWEVER, THERE WILL BE SOME PERIODS DURING CERTAIN EVENTS ASSOCIATED WITH THE CENTENNIAL CELEBRATION WHEN NO FLIGHTS WILL BE PERMITTED. 2) REQUESTS FOR PRE-SCREENING MUST BE SENT TO: U.S. NAVAL INVESTIGATIVE SERVICE. 90 CHURCH STREET. ROOM 803, NEW YORK, NEW YORK, NEW YORK 10007. TELEPHONE: 718-834-2777. 3) REQUESTS FOR PRE-SCREENING MUST CONTAIN THE FOLLOWING INFORMATION AND BE RECEIVED AT THE ABOVE ADDRESS BY JUNE 20, 1986 IN ORDER FOR CONSIDERATION TO BE GIVEN TO OPERATE IN THE AFFECTED AREA:...AIRCRAFT REGISTRATION NUMBER.... AIRCRAFT TYPE AND EQUIPMENT....AIRCRAFT COLOR....PROPOSED TIME OF ENTRY AND EXIT....NAME OF NEWS MEDIA OR ORGANIZATION FOR WHICH THE OPERATION IS BEING CONDUCTED....SPECIFIC NAMES OF FLIGHT CREW MEMBERS AND PASSENGERS. 4) ALL AIRCRAFT OPERATIONS MUST BE CONDUCTED UNDER A FLIGHT PLAN. VFR FLIGHT PLANS MAY ONLY BE FILED WITH TETERBORO FLIGHT SERVICE STATION AND MAY ONLY BE FILED BETWEEN JUNE 26 AND JUNE 30, 1986. NO VFR FLIGHT PLANS FOR OPERATIONS IN THE AFFECTED AREA WILL BE ACCEPTED AFTER 1700 LCL, JUNE 30. 5) AIR TRAFFIC CONTROL (ATC) SEPARATION OR TRAFFIC ADVISORY SERVICES WILL NOT BE PROVIDED OUTSIDE THE NEW YORK TCA. RECEIPT OF AN AUTHORIZATION TO OPERATE IN THE AFFECTED AREA DOES NOT CONSTITUTE AUTHORIZATION TO ENTER THE NEW YORK TCA. ENTER THE NEW YORK TCA. 6) ALL PILOTS CONDUCTING OPERATIONS UNDER VFR IN THE AFFECTED AREA SHALL SQUAWK THE ASSIGNED TRANSPONDER CODE. MAINTAIN A LISTENING WATCH ON THE RADIO FREQUENCY ASSIGNED BY ATC, AND COMPLY WITH ANY ATC INSTRUCTION. RELATED AERONAUTICAL INFORMATION: LETTER TO AIRMEN NO. 86-01, ISSUED BY THE EASTERN REGION AIR TRAFFIC DIVISION, HAS BEEN REVISED WITH SUPPLEMENTAL INFORMATION REFLECTING THIS NOTAM.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

- Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

- Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

- Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective April 10, 1986.

- Beale Air Force Base, CA
- Birmingham Municipal Airport, AL
- Burlington International Airport, VT
- Castle Air Force Base, CA
- Charlotte/Douglas International Airport, NC
- Columbus Metropolitan Airport, GA
- Mather Air Force Base. CA
- McClellan Air Force Base, CA
- Nashville Metropolitan Airport, TN
- Sacramento Metropolitan Airport, CA

ARSA's have been designated at the following locations to be effective May 8, 1986.

- Adams Field, Little Rock, AR
- General Mitchell Field, Milwaukee, WI
- Greater Buffalo International Airport, NY
- Memphis International Airport, TN
- Michiana Regional Airport, South Bend, IN
- Salt Lake International Aitport, UT

ARSA's have been designated at the following locations to be effective June 5, 1986.

- Albuquerque International Airport, NM
- Greater Cincinnati International Airport, KY
- Indianapolis International Airport, IN
- Phoenix Sky Harbor International Airport. AZ
- Tucson International Airport, AZ
- Davis-Monthan Air Force Base, AZ
- Wichita Mid-Continent Airport, KS

SPECIAL USE AIRSPACE
(Military Operations Area)

Effective July 25-August 3, 1986

1. Gallant Eagle 86 Area A Temporary MOA, CA [New]

Boundaries. Beginning at lat. 34°40'30"N., long. 116°29'30"W.;
to lat. 34°36'00"N., long. 116°34'00"W.;
to lat. 34°14'00"N., long. 116°19'00"W.;
to lat. 34°14'00"N., long. 116°17'00"W.;
to lat. 34°30'00"N., long. 116°26'30"W.;
to lat. 34°36'00"N., long. 116°28'00"W.;
thence to point of beginning.

Altitudes. 1,000 feet AGL to, but not including, FL 180.

Times of Use. Continuous July 25-August 3, 1986.

Controlling Agency. FAA, Los Angeles ARTCC.

Using Agency. U.S. Air Force, USCENTAF Battlestaff (USCENTAF/DOJ) Shaw AFB, SC

2. Gallant Eagle 86 Area B Temporary MOA, CA [New]

Boundaries. Beginning at lat. 34°14'00"N., long. 116°19'00"W.;
to lat. 34°14'00"N., long. 115°44'00"W.;
to lat. 34°08'00"N., long. 115°53'00"W.;
to lat. 34°03'00"N., long. 116°11'00"W.;
thence to the point of beginning.

Altitudes. 5,000 feet MSL to 11,000 feet MSL.

Times of Use. Continuous July 25-August 3, 1986.

Controlling Agency. FAA, Los Angeles ARTCC.

Using Agency. U.S. Air Force, USCENTAF Battlestaff (USCENTAF/DOJ) Shaw AFB, SC

3. Gallant Eagle 86 Daggett Corridor Temporary MOA, CA [New]

Boundaries. Beginning at lat. 35°39'00"N., long. 115°53'00"W.;
to lat. 34°34'21"N., long. 115°53'00"W.;
to lat. 34°35'30"N., long. 115°58'00"W.;
to lat. 34°41'00"N., long. 116°03'00"W.;
to lat. 34°43'00"N., long. 116°17'00"W.;
to lat. 34°43'00"N., long. 116°26'20"W.;
to lat. 34°36'00"N., long. 116°34'00"W.;
to lat. 34°38'00"N., long. 116°35'30"W.;
to lat. 35°19'00"N., long. 116°18'30"W.;
thence to point of beginning.

Altitudes. 100 feet AGL to 7,500 feet MSL.

Times of Use. 0500 to 0200 local time, July 25-August 3, 1986.

Controlling Agency. FAA, Los Angeles ARTCC.

Using Agency. U.S. Air Force, USCENTAF Battlestaff (USCENTAF/DOJ)
Shaw AFB, SC

TERMINAL AREA GRAPHIC NOTICE
(NOT TO BE USED FOR NAVIGATION)

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

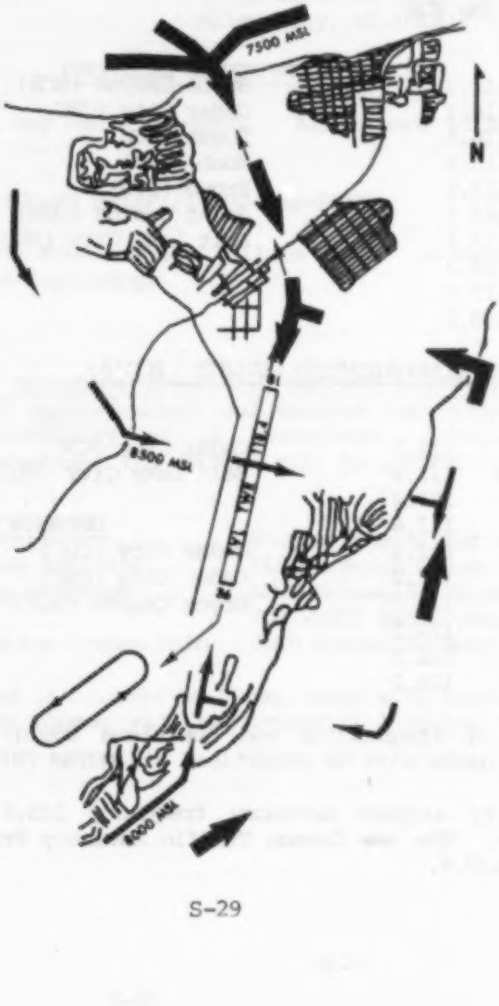
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



CEDAR CITY, UTAH, AUTOMATED FLIGHT SERVICE STATION

The Cedar City, Utah, Automated Flight Service Station (AFSS will commission on June 5, 1986. All services now provided by the Cedar City Flight Service Station (FSS) will be transferred to the AFSS at that time. On that same day, the AFSS will also assume control of most of the enroute flight advisory service (EFAS) outlets now remoted to Salt Lake flight Service Station. The remaining EFAS, remote communications outlet (RCO), and vary-high omni (VOR) voice frequencies now controlled by SLC FSS will be gradually transferred to Cedar City AFSS, as well as all eastern Utah facilities now controlled by Grand Junction, Colorado, Flight Service Station.

Area Served: The Cedar City AFSS's geographic area of responsibility is the state of Utah for all services except EFAS. The EFAS area of rsponsibility covers a six-state area (see below).

RADIO AIDS

A. Navigational aids with voice capability, (pilots transmit on 122.1 and receive on the VOR frequency.)

Bonneville (BVL)	112.3
Delta (DTA)	116.1
Fairfield (FFU)	116.6
Hanksville (HVE)	115.9
Lucin (LCU)	113.6
Milford (MLF)	112.1
Myton (MTU)	117.9
Ogden (OGD)	115.7
Price (PUC)	115.5
Vernal (VEL)	108.2

B. VOR navigational aids with no voice capability.

Bryce Canyon (BCE)	112.8
Cedar City (CDC)	108.6
Logan (LGU)	109.8
Moab (OAB)	109.8
Provo (PVU)	108.4
Saint George (OZN)	109.8
Salt Lake City (SLC)	116.8

REMOTE COMMUNICATION OUTLETS (RCO'S)

Saint George (SGU)	122.5
Salt Lake City (SLC)	122.2

UHF	
Cedar City (CDC)	255.4
Salt Lake City (SLC)	255.4

EMERGENCY	
Cedar City (CDC)	121.5
Cedar City (CDC)	243.0
Bryce Canyon (BCE)	121.5

NOTE 1: The transfer of frequencies and functions could include short outages. Exact time and dates will be advertised via NOTAM (D)s.

NOTE 2: The Cedar City airport advisory frequency 123.6 mHz will be decommissioned on June 5. The new Common Traffic Advisory Frequency (CTAF) for Cedar City, will be 122.9.

ENROUTE FLIGHT ADVISORY SERVICE (EFAS) OUTLETS

CDC AFSS will have 25 EFAS outlets on frequency 122.0 covering a six state area. In addition there will be one high altitude outlet (Battle Mountain, NV) on frequency 134.825, with five more high altitude outlets planned. Current and forecast high altitude outlets are indicated with an asterisk:

Ashton, ID. (4AS)
Helena, MT. (HLN)
Rome, OR. (REO)
Malad City, ID. (MLD)
Cedar City, UT. (CDC)*
Butte, MT. (BTM)
Big Piney, WY. (BPI)
Delta, UT. (DTA)
Great Falls, MT. (GTF)*

Sunnyside, UT. (4SS)
Judith Mountain, MT. (LWT)
Tonapah, NV. (TPH)

Wilson Creek, NV. (ILC)
Bliss, ID. (GNG)
Missoula, MT. (9UM)
Billings, MT. (BIL)
Squaw Butte, ID. (4EM)*
Delle, UT. (4DL)
Glasgow, MT. (GGW)
Rock Springs, WY. (RKS)
Provo, UT. (PVU)
Kalispell, MT. (FCA)
Battle Mountain, NV. (BAM)*
Francis Peak, UT. (SLC)*
(high altitude only)
Miles City, MT. (MLS)*

PREFLIGHT BRIEFING

Local Cedar City pilots may call 586-3806. All others within Utah dial:

1-800-WX BRIEF (1-800-992-7433)

After calling this toll-free number pilots will receive prerecorded instructions to access the following:

1. Pilot Briefer

2. Pilots Automatic Telephone Answering Service (PATWAS). PATWAS is a continuous recording of meteorlogical and aeronautical information. The PATWAS system has a capability of 24 recordings. Besides providing significant weather information, the PATWAS will be providing aeronautical information such as:

NOTAM D/L Information
Military Training Route Activity
Current FSS Automation Progress
FDC NOTAMS for Utah
High Altitude Reservation System Info

Sunrise/Sunset for the Week
Flight Watch Usage
AFSS Accessing Process
VOR VOICE Radio Usage
TWEB Routes/SA Reports

Automatic Access to PATWAS is limited to those users with touch tone phones. Users calling from Rotary phones will be connected directly to a briefer.

EXPO '86

May 2, 1986, through October 13, 1986

In anticipation of a significant increase of aircraft activity to and from the Vancouver, British Columbia, Canada, area during the 1986 World Exposition, the following flight information is provided to enhance safety and minimize air traffic delays.

BELLINGHAM, WASHINGTON, AREA

The Bellingham area includes the following airports:

Bellingham International (BLI)
Blaine Municipal (WA09)
Lynden (WA33)

Bellingham International is a port of entry and customs services are available from 8 a.m. until 5 p.m., locally and at other times, upon 1 hours advance notice. U.S. Airmen departing Canadian airspace which intend to land and clear Customs at Bellingham International are reminded to annotate their Customs requests in the remarks section of their flight plan. The Customs office telephone number at Bellingham is (206) 734-5463 (local exchange). Responsibility for ensuring Customs notification rests with the pilot.

TEMPORARY FAA BELLINGHAM CONTROL TOWER

The control tower will be operated from 8 a.m. until 8 p.m., daily, from May 1, 1986, through October 25, 1986.

Bellingham frequencies:

Bellingham Tower - 124.9 MHz, 239.25 MHz
Bellingham Ground Control - 121.65 MHz

BELLINGHAM (BLI) AIRPORT TRAFFIC AREA

The Bellingham Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as that airspace within a 5 statute mile radius of the BLI airport up to, but not including, 3,000' AGL excluding that airspace known as the Abbotsford-Bellingham Flight Information area which lies north of the BLI airport. The Abbotsford-Bellingham Flight Information Area is delineated on aeronautical charts.

BELLINGHAM AIRPORT INFORMATION - GENERAL

The Port of Bellingham is the airport sponsor of the airport. The traffic pattern is 1,200' for fixed wing aircraft and 800' for helicopters. The sponsor has a local regulation which prohibits intersection departures at the airport. Abbotsford, British Columbia, Canada, tower provides limited traffic

information service on 119.4 MHz to VFR aircraft operating between 1,500' and 4,000' MSL in an area generally described as between the U.S./Canadian border and Ferndale, and between the shoreline and Highway 9.

VFR FLIGHT PLANS

All pilots are encouraged to file a flight plan. Arriving aircraft should close their flight plans by radio with Bellingham FSS, on 123.6 MHz or 122.3 MHz. If unable, pilots may call the Bellingham FSS at 734-6400 (local exchange) or 1-800-833-0310 upon arrival.

Canadian/U.S. rules require that all aircraft operating VFR must be on a VFR flight plan prior to crossing the Canadian/U.S. border. Airfiles are discouraged and pilots are requested to file their flight plans 1 hour in advance of proposed departure times.

Pilots departing the U.S. from the Bellingham area are reminded that significant differences exist between Canadian and U.S. rules and procedures. Canadian officials have requested all U.S. pilots be cognizant of the requirement that flight plans are mandatory while operating in Canadian airspace.

IFR TRAFFIC

Vancouver Area Control Center (ACC) is the controlling agency for IFR aircraft operating to/from the Bellingham International Airport. Due to the expected increase in the volume of traffic generated by Expo '86, some delays may be encountered for IFR arrival and departure traffic. The Vancouver ACC has requested that U.S. airmen not request VFR/IFR practice ILS Runway 16 approaches to the Bellingham International Airport during Expo '86.

IFR ARRIVALS BLI INTERNATIONAL

Be prepared to discontinue your approach based upon local traffic conditions and enter a VFR traffic pattern for landing sequence. Pilots arriving IFR are requested to be extremely vigilant as the instrument approaches serving the Bellingham International Airport enter an area of high traffic activity in the Abbotsford-Bellingham Flight Information area.

VFR FLIGHT

Aircraft landing in Vancouver, British Columbia, Canada, should be extremely alert while operating in the Vancouver Lower Mainland area. Numerous aerial demonstrations and other aviation related sport activities are planned for Expo '86. The majority of these events will take place in the Vancouver Harbour Central Zone. The following VFR egress/ingress routes are recommended for traffic operating to/from Canadian airspace:

Bellingham (BLI) to Abbotsford (YXX) northbound east of Lynden
Abbotsford (YXX) to Bellingham (BLI) southbound west of Lynden

BLI to Vancouver (YVR) via Interstate 5 (I-5) using right side separation east/west of the highway. Extreme caution should be taken in the vicinity of the Abbotsford Localizer.

U.S. Airmen desiring additional information on Canadian area airports, rules and regulations, and Custom services may request (in writing) an Air Tourist Information Guide which is available without charge from:

Transport Canada (EXPO Guide)
800 Burrard Street
P.O. Box 220
Vancouver, British Columbia, Canada V6Z2J8

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAM's ISSUED BY BOTH THE U.S. AND CANADA PRIOR TO CONDUCTING FLIGHT.

SPECIAL TRAFFIC MANAGEMENT PROGRAM
CAPE COD AND ADJACENT ISLAND AREA AIRPORTS
MAY 15 THROUGH OCTOBER 30, 1986

In anticipation of the large number of aircraft operating to and from the Cape Cod and adjacent Island areas during the period May 15 through October 30, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****
CAPE COD AND ADJACENT ISLAND AREA

For the purpose of this Special Traffic Management Program, the Cape Cod and adjacent Island area includes the following airports:

Hyannis
Barnstable Municipal-Boardman/Polando Field - HYA
Nantucket Memorial Airport - ACK
Martha's Vineyard Airport - MVY

****VFR ENROUTE AND HOLDING****

Pilots are urged to become familiar with VFR holding and reporting points (SEE GRAPHIC).

Arriving aircraft are encouraged to monitor ATIS, where available, and then contact the appropriate tower when 10-15 miles from the airport. Advise receipt of ATIS information on initial contact. Aircraft landing Martha's Vineyard are requested to monitor tower frequency far enough out to obtain and advise the tower on initial contact, "HAVE NUMBERS".

Aircraft enroute Hyannis Airport from Sagamore Bridge, Martha's Vineyard and Cotuit areas should exercise caution due to high density military traffic on IFR approach to runway 23, Otis Air National Guard Base.

Arrival Points	Arrival Direction	Holding Direction
HYANNIS AIRPORT		
Sandy Neck	North	North
Dennis Drive In	Northeast	Northeast
Sagamore Bridge	Northwest	Northwest
Cotuit	West	Southwest
Dennisport	East	Southeast
MARTHA'S VINEYARD AIRPORT		
Woods Hole	North	Northwest
Oak Bluffs	Northeast	East
Bounre Bridge	North	West
Cuttyhunk Island	West	Southwest
Katama Airpark	Southeast	South
NANTUCKET AIRPORT		
Great Point	North	East
Tuckernuck Island	West	Southwest

****IFR ARRIVAL/DEPATRTURE****

Otis Terminal Radar Approach Control (TRACON) may assign a Control Departure Time (CDT) for IFR flights arriving or departing Hyannis, Nantucket or Martha's Vineyard Airports, whenever marginal VFR or IFR weather conditions exist.

Implementation of this part of the Special Traffic Management Program will be by special notice to flight service stations and area airport traffic control towers. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions pilots are encouraged to contact the tower or flight service station, prior to engine start up, to obtain latest information.

To insure the success of this Special Traffic Management Program, aircraft departing Hyannis, New Bedford, Nantucket and Martha's Vineyard Airports are urged to depart within plus or minus 5 minutes of CDT. Departures from other airports should depart within 15 minutes before and not later than 5 minutes after CDT.

****FLIGHT PLANS****

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans may experience extensive delays awaiting integration into the IFR system while this program is in effect.

Commercial operators are requested to file flight plans for extra flight sections no less than 1 hour prior to proposed time of departure.

Pilots are encouraged to cancel VFR flight plans with Bridgeport Flight Service Station by radio. Transmit 122.1 mHz receive on appropriate VOR frequency. If unable to cancel by radio, contact appropriate flight service station by telephone.

Bridgeport FSS (MA & RI)	800-242-2377
(CT)	800-972-2271

DAYTON INTERNATIONAL AIRSHOW AND TRADE EXPOSITION

DAYTON INTERNATIONAL AIRPORT, DAYTON, OHIO

JULY 24-27, 1986

In anticipation of the large number of aircraft traveling to and from the Dayton, Ohio, area during the Dayton International Airshow and Trade Exposition, special air traffic procedures will be used to enhance safety and minimize air traffic delays at Dayton International Airport.

The limited runway availability during this event, coupled with the expected large number of arriving and departing aircraft, may still lead to lengthy delays at Dayton International Airport. Pilots are encouraged to use outlying airports with ground transportation as an alternative.

Aircraft not landing in the Dayton area are requested to avoid overflight below 10,000 feet within a 30 mile radius of Dayton International Airport.

All pilots are encouraged to monitor ATIS on 125.8 MHz for information on the status of operations in the Dayton area. Pilots operating to Dayton International Airport are expected to have the current ATIS information PRIOR TO CONTACTING Dayton Approach Control.

VFR ARRIVAL PROCEDURES: Radar sequencing will be provided to all aircraft landing at Dayton International Airport. Contact Dayton Approach Control on the designated frequency prior to reaching one of the four VFR arrival points (see list and graphic). Aircraft will be sequenced from these points or asked to hold dependent upon traffic volume. We strongly recommend pilots DO NOT PROCEED PAST THESE POINTS without contacting Dayton Approach Control. Pilots are encouraged to be especially alert for frequency assignments.

DAYTON INTERNATIONAL VFR ARRIVAL POINTS	FROM	FREQUENCY
Over Rosewood VOR	NORTH	127.65
Over the City of Springfield (above 4,000)	EAST	118.85
Over the City of Springfield (4,000 & below)	EAST	126.5
Over Dayton General Airport (above 4,000)	SOUTH	118.85
Over Dayton General Airport (4,000 & below)	SOUTH	126.5
Over Dayton VOR	WEST	134.45

Field elevation at Dayton International Airport is 1009 feet MSL.

VFR FLIGHT PLAN CANCELLATION: Arriving VFR aircraft are requested to cancel their flight plans with Dayton FSS via radio on 122.55 MHz and 122.2MHz or transmit on 122.1 MHz and advise over which VOR you are listening:

Dayton --- 114.5   Rosewood - 117.5
Appleton - 116.7   Richmond - 110.6.

(Transcribed weather is also available over the Appleton VOR.)
Specify your flight planned destination when cancelling your flight plan.

TIE-DOWNS: All light aircraft will need to be secured.
BRING YOUR OWN TIE-DOWNS.

VFR DEPARTURE PROCEDURES: (July 26 and 27). Detailed departure instructions will be disseminated at the entry gate to each of the aircraft parking areas. THESE INSTRUCTIONS SHOULD BE CAREFULLY READ AND FOLLOWED. Adherence to these instructions will assist your safety and expedite your departure.

IFR ARRIVAL/DEPARTURE FLIGHTS: The anticipated demand of IFR aircraft does not indicate a need for any special flow control procedures. However, if traffic conditions warrant, a traffic management program to balance the arrival and departure flow of aircraft will be implemented. In that case, pilots would be assigned expected departure clearance times (EDCT's) in advance for both inbound and outbound IFR flights. Should a traffic management program be necessary, pilots may contact the nearest Flight Service Station on or after July 15, 1985 to obtain traffic management program information.

PILOT PRE-FLIGHT BRIEFINGS: The Dayton Flight Service Station is located at Dayton International Airport on the eastern edge of the ramp, adjacent to the military/civilian static display area. Pilots are encouraged to visit the FSS and obtain in-person, pre-flight briefings for both VFR and IFR flights. Telephone briefings are also available by calling 898-3692. If located on the Dayton International Airport, use the local API lines 312 or 313.

For PATWAS, call 898-1033.

In order to expedite your pre-flight briefing, please state the type of flight planned (VFR or IFR), the aircraft number and type (or your last name), departure point, destination, enroute altitude, and estimated time of departure.

WAKE TURBULENCE ADVISORY

Due to the number of large civil and military aircraft operating in the vicinity of Dayton International Airport and Wright-Patterson Air Force Base, pilots should be aware that a significant amount of wake turbulence may exist. Pilots are urged to be vigilant and exercise extreme caution when operating within 30 miles of Dayton.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL
AND DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

COLLEGE PARK AIR SHOW

College Park Airport, MD

In anticipation of the large number of aircraft traveling to and from the College Park Airport, the following procedures will be used to enhance safety and minimize air traffic delays.

NOTE: All times are Eastern Daylight Time (EDT).

TEMPORARY AIR TRAFFIC CONTROL TOWER

A Temporary Tower will be in effect at the College Park Airport during the following times:

July 6, 1986	8:00 AM - 6:00 PM

INBOUND PILOTS call College Park Tower for arrival information during the above times.

TOWER Frequency:	118.7 / 269.2
GROUND Frequency:	119.6

AIRPORT CLOSURE AND RESTRICTIONS

8:00 AM - 1:00 PM	Arrivals ONLY
3:00 PM - 5:00 PM	AIRPORT CLOSED
5:00 PM - 7:00 PM	Departures ONLY

CAUTION ADVISORY

Caution advised in the vicinity of the College Park Airport for numerous aircraft, including many non-radio aircraft.

Aerobatic Demonstration within two (2) NM radius of the airport from surface to 1,400 feet MSL. Call Washington Flight Service, Special Events Page for further information.

ARRIVAL ROUTES. ARRIVING AIRCRAFT.

Aircraft are to remain outside of the Washington Terminal Control Area (TCA). Enter College Park below the floor of the TCA from the Northwest, North, Northeast, or East. Aircraft arriving from the North and Northwest report over Greenbelt at 1400' or below; expect to proceed direct College Park traffic pattern. Aircraft arriving from the East and Northeast report over Bowie at 1400' or below; expect to proceed direct College Park. Aircraft are expected to hold at Greenbelt or Bowie and report to College Park Tower (118.7 / 269.2) for permission to enter the traffic pattern.

DEPARTURE ROUTES. DEPARTING AIRCRAFT.

Departing Aircraft remain outside the Washington TCA. Depart to the Northwest or clockwise to the East and remain below the floor of the TCA until beyond 15 NM from Andrews AFB or Washington National Airport.

WILLIAMSBURG-JAMESTOWN AIRPORT, VIRGINIA
TEMPORARY TOWER

JUNE 29, 1986 and July 4, 1986

Due to the volume of air traffic expected at the Williamsburg-Jamestown Airport (W70) on June 29, 1986 and July 4, 1986, the following procedures have been established to maintain a safe, orderly flow of traffic.

FAA TEMPORARY CONTROL TOWER AT WILLIAMSBURG, VIRGINIA

A temporary control tower will be operated from 0900L thru 1900L on June 29, 1986 and from 0800L thru 1800L on July 4, 1986.

WILLIAMSBURG-JAMESTOWN AIRPORT TRAFFIC AREA

The Williamsburg-Jamestown Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as the airspace within a five statute mile radius of the Williamsburg-Jamestown Airport, up to but not including three thousand feet AGL.

WILLIAMSBURG-JAMESTOWN AIRPORT GENERAL INFORMATION

Williamsburg-Jamestown Airport is a privately owned airport. The operating procedures shown in paragraphs 1 through 9 below, are published by the owner/operator of the airport. The owner/operator is requesting all pilots and aircraft owners using the airport to comply with these procedures. The following procedures will be used to avoid the noise/low flying sensitive residential area, located adjacent to the airport, in the northwest through northeast quadrants.

1. A standard left hand traffic pattern will be used for Runway 31 and a nonstandard right hand traffic pattern will be used for Runway 13.

2. Traffic pattern altitudes are 800 feet AGL for all single engine piston aircraft and 1500 feet AGL for all twin engine and turbine powered aircraft.

3. The calm wind runway (less than five knots) will be Runway 13 for departures and Runway 31 for arrivals, weather and traffic permitting.

4. All pilots will fly their traffic patterns as near to the airport and use an approach power setting as low as safety permits.

5. Runway 13 will be used by all departing aircraft when weather and traffic permit.

6. All departing aircraft will climb at Vx (best angle of climb airspeed) until reaching 400 feet, and then make a 45 degree turn in the proper direction to exit the pattern. (Vy; best rate of climb may be used after the 45 degree turn.)

7. All arriving twin engine and turbine powered aircraft will use Runway 31 when weather and traffic permit.

8. All aircraft will remain at their appropriate traffic pattern altitude until necessary to initiate a descent for a safe landing. In no case will any aircraft descend below the VASI approach slope which is set at 5 degrees.

9. No touch-and-go operations are permitted.

TEMPORARY TOWER PROCEDURES

*****VFR ARRIVALS/DEPARTURES*****

Aircraft landing at the Williamsburg-Jamestown Airport are requested to contact the Williamsburg Tower approximately ten (10) miles from the airport for landing instructions on frequency 120.0. All taxiways and the runway are controlled movement areas. Aircraft on VFR flight plans may close their flight plans by radio with Newport News FSS on frequency 122.65, while airborne, or by telephone at 877-0209 or 1-800-582-1013 (toll free), upon landing.

VFR aircraft departing the Williamsburg-Jamestown Airport are requested to contact Williamsburg Ground Control on 121.6 for departure instructions. All taxiways and the runway are controlled movement areas. Departing aircraft may file flight plans with Newport News FSS by telephone at 877-0209 or 1-800-582-1013.

*****VFR ADVISORY SERVICE*****

Aircraft desiring VFR advisory service may contact Norfolk Approach on frequency 119.45.

*****IFR TRAFFIC*****

Norfolk Approach Control is the controlling facility for IFR traffic operating to/from the Williamsburg-Jamestown Airport. Departing IFR aircraft shall contact Williamsburg Ground Control (121.6) for their ATC clearance. Norfolk Approach will not accept air files. Due to the expected increase in the volume of traffic, some delays may be encountered. Aircraft may file IFR flight plans with Newport News FSS on 877-0209 or 1-800-582-1013. Williamsburg Tower will not be able to file IFR/VFR flight plans. Pilots are encouraged to use Patrick Henry International Airport as an alternate in case delays are encountered due to weather.

GATEWAY ARCH, ST. LOUIS, MISSOURI
(STL VORTAC 143R/18NM)

During the period July 3 through July 6, 1986, caution be advised within a 3 NM radius of the Gateway Arch at altitudes 10,000 feet MSL and below. Aerial activities including skydiving, aerobatics, hot air balloons, blimps, military flybys, and fireworks will be conducted at various times, with July 4 scheduled to have the most activity. Aircraft operating to and from St. Louis Downtown-Parks Airport should avoid entering and exiting the airport traffic area in the Gateway Arch area. St. Louis Downtown-Parks Airport Traffic Control Tower will be in operation from 0700 through 2100 CDT daily and may be contacted on 120.9 MHz. At other times, flights below the St. Louis Terminal Control Area should contact St. Louis Approach Control on 126.7 MHz for the status of activities near the Gateway Arch.

FIRECRACKER 400
DAYTONA BEACH, FLORIDA AREA
JULY 4, 1986

In anticipation of the large number of aircraft traveling to and from the Daytona Beach area for the Firecracker 400, the following procedures will be used to enhance safety and minimize air traffic delays.

Aircraft not landing in the Daytona Beach area are requested to avoid overflight in the Daytona Beach Airport Radar Service Area (ARSA). IFR overflights can expect routing to avoid the Daytona Beach area.

VFR ARRIVALS: Radar sequencing will be provided to aircraft landing at Daytona Beach Regional Airport. Contact Daytona Beach Approach Control on the appropriate frequency at least 15 miles from the Daytona Beach Regional Airport. Aircraft landing at other airports within the Daytona Beach ARSA will be provided radar service. Contact Daytona Beach Approach Control on the appropriate frequency prior to reaching the Daytona Beach ARSA.

IFR AND VFR DEPARTURES: Both IFR and VFR aircraft operating at Daytona Beach Regional Airport may be issued taxi times. BEFORE STARTING YOUR ENGINE, monitor ATIS on 120.05 MHz for the latest information. Please comply with the taxi signs posted near runways. DO NOT CONTACT THE TOWER for departure until you are in the number one position for takeoff, then give your location and runway.

SPECIAL ACTIVITY ALERT AND OPERATIONS OVER THE SPEEDWAY

Aircraft operating in the vicinity of the Daytona International Speedway should remain alert for numerous special aviation activities associated with race events. Activities may include: sky diving, banner towing, helicopter operations, hot air balloons, military fly-bys, and blimps.

Continuous aircraft operations over the speedway will be permitted only with prior approval from Daytona Beach Regional Tower. Approval to operate over the speedway may be obtained from the Daytona Beach Regional Air Traffic Control Tower by telephoning 904/255-3216.

VFR ARRIVAL AIRCRAFT are requested to cancel their flight plans with Orlando FSS via radio on 122.4 (or transmit on 122.1 and receive on Ormond Beach VOR 112.6) and not request Jacksonville Center, Daytona Beach Approach, or Daytona Beach Ground Control to forward the cancellation.

RESTRICTED AREA ADVISORY

Pilots should be aware of the existence of restricted airspace to the south, west, and northwest of Daytona Beach and plan their flights accordingly. These areas may be continuously active or may be intermittently activated by NOTAM. Pilots are cautioned that penetration of Restricted Areas without authorization from the using or controlling agency may be extremely hazardous.

SPECIAL USE AIRSPACE
(Military Operations Area)

Effective July 25-August 3, 1986

1. Gallant Eagle Alpha Temporary MOA, UT [New]

Boundaries. Beginning at lat. 39°00'00"N., long. 113°59'00"W.;
to lat. 39°23'00"N., long. 114°03'00"W.;

thence to point of beginning.

Altitudes. 9,500 feet MSL to, but not including FL 180.

Times of Use. 0530-0200, July 25-August 3, 1986.

Controlling Agency. FAA, Salt Lake City ARTCC.

Using Agency. U.S. Air Force, USCENTAF Battlestaff (USCENTAF/DOJ)
Shaw AFB, SC

ST. LOUIS

NOTICE: JEFFERSON BARRACKS BRIDGE FLIGHT DEMONSTRATION AREA. DURING THE PERIOD 1600 CDT THROUGH 1730 CDT, JULY 4, 1986, AEROBATIC DEMONSTRATION FLIGHTS WILL BE CONDUCTED 27 NM SOUTHEAST OF THE ST. LOUIS VORTAC IN AN AREA BOUNDED BY THE FOLLOWING COORDINATES:

3826.5 N/9016.3 W to 3815.1 N/9006.9 W to
3812.4 N/9016.7 W to 3825.0 N/9018.9 W

VARIOUS TYPES OF AIRCRAFT WILL BE OPERATING IN THIS AREA BETWEEN 2000 FEET MSL AND 7000 FEET MSL. ALL PILOTS ARE CAUTIONED TO AVOID THIS AIRSPACE IF POSSIBLE. PILOTS TRANSITING THE AREA ARE CAUTIONED TO BE ALERT FOR AIRCRAFT MAKING ABRUPT ALTITUDE/COURSE CHANGES.

EXPERIMENTAL AIRCRAFT ASSOCIATION (EAA) CONVENTION
SPECIAL TRAFFIC MANAGEMENT PROGRAM
OSHKOSH, WISCONSIN
JULY 31 THROUGH AUGUST 8, 1986

In anticipation of the large number of aircraft arriving and departing from the Oshkosh area, during the EAA Convention, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily, 0600-2200 CDT (1100-0300 UTC). Chicago Center will assign a Controlled Departure Time (CDT) for unscheduled IFR flights arriving or departing the Oshkosh area.

For the purpose of this Special Traffic Management Program, the Oshkosh area encompasses a 35 nautical mile radius of the Oshkosh VOR and includes the following airports:

Oshkosh, Wittman Field	OSH
Appleton, Outagamie County	ATW
Fon Du Lac County	FLD
Neenah, Brennand	79C
New Holstein	8D1
Waupun	WI07
Winneconne, Courtney Plummer	4D4
Sheboygan County Memorial	SBM

Beginning July 23, 0800-2000 CDT (1300-0100 UTC); and between 0600-2000 CDT (1100-0100 UTC), August 1 daily, CDT's can be obtained from Chicago Center by calling (312) 844-3017.

Adherence to a CDT within a plus or minus 10 period is requested in order to avoid substantial delays.

Chicago Center, Milwaukee, Madison, Rockford, O'Hare, South Bend, Muskegon, and Green Bay Approach Controls will not accept airborne IFR flight plans or provide VFR advisory service during the time this program is in effect, except for emergency situations. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

Pilots are urged to file flight plans at least 4 hours prior to proposed time of departure. Include the CDT in remarks section of the IFR flight plan. Use of one of the following preferred routes to/from the Oshkosh area is encouraged.

IFR PREFERRED ROUTES TO OSHKOSH

1. NORTHEAST
   a. HIC V26 NEROE-MTW-OSH (over water).
   b. MLB-MTW-OSH (over water).

2. EAST
   MKG MKG 296° FAH 113° FAH-OSH (over water).

3. SOUTHEAST
   a. PMM 333° BULLY-FAH-OSH (over water)
   b. OXI V156 EON V128 RFD V63 JVL V177 MSN V341 OSH (around Lake Michigan and Chicago-Metropolitan bypass).

4. SOUTH
   RFD V63 JVL V177 MSN V341 OSH.

5. SOUTHWEST
   DBQ V341 OSH.

6. WEST
   DLL V82 V341 OSH.

7. NORTHWEST
   STE V63 OSH.

8. NORTH
   GRB-MTW-OSH.

IFR PREFERRED ROUTES FROM OSHKOSH (LOW ALTITUDE)

1. Proposed altitude at or above 11,000 feet MSL.
   a. SOUTHEAST - Radar vector-PMM.
   b. SOUTH - BAE-OBK-EON.
   c. SOUTHWEST - MSN-DBQ.

2. Proposed altitude at or below 10,000 feet MSL.
   a. To airports in the Chicago Metropolitan area.
      (1) O'Hare and airports north of O'Hare
      Radar vector ETB-OBK direct.
      (2) Airports west of O'Hare
      V341 MSN-RFD V128 V10 PLANO direct.
      (3) Airports sout of O'Hare
      V341 MSN-RFD V128 V8 JOT V69 BOJAK direct.

b. To other destinations.

(1) East and Southeast.
   (a) OVER WATER - Radar vector HIC-MKG or Radar vector FAH-MKG.
   (b) AROUND LAKE MICHIGAN - V341 MSN-RFD V128 EON V156 OXI.

(2) SOUTH - V341 MSN-RFD V127 OR V9.

(3) SOUTHWEST - V341 DBQ.

(4) WEST - Direct DLL-LNR or Direct DLL V82.

(5) NORTHWEST, NORTH, AND NORTHEAST-Unrestricted.

****IFR ARRIVALS - WITTMAN FIELD****

During periods of increased traffic demands, runway 27 final approach course may extend BEYOND THE LAKE MICHIGAN SHORELINE. Pilots planning to cancel IFR (weather permitting) and execute VFR arrival procedures should do so 25 nautical miles or more from Wittman Field. Pilots continuing IFR until landing should verify IFR cancellation after landing with Oshkosh Ground Control on 119.05 mHz. Verification is necessary due to tower frequency congestion.

****IFR DEPARTURES - WITTMAN FIELD****

DO NOT REQUEST IFR DEPARTURE CLEARANCE UNTIL 20 MINUTES BEFORE ESTIMATED TIME OF DEPARTURE. Prior to engine start, monitor departure ATIS 128.75 mHz then contact ground control, 119.05 mHz, for IFR clearance. DO NOT START ENGINES UNTIL IFR CLEARANCE IS RECEIVED.

After receiving IFR clearance and completing engine start, contact ground control, 119.05 mHz, when ready to taxi to the IFR runway. Remain on ground control frequency and follow direction of signs, EAA flag personnel, and RED IFR TAXI CHART (available at FSS trailer). Place red IFR taxi chart in lower left corner of aircraft windshield to assist ground personnel in segregating VFR and IFR aircraft. Takeoff clearance will be issued by FAA tower controllers using paddles or lighted wands at mobile units. Advise ground control as soon as airborne.

****WITTMAN FIELD - OSHKOSH TOWER****

CONTROL TOWER HOURS OF OPERATION: Oshkosh Airport Traffic Control Tower will operate 24 hours daily July 31 through August 8.

SEE EAA CONVENTION VFR ARRIVAL PROCEDURES GRAPHIC FOR OSHKOSH TOWER FREQUENCIES.

OSHKOSH 1986 EAA CONVENTION

Arrival Procedures

1. Monitor ATIS 125.8 MHz.
2. Enter transition over Ripon.
3. Proceed over the R.R. tracks toward Fisk.
4. Traffic at 100 MPH should fly at 1000 AGL — 1800 MSL. Traffic at 150 MPH should fly 1500 AGL — 2300 MSL.
5. Monitor Oshkosh Approach on 120.7 MHz turning inbound over Ripon.
6. Listen for controller instructions as you approach Fisk. "Traffic to follow, etc.". Controller will use color and type of aircraft at Fisk.

* White strobe beacon atop a camper, thats Fisk.

7. Controller will advise when to call Oshkosh tower on 118.5 MHz or 126.6 MHz.

Note: Dual Local will be used July 31, thru August 2, 1986.

DO NOT GO BEYOND FISK UNTIL APPROVED BY CONTROLLERS ON 120.7 MHz.

8. Oshkosh Ground Control (VFR)	121.9

CANCEL FLIGHT PLANS WITH GRB FSS T-122 1 R OSH VOR 111.8

****WITTMAN FIELD AIRPORT ARRIVALS****

After receiving clearance at Fisk, a request to change to Oshkosh Tower frequency 118.5 mHz or 126.6 mHz will be issued. Stay in trail, follow preceding aircraft and monitor tower communications. Tower controller will refer to aircraft by color and type. Enter final approach at appropriate altitude for type aircraft. After landing, exit the runway into the grass as expeditiously as safely possible.

****REDUCED ARRIVAL AND DEPARTURE SEPARATION STANDARDS****

A waiver has been issued reducing arrival and departure separation standards for group 1 and 2 aircraft (primarily single engine and light twin engine aircraft).

****FLIGHT SERVICE STATION INFORMATION****

GREEN BAY/OSHKOSH FSS

Complete flight services will be provided 24 hours daily through Green Bay FSS.

Pilot Briefing and Flight Planning Services are available by telephoning Green Bay FSS, (800) 322-5552 (Wisconsin only).

A temporary flight service station will be located at Wittman Field to provide Pilot Briefing and Flight Planning Services 0600-2000 CDT (1100-0100 UTC) daily during the EAA Convention.

INBOUND VFR FLIGHTS PLANS TO OSH: Pilots are requested to include an additional 30 minutes to their ETE to allow time for expected delays in landing and parking.

Specify the Oshkosh area airport of intended landing, see first page of this notice.

Cancel flight plans with Green Bay (GRB) FSS approaching airport of intended landing. Advise GRB FSS which VOR or frequency a reply is expected.

OSHKOSH (OSH) VOR		GREEN BAY (GRB) VOR	
TRANSMIT	122.1 mHz	TRANSMIT	122.1 mHz
RECEIVE	111.8 mHz	RECEIVE	117.0 mHz

****WITTMAN FIELD VFR DEPARTURES PRIOR TO DAILY AIR SHOW****

(Set transponder to standby mode or off until 10 minutes after departure.)

RUNWAY 27.	Maintain VFR at or below 500 feet AGL, 1,300 feet MSL, until clear of Wittman Field Airport Traffic Area. Depart on course if heading is 230° clockwise through 040°. If other than the above, depart on these headings until clear of Wittman Field Airport Traffic Area. Caution advised for aircraft landing Runway 27. Aircraft landing Runway 27 will maintain 1,000 feet AGL until north of Runway 27. Departures will maintain 500 feet AGL until clear of inbound traffic and traffic patterns. Southwest departures, caution advised, ultralight aircraft operating at or below 300 feet AGL.
RUNWAY 09	Depart the Oshkosh High Density Area (see graphic) in the northeast quadrant prior to proceeding on course.
RUNWAY 18/36	REQUIRES SPECIAL BRIEFING FROM EAA OFFICIALS.

****WITTMAN FIELD VFR DEPARTURES AFTER DAILY AIR SHOW****

(Set transponder to standby mode or off until 10 minutes after departure.)

RUNWAY 27	Proceed straight out 3 miles, then on course if heading is 230° clockwise through 040°. If other than the above, depart on these headings until clear of Wittman Field Airport Traffic Area.
RUNWAY 09	Depart Oshkosh High Density Area (see graphic) in the northeast quadrant prior to proceeding on course.
RUNWAY 18L	South and East bound.
RUNWAY 18R	South and West bound. Maintain runway heading until 3 miles south. Caution advised due to departures off the parallel runway. Gyrocraft and ultralights operating west of the runway at the southwest corner of the airport.
RUNWAY 36	Depart on course at pilot's discretion if course is a heading 270° clockwise through 130°. If other than the above, depart on these headings until clear of Wittman Field Airport Traffic Area.

VFR arrivals can expect a 30-45 minute delay after the Air Show. Caution VFR aircraft holding southwest of the Wittman Field Airport Traffic Area.

****WITTMAN FIELD WARBIRD ARRIVAL PROCEDURES****

Report over Fon Du Lac, the initial reporting point for all Warbird arrivals, to Oshkosh Tower on 118.5mHz. Report should state Warbird arrival, color, type of aircraft, and position.

EXAMPLE: "Warbird arrival, blue and yellow Wildcat, Fon Du Lac."

Then proceed direct to the island (6 miles southeast of Wittman Field, west shore of Lake Winnebago). Plan to arrive at the island at 2,300 feet MSL at an airspeed of 150 knots. Over the island report to Oshkosh Tower type of aircraft and position.

EXAMPLE: "Blue and yellow Wildcat, Island."

When Runway 27 is active, Oshkosh Tower will direct aircraft to proceed to the approach end of Runway 27, maintain 2,300 feet MSL, not more than 150 knots and orbit right while awaiting landing sequencing.

When Runway 09 is active, Oshkosh Tower will direct aircraft to depart the island on a northwesterly heading, maintain 2,300 feet MSL, not more than 150 knots, to a point 2 miles southwest of Runway 09, orbit left while awaiting landing sequencing. If traffic requires, Oshkosh Tower may direct aircraft to hold (right turns) at the island (south).

MAINTAIN 2,300 FEET MSL AND DO NOT EXCEED 150 KNOTS BETWEEN THE ISLAND AND ORBIT POINT.

Upon arrival at the orbit point and during approach, speed should be reduced in accordance with safe operating procedures.

If landing clearance appears unsafe because of spacing, speed of preceding aircraft, or any other reason, pilot should advise controller and a new sequence will be issued.

When traffic is light, controller may clear aircraft direct from the island for the approach. Orbit over the approach end of the active runway is not required.

AVOID the VFR arrival route southwest of Wittman Field and the NORDO arrival route southeast of Wittman Field.

Warbird Arrival Procedure

Island to Airport
150 knots. 2300 MSL
Fond Du Lac
Fond du Lac to Island
250 knots or slower.
Any altitude

****ARRIVALS DURING HOURS OF DARKNESS****

(See Airport Closing section of this NOTAM)

Aircraft arriving during the hours of darkness must park on the north-ramp (hard surface) until daylight the following day. Pilots are responsible for moving their aircraft to an appropriate grass parking area before noon the day following arrival. Overnight parking or camping in the grass area adjacent to the airport terminal building is not permitted. Aircraft parked in these areas, prior to the air show each day, must be moved before sundown. Limited overnight tie down space is available at the FBO for a nominal charge.

Aircraft ground movement will not be permitted in transient parking or camping areas during the hours of darkness unless accompanied by official ground guides.

****STUDENT PILOT TRAINING****

Student pilot training is not authorized at Wittman Field during the convention period. This includes student solo cross country flights, touch and go landings, and practice instrument approaches.

****WITTMAN FIELD NO RADIO SPECIAL NOTICE****

Pilots flying into Wittman field during the convention period without an operating two way radio are required to place their name, signature, aircraft type, identification number, address and the word "NORDO" on a postcard and mail it to:

Federal Aviation Administration
Airport Traffic Control Tower
P.O. Box 2606
Oshkosh, Wisconsin 54903

Postcards must be received no later than July 30, 1986. Receipt of the postcard by Oshkosh Tower will validate ATC authorization to arrive/depart Wittman Field without a radio. The postcard indicates that all procedures outlined in the NO RADIO ATC authorization section have been read and understood. The completed NO RADIO ATC Authorization must be carried in the aircraft while exercising provisions of this authorization.

NO RADIO OPERATION 1986 EAA CONVENTION

DO NOT MAKE AN APPROACH TO, OR LAND ON ANY RUNWAY WHEN STROBE LIGHT FLASHERS ON TOP OF CONTROL TOWER ARE OPERATING.

REMAIN WELL CLEAR OF ALL DEPARTURE COURSES AND FINAL APPROACH COURSES UNTIL STROBES ARE OFF.

NO RADIO ATC AUTHORIZATION 1986 EAA CONVENTION,
WITTMAN FIELD, OSHKOSH, WI.

DEPARTMENT OF TRANSPORTATION	OSHKOSH TOWER, WITTMAN FIELD
FEDERAL AVIATION ADMINISTRATION	OSHKOSH, WISCONSIN 54903

ATC AUTHORIZATION TO DEVIATE FROM TWO-WAY RADIO COMMUNICATION REQUIREMENTS SPECIFIED IN FAR 91.87(b) FOR ARRIVALS AND DEPARTURES AT THE 1986 EXPERIMENTAL AIRCRAFT ASSOCIATION CONVENTION.

This ATC authorization is issued to:

1. ______________________
Pilot's name and signature

2. ______________________
Date card mailed

3. ______________________
Aircraft ID

This ATC authorization is valid at Wittman Field, Oshkosh, Wisconsin, 1 day prior to and during the 1986 EAA Convention when the following special provisions are adhered to:

No-radio aircraft must use Runways 18R/36L (or when traffic dictates Runways 18L/36R) as the primary runways. The use of any other runways due to extreme wind conditions requires prior approval by Oshkosh Tower (414-235-2360). Be alert for glider, rotorcraft, and ultralight operations on the southwest corner of the airport (west of Runways 18R/36L) from 0700 - 0900 CDT. Pilots must exit the runway into the grass as soon as safety allows.

NO-RADIO ARRIVALS ARE PROHIBITED AFTER 1400 CDT DAILY FROM FRIDAY, AUGUST 1 THROUGH FRIDAY, AUGUST 8.

ATC authorization will be effective under the following:

1. Weather minimums - a ceiling of at least 1,500 feet and visibility 5 miles or better. This does not constitute authorization to enter the control zone if conditions are below basic VFR weather minima.

2. This authorization is not valid if the flashing white strobe light or airport rotating beacon, located on top of the control tower, are illuminated. These lights indicate an emergency, accident, or other traffic conditions exist which precludes no-radio operations. If these lights are on, remain clear of the Airport Traffic Area. When the situation is resolved the lights will be turned off and no-radio operations will resume in accordance with this authorization.

3. Pilots must exercise extreme caution and be alert for other no-radio aircraft landing and making fly-bys (fly-bys or low approaches will only be conducted on Runway 18L/36R by EAA pilots who have been briefed and authorized to conduct such operations). Absolutely NO fly-bys or low approaches will be conducted by any aircraft without an appropriate briefing. There will be NO fly-by pattern on July 31, August 1 and 2.

4. Runway 36L/18R will be used for some of the inbound traffic from Fisk.

5. No-radio aircraft should use 36R/18L if they observe heavy traffic on the parallel runway. When landing 36 right and parking in the area west of the runway, turn left at the second taxiway and look for the flagperson to wave you across Runway 36L. If going to the camping area, plan to roll out to the intersection of Runway 31 and look for the flagperson to direct you. Landing Runway 18L, plan to turn at the first intersection and look for the flagperson for directions to cross Runway 18R. In any case, EXPEDITE yourself clear of the landing runway. Disregard the above 36R/18L procedure from August 3 through August 8, 1986, since the fly-by pattern will be effective. When using Runway 36R/18L, make sure the strobe lights are not flashing. Warbirds may be using Runway 36R/18L for taxiing.

6. ARRIVAL PROCEDURES:

a. Enter the No-Radio pattern at the town of Van Dyne, 8 miles southeast of Wittman Field. Proceed northeast along the east side of the railroad tracks at 1,000' AGL, 1,800' MSL. Check for strobe lights or rotating beacon on top of the tower. If they are off, continue; if they are on, remain clear of the airport traffic area.

b. Visually observe the large orange arrow in the midfield grass area or the traffic in the fly-by traffic pattern to determine the runway in use. Fly-by traffic will be at or below 500' AGL (see illustration). On July 31, August 1, 2, and 3, observe inbound traffic from Fisk to determine the runway in use (18 or 36). Inbound traffic from Fisk (about 5 miles southwest of the field) will be landing on Runway 9/27 and Runway 18R/36L.

c. Enter appropriate downwind or base leg as shown in illustration. Check for the strobe lights or rotating beacon on top of the tower and follow other aircraft in the pattern. Descend to 600' AGL and be alert for fly-by traffic operating at 500' AGL within the Fly-by pattern (see graphic). Rock your wings turning base leg to indicate you intend to land. After sequencing, turn final approach at a safe altitude, considering your type aircraft, then descend and land at pilot's discretion.

******IMPORTANT******

BASE LEG FOR RUNWAY 18 AND CROSSWIND FOR A RUNWAY 36 GO-AROUND MUST BE SOUTH OF AN EAST/WEST LINE THROUGH THE INTERSECTION OF THE CLOSED DIAGONAL RUNWAYS, AND NORTH OF THE EAST/WEST ROAD RUNNING PAST THE CONTROL TOWER, EAST TO THE LAKE SHORE.

DO NOT, REPEAT, DO NOT PROCEED NORTH OF AN EAST/WEST LINE RUNNING THROUGH THE INTERSECTION OF THE CLOSED DIAGONAL RUNWAYS.

NO-RADIO DEPARTURES

Runway 36 traffic will depart southbound from a right downwing leg.

Runway 18 traffic will depart straight out.

ATC Authorization Page 3

****AEROBATICS DEMONSTRATIONS****

Aerobatics flight demonstrations will be conducted daily, August 1 through 8. The Air Show Operations Area is from the surface to 12,000 feet MSL within a 5 nautical mile radius of Wittman Field and will be in effect during the following time periods:

1545-1730 CDT	August 1, 1986
1545-1830 CDT	August 2, 1986
1445-1730 CDT	August 3, 1986
1545-1830 CDT	August 4, 1986
1500-1830 CDT	August 5, 1986
1500-1830 CDT	August 6, 1986
1600-1830 CDT	August 7, 1986
1400-1630 CDT	August 8, 1986

All unscheduled aircraft inbound to Wittman Field, unable to land prior to the above air show times, should land at an outlying airport or remain airborne and clear of the above described Air Show Operations Area. Holding should be in the Fisk holding pattern (see VFR Arrival Procedures graphic), until 30-45 minutes after the air show. Pilots on VFR flight plans are reminded to extend, cancel or change flight plan destination if unable to land Wittman Field.

MONITOR FUEL STATUS CLOSELY.

****AIRPORT MANAGER'S SPECIAL NOTICE****

Runways 4/22 and 13/31 will be closed to landings and takeoffs at least 7 days prior to and throughout the EAA Convention.

All All light, single engine and multi engine aircraft will be required to exit runways and taxi to parking on grass areas on the airport. Hazardous areas will be marked by cones and/or flags. Pilots are cautioned to remain clear of all marked areas. Exercise caution while operating on unimproved or grass areas due to rough ground and signs. Taxi operations on other than paved areas are at pilot's own risk. ALL INCIDENTS OR ACCIDENTS SHOULD BE REPORTED TO AIRPORT MANAGEMENT OR ANY FAA PERSONNEL AS SOON AS POSSIBLE.

Pilots of aircraft requiring hard surfaced parking are requested to make prior arrangements with the Airport Manager, Wittman Field Airport, 525 20th Avenue, Oshkosh, Wisconsin 54901, telephone (414)424-0092.

****AIRPORT CLOSING****

Wittman Field will be closed daily to all VFR/IFR arriving and departing aircraft, 2200-0500 CDT (0300-1000 UTC), July 31 through August 8.

FLIGHT RESTRICTIONS

THE STATUE OF LIBERTY CENTENNIAL CELEBRATION

JULY 2 THROUGH JULY 7, 1986

PURSUANT TO SECTIONS 91.104 AND 91.91(A)(3) OF THE FEDERAL AVIATION REGULATIONS (FAR), FLIGHT IS RESTRICTED, UNLESS OTHERWISE AUTHORIZED BY ATC, IN THE AREA AND DURING THE PERIOD DESCRIBED BELOW TO PROVIDE CONTROLLED ENTRY OF THE AIRSPACE, AND PREVENT UNSAFE CONGESTION OF SIGHT SEEING AIRCRAFT, OVER THE STATUE OF LIBERTY CENTENNIAL CELEBRATION.

THE AFFECTED AREA:

BEGINNING AT THE KENNEDY (JFK) VORTAC 257 DEGREE RADIAL, EIGHT-MILE DME, THENCE CLOCKWISE VIA THE EIGHT-MILE DME ARC TO THE SIX-MILE DME ARC OF THE LAGUARDIA (LGA) VOR;
THENCE CLOCKWISE VIA THE SIX-MILE DME ARC TO THE EASTERN SHORELINE OF THE HUDSON RIVER;
THENCE NORTHEAST VIA THE SHORELINE TO THE GEORGE WASHINGTON BRIDGE;
THENCE WESTWARD VIA THE GEORGE WASHINGTON BRIDGE TO THE WESTERN SHORELINE OF THE HUDSON RIVER;
THENCE DIRECT TO THE THE JFK VORTAC 318 DEGREE RADIAL, SIXTEEN-MILE DME;
THENCE DIRECT TO THE INTERSECTION OF THE JFK 304 DEGREE RADIAL AND THE FOUR-MILE RADIUS ARC OF THE NEWARK AIRPORT;
THENCE CLOCKWISE VIA THE FOUR-MILE RADIUS ARC TO THE JFK 280 DEGREE RADIAL;
THENCE DIRECT TO THE INTERSECTION OF THE COLTS NECK VORTAC (COL) 360 DEGREE RADIAL AND THE TEN-MILE RADIUS ARC OF THE NEWARK AIRPORT;
THENCE COUNTERCLOCKWISE VIA THE TEN-MILE RADIUS ARC TO THE COL 017 DEGREE RADIAL;
THENCE VIA THE COL 017 DEGREE RADIAL TO THE NORTHERN SHORELINE OF THE STATE OF NEW JERSEY;
THENCE EASTWARD VIA THE SHORELINE TO THE INTERSECTION OF ROUTE 36 AND THE GATEWAY NATIONAL PARK;
THENCE DIRECT TO JFK 257 DEGREE RADIAL, EIGHT-MILE DME.

THE EFFECTIVE PERIOD:

JULY 2, 0800 LOCAL TIME, UNTIL 1200 LOCAL TIME ON JULY 7, 1986.

THE AFFECTED ALTITUDES:

WITHIN THE AFFECTED AREA FROM THE SURFACE TO THE FLOOR OF THE NEW YORK TCA.

THE RESTRICTIONS:

1. ONLY THOSE OPERATIONS THAT WOULD OTHERWISE BE PERMITTED UNDER SECTION 91.91(D) WILL BE CONSIDERED FOR ATC AUTHORIZATION TO OPERATE IN THE AFFECTED AREA. FURTHER, ALL OPERATIONS PLANNED UNDER VFR MUST HAVE BEEN PRE-SCREENED BY THE APPROPRIATE SECURITY AGENCY BEFORE ATC WILL GRANT AUTHORIZATION. HOWEVER, THERE WILL BE SOME PERIODS DURING CERTAIN EVENTS ASSOCIATED WITH THE CENTENNIAL CELEBRATION WHEN NO FLIGHTS WILL BE PERMITTED.

2. REQUESTS FOR PRE-SCREENING MUST BE SENT TO:

U.S. NAVAL INVESTIGATIVE SERVICE
90 CHURCH STREET, ROOM 803
NEW YORK, NEW YORK 10007
TELEPHONE 718-834-2777

3. REQUESTS FOR PRE-SCREENING MUST CONTAIN THE FOLLOWING INFORMATION AND BE RECEIVED AT THE ABOVE ADDRESS BY JUNE 20, 1986 IN ORDER FOR CONSIDERATION TO BE GIVEN TO OPERATE IN THE AFFECTED AREA:

- AIRCRAFT REGISTRATION NUMBER.
- AIRCRAFT TYPE AND EQUIPMENT.
- AIRCRAFT COLOR.
- PROPOSED TIME OF ENTRY AND EXIT.
- NAME OF NEWS MEDIA OR ORGANIZATION FOR WHICH THE OPERATION IS BEING CONDUCTED.
- SPECIFIC NAMES OF FLIGHT CREW MEMBERS AND PASSENGERS.

4. ALL AIRCRAFT OPERATIONS MUST BE CONDUCTED UNDER A FLIGHT PLAN. VFR FLIGHT PLANS MAY ONLY BE FILED WITH TETERBORO FLIGHT SERVICE STATION, AND MAY ONLY BE FILED BETWEEN JUNE 26 AND JUNE 30, 1986. NO VFR FLIGHT PLANS FOR OPERATIONS IN THE AFFECTED AREA WILL BE ACCEPTED AFTER 1700 LOCAL, JUNE 30.

5. AIR TRAFFIC CONTROL (ATC) SEPARATION OR TRAFFIC ADVISORY SERVICES WILL NOT BE PROVIDED OUTSIDE THE NEW YORK TCA. RECEIPT OF AN AUTHORIZATION TO OPERATE IN THE AFFECTED AREA DOES NOT CONSTITUTE AUTHORIZATION TO ENTER THE NEW YORK TCA.

6. ALL PILOTS CONDUCTING OPERATIONS UNDER VFR IN THE AFFECTED AREA SHALL SQUAWK THE ASSIGNED TRANSPONDER CODE, MAINTAIN A LISTENING WATCH ON THE RADIO FREQUENCY ASSIGNED BY ATC, AND COMPLY WITH ANY ATC INSTRUCTION.

RELATED AERONAUTICAL INFORMATION:

LETTER TO AIRMEN NO. 86-01, ISSUED BY THE EASTERN REGION AIR TRAFFIC DIVISION, WILL BE REVISED WITH SUPPLEMENTAL INFORMATION REFLECTING THIS NOTAM.

NOTICES TO AIRMEN
CONTENT CRITERIA
Revised 1985

ALL AIRPORTS

TABLE 1

Information Category	Content Criteria
Airports	Abandonments (If currently listed in Airport/Facility Directory), Openings, Closings.
Runways	Openings, Closings, Commissionings, Permanent Closures.

NOTAM D AIRPORTS

TABLE 2

Information Category	Content Criteria
Airport Operating Restriction	CFR, ACR, etc.
Approach Light Systems	Commissionings, Changes, Decommissionings, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).
Control Zones	Hours of Operation (in Local Time).
Displaced Thresholds	Implementation and Changes.
Runways	Ident Changes, Length, Width, Surface Composition Changes.
Runway Light Systems	Commissionings, Changes, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).

NAVAIDS, COMMUNICATIONS, OTHER SERVICES

TABLE 3

Information Category	Content Criteria
Navigational Facilities	Commissionings (including Ident and Frequency), Decommissionings (including Ident and Frequency), Frequency Changes, Changes in Monitoring Facility and/or Status, Restrictions, Outages (with Effective Dates).
Air Traffic Control Towers, Approach Controls	Commissionings (including Frequencies), Hours of Operation, Decommissionings.
Flight Service Stations	Commissionings, Decommissionings, Hours of Operation; Commissionings, Decommissionings of RCO; Changes in Monitoring Status of RCO; Outages of RCO (with Effective Dates).
Weather	AWOS (System and Frequency).

For sale by the Superintendent of Documents, U.S. Government Printing Office Washington, D.C. 20402

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

a. GENERAL

b. AIRWAYS

c. FLIGHT RESTRICTIONS

d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

ABBREVIATIONS

The following abbreviations are those most commonly used within this publication. Other abbreviations may be found in the Contraction Handbook, 7340.1.

Note: An "s" may be added for plural. Abbreviations used in FDC NOTAMs are italicized.

A	
/	and
AAS	Airport Advisory Service
A/C	Approach Control
acft	aircraft
ACR	Air Carrier
ADF	Automatic Direction Finder
AER	Approach End Runway
AGL	above ground level
AIM	Airman's Information Manual
ALS	Approach light system
ALSF-1	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category I Configuration
ALSF-2	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category II Configuration
alt	altitude
altm	altimeter
altn	alternate
ALSTG	altimeter setting
amdt	amendment
apch	approach
apchg	approaching
aprx	approximate
arpt	airport
arr	arrive or arrival
ARSR	Air Route Surveillance Radar
ARTCC	Air Route Traffic Control Center
ASDE	airport surface detection equipment
ASR	Arpt Surveillance Radar
ATC	air traffic control
ATCT	air traffic control tower
ATIS	Automatic Terminal Information Service
avbl	available
awy	airway
B	
BC	back course
bcn	beacon
bcst	broadcast
bldg	building
brg	bearing
btn	between
byd	beyond
C	
cat	category
CFR	crash fire rescue
clnc	clearance
clsd	closed
cmsnd	commissioned
cntr	center
cntrln	centerline
Comlo	Compass locator
const	construction
cpty	capacity
crs	course
ctc	contact
CTLZ	Control Zone
D	
dalgt	daylight
dcmsnd	decommissioned
degs	degrees
dep	depart, departure
DF	direction finder
DH	decision height
DME	UHF standard TACAN compatible distance measuring equipment
dsplcd	displaced
dstc	distance
durg	during
DVFR	Defense Visual Flight Rule
E	
E	east
EFAS	Enroute Flight Advisory Service
elev	elevation
emerg	emergency
equip	equipment
excp	except
F	
FAF	final approach fix
FAR	Federal Aviation Regulation
FDC	Flight Data Center
FI/P	flight information (permanent)
FI/T	flight information (temporary)
FL	Flight Level
FM	from
freq	frequency
FSS	Flight Service Station
ft	feet/foot
G	
govt	government
GS	glide slope
GWT	gross weight
H	
HAA	height above airport
HAT	height above touchdown
HIRL	High intensity Runway Lights
hol	holiday
hwy	highway
I	
IAF	initial approach fix
IAP	initial approach procedure
ident	identification
IF	intermediate fix
IFR	Instrument Flight Rules
IFSS	International Flight Service Station
ILS	instrument landing system
info	information
inop	inoperative
int	intersection
intl	international
intst	intensity
ISMLS	Interim Standard Microwave Landing System
J	
J-bar	jet runway barrier
K	
kHz	kilohertz
L	
L	left (used only to designate rwys) eg. rwy 12L
lat	latitude
lb	pounds (weight)
lctd	located
LDA	Localizer type directional aid
LDIN	Lead-in Lighting System
lgtd	lighted
LMM	compass locator at middle marker ILS
lndg	landing
loc	localizer
LOM	compass locator at outer marker ILS
long	longitude
M	
MAA	maximum authorized altitude
mag	magnetic
maint	maintain, maintenance
MALS	Medium Intensity Approach Light System
MALSR	Medium Intensity Approach Light System with Runway Alignment Indicator Lights
MAP	missed approach point
max	maximum
MCA	minimum crossing altitude
MDA	minimum descent altitude
MEA	minimum enroute IFR altitude
MHz	megahertz
min	minimum or minute
MIRL	Medium Intensity Runway Edge Lights
MLS	Microwave Landing System
MM	middle marker ILS
MOCA	minimum obstruction clearance altitude
MRA	minimum reception altitude
MSA	minimum safe altitude
MSL	mean sea level
muni	municipal
N	
N	north
NA	not authorized
natl	national
navaid	navigational aid
NDB	Non-directional Radio Beacon
NM	nautical mile(s)
NOPT	no procedure turn required
Nr	number
O	
obstn	obstruction
ODALS	Omnidirectional Approach Lighting System
OM	outer marker ILS
oper	operate
opn	operation
orig	original
OTS	Out of Service
ovrn	overrun
P	
PAR	Precision Apch Radar
pat	pattern
permly	permanently
PPR	Prior Permission Required
proc	procedure
Q	
quad	quadrant
R	
R	right (used only to designate rwys) eg. rwy 19R
RAPCON	radar approach control (USAF)
RCAG	Remote Center air/ground
RCLS	Runway Centerline Lights System
RCO	Remote Communications Outlet
rcv	receive
rcvg	receiving
REIL	Runway End Identifier Lights
req	request
RNAV	Area Navigation
RRP	Runway Reference Point
rstrd	restricted
RTS	returned to service
RVR	runway visual range
RVRM	Runway Visual Range Midpoint
RVRT	Runway Visual Range Touchdown
RVRR	Runway Visual Range Rollout
RVV	runway visibility values
rwy	Runway
S	
S	south/snow
SDF	Simplified Directional Facility
sec	second
sfc	surface
SFL	Sequenced Flashing Lights
SI	straight-in approach
SM	statute mile(s)
SR	sunrise
SS	sunset
SSAFL	Simplified Short Approach Lighting System with Sequenced Flashers
SSALS	Simplified Short Approach Lighting System
SSALR	Simplified Short Approach Lighting System with Runway Alignment Indicator Lights
STOL	Short take-off & landing runway
svc	service
T	
T	true (after a bearing)
TAC	Terminal Area Chart
TACAN	UHF navigational facility—omnidirectional course and distance information
TCA	Terminal Control Area
TCH	Threshold Crossing Height
tfc	traffic
thr	threshold
thru	through
tkof	take-off
tmprly	temporarily
tmpry	temporary
TPA	Traffic Pattern Altitude
TRACON	Terminal Radar approach control
tmnl	terminal
TRSA	Terminal Radar Service Area
tsnt	transient
TWEB	transcribed weather bcst
twr	tower
twy	taxiway
U	
UHF	Ultra high frequency
unavbl	unavailable

GENERAL

FDC 6/1601 FI/P HI CORRECT U.S. SECTIONAL CHART HAWAIIAN ISLANDS 34TH EDITION DATED 5 JUN 86... CHANGE BRADSHAW NDB IDENT /BSF/FREQ 348 TO FREQ 339.

FDC 6/1588 OMEGA STATION 'B' LIBERIA TRANSMITTING WITHOUT ITS UNIQUE FREQ 12.6 KHZ.

FDC 6/1300 OMEGA STATION /D/NORTH DAKOTA WILL BE OFF THE AIR FOR ANNUAL MAINTENANCE EFFECTIVE 07 JULY THRU 31 JULY 1200-2300 UTC DAILY.

FDC 6/1087 FDC THE FEDERAL AVIATION ADMINISTRATION HAS PARTICIPATED IN GOVERNMENT ACTIVITIES TO ASSESS AVIATION PROBLEMS WHICH MIGHT OCCUR AS A RESULT OF THE SOVIET NUCLEAR ACCIDENT. NONE OF THE DATA WE HAVE SEEN PROVIDES ANY CONCERN FOR ANY FLIGHTS OF ANY U.S. CARRIERS ANYWHERE IN THE WORLD. THE ONLY AREA WE WOULD BE POTENTIALLY CONCERNED ABOUT IS FLIGHT IN THE VICINITY OF THE REACTOR SITE NEAR KIEV AT ALTITUDES BELOW 30,000 FEET. FLIGHT ABOVE 30,000 FEET AT THIS LOCATION NEAR KIEV OR OTHER FLIGHTS AT ANY ALTITUDE ANYWHERE IN THE WORLD IS NOT EXPECTED TO PRESENT ANY PUBLIC HEALTH OR SAFETY PROBLEMS DUE TO RADIATION CONTAMINATION WHICH MIGHT EXIST AS A RESULT OF THE ACCIDENT. THERE IS NO REASON FOR SPECIAL FLIGHT PRECAUTIONS. NO FURTHER NOTIFICATIONS ON THIS SUBJECT ARE PLANNED.

FDC 6/896 U.S. CUSTOMS REGULATORY CHANGES. AIRCRAFT PENETRATING THE INNER ADIZ FM ANYWHERE IN THE WESTERN HEMISPHERE SOUTH OF THE U.S. MEXICAN BORDER, SOUTH OF 33 DEG NORTH LATITUDE ON THE PACIFIC COAST, SOUTH OF 30 DEGREES NORTH LATITUDE ON THE ATLANTIC COAST, OR SOUTH OF THE INNER ADIZ ON THE GULF COAST, MUST PROVIDE U.S. CUSTOMS AT LEAST ON EHOUR ADVANCE NOTICE OF PENETRATION OF U.S. AIRSPACE, EFFECTIVE APRIL 30. THIS REQUIREMENT WILL BE EXTENDED TO AIRCRAFT THAT HAVE NOT LANDED IN A FOREIGN PLACE AND AIRCRAFT FROM PUERTO RICO THAT ARE NOT FLYING UNDER IFR FLIGHT RULES. FILING A FLIGHT PLAN WITH THE NOTATION "ADCUS" WITH THE U.S. FAA AT LEAST ONE HOUR IN ADVANCE OF PENETRATION OF THE ADIZ WILL SATISFY THIS REQUIREMENT. CONTRACTING U.S. CUSTOMS AT 305-536-6591, MIAMI, FL, OR 714-351-6674, RIVERSIDE, CA, AT LEAST ONE HOUR IN ADVANCE WILL ALSO MEET THE REQUIREMENT. LANDING AND INSPECTION REQUIREMENTS FOR AIRCRAFT ARRIVING FROM FOREIGN PLACES REMAIN UNCHANGED.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 18TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM, /AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7606/CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF

OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED. NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

* Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

* Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

* Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective June 5, 1986.

Albuquerque International Airport, NM
Greater Cincinnati International Airport, KY
Indianapolis International Airport, IN
Phoenix Sky Harbor International Airport, AZ
Tucson International Airport, AZ
Davis-Monthan Air Force Base, AZ
Wichita Mid-Continent Airport, KS

An ARSA has been designated at the following airport to be effective July 3, 1986.

Dallas Love Field, Texas

An ARSA has been designated at the following airport to be effective July 31, 1986.

Lafayette Regional Airport, LA

SPECIAL USE AIRSPACE
(Military Operations Area)

Effective July 25-August 3, 1986

1. Gallant Eagle 86 Area A Temporary MOA, CA [New]

Boundaries. Beginning at lat. 34°40'30"N., long. 116°29'30"W.;
to lat. 34°36'00"N., long. 116°34'00"W.;
to lat. 34°14'00"N., long. 116°19'00"W.;
to lat. 34°14'00"N., long. 116°17'00"W.;
to lat. 34°30'00"N., long. 116°26'30"W.;
to lat. 34°36'00"N., long. 116°28'00"W.;
thence to point of beginning.

Altitudes. 1,000 feet AGL to, but not including, FL 180.

Times of Use. Continuous July 25-August 3, 1986.

Controlling Agency. FAA, Los Angeles ARTCC.

Using Agency. U.S. Air Force, USCENTAF Battlestaff (USCENTAF/DOJ)
Shaw AFB, SC

2. Gallant Eagle 86 Area B Temporary MOA, CA [New]

Boundaries. Beginning at lat. 34°14'00"N., long. 116°19'00"W.;
to lat. 34°14'00"N., long. 115°44'00"W.;
to lat. 34°08'00"N., long. 115°53'00"W.;
to lat. 34°03'00"N., long. 116°11'00"W.;
thence to the point of beginning.

Altitudes. 5,000 feet MSL to 11,000 feet MSL.

Times of Use. Continuous July 25-August 3, 1986.

Controlling Agency. FAA, Los Angeles ARTCC.

Using Agency. U.S. Air Force, USCENTAF Battlestaff (USCENTAF/DOJ)
Shaw AFB, SC

3. Gallant Eagle 86 Daggett Corridor Temporary MOA, CA [New]

Boundaries. Beginning at lat. 35°39'00"N., long. 115°53'00"W.;
to lat. 34°34'21"N., long. 115°53'00"W.;
to lat. 34°35'30"N., long. 115°58'00"W.;
to lat. 34°41'00"N., long. 116°03'00"W.;
to lat. 34°43'00"N., long. 116°17'00"W.;
to lat. 34°43'00"N., long. 116°26'20"W.;
to lat. 34°36'00"N., long. 116°34'00"W.;
to lat. 34°38'00"N., long. 116°35'30"W.;
to lat. 35°19'00"N., long. 116°18'30"W.;
thence to point of beginning.

Altitudes. 100 feet AGL to 7,500 feet MSL.

Times of Use. 0500 to 0200 local time, July 25-August 3, 1986.

Controlling Agency. FAA, Los Angeles ARTCC.

Using Agency. U.S. Air Force, USCENTAF Battlestaff (USCENTAF/DOJ)
Shaw AFB, SC

TERMINAL AREA GRAPHIC NOTICE
(NOT TO BE USED FOR NAVIGATION)

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

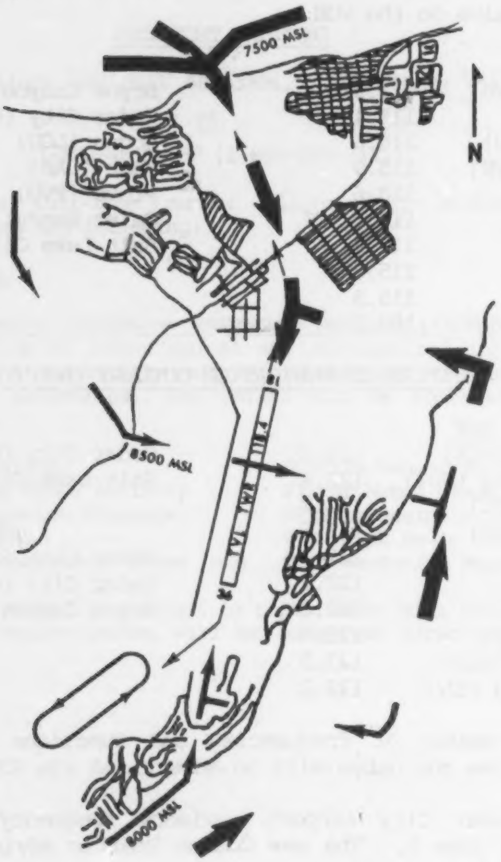
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: **ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.**

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



CEDAR CITY, UTAH, AUTOMATED FLIGHT SERVICE STATION

The Cedar City, Utah, Automated Flight Service Station (AFSS will commission on June 5, 1986. All services now provided by the Cedar City Flight Service Station (FSS) will be transferred to the AFSS at that time. On that same day, the AFSS will also assume control of most of the enroute flight advisory service (EFAS) outlets now remoted to Salt Lake flight Service Station. The remaining EFAS, remote communications outlet (RCO), and very-high omni (VOR) voice frequencies now controlled by SLC FSS will be gradually transferred to Cedar City AFSS, as well as all eastern Utah facilities now controlled by Grand Junction, Colorado, Flight Service Station.

Area Served: The Cedar City AFSS's geographic area of responsibility is the state of Utah for all services except EFAS. The EFAS area of rsponsibility covers a six-state area (see below).

RADIO AIDS

A. Navigational aids with voice capability, (pilots transmit on 122.1 and receive on the VOR frequency.)

Bonneville (BVL)	112.3
Delta (DTA)	116.1
Fairfield (FFU)	116.6
Hanksville (HVE)	115.9
Lucin (LCU)	113.6
Milford (MLF)	112.1
Myton (MTU)	117.9
Ogden (OGD)	115.7
Price (PUC)	115.5
Vernal (VEL)	108.2

B. VOR navigational aids with no voice capability.

Bryce Canyon (BCE)	112.8
Cedar City (CDC)	108.6
Logan (LGU)	109.8
Moab (OAB)	109.8
Provo (PVU)	108.4
Saint George (OZN)	109.8
Salt Lake City (SLC)	116.8

Delle (4DL)	122.2
Francis Peak	122.2
Moab (OAB)	122.3
Richfield (RIF)	122.5
Saint George (SGU)	122.5
Salt Lake City (SLC)	122.2

UHF	
Cedar City (CDC)	255.4
Salt Lake City (SLC)	255.4

EMERGENCY	
Cedar City (CDC)	121.5
Cedar City (CDC)	243.0
Bryce Canyon (BCE)	121.5

NOTE 1: The transfer of frequencies and functions could include short outages. Exact time and dates will be advertised via NOTAM (D)s.

NOTE 2: The Cedar City airport advisory frequency 123.6 mHz will be decommissioned on June 5. The new Common Traffic Advisory Frequency (CTAF) for Cedar City, will be 122.9.

ENROUTE FLIGHT ADVISORY SERVICE (EFAS) OUTLETS

CDC AFSS will have 25 EFAS outlets on frequency 122.0 covering a six state area. In addition there will be one high altitude outlet (Battle Mountain, NV) on frequency 134.825, with five more high altitude outlets planned. Current and forecast high altitude outlets are indicated with an asterisk:

Ashton, ID. (4AS)
Helena, MT. (HLN)
Rome, OR. (REO)
Malad City, ID. (MLD)
Cedar City, UT. (CDC)*

Tonapah, NV. (TPH)

Wilson Creek, NV. (ILC)
Bliss, ID. (GNG)
Missoula, MT. (9UM)
Billings, MT. (BIL)
Squaw Butte, ID. (4EM)*
Delle,UT. (4DL)
Glasgow, MT. (GGW)
Rock Springs, WY. (RKS)
Provo, UT. (PVU)
Kalispell, MT. (FCA)
Battle Mountain, NV. (BAM)*
Francis Peak, UT. (SLC)*
(high altitude only)
Miles City, MT.(MLS)*

PREFLIGHT BRIEFING

Local Cedar City pilots may call 586-3806. All others within Utah dial:

1-800-WX BRIEF (1-800-992-7433)

After calling this toll-free number pilots will receive prerecorded instructions to access the following:

1. Pilot Briefer

2. Pilots Automatic Telephone Answering Service (PATWAS). PATWAS is a continuous recording of meteorlogical and aeronautical information. The PATWAS system has a capability of 24 recordings. Besides providing significant weather information, the PATWAS will be providing aeronautical information such as:

NOTAM D/L Information
Military Training Route Activity
Current FSS Automation Progress
FDC NOTAMS for Utah
High Altitude Reservation System Info

Sunrise/Sunset for the Week
Flight Watch Usage
AFSS Accessing Process
VOR VOICE Radio Usage
TWEB Routes/SA Reports

Automatic Access to PATWAS is limited to those users with touch tone phones. Users calling from Rotary phones will be connected directly to a briefer.

EXPO '86

May 2, 1986, through October 13, 1986

In anticipation of a significant increase of aircraft activity to and from the Vancouver, British Columbia, Canada, area during the 1986 World Exposition, the following flight information is provided to enhance safety and minimize air traffic delays.

BELLINGHAM, WASHINGTON, AREA

The Bellingham area includes the following airports:

Bellingham International (BLI)
Blaine Municipal (WA09)
Lynden (WA33)

Bellingham International is a port of entry and customs services are available from 8 a.m. until 5 p.m., locally and at other times, upon 1 hours advance notice. U.S. Airmen departing Canadian airspace which intend to land and clear Customs at Bellingham International are reminded to annotate their Customs requests in the remarks section of their flight plan. The Customs office telephone number at Bellingham is (206) 734-5463 (local exchange). Responsibility for ensuring Customs notification rests with the pilot.

TEMPORARY FAA BELLINGHAM CONTROL TOWER

The control tower will be operated from 8 a.m. until 8 p.m., daily, from May 1, 1986, through October 25, 1986.

Bellingham frequencies:

Bellingham Tower - 124.9 MHz, 239.25 MHz
Bellingham Ground Control - 121.65 MHz

BELLINGHAM (BLI) AIRPORT TRAFFIC AREA

The Bellingham Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as that airspace within a 5 statute mile radius of the BLI airport up to, but not including, 3,000' AGL excluding that airspace known as the Abbotsford-Bellingham Flight Information area which lies north of the BLI airport. The Abbotsford-Bellingham Flight Information Area is delineated on aeronautical charts.

BELLINGHAM AIRPORT INFORMATION - GENERAL

The Port of Bellingham is the airport sponsor of the airport. The traffic pattern is 1,200' for fixed wing aircraft and 800' for helicopters. The sponsor has a local regulation which prohibits intersection departures at the airport. Abbotsford, British Columbia, Canada, tower provides limited traffic

information service on 119.4 MHz to VFR aircraft operating between 1,500' and 4,000' MSL in an area generally described as between the U.S./Canadian border and Ferndale, and between the shoreline and Highway 9.

VFR FLIGHT PLANS

All pilots are encouraged to file a flight plan. Arriving aircraft should close their flight plans by radio with Bellingham FSS, on 123.6 MHz or 122.3 MHz. If unable, pilots may call the Bellingham FSS at 734-6400 (local exchange) or 1-800-833-0310 upon arrival.

Canadian/U.S. rules require that all aircraft operating VFR must be on a VFR flight plan prior to crossing the Canadian/U.S. border. Airfiles are discouraged and pilots are requested to file their flight plans 1 hour in advance of proposed departure times.

Pilots departing the U.S. from the Bellingham area are reminded that significant differences exist between Canadian and U.S. rules and procedures. Canadian officials have requested all U.S. pilots be cognizant of the requirement that flight plans are mandatory while operating in Canadian airspace.

IFR TRAFFIC

Vancouver Area Control Center (ACC) is the controlling agency for IFR aircraft operating to/from the Bellingham International Airport. Due to the expected increase in the volume of traffic generated by Expo '86, some delays may be encountered for IFR arrival and departure traffic. The Vancouver ACC has requested that U.S. airmen not request VFR/IFR practice ILS Runway 16 approaches to the Bellingham International Airport during Expo '86.

IFR ARRIVALS BLI INTERNATIONAL

Be prepared to discontinue your approach based upon local traffic conditions and enter a VFR traffic pattern for landing sequence. Pilots arriving IFR are requested to be extremely vigilant as the instrument approaches serving the Bellingham International Airport enter an area of high traffic activity in the Abbotsford-Bellingham Flight Information area.

VFR FLIGHT

Aircraft landing in Vancouver, British Columbia, Canada, should be extremely alert while operating in the Vancouver Lower Mainland area. Numerous aerial demonstrations and other aviation related sport activities are planned for Expo '86. The majority of these events will take place in the Vancouver Harbour Central Zone. The following VFR egress/ingress routes are recommended for traffic operating to/from Canadian airspace:

Bellingham (BLI) to Abbotsford (YXX) northbound east of Lynden
Abbotsford (YXX) to Bellingham (BLI) southbound west of Lynden

BLI to Vancouver (YVR) via Interstate 5 (I-5) using right side separation east/west of the highway. Extreme caution should be taken in the vicinity of the Abbotsford Localizer.

U.S. Airmen desiring additional information on Canadian area airports, rules and regulations, and Custom services may request (in writing) an Air Tourist Information Guide which is available without charge from:

Transport Canada (EXPO Guide)
800 Burrard Street
P.O. Box 220
Vancouver, British Columbia, Canada V6Z2JB

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAM's ISSUED BY BOTH THE U.S. AND CANADA PRIOR TO CONDUCTING FLIGHT.

SPECIAL TRAFFIC MANAGEMENT PROGRAM
CAPE COD AND ADJACENT ISLAND AREA AIRPORTS
MAY 15 THROUGH OCTOBER 30, 1986

In anticipation of the large number of aircraft operating to and from the Cape Cod and adjacent Island areas during the period May 15 through October 30, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****
CAPE COD AND ADJACENT ISLAND AREA

For the purpose of this Special Traffic Management Program, the Cape Cod and adjacent Island area includes the following airports:

Hyannis
    Barnstable Municipal-Boardman/Polando Field - HYA
Nantucket Memorial Airport - ACK
Martha's Vineyard Airport - MVY

****VFR ENROUTE AND HOLDING****

Pilots are urged to become familiar with VFR holding and reporting points (SEE GRAPHIC).

Arriving aircraft are encouraged to monitor ATIS, where available, and then contact the appropriate tower when 10-15 miles from the airport. Advise receipt of ATIS information on initial contact. Aircraft landing Martha's Vineyard are requested to monitor tower frequency far enough out to obtain and advise the tower on initial contact, "HAVE NUMBERS".

Aircraft enroute Hyannis Airport from Sagamore Bridge, Martha's Vineyard and Cotuit areas should exercise caution due to high density military traffic on IFR approach to runway 23, Otis Air National Guard Base.

Arrival Points	Arrival Direction	Holding Direction
HYANNIS AIRPORT		
Sandy Neck	North	North
Dennis Drive In	Northeast	Northeast
Sagamore Bridge	Northwest	Northwest
Cotuit	West	Southwest
Dennisport	East	Southeast
MARTHA'S VINEYARD AIRPORT		
Woods Hole	North	Northwest
Oak Bluffs	Northeast	East
Bounre Bridge	North	West
Cuttyhunk Island	West	Southwest
Katama Airpark	Southeast	South
NANTUCKET AIRPORT		
Great Point	North	East
Tuckernuck Island	West	Southwest

****IFR ARRIVAL/DEPATRTURE****

Otis Terminal Radar Approach Control (TRACON) may assign a Control Departure Time (CDT) for IFR flights arriving or departing Hyannis, Nantucket or Martha's Vineyard Airports, whenever marginal VFR or IFR weather conditions exist.

Implementation of this part of the Special Traffic Management Program will be by special notice to flight service stations and area airport traffic control towers. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions pilots are encouraged to contact the tower or flight service station, prior to engine start up, to obtain latest information.

To insure the success of this Special Traffic Management Program, aircraft departing Hyannis, New Bedford, Nantucket and Martha's Vineyard Airports are urged to depart within plus or minus 5 minutes of CDT. Departures from other airports should depart within 15 minutes before and not later than 5 minutes after CDT.

****FLIGHT PLANS****

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans may experience extensive delays awaiting integration into the IFR system while this program is in effect.

Commercial operators are requested to file flight plans for extra flight sections no less than 1 hour prior to proposed time of departure.

Pilots are encouraged to cancel VFR flight plans with Bridgeport Flight Service Station by radio. Transmit 122.1 mHz receive on appropriate VOR frequency. If unable to cancel by radio, contact appropriate flight service station by telephone.

Bridgeport FSS (MA & RI)	800-242-2377

DAYTON INTERNATIONAL AIRSHOW AND TRADE EXPOSITION

DAYTON INTERNATIONAL AIRPORT, DAYTON, OHIO

JULY 24-27, 1986

In anticipation of the large number of aircraft traveling to and from the Dayton, Ohio area during the Dayton International Airshow and Trade Exposition, special air traffic procedures will be used to enhance safety and minimize air traffic delays at Dayton International Airport.

The limited runway availability during this event, coupled with the expected large number of arriving and departing aircraft, may still lead to lengthy delays at Dayton International Airport. Pilots are encouraged to use outlying airports with ground transportation as an alternative.

Aircraft not landing in the Dayton area are requested to avoid overflight below 10,000 feet within a 30 mile radius of Dayton International Airport.

All pilots are encouraged to monitor ATIS on 125.8 MHz for information on the status of operations in the Dayton area. Pilots operating to Dayton International Airport are expected to have the current ATIS information PRIOR TO CONTACTING Dayton Approach Control.

VFR ARRIVAL PROCEDURES: Radar sequencing will be provided to all aircraft landing at Dayton International Airport. Contact Dayton Approach Control on the designated frequency prior to reaching one of the four VFR arrival points (see list and graphic). Aircraft will be sequenced from these points or asked to hold dependent upon traffic volume. We strongly recommend pilots DO NOT PROCEED PAST THESE POINTS without contacting Dayton Approach Control. Pilots are encouraged to be especially alert for frequency assignments.

DAYTON INTERNATIONAL VFR ARRIVAL POINTS	FROM	FREQUENCY
Over Rosewood VOR	NORTH	127.65
Over the City of Springfield (above 4,000)	EAST	118.85
Over the City of Springfield (4,000 & below)	EAST	126.5
Over Dayton General Airport (above 4,000)	SOUTH	118.85
Over Dayton General Airport (4,000 & below)	SOUTH	126.5
Over Dayton VOR	WEST	134.45

Field elevation at Dayton International Airport is 1009 feet MSL.

VFR FLIGHT PLAN CANCELLATION: Arriving VFR aircraft are requested to cancel their flight plans with Dayton FSS via radio on 122.55 MHz and 122.2MHz or transmit on 122.1 MHz and advise over which VOR you are listening:

Dayton - 114.5
Appleton - 116.7
Allen County - 108.4
Rosewood - 117.5
Yellow Bud - 112.5

(Transcribed weather is also available over the Appleton VOR.)
Specify your flight planned destination when cancelling your flight plan.

TIE-DOWNS: All light aircraft will need to be secured.
BRING YOUR OWN TIE-DOWNS.

VFR DEPARTURE PROCEDURES: (July 26 and 27th) Detailed departure instructions will be disseminated at the entry gate to each of the aircraft parking areas. THESE INSTRUCIONS SHOULD BE CAREFULLY READ AND FOLLOWED. Adherence to these instructions will assist your safety and expedite your departure.

IFR ARRIVAL/DEPARTURE FLIGHTS: The anticipated demand of IFR aircraft does not indicate a need for any special flow control procedures. However, if traffic conditions warrant, a traffic management program to balance the arrival and departure flow of aircraft will be implemented. In that case, pilots would be assigned expected departure clearance times (EDCT's) in advance for both inbound and outbound IFR flights. Should a traffic management program be necessary, pilots may contact the nearest Flight Service Station on or after July 15, 1986 to obtain traffic management program information.

PILOT PRE-FLIGHT BRIEFINGS: The Dayton Flight Service Station is located at Dayton International Airport on the eastern edge of the ramp, adjacent to the military/civilian static display area. Pilots are encouraged to visit the FSS and obtain in-person, pre-flight briefings for both VFR and IFR flights and PATWAS information which is available by calling 898-3692. If located on the Dayton International Airport, use the local API lines 312 or 313.

In order to expedite your pre-flight briefing, please state the aircraft identification, VFR or IFR, aircraft type, airspeed, departure point, proposed time, altutude, route of flight, destination, time enroute, fuel on board, alternate airport, pilot information, number on board, and color of aircraft.

WAKE TURBULENCE ADVISORY

Due to the number of large civil and military aircraft operating in the vicinity of Dayton International Airport and Wright-Patterson Air Force Base, pilots should be aware that a significant amount of wake turbulence may exist. Pilots are urged to be vigilant and exercise extreme caution when operating within 30 miles of Dayton.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL AND DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

Controlling Agency. FAA, Salt Lake City ARTCC.

Using Agency. U.S. Air Force, USCENTAF Battlestaff (USCENTAF/DOJ) Shaw AFB, SC

EXPERIMENTAL AIRCRAFT ASSOCIATION (EAA) CONVENTION
SPECIAL TRAFFIC MANAGEMENT PROGRAM
OSHKOSH, WISCONSIN
JULY 31 THROUGH AUGUST 8, 1986

In anticipation of the large number of aircraft arriving and departing from the Oshkosh area, during the EAA Convention, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily, 0600-2200 CDT (1100-0300 UTC). Chicago Center will assign a Controlled Departure Time (CDT) for unscheduled IFR flights arriving or departing the Oshkosh area.

For the purpose of this Special Traffic Management Program, the Oshkosh area encompasses a 35 nautical mile radius of the Oshkosh VOR and includes the following airports:

Oshkosh, Wittman Field	OSH
Appleton, Outagamie County	ATW
Fon Du Lac County	FLD
Neenah, Brennand	79C
New Holstein	8D1
Waupun	WI07
Winneconne, Courtney Plummer	4D4
Sheboygan County Memorial	SBM

Beginning July 23, 0800-2000 CDT (1300-0100 UTC); and between 0600-2000 CDT (1100-0100 UTC), August 1 daily, CDT's can be obtained from Chicago Center by calling (312) 844-3017.

Adherence to a CDT within a plus or minus 10 period is requested in order to avoid substantial delays.

Chicago Center, Milwaukee, Madison, Rockford, O'Hare, South Bend, Muskegon, and Green Bay Approach Controls will not accept airborne IFR flight plans or provide VFR advisory service during the time this program is in effect, except for emergency situations. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

Pilots are urged to file flight plans at least 4 hours prior to proposed time of departure. Include the CDT in remarks section of the IFR flight plan. Use of one of the following preferred routes to/from the Oshkosh area is encouraged.

IFR PREFERRED ROUTES TO OSHKOSH

1. NORTHEAST
   a. HIC V26 NEROE-MTW-OSH (over water).
   b. MLB-MTW-OSH (over water).

2. EAST
   MKG MKG 296° FAH 113° FAH-OSH (over water).

3. SOUTHEAST
   a. PMM 333° BULLY-FAH-OSH (over water)
   b. OXI V156 EON V128 RFD V63 JVL V177 MSN V341 OSH (around Lake Michigan and Chicago-Metropolitan bypass).

4. SOUTH
   RFD V63 JVL V177 MSN V341 OSH.

5. SOUTHWEST
   DBQ V341 OSH.

6. WEST
   DLL V82 V341 OSH.

7. NORTHWEST
   STE V63 OSH.

8. NORTH
   GRB-MTW-OSH.

IFR PREFERRED ROUTES FROM OSHKOSH (LOW ALTITUDE)

1. Proposed altitude at or above 11,000 feet MSL.
   a. SOUTHEAST - Radar vector-PMM.
   b. SOUTH - BAE-OBK-EON.
   c. SOUTHWEST - MSN-DBQ.

2. Proposed altitude at or below 10,000 feet MSL.
   a. To airports in the Chicago Metropolitan area.
      (1) O'Hare and airports north of O'Hare
      Radar vector ETB-OBK direct.
      (2) Airports west of O'Hare
      V341 MSN-RFD V128 V10 PLANO direct.
      (3) Airports sout of O'Hare
      V341 MSN-RFD V128 V8 JOT V69 BOJAK direct.

b. To other destinations.

(1) East and Southeast.
    (a) OVER WATER - Radar vector HIC-MKG or Radar vector FAH-MKG.
    (b) AROUND LAKE MICHIGAN - V341 MSN-RFD V128 EON V156 OXI.

(2) SOUTH - V341 MSN-RFD V127 OR V9.

(3) SOUTHWEST - V341 DBQ.

(4) WEST - Direct DLL-LNR or Direct DLL V82.

(5) NORTHWEST, NORTH, AND NORTHEAST-Unrestricted.

****IFR ARRIVALS - WITTMAN FIELD****

During periods of increased traffic demands, runway 27 final approach course may extend BEYOND THE LAKE MICHIGAN SHORELINE. Pilots planning to cancel IFR (weather permitting) and execute VFR arrival procedures should do so 25 nautical miles or more from Wittman Field. Pilots continuing IFR until landing should verify IFR cancellation after landing with Oshkosh Ground Control on 119.05 mHz. Verification is necessary due to tower frequency congestion.

****IFR DEPARTURES - WITTMAN FIELD****

DO NOT REQUEST IFR DEPARTURE CLEARANCE UNTIL 20 MINUTES BEFORE ESTIMATED TIME OF DEPARTURE. Prior to engine start, monitor departure ATIS 128.75 mHz then contact ground control, 119.05 mHz, for IFR clearance. DO NOT START ENGINES UNTIL IFR CLEARANCE IS RECEIVED.

After receiving IFR clearance and completing engine start, contact ground control, 119.05 mHz, when ready to taxi to the IFR runway. Remain on ground control frequency and follow direction of signs, EAA flag personnel, and RED IFR TAXI CHART (available at FSS trailer). Place red IFR taxi chart in lower left corner of aircraft windshield to assist ground personnel in segregating VFR and IFR aircraft. Takeoff clearance will be issued by FAA tower controllers using paddles or lighted wands at mobile units. Advise ground control as soon as airborne.

****WITTMAN FIELD - OSHKOSH TOWER****

CONTROL TOWER HOURS OF OPERATION: Oshkosh Airport Traffic Control Tower will operate 24 hours daily July 31 through August 8.

SEE EAA CONVENTION VFR ARRIVAL PROCEDURES GRAPHIC FOR OSHKOSH TOWER FREQUENCIES.

Arrival Procedures

1. Monitor ATIS 125.8 MHz.
2. Enter transition over Ripon.
3. Proceed over the R.R. tracks toward Fisk.
4. Traffic at 100 MPH should fly at 1000 AGL — 1800 MSL. Traffic at 150 MPH should fly 1500 AGL — 2300 MSL.
5. Monitor Oshkosh Approach on 120.7 MHz turning inbound over Ripon.
6. Listen for controller instructions as you approach Fisk. "Traffic to follow, etc.". Controller will use color and type of aircraft at Fisk.

* White strobe beacon atop a camper, thats Fisk.

7. Controller will advise when to call Oshkosh tower on 118.5 MHz or 126.6 MHz.

Note: Dual Local will be used July 31, thru August 2, 1986.

DO NOT GO BEYOND FISK UNTIL APPROVED BY CONTROLLERS ON 120.7 MHz.

CANCEL FLIGHT PLANS WITH
GRB FSS T-122 1 R OSH VOR 111.8

****WITTMAN FIELD AIRPORT ARRIVALS****

After receiving clearance at Fisk, a request to change to Oshkosh Tower frequency 118.5 mHz or 126.6 mHz will be issued. Stay in trail, follow preceding aircraft and monitor tower communications. Tower controller will refer to aircraft by color and type. Enter final approach at appropriate altitude for type aircraft. After landing, exit the runway into the grass as expeditiously as safely possible.

****REDUCED ARRIVAL AND DEPARTURE SEPARATION STANDARDS****

A waiver has been issued reducing arrival and departure separation standards for group 1 and 2 aircraft (primarily single engine and light twin engine aircraft).

****FLIGHT SERVICE STATION INFORMATION****

GREEN BAY/OSHKOSH FSS

Complete flight services will be provided 24 hours daily through Green Bay FSS.

Pilot Briefing and Flight Planning Services are available by telephoning Green Bay FSS, (800) 322-5552 (Wisconsin only).

A temporary flight service station will be located at Wittman Field to provide Pilot Briefing and Flight Planning Services 0600-2000 CDT (1100-0100 UTC) daily during the EAA Convention.

INBOUND VFR FLIGHTS PLANS TO OSH: Pilots are requested to include an additional 30 minutes to their ETE to allow time for expected delays in landing and parking.

Specify the Oshkosh area airport of intended landing, see first page of this notice.

Cancel flight plans with Green Bay (GRB) FSS approaching airport of intended landing. Advise GRB FSS which VOR or frequency a reply is expected.

OSHKOSH (OSH) VOR	GREEN BAY (GRB) VOR
TRANSMIT 122.1 mHz	TRANSMIT 122.1 mHz
RECEIVE 111.8 mHz	RECEIVE 117.0 mHz

****WITTMAN FIELD VFR DEPARTURES PRIOR TO DAILY AIR SHOW****

(Set transponder to standby mode or off until 10 minutes after departure.)

RUNWAY 27.	Maintain VFR at or below 500 feet AGL, 1,300 feet MSL, until clear of Wittman Field Airport Traffic Area. Depart on course if heading is 230° clockwise through 040°. If other than the above, depart on these headings until clear of Wittman Field Airport Traffic Area. Caution advised for aircraft landing Runway 27. Aircraft landing Runway 27 will maintain 1,000 feet AGL until north of Runway 27. Departures will maintain 500 feet AGL until clear of inbound traffic and traffic patterns. Southwest departures, caution advised, ultralight aircraft operating at or below 300 feet AGL.
RUNWAY 09	Depart the Oshkosh High Density Area (see graphic) in the northeast quadrant prior to proceeding on course.
RUNWAY 18/36	REQUIRES SPECIAL BRIEFING FROM EAA OFFICIALS.

****WITTMAN FIELD VFR DEPARTURES AFTER DAILY AIR SHOW****

(Set transponder to standby mode or off until 10 minutes after departure.)

RUNWAY 27	Proceed straight out 3 miles, then on course if heading is 230° clockwise through 040°. If other than the above, depart on these headings until clear of Wittman Field Airport Traffic Area.
RUNWAY 09	Depart Oshkosh High Density Area (see graphic) in the northeast quadrant prior to proceeding on course.
RUNWAY 18L	South and East bound.
RUNWAY 18R	South and West bound. Maintain runway heading until 3 miles south. Caution advised due to departures off the parallel runway. Gyrocraft and ultralights operating west of the runway at the southwest corner of the airport.
RUNWAY 36	Depart on course at pilot's discretion if course is a heading 270° clockwise through 130°. If other than the above, depart on these headings until clear of Wittman Field Airport Traffic Area.

VFR arrivals can expect a 30-45 minute delay after the Air Show. Caution VFR aircraft holding southwest of the Wittman Field Airport Traffic Area.

****WITTMAN FIELD WARBIRD ARRIVAL PROCEDURES****

Report over Fon Du Lac, the initial reporting point for all Warbird arrivals, to Oshkosh Tower on 118.5mHz. Report should state Warbird arrival, color, type of aircraft, and position.

EXAMPLE: "Warbird arrival, blue and yellow Wildcat, Fon Du Lac."

Then proceed direct to the island (6 miles southeast of Wittman Field, west shore of Lake Winnebago). Plan to arrive at the island at 2,300 feet MSL at an airspeed of 150 knots. Over the island report to Oshkosh Tower type of aircraft and position.

EXAMPLE: "Blue and yellow Wildcat, Island."

When Runway 27 is active, Oshkosh Tower will direct aircraft to proceed to the approach end of Runway 27, maintain 2,300 feet MSL, not more than 150 knots and orbit right while awaiting landing sequencing.

When Runway 09 is active, Oshkosh Tower will direct aircraft to depart the island on a northwesterly heading, maintain 2,300 feet MSL, not more than 150 knots, to a point 2 miles southwest of Runway 09, orbit left while awaiting landing sequencing. If traffic requires, Oshkosh Tower may direct aircraft to hold (right turns) at the island (south).

MAINTAIN 2,300 FEET MSL AND DO NOT EXCEED 150 KNOTS BETWEEN THE ISLAND AND ORBIT POINT.

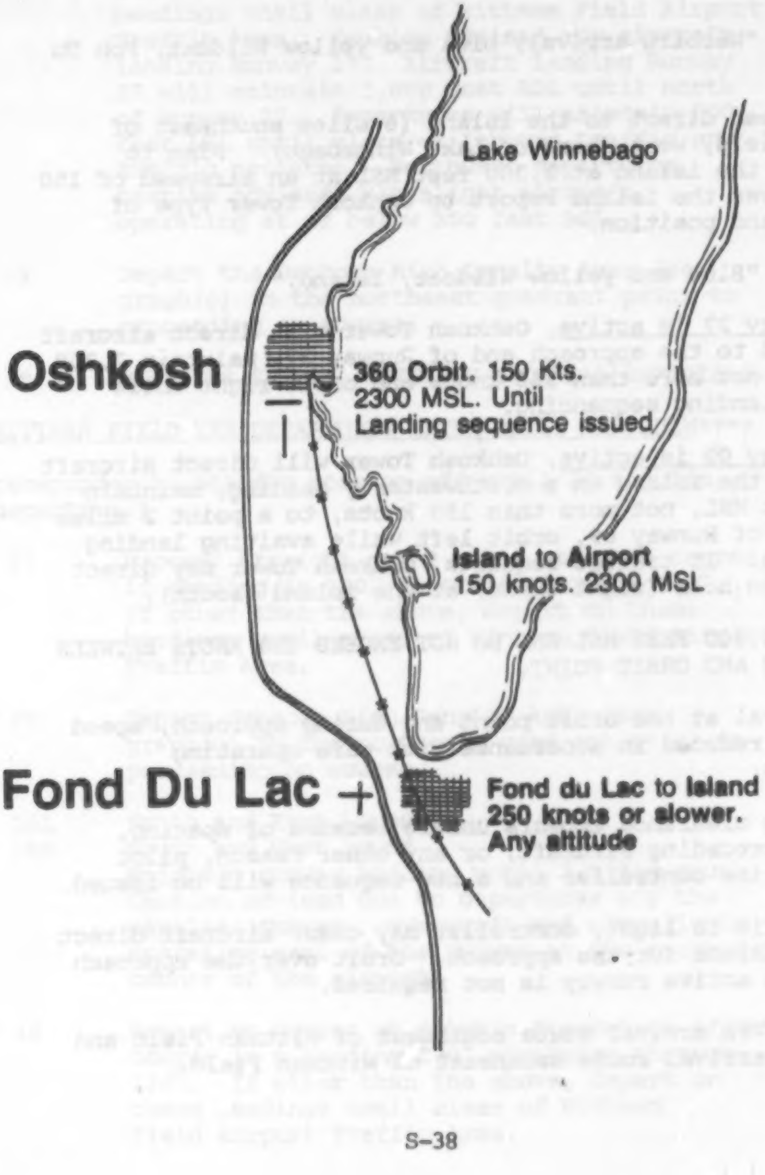
Upon arrival at the orbit point and during approach, speed should be reduced in accordance with safe operating procedures.

If landing clearance appears unsafe because of spacing, speed of preceding aircraft, or any other reason, pilot should advise controller and a new sequence will be issued.

When traffic is light, controller may clear aircraft direct from the island for the approach. Orbit over the approach end of the active runway is not required.

AVOID the VFR arrival route southwest of Wittman Field and the NORDO arrival route southeast of Wittman Field.

Warbird Arrival Procedure



Lake Winnebago
Oshkosh
360 Orbit. 150 Kts.
2300 MSL. Until
Landing sequence issued
Island to Airport
150 knots. 2300 MSL
Fond Du Lac
Fond du Lac to Island
250 knots or slower.
Any altitude

****ARRIVALS DURING HOURS OF DARKNESS****

(See Airport Closing section of this NOTAM)

Aircraft arriving during the hours of darkness must park on the north ramp (hard surface) until daylight the following day. Pilots are responsible for moving their aircraft to an appropriate grass parking area before noon the day following arrival. Overnight parking or camping in the grass area adjacent to the airport terminal building is not permitted. Aircraft parked in these areas, prior to the air show each day, must be moved before sundown. Limited overnight tie down space is available at the FBO for a nominal charge.

Aircraft ground movement will not be permitted in transient parking or camping areas during the hours of darkness unless accompanied by official ground guides.

****STUDENT PILOT TRAINING****

Student pilot training is not authorized at Wittman Field during the convention period. This includes student solo cross country flights, touch and go landings, and practice instrument approaches.

****WITTMAN FIELD NO RADIO SPECIAL NOTICE****

Pilots flying into Wittman field during the convention period without an operating two way radio are required to place their name, signature, aircraft type, identification number, address and the word "NORDO" on a postcard and mail it to:

Federal Aviation Administration
Airport Traffic Control Tower
P.O. Box 2606
Oshkosh, Wisconsin 54903

Postcards must be received no later than July 30, 1986. Receipt of the postcard by Oshkosh Tower will validate ATC authorization to arrive/depart Wittman Field without a radio. The postcard indicates that all procedures outlined in the NO RADIO ATC authorization section have been read and understood. The completed NO RADIC ATC Authorization must be carried in the aircraft while exercising provisions of this authorization.

NO RADIO OPERATION

NO RADIO ATC AUTHORIZATION 1986 EAA CONVENTION, WITTMAN FIELD, OSHKOSH, WI.

DEPARTMENT OF TRANSPORTATION
FEDERAL AVIATION ADMINISTRATION

OSHKOSH TOWER, WITTMAN FIELD
OSHKOSH, WISCONSIN 54903

ATC AUTHORIZATION TO DEVIATE FROM TWO-WAY RADIO COMMUNICATION REQUIREMENTS SPECIFIED IN FAR 91.87(b) FOR ARRIVALS AND DEPARTURES AT THE 1986 EXPERIMENTAL AIRCRAFT ASSOCIATION CONVENTION.

This ATC authorization is issued to:

1. ______________________
Pilot's name and signature

2. ______________________
Date card mailed

3. ______________________
Aircraft ID

This ATC authorization is valid at Wittman Field, Oshkosh, Wisconsin, 1 day prior to and during the 1986 EAA Convention when the following special provisions are adhered to:

No-radio aircraft must use Runways 18R/36L (or when traffic dictates Runways 18L/36R) as the primary runways. The use of any other runways due to extreme wind conditions requires prior approval by Oshkosh Tower (414-235-2360). Be alert for glider, rotorcraft, and ultralight operations on the southwest corner of the airport (west of Runways 18R/36L) from 0700 - 0900 CDT. Pilots must exit the runway into the grass as soon as safety allows.

NO-RADIO ARRIVALS ARE PROHIBITED AFTER 1400 CDT DAILY FROM FRIDAY, AUGUST 1 THROUGH FRIDAY, AUGUST 8.

ATC authorization will be effective under the following:

1. Weather minimums - a ceiling of at least 1,500 feet and visibility 5 miles or better. This does not constitute authorization to enter the control zone if conditions are below basic VFR weather minima.

2. This authorization is not valid if the flashing white strobe light or airport rotating beacon, located on top of the control tower, are illuminated. These lights indicate an emergency, accident, or other traffic conditions exist which precludes no-radio operations. If these lights are on, remain clear of the Airport Traffic Area. When the situation is resolved the lights will be turned off and no-radio operations will resume in accordance with this authorization.

3. Pilots must exercise extreme caution and be alert for other no-radio aircraft landing and making fly-bys (fly-bys or low approaches will only be conducted on Runway 18L/36R by EAA pilots who have been briefed and authorized to conduct such operations). Absolutely NO fly-bys or low approaches will be conducted by any aircraft without an appropriate briefing. There will be NO fly-by pattern on July 31, August 1 and 2.

4. Runway 36L/18R will be used for some of the inbound traffic from Fisk.

5. No-radio aircraft should use 36R/18L if they observe heavy traffic on the parallel runway. When landing 36 right and parking in the area west of the runway, turn left at the second taxiway and look for the flagperson to wave you across Runway 36L. If going to the camping area, plan to roll out to the intersection of Runway 31 and look for the flagperson to direct you. Landing Runway 18L, plan to turn at the first intersection and look for the flagperson for directions to cross Runway 18R. In any case, EXPEDITE yourself clear of the landing runway. Disregard the above 36R/18L procedure from August 3 through August 8, 1986, since the fly-by pattern will be effective. When using Runway 36R/18L, make sure the strobe lights are not flashing. Warbirds may be using Runway 36R/18L for taxiing.

6. ARRIVAL PROCEDURES:

a. Enter the No-Radio pattern at the town of Van Dyne, 8 miles southeast of Wittman Field. Proceed northeast along the east side of the railroad tracks at 1,000' AGL, 1,800' MSL. Check for strobe lights or rotating beacon on top of the tower. If they are off, continue; if they are on, remain clear of the airport traffic area.

b. Visually observe the large orange arrow in the midfield grass area or the traffic in the fly-by traffic pattern to determine the runway in use. Fly-by traffic will be at or below 500' AGL (see illustration). On July 31, August 1, 2, and 3, observe inbound traffic from Fisk to determine the runway in use (18 or 36). Inbound traffic from Fisk (about 5 miles southwest of the field) will be landing on Runway 9/27 and Runway 18R/36L.

c. Enter appropriate downwind or base leg as shown in illustration. Check for the strobe lights or rotating beacon on top of the tower and follow other aircraft in the pattern. Descend to 600' AGL and be alert for fly-by traffic operating at 500' AGL within the Fly-by pattern (see graphic). Rock your wings turning base leg to indicate you intend to land. After sequencing, turn final approach at a safe altitude, considering your type aircraft, then descend and land at pilot's discretion.

ATC Authorization Page 2

******IMPORTANT******

BASE LEG FOR RUNWAY 18 AND CROSSWIND FOR A RUNWAY 36 GO-AROUND MUST BE SOUTH OF AN EAST/WEST LINE THROUGH THE INTERSECTION OF THE CLOSED DIAGONAL RUNWAYS, AND NORTH OF THE EAST/WEST ROAD RUNNING PAST THE CONTROL TOWER, EAST TO THE LAKE SHORE."

DO NOT, REPEAT, DO NOT PROCEED NORTH OF AN EAST/WEST LINE RUNNING THROUGH THE INTERSECTION OF THE CLOSED DIAGONAL RUNWAYS.

NO-RADIO DEPARTURES

Runway 36 traffic will depart southbound from a right downwing leg.

Runway 18 traffic will depart straight out.

ATC Authorization Page 3

****AEROBATICS DEMONSTRATIONS****

Aerobatics flight demonstrations will be conducted daily, August 1 through 8. The Air Show Operations Area is from the surface to 12,000 feet MSL within a 5 nautical mile radius of Wittman Field and will be in effect during the following time periods:

1545-1730 CDT	August 1, 1986
1545-1830 CDT	August 2, 1986
1445-1730 CDT	August 3, 1986
1545-1830 CDT	August 4, 1986
1500-1830 CDT	August 5, 1986
1500-1830 CDT	August 6, 1986
1600-1830 CDT	August 7, 1986
1400-1630 CDT	August 8, 1986

All unscheduled aircraft inbound to Wittman Field, unable to land prior to the above air show times, should land at an outlying airport or remain airborne and clear of the above described Air Show Operations Area. Holding should be in the Fisk holding pattern (see VFR Arrival Procedures graphic), until 30-45 minutes after the air show. Pilots on VFR flight plans are reminded to extend, cancel or change flight plan destination if unable to land Wittman Field.

MONITOR FUEL STATUS CLOSELY.

****AIRPORT MANAGER'S SPECIAL NOTICE****

Runways 4/22 and 13/31 will be closed to landings and takeoffs at least 7 days prior to and throughout the EAA Convention.

All All light, single engine and multi engine aircraft will be required to exit runways and taxi to parking on grass areas on the airport. Hazardous areas will be marked by cones and/or flags. Pilots are cautioned to remain clear of all marked areas. Exercise caution while operating on unimproved or grass areas due to rough ground and signs. Taxi operations on other than paved areas are at pilot's own risk. ALL INCIDENTS OR ACCIDENTS SHOULD BE REPORTED TO AIRPORT MANAGEMENT OR ANY FAA PERSONNEL AS SOON AS POSSIBLE.

Pilots of aircraft requiring hard surfaced parking are requested to make prior arrangements with the Airport Manager, Wittman Field Airport, 525 20th Avenue, Oshkosh, Wisconsin 54901, telephone (414)424-0092.

****AIRPORT CLOSING****

Wittman Field will be closed daily to all VFR/IFR arriving and departing aircraft, 2200-0500 CDT (0300-1000 UTC), July 31 through August 8.

T. F. Green State Airport, Warwick, R.I.

Closing certain runways and taxiways for installation of CAT II Lighting System.

Runway 5R-23L, Runway 10-28, Taxiway Alfa, Mike, Papa, Delta, Echo, and the portions of Sierra that is east of Runway 5L will be closed on September 2, 1986 at 6:00 a.m., and remain closed until 6:00 a.m., on October 2, 1986.

A portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo will remain open for taxi purposes and use incidental to the operation of Runway 16-34.

The portions of Runway 10-28 that intersect Runway 16-34, Runway 5L-23R, Taxiway Bravo, Taxiway Foxtrot, will remain open for taxi purposes and use incidental to the operation of Runway 16-34 and Runway 5L-23R.

Runway 16-34 and the portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo, will be closed from 12:00 midnight to 6:00 a.m., commencing September 17, 1986 through September 24, 1986, to allow fixture installation at the runway intersection.

SPECIAL USE AIRSPACE
(Temporary Restricted Areas)

Effective August 9-10, 1986

D4.12/4:

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

a. GENERAL
b. AIRWAYS
c. FLIGHT RESTRICTIONS
d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

(A) Information for Section 1 should be submitted to the National Flight Data Center (ATO-250).
(B) Camera-ready copy for Section 2 should be submitted to ATO-200.

ADDRESSING INFORMATION FOR SECTION 1

Federal Aviation Administration, National Flight Data Center (ATO-250), 800 Independence Ave, SW., Washington, DC 20591.

Phone: Commercial—(202)426-3813/3390.

Phone: FTS— 426-3813/426-3390.

ADDRESSING INFORMATION FOR SECTION 2

Federal Aviation Administration, ATO-200, 800 Independence Ave, SW., Washington, DC 20591.

Phone: Commercial—(202)426-3731.

Phone: FTS—426-3731.

SUBSCRIPTION INFORMATION

HOW TO ORDER

The Notices to Airmen publication is available by subscription through the Superintendent of Documents. Subscriptions are accepted for a 1 year period. Remittance must be made in advance of shipment. Your check or money order must be made payable to the Superintendent of Documents. Orders can also be charged to your VISA or MASTERCARD account. Orders should be addressed to:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402,

or

Phone: (202)783-3238 (Order Desk).

ABBREVIATIONS

The following abbreviations are those most commonly used within this publication. Other abbreviations may be found in the Contraction Handbook, 7340.1.

Note: An "s" may be added for plural. Abbreviations used in FDC NOTAMs are italicized.

A	
/	and
AAS	Airport Advisory Service
A/C	Approach Control
acft	aircraft
ACR	Air Carrier
ADF	Automatic Direction Finder
AER	Approach End Runway
AGL	above ground level
AIM	Airman's Information Manual
ALS	Approach light system
ALSF-1	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category I Configuration
ALSF-2	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category II Configuration
alt	altitude
altm	altimeter
altn	alternate
ALSTG	altimeter setting
amdt	amendment
apch	approach
apchg	approaching
aprx	approximate
arpt	airport
arr	arrive or arrival
ARSR	Air Route Surveillance Radar
ARTCC	Air Route Traffic Control Center
ASDE	airport surface detection equipment
ASR	Arpt Surveillance Radar
ATC	air traffic control
ATCT	air traffic control tower
ATIS	Automatic Terminal Information Service
avbl	available
awy	airway
B	
BC	back course
bcn	beacon
bcst	broadcast
bldg	building
brg	bearing
btn	between
byd	beyond
C	
cat	category
CFR	crash fire rescue
clnc	clearance
clsd	closed
cmsnd	commissioned
cntr	center
cntrln	centerline
Comlo	Compass locator
const	construction
cpty	capacity
crs	course
ctc	contact
CTLZ	Control Zone
D	
dalgt	daylight
dcmsnd	decommissioned
dsgs	degrees
dep	depart, departure
DF	direction finder
DH	decision height
DME	UHF standard TACAN compatible distance measuring equipment
dsplcd	displaced
dstc	distance
durg	during
DVFR	Defense Visual Flight Rule
E	
E	east
EFAS	Enroute Flight Advisory Service
elev	elevation
emerg	emergency
equip	equipment
excp	except
F	
FAF	final approach fix
FAR	Federal Aviation Regulation
FDC	Flight Data Center
FI/P	flight information (permanent)
FI/T	flight information (temporary)
FL	Flight Level
FM	from
freq	frequency
FSS	Flight Service Station
ft	feet/foot
G	
govt	government
GS	glide slope
GWT	gross weight
H	
HAA	height above airport
HAT	height above touchdown
HIRL	High intensity Runway Lights
hol	holiday
hwy	highway
I	
IAF	initial approach fix
IAP	initial approach procedure
ident	identification
IF	intermediate fix
IFR	Instrument Flight Rules
IFSS	International Flight Service Station
ILS	instrument landing system
info	information
inop	inoperative
int	intersection
intl	international
intst	intensity
ISMLS	Interim Standard Microwave Landing System
J	
J-bar	jet runway barrier
K	
kHz	kilohertz
L	
L	left (used only to designate rwys) eg. rwy 12L
lat	latitude
lb	pounds (weight)
lctd	located
LDA	Localizer type directional aid
LDIN	Lead-in Lighting System
lgtd	lighted
LMM	compass locator at middle marker ILS
lndg	landing
loc	localizer
LOM	compass locator at outer marker ILS
long	longitude
M	
MAA	maximum authorized altitude
mag	magnetic
maint	maintain, maintenance
MALS	Medium Intensity Approach Light System
MALSR	Medium Intensity Approach Light System with Runway Alignment Indicator Lights
MAP	missed approach point
max	maximum
MCA	minimum crossing altitude
MDA	minimum descent altitude
MEA	minimum enroute IFR altitude
MHz	megahertz
min	minimum or minute
MIRL	Medium Intensity Runway Edge Lights
MLS	Microwave Landing System
MM	middle marker ILS
MOCA	minimum obstruction clearance altitude
MRA	minimum reception altitude
MSA	minimum safe altitude
MSL	mean sea level
muni	municipal
N	
N	north
NA	not authorized
natl	national
navaid	navigational aid
NDB	Non-directional Radio Beacon
NM	nautical mile(s)
NOPT	no procedure turn required
Nr	number
O	
dstrn	destruction
ODALS	Omnidirectional Approach Lighting System
OM	outer marker ILS
oper	operate
opn	operation
orig	original
OTS	Out of Service
ovrn	overrun
P	
PAR	Precision Apch Radar
pat	pattern
permly	permanently
PPR	Prior Permission Required
proc	procedure
Q	
quad	quadrant
R	
R	right (used only to designate rwys) eg. rwy 19R
RAPCON	radar approach control (USAF)
RCAG	Remote Center air/ground
RCLS	Runway Centerline Lights System
RCO	Remote Communications Outlet
rcv	receive
rcvg	receiving
REIL	Runway End Identifier Lights
req	request
RNAV	Area Navigation
RRP	Runway Reference Point
rstrd	restricted
RTS	returned to service
RVR	runway visual range
RVRM	Runway Visual Range Midpoint
RVRT	Runway Visual Range Touchdown
RVRR	Runway Visual Range Rollout
RVV	runway visibility values
rwy	Runway
S	
S	south/snow
SDF	Simplified Directional Facility
sec	second
sfc	surface
SFL	Sequenced Flashing Lights
SI	straight-in approach
SM	statute mile(s)
SR	sunrise
SS	sunset
SSAFL	Simplified Short Approach Lighting System with Sequenced Flashers
SSALS	Simplified Short Approach Lighting System
SSALR	Simplified Short Approach Lighting system with Runway Alignment Indicator Lights
STOL	Short take-off & landing runway
svc	service
T	
T	true (after a bearing)
TAC	Terminal Area Chart
TACAN	UHF navigational facility—omni directional course and distance information
TCA	Terminal Control Area
TCH	Threshold Crossing Height
tfc	traffic
thr	threshold
thru	through
tkof	take-off
tmprly	temporarily
tmpry	temporary
TPA	Traffic Pattern Altitude
TRACON	Terminal Radar approach control
trml	terminal
TRSA	Terminal Radar Service Area
tsnt	transient
TWEB	transcribed weather bcst
twr	tower
twy	taxiway
U	
UHF	Ultra high frequency
unavbl	unavailable
unlgtd	unlighted
unmon	unmonitored
unusbl	unusable
V	
VASI	Visual Approach Slope Indicator
VDP	visual descent point
VFR	visual flight rules
VHF	Very high frequency
vis	visibility
VOR	VHF Omni-Directional Radio Range
VORTAC	Combined VOR and TACAN System
VOT	a VOR Receiver testing facility
vsby	visibility
W	
W	west
wea	weather
wkday	weekday
wkend	weekend
wp	waypoint
wt	weight
Z	
Z	Coordinated Universal Time (UTC)

GENERAL

FDC 6/1766 AK. CURRENT STATUS OF PAVLOV VOLCANO. DRIFTING VOLCANIC ASH FROM PAVLOV VOLCANO SURFACE TO APPROXIMATELY 25 THOUSAND FEET DRIFTING EAST. IFR FLIGHTS MAY BE REROUTED TO AVOID HAZARDOUS ASH AREAS. VFR FLIGHTS INTO VOLCANIC ASH MAY CAUSE ENGINE DAMAGE/FAILURE AND ABRASION DAMAGE TO WING AND WINDSHIELD SURFACES. THIS NOTAM WILL BE UPDATED AS CONDITIONS CHANGE.

FDC 6/1601 FI/P HI CORRECT U.S. SECTIONAL CHART HAWAIIAN ISLANDS 34TH EDITION DATED 5 JUN 86.. CHANGE BRADSHAW NDB IDENT /BSF/FREQ 349 TO FREQ 339.

FDC 6/1566 OMEGA STATION 'B' LIBERIA TRANSMITTING WITHOUT ITS UNIQUE FREQ 12.0 KHZ.

FDC 6/1300 OMEGA STATION /D/NORTH DAKOTA WILL BE OFF THE AIR FOR ANNUAL MAINTENANCE EFFECTIVE 07 JULY THRU 31 JULY 1200-2200 UTC DAILY.

FDC 6/1067 FDC THE FEDERAL AVIATION ADMINISTRATION HAS PARTICIPATED IN GOVERNMENT ACTIVITIES TO ASSESS AVIATION PROBLEMS WHICH MIGHT OCCUR AS A RESULT OF THE SOVIET NUCLEAR ACCIDENT. NONE OF THE DATA WE HAVE SEEN PROVIDES ANY CONCERN FOR ANY FLIGHTS OF ANY U.S. CARRIERS ANYWHERE IN THE WORLD. THE ONLY AREA WE WOULD BE POTENTIALLY CONCERNED ABOUT IS FLIGHT IN THE VICINITY OF THE REACTOR SITE NEAR KIEV AT ALTITUDES BELOW 20,000 FEET. FLIGHT ABOVE 20,000 FEET AT THIS LOCATION NEAR KIEV OR OTHER FLIGHTS AT ANY ALTITUDE ANYWHERE IN THE WORLD IS NOT EXPECTED TO PRESENT ANY PUBLIC HEALTH OR SAFETY PROBLEMS DUE TO RADIATION CONTAMINATION WHICH MIGHT EXIST AS A RESULT OF THE ACCIDENT. THERE IS NO REASON FOR SPECIAL FLIGHT PRECAUTIONS. NO FURTHER NOTIFICATIONS ON THIS SUBJECT ARE PLANNED.

FDC 6/995 U.S. CUSTOMS REGULATORY CHANGES. AIRCRAFT PENETRATING THE INNER ADIZ FM ANYWHERE IN THE WESTERN HEMISPHERE SOUTH OF THE U.S. MEXICAN BORDER, SOUTH OF 33 DEG NORTH LATITUDE ON THE PACIFIC COAST, SOUTH OF 30 DEGREES NORTH LATITUDE ON THE ATLANTIC COAST, OR SOUTH OF THE INNER ADIZ ON THE GULF COAST, MUST PROVIDE U.S. CUSTOMS AT LEAST ON EHOUR ADVANCE NOTICE OF PENETRATION OF U.S. AIRSPACE. EFFECTIVE APRIL 30. THIS REQUIREMENT WILL BE EXTENDED TO AIRCRAFT THAT HAVE NOT LANDED IN A FOREIGN PLACE AND AIRCRAFT FROM PUERTO RICO THAT ARE NOT FLYING UNDER IFR FLIGHT RULES. FILING A FLIGHT PLAN WITH THE NOTATION "ADCUS" WITH THE U.S. FAA AT LEAST ONE HOUR IN ADVANCE OF PENETRATION OF THE ADIZ WILL SATISFY THIS REQUIREMENT. CONTRACTING U.S. CUSTOMS AT 305-536-6591, MIAMI, FL, OR 714-351-6674, RIVERSIDE, CA, AT LEAST ONE HOUR IN ADVANCE WILL ALSO MEET THE REQUIREMENT. LANDING AND INSPECTION REQUIREMENTS FOR AIRCRAFT ARRIVING FROM FOREIGN PLACES REMAIN UNCHANGED.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 16TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-276-4637/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7606/CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5

DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS.... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT.... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED. NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

* Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

* Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

* Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.

2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.

3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.

4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.

5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.

6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.

2. Standard separation between all instrument flight rules (IFR) flights.

3. Traffic advisories and safety advisories to all aircraft.

4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective June 5, 1986.

Albuquerque International Airport, NM
Greater Cincinnati International Airport, KY
Indianapolis International Airport, IN
Phoenix Sky Harbor International Airport, AZ
Tucson International Airport, AZ
Davis-Monthan Air Force Base, AZ
Wichita Mid-Continent Airport, KS

An ARSA has been designated at the following airport to be effective July 3, 1986.

Dallas Love Field, Texas

An ARSA has been designated at the following airport to be effective July 31, 1986.

Lafayette Regional Airport, LA

SPECIAL USE AIRSPACE
(Military Operations Area)

Effective July 25-August 3, 1986

1. Gallant Eagle 86 Area A Temporary MOA, CA [New]

Boundaries. Beginning at lat. 34°40'30"N., long. 116°29'30"W.;
to lat. 34°36'00"N., long. 116°34'00"W.;
to lat. 34°14'00"N., long. 116°19'00"W.;
to lat. 34°14'00"N., long. 116°17'00"W.;
to lat. 34°30'00"N., long. 116°26'30"W.;
to lat. 34°36'00"N., long. 116°28'00"W.;
thence to point of beginning.

Altitudes. 1,000 feet AGL to, but not including, FL 180.

Times of Use. Continuous July 25-August 3, 1986.

Controlling Agency. FAA, Los Angeles ARTCC.

Using Agency. U.S. Air Force, USCENTAF Battlestaff (USCENTAF/DOJ)
Shaw AFB, SC

2. Gallant Eagle 86 Area B Temporary MOA, CA [New]

Boundaries. Beginning at lat. 34°14'00"N., long. 116°19'00"W.;
to lat. 34°14'00"N., long. 115°44'00"W.;
to lat. 34°08'00"N., long. 115°53'00"W.;
to lat. 34°03'00"N., long. 116°11'00"W.;
thence to the point of beginning.

Altitudes. 5,000 feet MSL to 11,000 feet MSL.

Times of Use. Continuous July 25-August 3, 1986.

Controlling Agency. FAA, Los Angeles ARTCC.

Using Agency. U.S. Air Force, USCENTAF Battlestaff (USCENTAF/DOJ)
Shaw AFB, SC

3. Gallant Eagle 86 Daggett Corridor Temporary MOA, CA [New]

Boundaries. Beginning at lat. 35°39'00"N., long. 115°53'00"W.;
to lat. 34°34'21"N., long. 115°53'00"W.;
to lat. 34°35'30"N., long. 115°58'00"W.;
to lat. 34°41'00"N., long. 116°03'00"W.;
to lat. 34°43'00"N., long. 116°17'00"W.;
to lat. 34°43'00"N., long. 116°26'20"W.;
to lat. 34°36'00"N., long. 116°34'00"W.;
to lat. 34°38'00"N., long. 116°35'30"W.;
to lat. 35°19'00"N., long. 116°18'30"W.;
thence to point of beginning.

Altitudes. 100 feet AGL to 7,500 feet MSL.

Times of Use. 0500 to 0200 local time, July 25-August 3, 1986.

Controlling Agency. FAA, Los Angeles ARTCC.

Using Agency. U.S. Air Force, USCENTAF Battlestaff (USCENTAF/DOJ)
Shaw AFB, SC

TERMINAL AREA GRAPHIC NOTICE
(NOT TO BE USED FOR NAVIGATION)

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

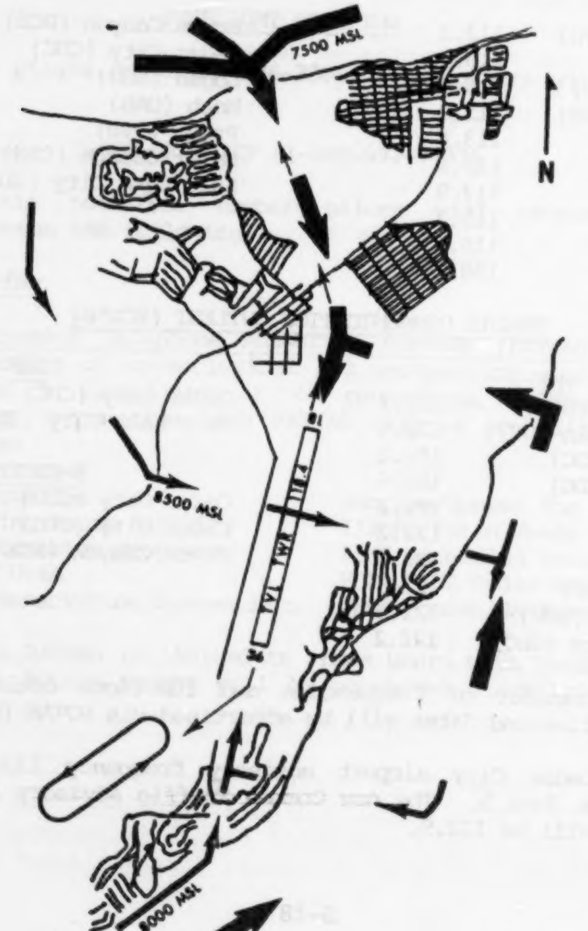
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: **ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.**

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



CEDAR CITY, UTAH, AUTOMATED FLIGHT SERVICE STATION

The Cedar City, Utah, Automated Flight Service Station (AFSS will commission on June 5, 1986. All services now provided by the Cedar City Flight Service Station (FSS) will be transferred to the AFSS at that time. On that same day, the AFSS will also assume control of most of the enroute flight advisory service (EFAS) outlets now remoted to Salt Lake flight Service Station. The remaining EFAS, remote communications outlet (RCO), and very-high omni (VOR) voice frequencies now controlled by SLC FSS will be gradually transferred to Cedar City AFSS, as well as all eastern Utah facilities now controlled by Grand Junction, Colorado, Flight Service Station.

Area Served: The Cedar City AFSS's geographic area of responsibility is the state of Utah for all services except EFAS. The EFAS area of rsponsibility covers a six-state area (see below).

RADIO AIDS

A. Navigational aids with voice capability, (pilots transmit on 122.1 and receive on the VOR frequency.)

Bonneville (BVL)	112.3
Delta (DTA)	116.1
Fairfield (FFU)	116.6
Hanksville (HVE)	115.9
Lucin (LCU)	113.6
Milford (MLF)	112.1
Myton (MTU)	117.9
Ogden (OGD)	115.7
Price (PUC)	115.5
Vernal (VEL)	108.2

B. VOR navigational aids with no voice capability.

Bryce Canyon (BCE)	112.8
Cedar City (CDC)	108.6
Logan (LGU)	109.8
Moab (OAB)	109.8
Provo (PVU)	108.4
Saint George (OZN)	109.8
Salt Lake City (SLC)	116.8

REMOTE COMMUNICATION OUTLEST (RCO'S)

VHF	
Bryce Canyon (BCE)	122.2
Bull Frog Basin (U07)	122.4
Cedar City (CDC)	122.2
Cedar City (CDC)	122.6
Delle (4DL)	122.2
Francis Peak	122.2
Moab (OAB)	122.3
Richfield (RIF)	122.5
Saint George (SGU)	122.5
Salt Lake City (SLC)	122.2

UHF	
Cedar City (CDC)	255.4
Salt Lake City (SLC)	255.4

EMERGENCY	
Cedar City (CDC)	121.5
Cedar City (CDC)	243.0
Bryce Canyon (BCE)	121.5

NOTE 1: The transfer of frequencies and functions could include short outages. Exact time and dates will be advertised via NOTAM (D)s.

NOTE 2: The Cedar City airport advisory frequency 123.6 mHz will be decommissioned on June 5. The new Common Traffic Advisory Frequency (CTAF) for Cedar City, will be 122.9.

ENROUTE FLIGHT ADVISORY SERVICE (EFAS) OUTLETS

CDC AFSS will have 25 EFAS outlets on frequency 122.0 covering a six state area. In addition there will be one high altitude outlet (Battle Mountain, NV) on frequency 134.825, with five more high altitude outlets planned. Current and forecast high altitude outlets are indicated with an asterisk:

Ashton, ID. (4AS)
Helena, MT. (HLN)
Rome, OR. (REO)
Malad City, ID. (MLD)
Cedar City, UT. (CDC)*
Butte, MT. (BTM)
Big Piney, WY. (BPI)
Delta, UT. (DTA)
Great Falls, MT. (GTF)*
Thermopolis, WY. (THP)
Sunnyside, UT. (4SS)
Judith Mountain, MT. (LWT)
Tonapah, NV. (TPH)

Wilson Creek, NV. (ILC)
Bliss, ID. (GNG)
Missoula, MT. (9UM)
Billings, MT. (BIL)
Squaw Butte, ID. (4EM)*
Delle,UT. (4DL)
Glasgow, MT. (GGW)
Rock Springs, WY. (RKS)
Provo, UT. (PVU)
Kalispell, MT. (FCA)
Battle Mountain, NV. (BAM)*
Francis Peak, UT. (SLC)*
(high altitude only)
Miles City, MT.(MLS)*

PREFLIGHT BRIEFING

Local Cedar City pilots may call 586-3806. All others within Utah dial:

1-800-WX BRIEF (1-800-992-7433)

After calling this toll-free number pilots will receive prerecorded instructions to access the following:

1. Pilot Briefer

2. Pilots Automatic Telephone Answering Service (PATWAS). PATWAS is a continuous recording of meteorlogical and aeronautical information. The PATWAS system has a capability of 24 recordings. Besides providing significant weather information, the PATWAS will be providing aeronautical information such as:

NOTAM D/L Information
Military Training Route Activity
Current FSS Automation Progress
FDC NOTAMS for Utah
High Altitude Reservation System Info

Sunrise/Sunset for the Week
Flight Watch Usage
AFSS Accessing Process
VOR VOICE Radio Usage
TWEB Routes/SA Reports

Automatic Access to PATWAS is limited to those users with touch tone phones. Users calling from Rotary phones will be connected directly to a briefer.

EXPO '86

May 2, 1986, through October 13, 1986

In anticipation of a significant increase of aircraft activity to and from the Vancouver, British Columbia, Canada, area during the 1986 World Exposition, the following flight information is provided to enhance safety and minimize air traffic delays.

BELLINGHAM, WASHINGTON, AREA

The Bellingham area includes the following airports:

Bellingham International (BLI)
Blaine Municipal (WA09)
Lynden (WA33)

Bellingham International is a port of entry and customs services are available from 8 a.m. until 5 p.m., locally and at other times, upon 1 hours advance notice. U.S. Airmen departing Canadian airspace which intend to land and clear Customs at Bellingham International are reminded to annotate their Customs requests in the remarks section of their flight plan. The Customs office telephone number at Bellingham is (206) 734-5463 (local exchange). Responsibility for ensuring Customs notification rests with the pilot.

TEMPORARY FAA BELLINGHAM CONTROL TOWER

The control tower will be operated from 8 a.m. until 8 p.m., daily, from May 1, 1986, through October 25, 1986.

Bellingham frequencies:

Bellingham Tower - 124.9 MHz, 239.25 MHz
Bellingham Ground Control - 121.65 MHz

BELLINGHAM (BLI) AIRPORT TRAFFIC AREA

The Bellingham Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as that airspace within a 5 statute mile radius of the BLI airport up to, but not including, 3,000' AGL excluding that airspace known as the Abbotsford-Bellingham Flight Information area which lies north of the BLI airport. The Abbotsford-Bellingham Flight Information Area is delineated on aeronautical charts.

BELLINGHAM AIRPORT INFORMATION - GENERAL

The Port of Bellingham is the airport sponsor of the airport. The traffic pattern is 1,200' for fixed wing aircraft and 800' for helicopters. The sponsor has a local regulation which prohibits intersection departures at the airport. Abbotsford, British Columbia, Canada, tower provides limited traffic

information service on 119.4 MHz to VFR aircraft operating between 1,500' and 4,000' MSL in an area generally described as between the U.S./Canadian border and Ferndale, and between the shoreline and Highway 9.

VFR FLIGHT PLANS

All pilots are encouraged to file a flight plan. Arriving aircraft should close their flight plans by radio with Bellingham FSS, on 123.6 MHz or 122.3 MHz. If unable, pilots may call the Bellingham FSS at 734-6400 (local exchange) or 1-800-833-0310 upon arrival.

Canadian/U.S. rules require that all aircraft operating VFR must be on a VFR flight plan prior to crossing the Canadian/U.S. border. Airfiles are discouraged and pilots are requested to file their flight plans 1 hour in advance of proposed departure times.

Pilots departing the U.S. from the Bellingham area are reminded that significant differences exist between Canadian and U.S. rules and procedures. Canadian officials have requested all U.S. pilots be cognizant of the requirement that flight plans are mandatory while operating in Canadian airspace.

IFR TRAFFIC

Vancouver Area Control Center (ACC) is the controlling agency for IFR aircraft operating to/from the Bellingham International Airport. Due to the expected increase in the volume of traffic generated by Expo '86, some delays may be encountered for IFR arrival and departure traffic. The Vancouver ACC has requested that U.S. airmen not request VFR/IFR practice ILS Runway 16 approaches to the Bellingham International Airport during Expo '86.

IFR ARRIVALS BLI INTERNATIONAL

Be prepared to discontinue your approach based upon local traffic conditions and enter a VFR traffic pattern for landing sequence. Pilots arriving IFR are requested to be extremely vigilant as the instrument approaches serving the Bellingham International Airport enter an area of high traffic activity in the Abbotsford-Bellingham Flight Information area.

VFR FLIGHT

Aircraft landing in Vancouver, British Columbia, Canada, should be extremely alert while operating in the Vancouver Lower Mainland area. Numerous aerial demonstrations and other aviation related sport activities are planned for Expo '86. The majority of these events will take place in the Vancouver Harbour Central Zone. The following VFR egress/ingress routes are recommended for traffic operating to/from Canadian airspace:

Bellingham (BLI) to Abbotsford (YXX) northbound east of Lynden
Abbotsford (YXX) to Bellingham (BLI) southbound west of Lynden

BLI to Vancouver (YVR) via Interstate 5 (I-5) using right side separation east/west of the highway. Extreme caution should be taken in the vicinity of the Abbotsford Localizer.

U.S. Airmen desiring additional information on Canadian area airports, rules and regulations, and Custom services may request (in writing) an Air Tourist Information Guide which is available without charge from:

Transport Canada (EXPO Guide)
800 Burrard Street
P.O. Box 220
Vancouver, British Columbia, Canada V6Z2JB

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAM's ISSUED BY BOTH THE U.S. AND CANADA PRIOR TO CONDUCTING FLIGHT.

SPECIAL TRAFFIC MANAGEMENT PROGRAM
CAPE COD AND ADJACENT ISLAND AREA AIRPORTS
MAY 15 THROUGH OCTOBER 30, 1986

In anticipation of the large number of aircraft operating to and from the Cape Cod and adjacent Island areas during the period May 15 through October 30, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****
CAPE COD AND ADJACENT ISLAND AREA

For the purpose of this Special Traffic Management Program, the Cape Cod and adjacent Island area includes the following airports:

Hyannis Barnstable Municipal-Boardman/Polando Field	- HYA
Nantucket Memorial Airport	- ACK
Martha's Vineyard Airport	- MVY

****VFR ENROUTE AND HOLDING****

Pilots are urged to become familiar with VFR holding and reporting points (SEE GRAPHIC).

Arriving aircraft are encouraged to monitor ATIS, where available, and then contact the appropriate tower when 10-15 miles from the airport. Advise receipt of ATIS information on initial contact. Aircraft landing Martha's Vineyard are requested to monitor tower frequency far enough out to obtain and advise the tower on initial contact, "HAVE NUMBERS".

Aircraft enroute Hyannis Airport from Sagamore Bridge, Martha's Vineyard and Cotuit areas should exercise caution due to high density military traffic on IFR approach to runway 23, Otis Air National Guard Base.

Arrival Points	Arrival Direction	Holding Direction
HYANNIS AIRPORT		
Sandy Neck	North	North
Dennis Drive In	Northeast	Northeast
Sagamore Bridge	Northwest	Northwest
Cotuit	West	Southwest
Dennisport	East	Southeast
MARTHA'S VINEYARD AIRPORT		
Woods Hole	North	Northwest
Oak Bluffs	Northeast	East
Bounre Bridge	North	West
Cuttyhunk Island	West	Southwest
Katama Airpark	Southeast	South
NANTUCKET AIRPORT		
Great Point	North	East
Tuckernuck Island	West	Southwest

****IFR ARRIVAL/DEPATRTURE****

Otis Terminal Radar Approach Control (TRACON) may assign a Control Departure Time (CDT) for IFR flights arriving or departing Hyannis, Nantucket or Martha's Vineyard Airports, whenever marginal VFR or IFR weather conditions exist.

Implementation of this part of the Special Traffic Management Program will be by special notice to flight service stations and area airport traffic control towers. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions pilots are encouraged to contact the tower or flight service station, prior to engine start up, to obtain latest information.

To insure the success of this Special Traffic Management Program, aircraft departing Hyannis, New Bedford, Nantucket and Martha's Vineyard Airports are urged to depart within plus or minus 5 minutes of CDT. Departures from other airports should depart within 15 minutes before and not later than 5 minutes after CDT.

****FLIGHT PLANS****

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans may experience extensive delays awaiting integration into the IFR system while this program is in effect.

Commercial operators are requested to file flight plans for extra flight sections no less than 1 hour prior to proposed time of departure.

Pilots are encouraged to cancel VFR flight plans with Bridgeport Flight Service Station by radio. Transmit 122.1 mHz receive on appropriate VOR frequency. If unable to cancel by radio, contact appropriate flight service station by telephone.

WORLD SKYDIVING CONVENTION
QUINCY MUNICIPAL AIRPORT
QUINCY, ILLINOIS

August 8 through 18, 1986

In anticipation of the large number of airaraft traveling to and from the Quincy, Illinois Municipal Airport and the excessive amount of skydiving operations during the World Skydiving Convention, the following procedures will be used to enhance safety and minimize air traffic delays.

****AIRPORT CLOSURES & RESTRICTIONS****

Runway 13-31 will be closed by NOTAM 24 hours a day from August 7 through 18, 1986. Other runways may be closed for short periods by NOTAM.

Airport traffic patterns are 1769 feet MSL with right hand traffic pattern for runways 18 and 22, and left hand traffic patterns for runways 4 and 36.

****CAUTION ADVISORY****

Caution is advised in the vicinity of Quincy Municipal Airport for numerous aircraft in climb and rapid descent configuration.

Skydiving operations will be conducted within 5 nautical mile radius of the Quincy Municipal Airport from the surface to 19,000 feet MSL during the hours of sunrise to 30 minutes after sunset.

Non-radio and student training flights are highly discouraged through the area during the hours when skydiving operations are scheduled. This includes student solo or instructed cross country flights, touch-and-go landings, low approaches and practice instrument approaches.

Over flights are requested to avoid the airspace 17,500 feet MSL and below within a 5 nautical mile radius of the Quincy Municipal Airport.

****COMMUNICATIONS****

Due to anticipated frequency congestion, pilots are encouraged to obtain a weather briefing and file flight plans by phone, however, if necessary use frequency 122.5. Quincy Flight Service Station provides Airport Advisory Service on frequency 123.6. Pilots are urged to review all applicable NOTAMS and to file a flight plan.

Kansas City Center is the controlling agency for IFR aircraft operating to/from the Quincy Municipal Airport on frequency of 133.15.

SPECIAL USE AIRSPACE
(Military Operations Area)

Effective July 25-August 3, 1986

1. Gallant Eagle Alpha Temporary MOA, UT [New]

Boundaries. Beginning at lat. 39°00'00"N., long. 113°59'00"W.;
to lat. 39°23'00"N., long. 114°03'00"W.;
to lat. 39°23'00"N., long. 113°03'45"W.;
to lat. 39°00'00"N., long. 113°22'00"W.;
thence to the point of beginning.

Altitudes. 14,500 feet MSL to, but not including FL 180.

Times of Use. 0530-0200, July 25-August 3, 1986.

Controlling Agency. FAA, Salt Lake City ARTCC.

Using Agency. U.S. Air Force, USCENTAF Battlestaff (USCENTAF/DOJ) Shaw AFB, SC

EXPERIMENTAL AIRCRAFT ASSOCIATION (EAA) CONVENTION
SPECIAL TRAFFIC MANAGEMENT PROGRAM
OSHKOSH, WISCONSIN
JULY 31 THROUGH AUGUST 8, 1986

In anticipation of the large number of aircraft arriving and departing from the Oshkosh area, during the EAA Convention, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily, 0600-2200 CDT (1100-0300 UTC). Chicago Center will assign a Controlled Departure Time (CDT) for unscheduled IFR flights arriving or departing the Oshkosh area.

For the purpose of this Special Traffic Management Program, the Oshkosh area encompasses a 35 nautical mile radius of the Oshkosh VOR and includes the following airports:

Oshkosh, Wittman Field	OSH
Appleton, Outagamie County	ATW
Fon Du Lac County	FLD
Neenah, Brennand	79C
New Holstein	8D1
Waupun	WI07
Winneconne, Courtney Plummer	4D4
Sheboygan County Memorial	SBM

Beginning July 23, 0800-2000 CDT (1300-0100 UTC); and between 0600-2000 CDT (1100-0100 UTC), August 1 daily, CDT's can be obtained from Chicago Center by calling (312) 844-3017.

Adherence to a CDT within a plus or minus 10 minute period is requested in order to avoid substantial delays.

Chicago Center, Milwaukee, Madison, Rockford, O'Hare, South Bend, Muskegon, and Green Bay Approach Controls will not accept airborne IFR flight plans or provide VFR advisory service during the time this program is in effect, except for emergency situations. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

Pilots are urged to file flight plans at least 4 hours prior to proposed time of departure. Include the CDT in remarks section of the IFR flight plan. Use of one of the following preferred routes to/from the Oshkosh area is encouraged.

Page Revised 7/17/86

IFR PREFERRED ROUTES TO OSHKOSH

1. **NORTHEAST**
   a. HIC V26 NEROE-MTW-OSH (over water).
   b. MBL-MTW-OSH (over water).

2. **EAST**
   MKG MKG 296° FAH 113° FAH-OSH (over water).

3. **SOUTHEAST**
   a. PMM 333° BULLY-FAH-OSH (over water)
   b. OXI V156 EON V128 RFD V63 JVL V177 MSN V341 OSH (around Lake Michigan and Chicago-Metropolitan bypass).

4. **SOUTH**
   RFD V63 JVL V177 MSN V341 OSH.

5. **SOUTHWEST**
   DBQ V341 OSH.

6. **WEST**
   DLL V82 V341 OSH.

7. **NORTHWEST**
   STE V63 OSH.

8. **NORTH**
   GRB-MTW-OSH.

IFR PREFERRED ROUTES FROM OSHKOSH (LOW ALTITUDE)

1. Proposed altitude at or above 11,000 feet MSL.
   a. SOUTHEAST - Radar vector-PMM.
   b. SOUTH - BAE-OBK-EON.
   c. SOUTHWEST - MSN-DBQ.

2. Proposed altitude at or below 10,000 feet MSL.
   a. To airports in the Chicago Metropolitan area.
      (1) O'Hare and airports north of O'Hare
      Radar vector ETB-OBK direct.
      (2) Airports west of O'Hare
      V341 MSN-RFD V128 V10 PLANO direct.
      (3) Airports south of O'Hare
      V341 MSN-RFD V128 V8 JOT V69 BOJAK direct.

Page Revised 7/17/86

b. To other destinations.

(1) East and Southeast.
   (a) OVER WATER - Radar vector HIC-MKG or Radar vector FAH-MKG.
   (b) AROUND LAKE MICHIGAN - V341 MSN-RFD V128 EON V156 OXI.

(2) SOUTH - V341 MSN-RFD V127 OR V9.

(3) SOUTHWEST - V341 DBQ.

(4) WEST - Direct DLL-LNR or Direct DLL V82.

(5) NORTHWEST, NORTH, AND NORTHEAST-Unrestricted.

****IFR ARRIVALS - WITTMAN FIELD****

During periods of increased traffic demands, runway 27 final approach course may extend BEYOND THE LAKE MICHIGAN SHORELINE. Pilots planning to cancel IFR (weather permitting) and execute VFR arrival procedures should do so 25 nautical miles or more from Wittman Field. Pilots continuing IFR until landing should verify IFR cancellation after landing with Oshkosh Ground Control on 119.05 mHz. Verification is necessary due to tower frequency congestion.

****IFR DEPARTURES - WITTMAN FIELD****

DO NOT REQUEST IFR DEPARTURE CLEARANCE UNTIL 20 MINUTES BEFORE ESTIMATED TIME OF DEPARTURE. Prior to engine start, monitor departure ATIS 128.75 mHz then contact ground control, 119.05 mHz, for IFR clearance. DO NOT START ENGINES UNTIL IFR CLEARANCE IS RECEIVED.

After receiving IFR clearance and completing engine start, contact ground control, 119.05 mHz, when ready to taxi to the IFR runway. Remain on ground control frequency and follow direction of signs, EAA flag personnel, and RED IFR TAXI CHART (available at FSS trailer). Place red IFR taxi chart in lower left corner of aircraft windshield to assist ground personnel in segregating VFR and IFR aircraft. Takeoff clearance will be issued by FAA tower controllers using paddles or lighted wands at mobile units. Advise ground control as soon as airborne.

****WITTMAN FIELD - OSHKOSH TOWER****

CONTROL TOWER HOURS OF OPERATION: Oshkosh Airport Traffic Control Tower will operate 24 hours daily July 31 through August 8.

SEE EAA CONVENTION VFR ARRIVAL PROCEDURES GRAPHIC FOR OSHKOSH TOWER FREQUENCIES.

Arrival Procedures

1. Monitor ATIS 125.8 MHz.
2. Enter transition over Ripon.
3. Proceed over the R.R. tracks toward Fisk.
4. Traffic at 100 MPH should fly at 1000 AGL — 1800 MSL. Traffic at 150 MPH should fly 1500 AGL — 2300 MSL.
5. Monitor Oshkosh Approach on 120.7 MHz turning inbound over Ripon.
6. Listen for controller instructions as you approach Fisk. "Traffic to follow, etc.". Controller will use color and type of aircraft at Fisk.

* White strobe beacon atop a camper, thats Fisk.

7. Controller will advise when to call Oshkosh tower on 118.5 MHz or 126.6 MHz.

Note: Dual Local will be used July 31, thru August 2, 1986.

DO NOT GO BEYOND FISK UNTIL APPROVED BY CONTROLLERS ON 120.7 MHz.

CANCEL FLIGHT PLANS WITH GRB FSS T-122 1 R OSH VOR 111.8

****WITTMAN FIELD AIRPORT ARRIVALS****

After receiving clearance at Fisk, a request to change to Oshkosh Tower frequency 118.5 mHz or 126.6 mHz will be issued. Stay in trail, follow preceding aircraft and monitor tower communications. Tower controller will refer to aircraft by color and type. Enter final approach at appropriate altitude for type aircraft. After landing, exit the runway into the grass as expeditiously as safely possible.

****REDUCED ARRIVAL AND DEPARTURE SEPARATION STANDARDS****

A waiver has been issued reducing arrival and departure separation standards for group 1 and 2 aircraft (primarily single engine and light twin engine aircraft).

****FLIGHT SERVICE STATION INFORMATION****

GREEN BAY/OSHKOSH FSS

Complete flight services will be provided 24 hours daily through Green Bay FSS.

Pilot Briefing and Flight Planning Services are available by telephoning Green Bay FSS, (800) 322-5552 (Wisconsin only).

A temporary flight service station will be located at Wittman Field to provide Pilot Briefing and Flight Planning Services 0600-2000 CDT (1100-0100 UTC) daily during the EAA Convention.

INBOUND VFR FLIGHTS PLANS TO OSH: Pilots are requested to include an additional 30 minutes to their ETE to allow time for expected delays in landing and parking.

Specify the Oshkosh area airport of intended landing, see first page of this notice.

Cancel flight plans with Green Bay (GRB) FSS approaching airport of intended landing. Advise GRB FSS which VOR or frequency a reply is expected.

OSHKOSH (OSH) VOR		GREEN BAY (GRB) VOR	
TRANSMIT	122.1 mHz	TRANSMIT	122.1 mHz
RECEIVE	111.8 mHz	RECEIVE	117.0 mHz

****WITTMAN FIELD VFR DEPARTURES PRIOR TO DAILY AIR SHOW****

(Set transponder to standby mode or off until 10 minutes after departure.)

RUNWAY 27	Maintain VFR at or below 500 feet AGL, 1,300 feet MSL, until clear of Wittman Field Airport Traffic Area. Depart on course if heading is 230° clockwise through 040°. If other than the above, depart on these headings until clear of Wittman Field Airport Traffic Area. Caution advised for aircraft landing Runway 27. Aircraft landing Runway 27 will maintain 1,000 feet AGL until north of Runway 27. Departures will maintain 500 feet AGL until clear of inbound traffic and traffic patterns. Southwest departures, caution advised, ultralight aircraft operating at or below 300 feet AGL.
RUNWAY 09	Depart the Oshkosh High Density Area (see graphic) in the northeast quadrant prior to proceeding on course.
RUNWAY 18/36	REQUIRES SPECIAL BRIEFING FROM EAA OFFICIALS.

****WITTMAN FIELD VFR DEPARTURES AFTER DAILY AIR SHOW****

(Set transponder to standby mode or off until 10 minutes after departure.)

RUNWAY 27	Proceed straight out 3 miles, then on course if heading is 230° clockwise through 040°. If other than the above, depart on these headings until clear of Wittman Field Airport Traffic Area.
RUNWAY 09	Depart Oshkosh High Density Area (see graphic) in the northeast quadrant prior to proceeding on course.
RUNWAY 18L	South and East bound.
RUNWAY 18R	South and West bound. Maintain runway heading until 3 miles south. Caution advised due to departures off the parallel runway. Gyrocraft and ultralights operating west of the runway at the southwest corner of the airport.
RUNWAY 36	Depart on course at pilot's discretion if course is a heading 270° clockwise through 130°. If other than the above, depart on these headings until clear of Wittman Field Airport Traffic Area.

VFR arrivals can expect a 30-45 minute delay after the Air Show. Caution VFR aircraft holding southwest of the Wittman Field Airport Traffic Area.

****WITTMAN FIELD WARBIRD ARRIVAL PROCEDURES****

Report over Fon Du Lac, the initial reporting point for all Warbird arrivals, to Oshkosh Tower on 118.5mHz. Report should state Warbird arrival, color, type of aircraft, and position.

EXAMPLE: "Warbird arrival, blue and yellow Wildcat, Fon Du Lac."

Then proceed direct to the island (6 miles southeast of Wittman Field, west shore of Lake Winnebago). Plan to arrive at the island at 2,300 feet MSL at an airspeed of 150 knots. Over the island report to Oshkosh Tower type of aircraft and position.

EXAMPLE: "Blue and yellow Wildcat, Island."

When Runway 27 is active, Oshkosh Tower will direct aircraft to proceed to the approach end of Runway 27, maintain 2,300 feet MSL, not more than 150 knots and orbit right while awaiting landing sequencing.

When Runway 09 is active, Oshkosh Tower will direct aircraft to depart the island on a northwesterly heading, maintain 2,300 feet MSL, not more than 150 knots, to a point 2 miles southwest of Runway 09, orbit left while awaiting landing sequencing. If traffic requires, Oshkosh Tower may direct aircraft to hold (right turns) at the island (south).

MAINTAIN 2,300 FEET MSL AND DO NOT EXCEED 150 KNOTS BETWEEN THE ISLAND AND ORBIT POINT.

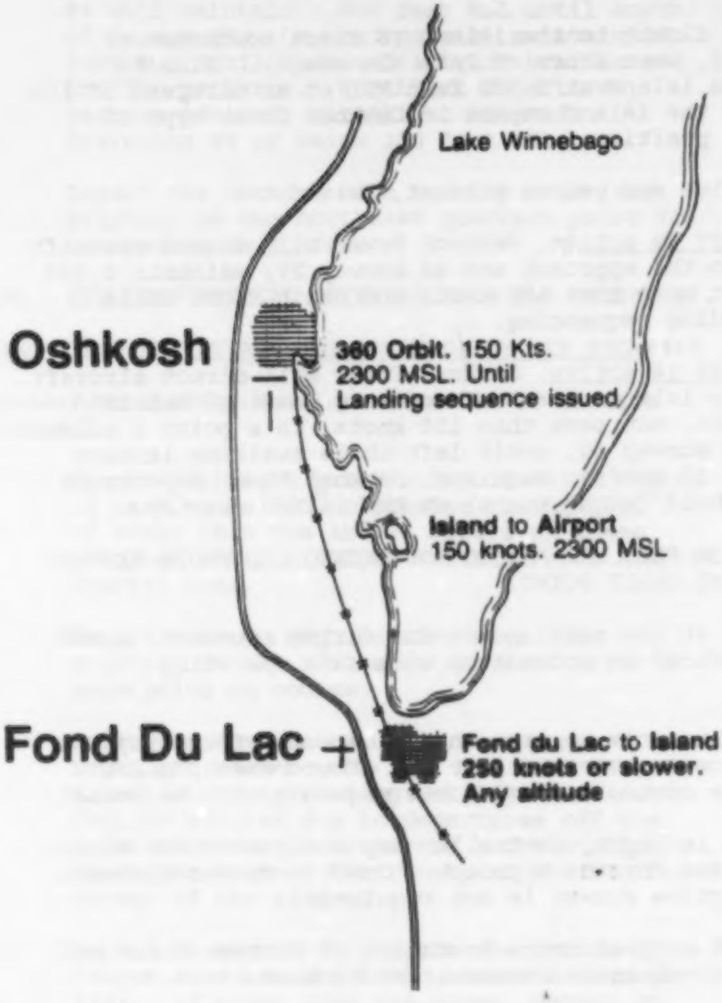
Upon arrival at the orbit point and during approach, speed should be reduced in accordance with safe operating procedures.

If landing clearance appears unsafe because of spacing, speed of preceding aircraft, or any other reason, pilot should advise controller and a new sequence will be issued.

When traffic is light, controller may clear aircraft direct from the island for the approach. Orbit over the approach end of the active runway is not required.

AVOID the VFR arrival route southwest of Wittman Field and the NORDO arrival route southeast of Wittman Field.

Warbird Arrival Procedure



Lake Winnebago
Oshkosh
360 Orbit. 150 Kts. 2300 MSL. Until Landing sequence issued.
Island to Airport 150 knots. 2300 MSL
Fond Du Lac
Fond du Lac to Island 250 knots or slower. Any altitude

****ARRIVALS DURING HOURS OF DARKNESS****

(See Airport Closing section of this NOTAM)

Aircraft arriving during the hours of darkness must park on the north-ramp (hard surface) until daylight the following day. Pilots are responsible for moving their aircraft to an appropriate grass parking area before noon the day following arrival. Overnight parking or camping in the grass area adjacent to the airport terminal building is not permitted. Aircraft parked in these areas, prior to the air show each day, must be moved before sundown. Limited overnight tie down space is available at the FBO for a nominal charge.

Aircraft ground movement will not be permitted in transient parking or camping areas during the hours of darkness unless accompanied by official ground guides.

****STUDENT PILOT TRAINING****

Student pilot training is not authorized at Wittman Field during the convention period. This includes student solo cross country flights, touch and go landings, and practice instrument approaches.

****WITTMAN FIELD NO RADIO SPECIAL NOTICE****

Pilots flying into Wittman field during the convention period without an operating two way radio are required to place their name, signature, aircraft type, identification number, address and the word "NORDO" on a postcard and mail it to:

Federal Aviation Administration
Airport Traffic Control Tower
P.O. Box 2606
Oshkosh, Wisconsin 54903

Postcards must be received no later than July 30, 1986. Receipt of the postcard by Oshkosh Tower will validate ATC authorization to arrive/depart Wittman Field without a radio. The postcard indicates that all procedures outlined in the NO RADIO ATC authorization section have been read and understood. The completed NO RADIO ATC Authorization must be carried in the aircraft while exercising provisions of this authorization.

NO RADIO OPERATION
1986 EAA CONVENTION

DO NOT MAKE AN APPROACH TO, OR LAND ON ANY RUNWAY WHEN STROBE LIGHT FLASHERS ON TOP OF CONTROL TOWER ARE OPERATING.

NO RADIO ATC AUTHORIZATION 1986 EAA CONVENTION, WITTMAN FIELD, OSHKOSH, WI.

DEPARTMENT OF TRANSPORTATION
FEDERAL AVIATION ADMINISTRATION

OSHKOSH TOWER, WITTMAN FIELD
OSHKOSH, WISCONSIN 54903

ATC AUTHORIZATION TO DEVIATE FROM TWO-WAY RADIO COMMUNICATION REQUIREMENTS SPECIFIED IN FAR 91.87(b) FOR ARRIVALS AND DEPARTURES AT THE 1986 EXPERIMENTAL AIRCRAFT ASSOCIATION CONVENTION.

This ATC authorization is issued to:

1. ______________________
Pilot's name and signature

2. ______________________
Date card mailed

3. ______________________
Aircraft ID

This ATC authorization is valid at Wittman Field, Oshkosh, Wisconsin, 1 day prior to and during the 1986 EAA Convention when the following special provisions are adhered to:

No-radio aircraft must use Runways 18R/36L (or when traffic dictates Runways 18L/36R) as the primary runways. The use of any other runways due to extreme wind conditions requires prior approval by Oshkosh Tower (414-235-2360). Be alert for glider, rotorcraft, and ultralight operations on the southwest corner of the airport (west of Runways 18R/36L) from 0700 - 0900 CDT. Pilots must exit the runway into the grass as soon as safety allows.

NO-RADIO ARRIVALS ARE PROHIBITED AFTER 1400 CDT DAILY FROM FRIDAY, AUGUST 1 THROUGH FRIDAY, AUGUST 8.

ATC authorization will be effective under the following:

1. Weather minimums - a ceiling of at least 1,500 feet and visibility 5 miles or better. This does not constitute authorization to enter the control zone if conditions are below basic VFR weather minima.

2. This authorization is not valid if the flashing white strobe light or airport rotating beacon, located on top of the control tower, are illuminated. These lights indicate an emergency, accident, or other traffic conditions exist which precludes no-radio operations. If these lights are on, remain clear of the Airport Traffic Area. When the situation is resolved the lights will be turned off and no-radio operations will resume in accordance with this authorization.

3. Pilots must exercise extreme caution and be alert for other no-radio aircraft landing and making fly-bys (fly-bys or low approaches will only be conducted on Runway 18L/36R by EAA pilots who have been briefed and authorized to conduct such operations). Absolutely NO fly-bys or low approaches will be conducted by any aircraft without an appropriate briefing. There will be NO fly-by pattern on July 31, August 1 and 2.

4. Runway 36L/18R will be used for some of the inbound traffic from Fisk.

5. No-radio aircraft should use 36R/18L if they observe heavy traffic on the parallel runway. When landing 36 right and parking in the area west of the runway, turn left at the second taxiway and look for the flagperson to wave you across Runway 36L. If going to the camping area, plan to roll out to the intersection of Runway 31 and look for the flagperson to direct you. Landing Runway 18L, plan to turn at the first intersection and look for the flagperson for directions to cross Runway 18R. In any case, EXPEDITE yourself clear of the landing runway. Disregard the above 36R/18L procedure from August 3 through August 8, 1986, since the fly-by pattern will be effective. When using Runway 36R/18L, make sure the strobe lights are not flashing. Warbirds may be using Runway 36R/18L for taxiing.

6. ARRIVAL PROCEDURES:

a. Enter the No-Radio pattern at the town of Van Dyne, 8 miles southeast of Wittman Field. Proceed northeast along the east side of the railroad tracks at 1,000' AGL, 1,800' MSL. Check for strobe lights or rotating beacon on top of the tower. If they are off, continue; if they are on, remain clear of the airport traffic area.

b. Visually observe the large orange arrow in the midfield grass area or the traffic in the fly-by traffic pattern to determine the runway in use. Fly-by traffic will be at or below 500' AGL (see illustration). On July 31, August 1, 2, and 3, observe inbound traffic from Fisk to determine the runway in use (18 or 36). Inbound traffic from Fisk (about 5 miles southwest of the field) will be landing on Runway 9/27 and Runway 18R/36L.

c. Enter appropriate downwind or base leg as shown in illustration. Check for the strobe lights or rotating beacon on top of the tower and follow other aircraft in the pattern. Descend to 600' AGL and be alert for fly-by traffic operating at 500' AGL within the Fly-by pattern (see graphic). Rock your wings turning base leg to indicate you intend to land. After sequencing, turn final approach at a safe altitude, considering your type aircraft, then descend and land at pilot's discretion.

******IMPORTANT******

BASE LEG FOR RUNWAY 18 AND CROSSWIND FOR A RUNWAY 36 GO-AROUND MUST BE SOUTH OF AN EAST/WEST LINE THROUGH THE INTERSECTION OF THE CLOSED DIAGONAL RUNWAYS, AND NORTH OF THE EAST/WEST ROAD RUNNING PAST THE CONTROL TOWER, EAST TO THE LAKE SHORE."

DO NOT, REPEAT, DO NOT PROCEED NORTH OF AN EAST/WEST LINE RUNNING THROUGH THE INTERSECTION OF THE CLOSED DIAGONAL RUNWAYS.

NO-RADIO DEPARTURES

Runway 36 traffic will depart southbound from a right downwing leg.

Runway 18 traffic will depart straight out.

ATC Authorization Page 3

****AEROBATICS DEMONSTRATIONS****

Aerobatics flight demonstrations will be conducted daily, August 1 through 8. The Air Show Operations Area is from the surface to 12,000 feet MSL within a 5 nautical mile radius of Wittman Field and will be in effect during the following time periods:

1545-1730 CDT	August 1, 1986
1545-1830 CDT	August 2, 1986
1445-1730 CDT	August 3, 1986
1545-1830 CDT	August 4, 1986
1500-1830 CDT	August 5, 1986
1500-1830 CDT	August 6, 1986
1600-1830 CDT	August 7, 1986
1400-1630 CDT	August 8, 1986

All unscheduled aircraft inbound to Wittman Field, unable to land prior to the above air show times, should land at an outlying airport or remain airborne and clear of the above described Air Show Operations Area. Holding should be in the Fisk holding pattern (see VFR Arrival Procedures graphic), until 30-45 minutes after the air show. Pilots on VFR flight plans are reminded to extend, cancel or change flight plan destination if unable to land Wittman Field.

MONITOR FUEL STATUS CLOSELY.

****AIRPORT MANAGER'S SPECIAL NOTICE****

Runways 4/22 and 13/31 will be closed to landings and takeoffs at least 7 days prior to and throughout the EAA Convention.

All light, single engine and multi engine aircraft will be required to exit runways and taxi to parking on grass areas on the airport. Hazardous areas will be marked by cones and/or flags. Pilots are cautioned to remain clear of all marked areas. Exercise caution while operating on unimproved or grass areas due to rough ground and signs. Taxi operations on other than paved areas are at pilot's own risk. ALL INCIDENTS OR ACCIDENTS SHOULD BE REPORTED TO AIRPORT MANAGEMENT OR ANY FAA PERSONNEL AS SOON AS POSSIBLE.

Pilots of aircraft requiring hard surfaced parking are requested to make prior arrangements with the Airport Manager, Wittman Field Airport, 525 20th Avenue, Oshkosh, Wisconsin 54901, telephone (414)424-0092.

****AIRPORT CLOSING****

Wittman Field will be closed daily to all VFR/IFR arriving and departing aircraft, 2200-0500 CDT (0300-1000 UTC), July 31 through August 8. (Exceptions will be made with prior approval from the Airport Manager.)

Closing certain runways and taxiways for installation of CAT II Lighting System.

Runway 5R-23L, Runway 10-28, Taxiway Alfa, Mike, Papa, Delta, Echo, and the portions of Sierra that is east of Runway 5L will be closed on September 2, 1986 at 6:00 a.m., and remain closed until 6:00 a.m., on October 2, 1986.

A portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo will remain open for taxi purposes and use incidental to the operation of Runway 16-34.

The portions of Runway 10-28 that intersect Runway 16-34, Runway 5L-23R, Taxiway Bravo, Taxiway Foxtrot, will remain open for taxi purposes and use incidental to the operation of Runway 16-34 and Runway 5L-23R.

Runway 16-34 and the portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo, will be closed from 12:00 midnight to 6:00 a.m., commencing September 17, 1986 through September 24, 1986, to allow fixture installation at the runway intersection.

SPECIAL USE AIRSPACE
(Temporary Restricted Areas)

Effective August 9-10, 1986

R-6412A Camp Williams, UT [New]

Boundaries. Beginning at lat. 40°27'30"N., long. 111°56'24"W.;
thence southerly along Redwood Road (Utah
Highway 68)
to lat. 40°23'30"N., long. 111°54'58"W.;
to lat. 40°23'30"N., long. 112°06'00"W.;
to lat. 40°27'30"N., long. 112°06'00"W.;
to the point of beginning.

Designated altitudes. Surface to 9,000 feet MSL.

Time of designation. By NOTAM, August 9-10, 1986.

Controlling agency. FAA, Salt Lake City Tower.

Using agency. The Adjutant General, state of Utah.

R-6412B Camp Williams, UT [New]

Boundaries. Beginning at lat. 40°27'30"N., long. 111°56'24"W.;
thence southerly along Redwood Road (Utah
Highway 68
to lat. 40°23'30"N., long. 111°54'58"W.;
to lat. 40°23'30"N., long. 112°06'00"W.;
to lat. 40°27'30"N., long. 112°06'00"W.;
to the point of beginning.

Designated altitudes. 9,000 feet to 10,000 feet MSL.

Time of designation. By NOTAM, August 9-10, 1986.

Controlling agency. FAA, Salt Lake City Tower.

Using agency. The Adjutant General, state of Utah.

SPECIAL USE AIRSPACE
(Military Operations Area)

Effective August 2-8, 1986

1. Owyhee Temporary MOA, ID [New]

Boundaries. Beginning at lat. 42°24'10"N., long. 115°50'16"W.;
to lat. 42°23'30"N., long. 116°04'00"W.;
to lat. 42°33'00"N., long. 116°29'00"W.;
to lat. 42°48'00"N., long. 116°43'00"W.;
to lat. 42°34'00"N., long. 117°27'00"W.;
to lat. 41°52'00"N., long. 117°49'00"W.;
to lat. 41°31'00"N., long. 117°18'00"W.;
to lat. 41°19'00"N., long. 116°47'00"W.;
to lat. 41°18'00"N., long. 115°42'00"W.;
to lat. 42°00'00"N., long. 115°05'00"W.;
to lat. 42°00'00"N., long. 115°48'38"W.;
thence to the point of beginning.

Altitudes. 100 feet AGL to but not including FL 180.

Exclusions. All airspace within 3NM/1500 feet of the following public use airports is excluded from the temporary MOA's.

1. McDermitt State Airport
(lat. 42°00'08"N., long. 117°43'20"W.)
2. Owyhee Airport
(lat. 41°57'12"N., long. 116°11'12"W.)
3. Stevens-Crosby Airport
(lat. 41°30'55"N., long. 115°51'25"W.)

Times of use. 0700 - 1900 local time; other times by NOTAM.
Controlling agency. FAA, Salt Lake City ARTCC.
Using agency. U.S. Air Force, 366th Tactical Fighter Wing, Mountain Home AFB, ID.

2. Snake 1 Temporary MOA, ID [New]

Boundaries. Beginning at lat. 42°48'00"N., long. 116°43'00"W.;
to lat. 42°51'00"N., long. 116°31'00"W.;
to lat. 42°44'00"N., long. 116°13'00"W.;
to lat. 42°33'00"N., long. 116°29'00"W.;
thence to the point of beginning.
Altitudes. 100 feet AGL to but not including FL 180.
Times of use. 0700 - 1900 local time; other times by NOTAM.
Controlling agency. FAA, Salt Lake City ARTCC.
Using agency. U.S. Air Force, 366th Tactical Fighter Wing, Mountain Home AFB, ID.

3. Snake 2 Temporary MOA, ID [New]

Boundaries. Beginning at lat. 42°33'00"N., long. 116°29'00"W.;
to lat. 42°44'00"N., long. 116°13'00"W.;
to lat. 42°39'00"N., long. 115°59'00"W.;
to lat. 42°23'00"N., long. 116°04'00"W.;
thence to the point of beginning.
Altitudes. 100 feet AGL to but not including FL 180.
Times of use. 0700 - 1900 local time; other times by NOTAM.
Controlling agency. FAA, Salt Lake City ARTCC.
Using agency. U.S. Air Force, 366th Tactical Fighter Wing, Mountain Home AFB, ID.

4. Snake 3 Temporary MOA, ID [New]

Boundaries. Beginning at lat. 42°23'00"N., long. 116°04'00"W.;
to lat. 42°39'00"N., long. 115°59'00"W.;
to lat. 42°46'00"N., long. 115°42'00"W.;
to lat. 42°36'00"N., long. 115°42'20"W.;
to lat. 42°24'00"N., long. 115°50'00"W.;
thence to the point of beginning.
Altitudes. 100 feet AGL to but not including FL 180.
Times of use. 0700 - 1900 local time; other times by NOTAM.
Controlling agency. FAA, Salt Lake City ARTCC.
Using agency. U.S. Air Force, 366th Tactical Fighter Wing, Mountain Home AFB, ID.

5. Bruneau 1 MOA, ID [Temporarily Amended]

Altitudes. 100 feet AGL to, but not including FL 180.
Times of Use. 0700 - 1900 local time; other times by NOTAM.

6. Bruneau 2 MOA, ID [Temporarily Amended]

Altitudes. 2,000 feet AGL to, but not including FL 180.
Times of Use. 0700 - 1900 local time; other times by NOTAM.

7. Sheep Creek 1 MOA, ID [Temporarily Amended]

Altitudes. 100 feet AGL to, but not including FL 180.
Times of Use. 0700 - 1900 local time; other times by NOTAM.

8. Sheep Creek 2 MOA, ID [Temporarily Amended]

Altitudes. 100 feet AGL to, but not including FL 180.
Times of Use. 0700 - 1900 local time; other times by NOTAM.

9. Saylor MOA, ID [Temporarily Amended]

Altitudes. 100 feet AGL to, but not including FL 180.
Times of Use. 0700 - 1900 local time; other times by NOTAM.

10. Saylor 2 Temporary MOA, ID [New]

Boundaries. Beginning at lat. 42°33'00"N., long. 115°37'00"W.;
to lat. 42°33'00"N., long. 115°30'00"W.;
to lat. 42°07'00"N., long. 115°30'00"W.;
to lat. 42°07'00"N., long. 115°37'00"W.;
thence to the point of beginning.
Altitudes. 11,000 feet MSL to but not including FL 180.
Times of use. 0700 - 1900 local time; other times by NOTAM.
Controlling agency. FAA, Salt Lake City ARTCC.
Using agency. U.S. Air Force, 366th Tactical Fighter Wing, Mountain Home AFB, ID.

11. Saylor 3 Temporary MOA, ID [New]

Boundaries. Beginning at lat. 42°36'00"N., long. 115°37'00"W.;
to lat. 42°36'00"N., long. 115°30'00"W.;
to lat. 42°33'00"N., long. 115°30'00"W.;
to lat. 42°33'00"N., long. 115°37'00"W.;
thence to the point of beginning.
Altitudes. 14,000 feet MSL to but not including FL 180.
Times of use. 0700 - 1900 local time; other times by NOTAM.
Controlling agency. FAA, Salt Lake City ARTCC.
Using agency. U.S. Air Force, 366th Tactical Fighter Wing, Mountain Home AFB, ID.

ABBREVIATIONS

The following abbreviations are those most commonly used within this publication. Other abbreviations may be found in the Contraction Handbook, 7340.1.

Note: An "s" may be added for plural. Abbreviations used in FDC NOTAMs are italicized.

A	
/	and
AAS	Airport Advisory Service
A/C	Approach Control
acft	aircraft
ACR	Air Carrier
ADF	Automatic Direction Finder
AER	Approach End Runway
AGL	above ground level
AIM	Airman's Information Manual
ALS	Approach light system
ALSF-1	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category I Configuration
ALSF-2	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category II Configuration
alt	altitude
altm	altimeter
altn	alternate
ALSTG	altimeter setting
amdt	amendment
apch	approach
apchg	approaching
aprx	approximate
arpt	airport
arr	arrive or arrival
ARSR	Air Route Surveillance Radar
ARTCC	Air Route Traffic Control Center
ASDE	airport surface detection equipment
ASR	Arpt Surveillance Radar
ATC	air traffic control
ATCT	air traffic control tower
ATIS	Automatic Terminal Information Service
avbl	available
awy	airway
B	
BC	back course
bcn	beacon
bcst	broadcast
bldg	building
brg	bearing
btn	between
byd	beyond
C	
cat	category
CFR	crash fire rescue
clnc	clearance
clsd	closed
cmsnd	commissioned
cntr	center
cntrln	centerline
Comlo	Compass locator
const	construction
cpty	capacity
crs	course
ctc	contact
CTLZ	Control Zone
D	
dalgt	daylight
dcmsnd	decommissioned
degs	degrees
dep	depart, departure
DF	direction finder
DH	decision height
DME	UHF standard TACAN compatible distance measuring equipment
dsplcd	displaced
dstc	distance
durg	during
DVFR	Defense Visual Flight Rule
E	
E	east
EFAS	Enroute Flight Advisory Service
elev	elevation
emerg	emergency
equip	equipment
excp	except
F	
FAF	final approach fix
FAR	Federal Aviation Regulation
FDC	Flight Data Center
FI/P	flight information (permanent)
FI/T	flight information (temporary)
FL	Flight Level
FM	from
freq	frequency
FSS	Flight Service Station
ft	feet/foot
G	
govt	government
GS	glide slope
GWT	gross weight
H	
HAA	height above airport
HAT	height above touchdown
HIRL	High Intensity Runway Lights
hol	holiday
hwy	highway
I	
IAF	initial approach fix
IAP	initial approach procedure
ident	identification
IF	intermediate fix
IFR	Instrument Flight Rules
IFSS	International Flight Service Station
ILS	instrument landing system
info	information
inop	inoperative
int	intersection
intl	international
intst	intensity
ISMLS	Interim Standard Microwave Landing System
J	
J-bar	jet runway barrier
K	
kHz	kilohertz
L	
L	left (used only to designate rwys) eg. rwy 13L
lat	latitude
lb	pounds (weight)
lctd	located
LDA	Localizer type directional aid
LDIN	Lead-in Lighting System
lgtd	lighted
LMM	compass locator at middle marker ILS
lndg	landing
loc	localizer
LOM	compass locator at outer marker ILS
long	longitude
M	
MAA	maximum authorized altitude
mag	magnetic
maint	maintain, maintenance
MALS	Medium Intensity Approach Light System
MALSR	Medium Intensity Approach Light System with Runway Alignment Indicator Lights
MAP	missed approach point
max	maximum
MCA	minimum crossing altitude
MDA	minimum descent altitude
MEA	minimum enroute IFR altitude
MHz	megahertz
min	minimum or minute
MIRL	Medium Intensity Runway Edge Lights
MLS	Microwave Landing System
MM	middle marker ILS
MOCA	minimum obstruction clearance altitude
MRA	minimum reception altitude
MSA	minimum safe altitude
MSL	mean sea level
muni	municipal
N	
N	north
NA	not authorized
natl	national
navaid	navigational aid
NDB	Non-directional Radio Beacon
NM	nautical mile(s)
NOPT	no procedure turn required
Nr	number
O	
obstn	obstruction
ODALS	Omnidirectional Approach Lighting System
OM	outer marker ILS
oper	operate
opn	operation
orig	original
OTS	Out of Service
ovrn	overrun
P	
PAR	Precision Apch Radar
pat	pattern
permly	permanently
PPR	Prior Permission Required
proc	procedure
Q	
quad	quadrant
R	
R	right (used only to designate rwys) eg. rwy 18R
RAPCON	radar approach control (USAF)
RCAG	Remote Center air/ground
RCLS	Runway Centerline Lights System
RCO	Remote Communications Outlet
rcv	receive
rcvg	receiving
REIL	Runway End Identifier Lights
req	request
RNAV	Area Navigation
RRP	Runway Reference Point
rstrd	restricted
RTS	returned to service
RVR	runway visual range
RVRM	Runway Visual Range Midpoint
RVRT	Runway Visual Range Touchdown
RVRR	Runway Visual Range Rollout
RVV	runway visibility values
rwy	Runway
S	
S	south/snow
SDF	Simplified Directional Facility
sec	second
sfc	surface
SFL	Sequenced Flashing Lights
SI	straight-in approach
SM	statute mile(s)
SR	sunrise
SS	sunset
SSAFL	Simplified Short Approach Lighting System with Sequenced Flashers
SSALS	Simplified Short Approach Lighting System
SSALR	Simplified Short Approach Lighting System with Runway Alignment Indicator Lights
STOL	Short take-off & landing runway
svc	service
T	
T	true (after a bearing)
TAC	Terminal Area Chart
TACAN	UHF navigational facility—omnidirectional course and distance information
TCA	Terminal Control Area
TCH	Threshold Crossing Height
tfc	traffic
thr	threshold
thru	through
tkof	take-off
tmply	temporarily
tmpry	temporary
TPA	Traffic Pattern Altitude
TRACON	Terminal Radar approach control
trml	terminal
TRSA	Terminal Radar Service Area
trsnt	transient
TWEB	transcribed weather bcst
twr	tower
twy	taxiway
U	
UHF	Ultra high frequency
unavbl	unavailable
unlgtd	unlighted
unmon	unmonitored
unusbl	unusable
V	
VASI	Visual Approach Slope Indicator
VDP	visual descent point
VFR	visual flight rules
VHF	Very high frequency
vis	visibility
VOR	VHF Omni-Directional Radio Range
VORTAC	Combined VOR and TACAN System
VOT	a VOR Receiver testing facility
vsby	visibility
W	
W	west
wea	weather
wkdy	weekday
wkend	weekend
wp	waypoint
wt	weight
Z	
Z	Coordinated Universal Time (UTC)

GENERAL

FDC 6/1788 AK. CURRENT STATUS OF PAVLOV VOLCANO..DRIFTING VOLCANIC ASH FROM PAVLOV VOLCANO SURFACE TO APPROXIMATELY 25 THOUSAND FEET DRIFTING EAST. IFR FLIGHTS MAY BE REROUTED TO AVOID HAZARDOUS ASH AREAS. VFR FLIGHTS INTO VOLCANIC ASH MAY CAUSE ENGINE DAMAGE/FAILURE AND ABRASION DAMAGE TO WING AND WINDSHIELD SURFACES. THIS NOTAM WILL BE UPDATED AS CONDITIONS CHANGE.

FDC 6/1801 FI/P HI CORRECT U.S. SECTIONAL CHART HAWAIIAN ISLANDS 34TH EDITION DATED 5 JUN 86.. CHANGE BRADSHAW NDB IDENT /BSF/FREQ 348 TO FREQ 339.

FDC 6/1598 OMEGA STATION 'B' LIBERIA TRANSMITTING WITHOUT ITS UNIQUE FREQ 12.0 KHZ.

FDC 6/1300 OMEGA STATION /D/NORTH DAKOTA WILL BE OFF THE AIR FOR ANNUAL MAINTENANCE EFFECTIVE 07 JULY THRU 31 JULY 1200-2300 UTC DAILY.

FDC 6/1087 FDC THE FEDERAL AVIATION ADMINISTRATION HAS PARTICIPATED IN GOVERNMENT ACTIVITIES TO ASSESS AVIATION PROBLEMS WHICH MIGHT OCCUR AS A RESULT OF THE SOVIET NUCLEAR ACCIDENT. NONE OF THE DATA WE HAVE SEEN PROVIDES ANY CONCERN FOR ANY FLIGHTS OF ANY U.S. CARRIERS ANYWHERE IN THE WORLD. THE ONLY AREA WE WOULD BE POTENTIALLY CONCERNED ABOUT IS FLIGHT IN THE VICINITY OF THE REACTOR SITE NEAR KIEV AT ALTITUDES BELOW 20,000 FEET. FLIGHT ABOVE 20,000 FEET AT THIS LOCATION NEAR KIEV OR OTHER FLIGHTS AT ANY ALTITUDE ANYWHERE IN THE WORLD IS NOT EXPECTED TO PRESENT ANY PUBLIC HEALTH OR SAFETY PROBLEMS DUE TO RADIATION CONTAMINATION WHICH MIGHT EXIST AS A RESULT OF THE ACCIDENT. THERE IS NO REASON FOR SPECIAL FLIGHT PRECAUTIONS. NO FURTHER NOTIFICATIONS ON THIS SUBJECT ARE PLANNED.

FDC 5/885 U.S. CUSTOMS REGULATORY CHANGES. AIRCRAFT PENETRATING THE INNER ADIZ FM ANYWHERE IN THE WESTERN HEMISPHERE SOUTH OF THE U.S. MEXICAN BORDER, SOUTH OF 33 DEG NORTH LATITUDE ON THE PACIFIC COAST, SOUTH OF 30 DEGREES NORTH LATITUDE ON THE ATLANTIC COAST, OR SOUTH OF THE INNER ADIZ ON THE GULF COAST, MUST PROVIDE U.S. CUSTOMS AT LEAST ON EHOUR ADVANCE NOTICE OF PENETRATION OF U.S. AIRSPACE, EFFECTIVE APRIL 30. THIS REQUIREMENT WILL BE EXTENDED TO AIRCRAFT THAT HAVE NOT LANDED IN A FOREIGN PLACE AND AIRCRAFT FROM PUERTO RICO THAT ARE NOT FLYING UNDER IFR FLIGHT RULES. FILING A FLIGHT PLAN WITH THE NOTATION "ADCUS" WITH THE U.S. FAA AT LEAST ONE HOUR IN ADVANCE OF PENETRATION OF THE ADIZ WILL SATISFY THIS REQUIREMENT. CONTRACTING U.S. CUSTOMS AT 305-536-6591, MIAMI, FL, OR 714-351-6874, RIVERSIDE, CA, AT LEAST ONE HOUR IN ADVANCE WILL ALSO MEET THE REQUIREMENT. LANDING AND INSPECTION REQUIREMENTS FOR AIRCRAFT ARRIVING FROM FOREIGN PLACES REMAIN UNCHANGED.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART 0621, 18TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-0837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7808/CHICAGO 312-263-2375 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED.
NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

- Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.
- Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.
- Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective June 5, 1986.

Albuquerque International Airport, NM
Greater Cincinnati International Airport, KY
Indianapolis International Airport, IN
Phoenix Sky Harbor International Airport, AZ
Tucson International Airport, AZ
Davis-Monthan Air Force Base, AZ
Wichita Mid-Continent Airport, KS

An ARSA has been designated at the following airport to be effective July 3, 1986.

Dallas Love Field, Texas

An ARSA has been designated at the following airport to be effective July 31, 1986.

Lafayette Regional Airport, LA

ARSA's have been designated at the following locations to be effective on August 28, 1986.

Raleigh-Durham, NC

TERMINAL AREA GRAPHIC NOTICE
(NOT TO BE USED FOR NAVIGATION)

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

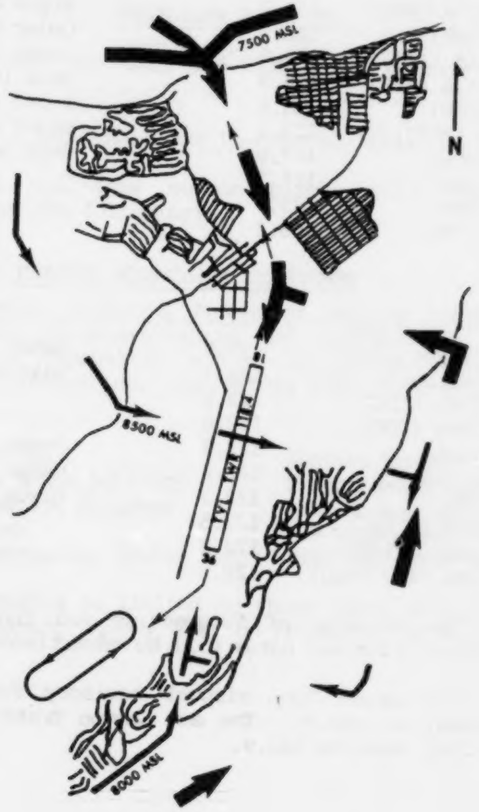
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



CEDAR CITY, UTAH, AUTOMATED FLIGHT SERVICE STATION

The Cedar City, Utah, Automated Flight Service Station (AFSS will commission on June 5, 1986. All services now provided by the Cedar City Flight Service Station (FSS) will be transferred to the AFSS at that time. On that same day, the AFSS will also assume control of most of the enroute flight advisory service (EFAS) outlets now remoted to Salt Lake flight Service Station. The remaining EFAS, remote communications outlet (RCO), and very-high omni (VOR) voice frequencies now controlled by SLC FSS will be gradually transferred to Cedar City AFSS, as well as all eastern Utah facilities now controlled by Grand Junction, Colorado, Flight Service Station.

Area Served: The Cedar City AFSS's geographic area of responsibility is the state of Utah for all services except EFAS. The EFAS area of rsponsibility covers a six-state area (see below).

RADIO AIDS

A. Navigational aids with voice capability, (pilots transmit on 122.1 and receive on the VOR frequency.)

Bonneville (BVL)	112.3

Salt Lake City (SLC)	255.4

EMERGENCY	
Cedar City (CDC)	121.5
Cedar City (CDC)	243.0
Bryce Canyon (BCE)	121.5

NOTE 1: The transfer of frequencies and functions could include short outages. Exact time and dates will be advertised via NOTAM (D)s.

NOTE 2: The Cedar City airport advisory frequency 123.6 mHz will be decommissioned on June 5. The new Common Traffic Advisory Frequency (CTAF) for Cedar City, will be 122.9.

ENROUTE FLIGHT ADVISORY SERVICE (EFAS) OUTLETS

CDC AFSS will have 25 EFAS outlets on frequency 122.0 covering a six state area. In addition there will be one high altitude outlet (Battle Mountain, NV) on frequency 134.825, with five more high altitude outlets planned. Current and forecast high altitude outlets are indicated with an asterisk:

Ashton, ID. (4AS)
Helena, MT. (HLN)
Rome, OR. (REO)

Provo, UT. (PVU)
Kalispell, MT. (FCA)
Battle Mountain, NV. (BAM)*
Francis Peak, UT. (SLC)*
(high altitude only)
Miles City, MT.(MLS)*

PREFLIGHT BRIEFING

Local Cedar City pilots may call 586-3806. All others within Utah dial:

1-800-WX BRIEF (1-800-992-7433)

After calling this toll-free number pilots will receive prerecorded instructions to access the following:

1. Pilot Briefer

2. Pilots Automatic Telephone Answering Service (PATWAS). PATWAS is a continuous recording of meteorlogical and aeronautical information. The PATWAS system has a capability of 24 recordings. Besides providing significant weather information, the PATWAS will be providing aeronautical information such as:

NOTAM D/L Information
Military Training Route Activity
Current FSS Automation Progress
FDC NOTAMS for Utah
High Altitude Reservation System Info

Sunrise/Sunset for the Week
Flight Watch Usage
AFSS Accessing Process
VOR VOICE Radio Usage
TWEB Routes/SA Reports

Automatic Access to PATWAS is limited to those users with touch tone phones. Users calling from Rotary phones will be connected directly to a briefer.

EXPO '86

May 2, 1986, through October 13, 1986

In anticipation of a significant increase of aircraft activity to and from the Vancouver, British Columbia, Canada, area during the 1986 World Exposition, the following flight information is provided to enhance safety and minimize air traffic delays.

BELLINGHAM, WASHINGTON, AREA

The Bellingham area includes the following airports:

Bellingham International (BLI)
Blaine Municipal (WA09)
Lynden (WA33)

Bellingham International is a port of entry and customs services are available from 8 a.m. until 5 p.m., locally and at other times, upon 1 hours advance notice. U.S. Airmen departing Canadian airspace which intend to land and clear Customs at Bellingham International are reminded to annotate their Customs requests in the remarks section of their flight plan. The Customs office telephone number at Bellingham is (206) 734-5463 (local exchange). Responsibility for ensuring Customs notification rests with the pilot.

TEMPORARY FAA BELLINGHAM CONTROL TOWER

The control tower will be operated from 8 a.m. until 8 p.m., daily, from May 1, 1986, through October 25, 1986.

Bellingham frequencies:

Bellingham Tower - 124.9 MHz, 239.25 MHz
Bellingham Ground Control - 121.65 MHz

BELLINGHAM (BLI) AIRPORT TRAFFIC AREA

The Bellingham Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as that airspace within a 5 statute mile radius of the BLI airport up to, but not including, 3,000' AGL excluding that airspace known as the Abbotsford-Bellingham Flight Information area which lies north of the BLI airport. The Abbotsford-Bellingham Flight Information Area is delineated on aeronautical charts.

BELLINGHAM AIRPORT INFORMATION - GENERAL

The Port of Bellingham is the airport sponsor of the airport. The traffic pattern is 1,200' for fixed wing aircraft and 800' for helicopters. The sponsor has a local regulation which prohibits intersection departures at the airport. Abbotsford, British Columbia, Canada, tower provides limited traffic

information service on 119.4 MHz to VFR aircraft operating between 1,500' and 4,000' MSL in an area generally described as between the U.S./Canadian border and Ferndale, and between the shoreline and Highway 9.

VFR FLIGHT PLANS

All pilots are encouraged to file a flight plan. Arriving aircraft should close their flight plans by radio with Bellingham FSS, on 123.6 MHz or 122.3 MHz. If unable, pilots may call the Bellingham FSS at 734-6400 (local exchange) or 1-800-833-0310 upon arrival.

Canadian/U.S. rules require that all aircraft operating VFR must be on a VFR flight plan prior to crossing the Canadian/U.S. border. Airfiles are discouraged and pilots are requested to file their flight plans 1 hour in advance of proposed departure times.

Pilots departing the U.S. from the Bellingham area are reminded that significant differences exist between Canadian and U.S. rules and procedures. Canadian officials have requested all U.S. pilots be cognizant of the requirement that flight plans are mandatory while operating in Canadian airspace.

IFR TRAFFIC

Vancouver Area Control Center (ACC) is the controlling agency for IFR aircraft operating to/from the Bellingham International Airport. Due to the expected increase in the volume of traffic generated by Expo '86, some delays may be encountered for IFR arrival and departure traffic. The Vancouver ACC has requested that U.S. airmen not request VFR/IFR practice ILS Runway 16 approaches to the Bellingham International Airport during Expo '86.

IFR ARRIVALS BLI INTERNATIONAL

Be prepared to discontinue your approach based upon local traffic conditions and enter a VFR traffic pattern for landing sequence. Pilots arriving IFR are requested to be extremely vigilant as the instrument approaches serving the Bellingham International Airport enter an area of high traffic activity in the Abbotsford-Bellingham Flight Information area.

VFR FLIGHT

Aircraft landing in Vancouver, British Columbia, Canada, should be extremely alert while operating in the Vancouver Lower Mainland area. Numerous aerial demonstrations and other aviation related sport activities are planned for Expo '86. The majority of these events will take place in the Vancouver Harbour Central Zone. The following VFR egress/ingress routes are recommended for traffic operating to/from Canadian airspace:

Bellingham (BLI) to Abbotsford (YXX) northbound east of Lynden
Abbotsford (YXX) to Bellingham (BLI) southbound west of Lynden

BLI to Vancouver (YVR) via Interstate 5 (I-5) using right side separation east/west of the highway. Extreme caution should be taken in the vicinity of the Abbotsford Localizer.

U.S. Airmen desiring additional information on Canadian area airports, rules and regulations, and Custom services may request (in writing) an Air Tourist Information Guide which is available without charge from:

Transport Canada (EXPO Guide)
800 Burrard Street
P.O. Box 220
Vancouver, British Columbia, Canada V6Z2J8

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAM's ISSUED BY BOTH THE U.S. AND CANADA PRIOR TO CONDUCTING FLIGHT.

SPECIAL TRAFFIC MANAGEMENT PROGRAM
CAPE COD AND ADJACENT ISLAND AREA AIRPORTS
MAY 15 THROUGH OCTOBER 30, 1986

In anticipation of the large number of aircraft operating to and from the Cape Cod and adjacent Island areas during the period May 15 through October 30, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****
CAPE COD AND ADJACENT ISLAND AREA

For the purpose of this Special Traffic Management Program, the Cape Cod and adjacent Island area includes the following airports:

Hyannis
Barnstable Municipal-Boardman/Polando Field - HYA
Nantucket Memorial Airport - ACK
Martha's Vineyard Airport - MVY

****VFR ENROUTE AND HOLDING****

Pilots are urged to become familiar with VFR holding and reporting points (SEE GRAPHIC).

Arriving aircraft are encouraged to monitor ATIS, where available, and then contact the appropriate tower when 10-15 miles from the airport. Advise receipt of ATIS information on initial contact. Aircraft landing Martha's Vineyard are requested to monitor tower frequency far enough out to obtain and advise the tower on initial contact, "HAVE NUMBERS".

Aircraft enroute Hyannis Airport from Sagamore Bridge, Martha's Vineyard and Cotuit areas should exercise caution due to high density military traffic on IFR approach to runway 23, Otis Air National Guard Base.

Arrival Points	Arrival Direction	Holding Direction
HYANNIS AIRPORT		
Sandy Neck	North	North
Dennis Drive In	Northeast	Northeast
Sagamore Bridge	Northwest	Northwest
Cotuit	West	Southwest
Dennisport	East	Southeast
MARTHA'S VINEYARD AIRPORT		
Woods Hole	North	Northwest
Oak Bluffs	Northeast	East
Bounre Bridge	North	West
Cuttyhunk Island	West	Southwest
Katama Airpark	Southeast	South
NANTUCKET AIRPORT		
Great Point	North	East
Tuckernuck Island	West	Southwest

****IFR ARRIVAL/DEPARTURE****

Otis Terminal Radar Approach Control (TRACON) may assign a Control Departure Time (CDT) for IFR flights arriving or departing Hyannis, Nantucket or Martha's Vineyard Airports, whenever marginal VFR or IFR weather conditions exist.

Implementation of this part of the Special Traffic Management Program will be by special notice to flight service stations and area airport traffic control towers. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions pilots are encouraged to contact the tower or flight service station, prior to engine start up, to obtain latest information.

To insure the success of this Special Traffic Management Program, aircraft departing Hyannis, New Bedford, Nantucket and Martha's Vineyard Airports are urged to depart within plus or minus 5 minutes of CDT. Departures from other airports should depart within 15 minutes before and not later than 5 minutes after CDT.

****FLIGHT PLANS****

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans may experience extensive delays awaiting integration into the IFR system while this program is in effect.

Commercial operators are requested to file flight plans for extra flight sections no less than 1 hour prior to proposed time of departure.

Pilots are encouraged to cancel VFR flight plans with Bridgeport Flight Service Station by radio. Transmit 122.1 mHz receive on appropriate VOR frequency. If unable to cancel by radio, contact appropriate flight service station by telephone.

NOTE: CHART NOT TO SCALE AND IS NOT TO BE USED FOR NAVIGATION

WORLD SKYDIVING CONVENTION
QUINCY MUNICIPAL AIRPORT
QUINCY, ILLINOIS

August 8 through 18, 1986

In anticipation of the large number of aircraft traveling to and from the Quincy, Illinois Municipal Airport and the excessive amount of skydiving operations during the World Skydiving Convention, the following procedures will be used to enhance safety and minimize air traffic delays.

****AIRPORT CLOSURES & RESTRICTIONS****

Runway 13-31 will be closed by NOTAM 24 hours a day from August 7 through 18, 1986. Other runways may be closed for short periods by NOTAM.

Airport traffic patterns are 1769 feet MSL with right hand traffic pattern for runways 18 and 22, and left hand traffic patterns for runways 4 and 36.

****CAUTION ADVISORY****

Caution is advised in the vicinity of Quincy Municipal Airport for numerous aircraft in climb and rapid descent configuration.

Skydiving operations will be conducted within 5 nautical mile radius of the Quincy Municipal Airport from the surface to 19,000 feet MSL during the hours of sunrise to 30 minutes after sunset.

Non-radio and student training flights are highly discouraged through the area during the hours when skydiving operations are scheduled. This includes student solo or instructed cross country flights, touch-and-go landings, low approaches and practice instrument approaches.

Over flights are requested to avoid the airspace 17,500 feet MSL and below within a 5 nautical mile radius of the Quincy Municipal Airport.

****COMMUNICATIONS****

Due to anticipated frequency congestion, pilots are encouraged to obtain a weather briefing and file flight plans by phone, however, if necessary use frequency 122.5. Quincy Flight Service Station provides Airport Advisory Service on frequency 123.6. Pilots are urged to review all applicable NOTAMS and to file a flight plan.

Kansas City Center is the controlling agency for IFR aircraft operating to/from the Quincy Municipal Airport on frequency of 133.15.

T. F. Green State Airport, Warwick, R.I.

Closing certain runways and taxiways for installation of CAT II Lighting System.

Runway 5R-23L, Runway 10-28, Taxiway Alfa, Mike, Papa, Delta, Echo, and the portions of Sierra that is east of Runway 5L will be closed on September 2, 1986 at 6:00 a.m., and remain closed until 6:00 a.m., on October 2, 1986.

A portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo will remain open for taxi purposes and use incidental to the operation of Runway 16-34.

The portions of Runway 10-28 that intersect Runway 16-34, Runway 5L-23R, Taxiway Bravo, Taxiway Foxtrot, will remain open for taxi purposes and use incidental to the operation of Runway 16-34 and Runway 5L-23R.

Runway 16-34 and the portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo, will be closed from 12:00 midnight to 6:00 a.m., commencing September 17, 1986 through September 24, 1986, to allow fixture installation at the runway intersection.

HIGH ALTITUDE/EN ROUTE FLIGHT ADVISORY SERVICE (HA/EFAS)

HA/EFAS is an expansion of the current EFAS program (See AIM, paragraph 503). When fully implemented, it will provide a discrete frequency for each of the Air Route Traffic Control Center (ARTCC) areas for use by aircraft flying at altitudes of 18,000 feet and above within the center's area. The service expansion was initiated in July 1986 in the Salt Lake City ARTCC area on a frequency of 123.025 mHz.

As service in other areas becomes available the information will be published on charts located on the inside back cover of the Airport Facility Directories.

NATIONAL GOVENORS' CONFERENCE
SPECIAL TRAFFIC MANAGEMENT PROGRAM
HILTON HEAD ISLAND, SOUTH CAROLINA
AUGUST 22 THROUGH AUGUST 27, 1986

In anticipation of the large number of aircraft arriving and and departing Hilton Head Airport, South Carolina and arriving Savanah International Airport, Georgia during the National Governors' Conference, the following procedures will be used to enhance safety and minimize air traffic delays.

TRAFFIC MANAGEMENT PROGRAM

A Special Traffic Management Program will be in effect daily, August 22 through August 27. A Controlled Departure Time (CDT) will be assign unscheduled IFR flights arriving/departing Hilton Head (49J) and arriving Savanah International (SAV) Airports during the effective dates and times of this program. CDT's may be obtained from any flight service station during preflight briefings. CDT's will not be assigned more than 24 hours in advance of proposed time of departure. This Special Traffic Management Program will be in effect:

ARRIVALS ONLY

Friday	August 22	2000-0300 UTC	49J/SAV
Saturday	August 23	1000-2000 UTC	49J/SAV
Sunday	August 24	1100-2000 UTC	49J
Monday	August 25	1100-2000 UTC	49J
Tuesday	August 26	1100-2000 UTC	49J
Wednesday	August 27	1000-1600 UTC	49J

NOTE: Limited Parking available at Hilton Head Airport.

Inbound flight plans should be filed with the nearest flight service station (FSS) at least 4 hours prior to proposed time of departure.

DEPARTURES ONLY

Tuesday	August 26	2100-0400 UTC	49J
Wednesday	August 27	1000-2000 UTC	49J

Departure flight plans should be filed with Savanah FSS at least 4 hours prior to proposed time of departure.

Contact Hilton Head Clearance Delivery on 121.6 mHz not more than 5 minutes plus or minus of the CDT.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL/DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

RENO NATIONAL CHAMPIONSHIP AIR RACES RENO/STEAD AIRPORT

Reno, Nevada

September 11, 12, 13 and 14, 1986

Due to the increased volume of traffic in the Reno area during the air races, the following information is provided to minimize delays and assist pilots entering Reno Approach Control/Tower Airspace.

The air races are held at Reno/Stead Airport, 13 miles NW of Reno Cannon International. The Reno/Stead Airport will be closed to all aircraft, except air race participants, from September 8, 1986, to September 15, 1986. Non-participating aircraft are requested to remain clear of a 5 nautical mile radius of a Reno/Stead Airport from September 1, 1986 through September 14, 1986. Check NOTAMS for the time and altitudes.

Transient parking at Reno Cannon International beginning September 10, 1986, through September 14, 1986, will be in various unimproved infield areas. Parking in these areas will be from sunrise to sunset only. Aircraft arriving after sunset or before sunrise are advised to seek parking at one of the following satellite airports:

Airport	Ident	Unicom	Location from Reno	Parking Spaces
Truckee-Tahoe	TRK	122.8	26 miles SW	302
Beckworth/Nervino	O02	122.8	37 miles NW	30
Carson City	O04	123.0	21 miles S	200
Douglas County	MEV	122.8	33 miles S	80
Fallon	FLX	122.8	42 miles E	20

ARRIVALS: Monitor ATIS on 125.8 before contacting Reno Approach Control. The ATIS broadcast will include special information for arriving aircraft during the air races. Contact Reno Approach on the designated frequency prior to entering TRSA or 10 miles from Reno Cannon. Keep your transmissions brief and expect delays due to traffic volume. The following are suggested reporting points for VFR arrivals:

From	Locations	Distance
South	Carson City Airport	13 miles
West	Town of Verdi	12 miles
East	Tracy Power Station	10 miles
North	Pyramid Lake	30 miles

Please cancel VFR flight plans through Reno Flight Service Station on 122.5 or 122.2.

DEPARTURES: All fixed base operators will have flyers explaining taxi and departure instructions. Please read all information carefully; a map of the airport will be included on the flyer. Monitor ATIS on 125.8 for more information prior to taxi. Keep your transmissions brief.

TIE-DOWNS: It is recommended that all pilots carry their own tie-downs.

TRANSCRIBED WEATHER: Can be received over any of the following NAVAIDS:

FMG 117.9
LTA 113.2
HZN 114.1
SPK NDB 254

PILOT BRIEFINGS: Reno Flight Service Station is located at the east side of Reno Cannon International Airport. A temporary Flight Service Station will be located in the Civil Air Patrol Office, Building 7005, Reno/Stead Airport. Call 348-9480 within the local Reno area, 800-222-4310 from other areas of Nevada, or 800-826-1502 from out-of-state airports.

BEFORE YOUR FLIGHT INTO OR OUT OF THE RENO AREA CHECK FOR CURRENT NOTAMs.

PENNSYLVANIA INTERNATIONAL AIR SHOW
HARRISBURG INTERNATIONAL AIRPORT (MDT)
MIDDLETOWN, PENNSYLVANIA

SEPTEMBER 27 & 28, 1986

IN ANTICIPATION OF THE LARGE NUMBER OF AIR SHOW AIRCRAFT AND SCHEDULED COMMERCIAL AIRCRAFT TRAVELING TO AND FROM HARRISBURG INTERNATIONAL AIRPORT, THE FOLLOWING PROCEDURES WILL BE USED TO ENHANCE SAFETY AND MINIMIZE AIR TRAFFIC DELAYS.

NOTE: ALL TIMES ARE EASTERN DAYLIGHT TIME (EDT).

AIRPORT CLOSURE AND RESTRICTIONS

SEPTEMBER 27 AND 28 (SATURDAY AND SUNDAY)
8AM - 6PM AIRPORT CLOSED - EXCEPT FOR AIRSHOW AND SCHEDULED COMMERCIAL AIRCRAFT

CAUTION ADVISORY

CAUTION ADVISED IN THE VICINITY OF THE HARRISBURG INTERNATIONAL AIRPORT FOR NUMEROUS AIRSHOW AIRCRAFT.

ITERINERANT AIRCRAFT PARKING AVAILABLE AT CAPITAL CITY AIRPORT (CXY).

SEPTEMBER 27 (SATURDAY) AND SEPTEMBER 28 (SUNDAY) 3:00 PM TO 4:30 PM CAUTION ADVISED FOR CANADIAN AEROBATIC JET TEAM "THE SNOW BIRDS", PERFORMANCE WITHIN 5 NAUTICAL MILE RADIUS OF THE HARRISBURG INTERNATIONAL AIRPORT FROM THE SURFACE TO 15,000 MSL.

SPECIAL TRAFFIC MANAGEMENT PROCEDURES
READING MUNICIPAL AIRPORT
READING AIR SHOW
AUGUST 23 & 24, 1986

READING TOWER FREQUENCIES:

Reading Ground Control	121.9
Reading Clearance Delivery	124.3
Reading Tower - Primary	119.9
Reading Tower	121.0
Reading Approach - EAST (360° to 181°)	125.15
Reading Approach - WEST (182° to 359°)	119.25
Reading ATIS	127.1

READING ATIS

Pertinent arrival and departure information will be broadcast continuously on the Reading ATIS, frequency 127.1 MHz. All pilots should listen to this broadcast before calling Reading Approach Control or Ground Control.

VFR ARRIVAL PROCEDURES

Pilots arriving at the Reading Municipal Airport shall monitor the Reading ATIS and contact Reading Approach on the appropriate frequency fifteen (15) nautical miles from the Reading Airport. If you do not have 50 kHz spacing capability, use 119.9 MHz. On initial call up, give your aircraft type and identification, ATIS code, and position. Please keep radio calls to an absolute minimum. Traffic advisories will be given on a workload permitting basis. Do not contact Reading Tower until instructed to. All light single and multi-engine aircraft may be required to exit runways, taxi, and park on designated grass areas of the airport.

VFR DEPARTURE PROCEDURES

Obtain departure information from the Reading ATIS on 127.1 MHz.

IFR DEPARTURE PROCEDURES

Obtain the information from the Reading ATIS on 127.1 MHz. Contact Reading Clearance Delivery on 124.3 MHz prior to engine start up.

AIRPORT CLOSING & AEROBATIC DEMONSTRATIONS

The Reading Airport will be closed during the following time periods and aerobatic flight demonstrations will be conducted in the "Air Show Operations Area" as listed.

August 23 & 24, 1986: Five (5) nautical mile radius of the Reading Airport, from the surface to 5,432 feet MSL during 1300 to 1600 Local on the 23rd and 1400 to 1700 Local on the 24th. Additionally, the ceiling will be 15,000 feet MSL from 1600 to 1630 Local on the 23rd and from 1700 to 1730 Local on the 24th.

Aircraft inbound to Reading, except scheduled Air Carrier/Taxi aircraft, which are not able to land prior to the above air show times, will have to land at outlying airports or remain airborne, clear of the above described "Air Show Operations Area". Pilots on VFR flight plans are reminded to extend, change, or cancel their flight plan if unable to land at the Reading Airport. Harrisburg Flight Service frequency is 122.4 MHz.

FLIGHT PLANS & WEATHER INFORMATION

Flight plan filing, cancelation, or changes and weather information can be obtained from Harrisburg Flight Service on 122.4 MHz when airborne or 376-3045 on the ground at Reading.

STUDENT PILOT TRAINING

No student training flights will be authorized at the Reading Airport on August 23 & 24, 1986. This includes student solo cross country flights, touch and go landings, and practice instrument approaches.

RESTRICTED AREA (R-5802)

Restricted Area R-5802 located south/southwest of Ravine Vortac.

approximately 30 miles northwest of the Reading Airport, may be active. Please check NOTAM and Flight Service information for active times of firing activity. When airborne, contact Harrisburg Flight Service on 122.4 or on the ground at Reading phone 376-3045.

Flight Service Stations	Commissionings, Decommissionings, Hours of Operation; Commissionings, Decommissionings of RCO; Changes in Monitoring Status of RCO; Outages of RCO (with Effective Dates).
Weather	AWOS (System and Frequency).

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

a. GENERAL

b. AIRWAYS

c. FLIGHT RESTRICTIONS

d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (¦) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

GENERAL

FDC 6/2036 FI/P CORRECT U.S. SECTIONAL CHART FOR SEATTLE, 21ST EDITION, DTD 3 JUL 86. CHANGE BAKER FSS /BKE/FREQ 122.4 TO FREQ 122.2.

FDC 6/1786 AK. CURRENT STATUS OF PAVLOV VOLCANO..DRIFTING VOLCANIC ASH FROM PAVLOV VOLCANO SURFACE TO APPROXIMATELY 25 THOUSAND FEET DRIFTING EAST. IFR FLIGHTS MAY BE REROUTED TO AVOID HAZARDOUS ASH AREAS. VFR FLIGHTS INTO VOLCANIC ASH MAY CAUSE ENGINE DAMAGE/FAILURE AND ABRASION DAMAGE TO WING AND WINDSHIELD SURFACES. THIS NOTAM WILL BE UPDATED AS CONDITIONS CHANGE.

FDC 6/1661 FI/P HI CORRECT U.S. SECTIONAL CHART HAWAIIAN ISLANDS 34TH EDITION DATED 5 JUN 86.. CHANGE BRADSHAW NDB IDENT /BSF/FREQ 349 TO FREQ 339.

FDC 6/1087 FDC THE FEDERAL AVIATION ADMINISTRATION HAS PARTICIPATED IN GOVERNMENT ACTIVITIES TO ASSESS AVIATION PROBLEMS WHICH MIGHT OCCUR AS A RESULT OF THE SOVIET NUCLEAR ACCIDENT. NONE OF THE DATA WE HAVE SEEN PROVIDES ANY CONCERN FOR ANY FLIGHTS OF ANY U.S. CARRIERS ANYWHERE IN THE WORLD. THE ONLY AREA WE WOULD BE POTENTIALLY CONCERNED ABOUT IS FLIGHT IN THE VICINITY OF THE REACTOR SITE NEAR KIEV AT ALTITUDES BELOW 20,000 FEET. FLIGHT ABOVE 20,000 FEET AT THIS LOCATION NEAR KIEV OR OTHER FLIGHTS AT ANY ALTITUDE ANYWHERE IN THE WORLD IS NOT EXPECTED TO PRESENT ANY PUBLIC HEALTH OR SAFETY PROBLEMS DUE TO RADIATION CONTAMINATION WHICH MIGHT EXIST AS A RESULT OF THE ACCIDENT. THERE IS NO REASON FOR SPECIAL FLIGHT PRECAUTIONS. NO FURTHER NOTIFICATIONS ON THIS SUBJECT ARE PLANNED.

FDC 6/995 U.S. CUSTOMS REGULATORY CHANGES. AIRCRAFT PENETRATING THE INNER ADIZ FM ANYWHERE IN THE WESTERN HEMISPHERE SOUTH OF THE U.S. MEXICAN BORDER, SOUTH OF 33 DEG NORTH LATITUDE ON THE PACIFIC COAST, SOUTH OF 30 DEGREES NORTH LATITUDE ON THE ATLANTIC COAST, OR SOUTH OF THE INNER ADIZ ON THE GULF COAST, MUST PROVIDE U.S. CUSTOMS AT LEAST ON EHOUR ADVANCE NOTICE OF PENETRATION OF U.S. AIRSPACE, EFFECTIVE APRIL 30. THIS REQUIREMENT WILL BE EXTENDED TO AIRCRAFT THAT HAVE NOT LANDED IN A FOREIGN PLACE AND AIRCRAFT FROM PUERTO RICO THAT ARE NOT FLYING UNDER IFR FLIGHT RULES. FILING A FLIGHT PLAN WITH THE NOTATION "ADCUS" WITH THE U.S. FAA AT LEAST ONE HOUR IN ADVANCE OF PENETRATION OF THE ADIZ WILL SATISFY THIS REQUIREMENT. CONTRACTING U.S. CUSTOMS AT 305-536-6591, MIAMI, FL, OR 714-351-6874, RIVERSIDE, CA, AT LEAST ONE HOUR IN ADVANCE WILL ALSO MEET THE REQUIREMENT. LANDING AND INSPECTION REQUIREMENTS FOR AIRCRAFT ARRIVING FROM FOREIGN PLACES REMAIN UNCHANGED.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 16TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7806/CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED.
NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

- Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.
- Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.
- Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective June 5, 1986.

Albuquerque International Airport, NM
Greater Cincinnati International Airport, KY
Indianapolis International Airport, IN
Phoenix Sky Harbor International Airport, AZ
Tucson International Airport, AZ
Davis-Monthan Air Force Base, AZ
Wichita Mid-Continent Airport, KS

An ARSA has been designated at the following airport to be effective July 3, 1986.

Dallas Love Field, Texas

An ARSA has been designated at the following airport to be effective July 31, 1986.

Lafayette Regional Airport, LA

ARSA's have been designated at the following locations to be effective on August 28, 1986.

Raleigh-Durham, NC

Dulles International Airport, Washington, DC

TERMINAL AREA GRAPHIC NOTICE
(NOT TO BE USED FOR NAVIGATION)

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

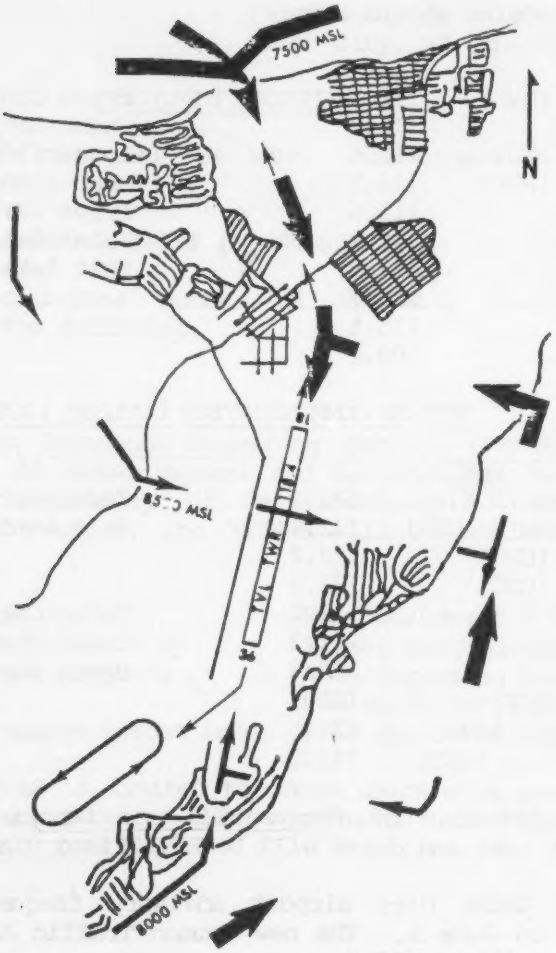
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



CEDAR CITY, UTAH, AUTOMATED FLIGHT SERVICE STATION

The Cedar City, Utah, Automated Flight Service Station (AFSS will commission on June 5, 1986. All services now provided by the Cedar City Flight Service Station (FSS) will be transferred to the AFSS at that time. On that same day, the AFSS will also assume control of most of the enroute flight advisory service (EFAS) outlets now remoted to Salt Lake flight Service Station. The remaining EFAS, remote communications outlet (RCO), and very-high omni (VOR) voice frequencies now controlled by SLC FSS will be gradually transferred to Cedar City AFSS, as well as all eastern Utah facilities now controlled by Grand Junction, Colorado, Flight Service Station.

Area Served: The Cedar City AFSS's geographic area of responsibility is the state of Utah for all services except EFAS. The EFAS area of rsponsibility covers a six-state area (see below).

RADIO AIDS

A. Navigational aids with voice capability, (pilots transmit on 122.1 and receive on the VOR frequency.)

Bonneville (BVL)	112.3
Delta (DTA)	116.1
Fairfield (FFU)	116.6
Hanksville (HVE)	115.9
Lucin (LCU)	113.6
Milford (MLF)	112.1
Myton (MTU)	117.9
Ogden (OGD)	115.7
Price (PUC)	115.5
Vernal (VEL)	108.2

B. VOR navigational aids with no voice capability.

Bryce Canyon (BCE)	112.8
Cedar City (CDC)	108.6
Logan (LGU)	109.8
Moab (OAB)	109.8
Provo (PVU)	108.4

Provo, UT. (PVU)
Kalispell, MT. (FCA)
Battle Mountain, NV. (BAM)*
Francis Peak, UT. (SLC)*
(high altitude only)
Miles City, MT.(MLS)*

PREFLIGHT BRIEFING

Local Cedar City pilots may call 586-3806. All others within Utah dial:

1-800-WX BRIEF (1-800-992-7433)

After calling this toll-free number pilots will receive prerecorded instructions to access the following:

1. Pilot Briefer

2. Pilots Automatic Telephone Answering Service (PATWAS). PATWAS is a continuous recording of meteorlogical and aeronautical information. The PATWAS system has a capability of 24 recordings. Besides providing significant weather information, the PATWAS will be providing aeronautical information such as:

NOTAM D/L Information
Military Training Route Activity
Current FSS Automation Progress
FDC NOTAMS for Utah
High Altitude Reservation System Info

Sunrise/Sunset for the Week
Flight Watch Usage
AFSS Accessing Process
VOR VOICE Radio Usage
TWEB Routes/SA Reports

Automatic Access to PATWAS is limited to those users with touch tone phones. Users calling from Rotary phones will be connected directly to a briefer.

EXPO '86

May 2, 1986, through October 13, 1986

In anticipation of a significant increase of aircraft activity to and from the Vancouver, British Columbia, Canada, area during the 1986 World Exposition, the following flight information is provided to enhance safety and minimize air traffic delays.

BELLINGHAM, WASHINGTON, AREA

The Bellingham area includes the following airports:

Bellingham International (BLI)
Blaine Municipal (WA09)
Lynden (WA33)

Bellingham International is a port of entry and customs services are available from 8 a.m. until 5 p.m., locally and at other times, upon 1 hours advance notice. U.S. Airmen departing Canadian airspace which intend to land and clear Customs at Bellingham International are reminded to annotate their Customs requests in the remarks section of their flight plan. The Customs office telephone number at Bellingham is (206) 734-5463 (local exchange). Responsibility for ensuring Customs notification rests with the pilot.

TEMPORARY FAA BELLINGHAM CONTROL TOWER

The control tower will be operated from 8 a.m. until 8 p.m., daily, from May 1, 1986, through October 25, 1986.

Bellingham frequencies:

Bellingham Tower - 124.9 MHz, 239.25 MHz
Bellingham Ground Control - 121.65 MHz

BELLINGHAM (BLI) AIRPORT TRAFFIC AREA

The Bellingham Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as that airspace within a 5 statute mile radius of the BLI airport up to, but not including, 3,000' AGL excluding that airspace known as the Abbotsford-Bellingham Flight Information area which lies north of the BLI airport. The Abbotsford-Bellingham Flight Information Area is delineated on aeronautical charts.

BELLINGHAM AIRPORT INFORMATION - GENERAL

The Port of Bellingham is the airport sponsor of the airport. The traffic pattern is 1,200' for fixed wing aircraft and 800' for helicopters. The sponsor has a local regulation which prohibits intersection departures at the airport. Abbotsford, British Columbia, Canada, tower provides limited traffic

information service on 119.4 MHz to VFR aircraft operating between 1,500' and 4,000' MSL in an area generally described as between the U.S./Canadian border and Ferndale, and between the shoreline and Highway 9.

VFR FLIGHT PLANS

All pilots are encouraged to file a flight plan. Arriving aircraft should close their flight plans by radio with Bellingham FSS, on 123.6 MHz or 122.3 MHz. If unable, pilots may call the Bellingham FSS at 734-6400 (local exchange) or 1-800-833-0310 upon arrival.

Canadian/U.S. rules require that all aircraft operating VFR must be on a VFR flight plan prior to crossing the Canadian/U.S. border. Airfiles are discouraged and pilots are requested to file their flight plans 1 hour in advance of proposed departure times.

Pilots departing the U.S. from the Bellingham area are reminded that significant differences exist between Canadian and U.S. rules and procedures. Canadian officials have requested all U.S. pilots be cognizant of the requirement that flight plans are mandatory while operating in Canadian airspace.

IFR TRAFFIC

Vancouver Area Control Center (ACC) is the controlling agency for IFR aircraft operating to/from the Bellingham International Airport. Due to the expected increase in the volume of traffic generated by Expo '86, some delays may be encountered for IFR arrival and departure traffic. The Vancouver ACC has requested that U.S. airmen not request VFR/IFR practice ILS Runway 16 approaches to the Bellingham International Airport during Expo '86.

IFR ARRIVALS BLI INTERNATIONAL

Be prepared to discontinue your approach based upon local traffic conditions and enter a VFR traffic pattern for landing sequence. Pilots arriving IFR are requested to be extremely vigilant as the instrument approaches serving the Bellingham International Airport enter an area of high traffic activity in the Abbotsford-Bellingham Flight Information area.

VFR FLIGHT

Aircraft landing in Vancouver, British Columbia, Canada, should be extremely alert while operating in the Vancouver Lower Mainland area. Numerous aerial demonstrations and other aviation related sport activities are planned for Expo '86. The majority of these events will take place in the Vancouver Harbour Central Zone. The following VFR egress/ingress routes are recommended for traffic operating to/from Canadian airspace:

Bellingham (BLI) to Abbotsford (YXX) northbound east of Lynden
Abbotsford (YXX) to Bellingham (BLI) southbound west of Lynden

BLI to Vancouver (YVR) via Interstate 5 (I-5) using right side separation east/west of the highway. Extreme caution should be taken in the vicinity of the Abbotsford Localizer.

U.S. Airmen desiring additional information on Canadian area airports, rules and regulations, and Custom services may request (in writing) an Air Tourist Information Guide which is available without charge from:

Transport Canada (EXPO Guide)
800 Burrard Street
P.O. Box 220
Vancouver, British Columbia, Canada V6Z2JB

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAM's ISSUED BY BOTH THE U.S. AND CANADA PRIOR TO CONDUCTING FLIGHT.

SPECIAL TRAFFIC MANAGEMENT PROGRAM
CAPE COD AND ADJACENT ISLAND AREA AIRPORTS
MAY 15 THROUGH OCTOBER 30, 1986

In anticipation of the large number of aircraft operating to and from the Cape Cod and adjacent Island areas during the period May 15 through October 30, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****
CAPE COD AND ADJACENT ISLAND AREA

For the purpose of this Special Traffic Management Program, the Cape Cod and adjacent Island area includes the following airports:

Hyannis
Barnstable Municipal-Boardman/Polando Field - HYA
Nantucket Memorial Airport - ACK
Martha's Vineyard Airport - MVY

****VFR ENROUTE AND HOLDING****

Pilots are urged to become familiar with VFR holding and reporting points (SEE GRAPHIC).

Arriving aircraft are encouraged to monitor ATIS, where available, and then contact the appropriate tower when 10-15 miles from the airport. Advise receipt of ATIS information on initial contact. Aircraft landing Martha's Vineyard are requested to monitor tower frequency far enough out to obtain and advise the tower on initial contact, "HAVE NUMBERS".

Aircraft enroute Hyannis Airport from Sagamore Bridge, Martha's Vineyard and Cotuit areas should exercise caution due to high density military traffic on IFR approach to runway 23, Otis Air National Guard Base.

Arrival Points	Arrival Direction	Holding Direction
HYANNIS AIRPORT		
Sandy Neck	North	North
Dennis Drive In	Northeast	Northeast
Sagamore Bridge	Northwest	Northwest
Cotuit	West	Southwest
Dennisport	East	Southeast
MARTHA'S VINEYARD AIRPORT		
Woods Hole	North	Northwest
Oak Bluffs	Northeast	East
Bounre Bridge	North	West
Cuttyhunk Island	West	Southwest
Katama Airpark	Southeast	South
NANTUCKET AIRPORT		
Great Point	North	East
Tuckernuck Island	West	Southwest

****IFR ARRIVAL/DEPARTURE****

Otis Terminal Radar Approach Control (TRACON) may assign a Control Departure Time (CDT) for IFR flights arriving or departing Hyannis, Nantucket or Martha's Vineyard Airports, whenever marginal VFR or IFR weather conditions exist.

Implementation of this part of the Special Traffic Management Program will be by special notice to flight service stations and area airport traffic control towers. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions pilots are encouraged to contact the tower or flight service station, prior to engine start up, to obtain latest information.

To insure the success of this Special Traffic Management Program, aircraft departing Hyannis, New Bedford, Nantucket and Martha's Vineyard Airports are urged to depart within plus or minus 5 minutes of CDT. Departures from other airports should depart within 15 minutes before and not later than 5 minutes after CDT.

****FLIGHT PLANS****

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans may experience extensive delays awaiting integration into the IFR system while this program is in effect.

Commercial operators are requested to file flight plans for extra flight sections no less than 1 hour prior to proposed time of departure.

Pilots are encouraged to cancel VFR flight plans with Bridgeport Flight Service Station by radio. Transmit 122.1 mHz receive on appropriate VOR frequency. If unable to cancel by radio, contact appropriate flight service station by telephone.

Bridgeport FSS (MA & RI) (CT)	800-992-7433 (800WXBRIEF)

⚑ VFR HOLDING / REPORTING POINTS

NOTE: CHART NOT TO SCALE AND IS NOT TO BE USED FOR NAVIGATION

T. F. Green State Airport, Warwick, R.I.

Closing certain runways and taxiways for installation of CAT II Lighting System.

Runway 5R-23L, Runway 10-28, Taxiway Alfa, Mike, Papa, Delta, Echo, and the portions of Sierra that is east of Runway 5L will be closed on September 2, 1986 at 6:00 a.m., and remain closed until 6:00 a.m., on October 2, 1986.

A portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo will remain open for taxi purposes and use incidental to the operation of Runway 16-34.

The portions of Runway 10-28 that intersect Runway 16-34, Runway 5L-23R, Taxiway Bravo, Taxiway Foxtrot, will remain open for taxi purposes and use incidental to the operation of Runway 16-34 and Runway 5L-23R.

Runway 16-34 and the portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo, will be closed from 12:00 midnight to 6:00 a.m., commencing September 17, 1986 through September 24, 1986, to allow fixture installation at the runway intersection.

HIGH ALTITUDE/EN ROUTE FLIGHT ADVISORY SERVICE (HA/EFAS)

HA/EFAS is an expansion of the current EFAS program (See AIM, paragraph 503). When fully implemented, it will provide a discrete frequency for each of the Air Route Traffic Control Center (ARTCC) areas for use by aircraft flying at altitudes of 18,000 feet and above within the center's area. The service expansion was initiated in July 1986 in the Salt Lake City ARTCC area on a frequency of 123.025 mHz.

As service in other areas becomes available the information will be published on charts located on the inside back cover of the Airport Facility Directories.

RENO NATIONAL CHAMPIONSHIP AIR RACES RENO/STEAD AIRPORT

Reno, Nevada

September 11, 12, 13 and 14, 1986

Due to the increased volume of traffic in the Reno area during the air races, the following information is provided to minimize delays and assist pilots entering Reno Approach Control/Tower Airspace.

The air races are held at Reno/Stead Airport, 13 miles NW of Reno Cannon International. The Reno/Stead Airport will be closed to all aircraft, except air race participants, from September 8, 1986, to September 15, 1986. Non-participating aircraft are requested to remain clear of a 5 nautical mile radius of a Reno/Stead Airport from September 1, 1986 through September 14, 1986. Check NOTAMS for the time and altitudes.

Transient parking at Reno Cannon International beginning September 10, 1986, through September 14, 1986, will be in various unimproved infield areas. Parking in these areas will be from sunrise to sunset only. Aircraft arriving after sunset or before sunrise are advised to seek parking at one of the following satellite airports:

Airport	Ident	Unicom	Location from Reno	Parking Spaces
Truckee-Tahoe	TRK	122.8	26 miles SW	302
Beckworth/Nervino	O02	122.8	37 miles NW	30
Carson City	O04	123.0	21 miles S	200
Douglas County	MEV	122.8	33 miles S	80
Fallon	FLX	122.8	42 miles E	20

ARRIVALS: Monitor ATIS on 125.8 before contacting Reno Approach Control. The ATIS broadcast will include special information for arriving aircraft during the air races. Contact Reno Approach on the designated frequency prior to entering TRSA or 10 miles from Reno Cannon. Keep your transmissions brief and expect delays due to traffic volume. The following are suggested reporting points for VFR arrivals:

From	Locations	Distance
South	Carson City Airport	13 miles
West	Town of Verdi	12 miles
East	Tracy Power Station	10 miles
North	Pyramid Lake	30 miles

Please cancel VFR flight plans through Reno Flight Service Station on 122.5 or 122.2.

DEPARTURES: All fixed base operators will have flyers explaining taxi and departure instructions. Please read all information carefully; a map of the airport will be included on the flyer. Monitor ATIS on 125.8 for more information prior to taxi. Keep your transmissions brief.

TIE-DOWNS: It is recommended that all pilots carry their own tie-downs.

TRANSCRIBED WEATHER: Can be received over any of the following NAVAIDS:

FMG 117.9
LTA 113.2
HZN 114.1
SPK NDB 254

PILOT BRIEFINGS: Reno Flight Service Station is located at the east side of Reno Cannon International Airport. A temporary Flight Service Station will be located in the Civil Air Patrol Office, Building 7005, Reno/Stead Airport. Call 348-9480 within the local Reno area, 800-222-4310 from other areas of Nevada, or 800-826-1502 from out-of-state airports.

BEFORE YOUR FLIGHT INTO OR OUT OF THE RENO AREA, CHECK FOR CURRENT NOTAMs.

PENNSYLVANIA INTERNATIONAL AIR SHOW
HARRISBURG INTERNATIONAL AIRPORT (MDT)
MIDDLETOWN, PENNSYLVANIA

SEPTEMBER 27 & 28, 1986

IN ANTICIPATION OF THE LARGE NUMBER OF AIR SHOW AIRCRAFT AND SCHEDULED COMMERCIAL AIRCRAFT TRAVELING TO AND FROM HARRISBURG INTERNATIONAL AIRPORT, THE FOLLOWING PROCEDURES WILL BE USED TO ENHANCE SAFETY AND MINIMIZE AIR TRAFFIC DELAYS.

NOTE: ALL TIMES ARE EASTERN DAYLIGHT TIME (EDT).

AIRPORT CLOSURE AND RESTRICTIONS

SEPTEMBER 27 AND 28 (SATURDAY AND SUNDAY)
8AM - 6PM AIRPORT CLOSED - EXCEPT FOR AIRSHOW AND SCHEDULED COMMERCIAL AIRCRAFT

CAUTION ADVISORY

CAUTION ADVISED IN THE VICINITY OF THE HARRISBURG INTERNATIONAL AIRPORT FOR NUMEROUS AIRSHOW AIRCRAFT.

ITERINERANT AIRCRAFT PARKING AVAILABLE AT CAPITAL CITY AIRPORT (CXY).

SEPTEMBER 27 (SATURDAY) AND SEPTEMBER 28 (SUNDAY) 3:00 PM TO 4:30 PM CAUTION ADVISED FOR CANADIAN AEROBATIC JET TEAM "THE SNOW BIRDS", PERFORMANCE WITHIN 5 NAUTICAL MILE RADIUS OF THE HARRISBURG INTERNATIONAL AIRPORT FROM THE SURFACE TO 15,000 MSL.

UNIVERSITY OF FLORIDA HOME FOOTBALL GAMES
SPECIAL TRAFFIC MANAGEMENT PROGRAM
GAINESVILLE, FLORIDA

In anticipation of the large number of aircraft operating to/from the Gainesville, Florida, area during the University of Florida home football games, special traffic management procedures will be used to enhance safety and minimize air traffic delays at Gainesville Regional Airport (GNV).

TRAFFIC MANAGEMENT PROGRAM

A Special Traffic Management Program will be in effect for IFR departures within the Jacksonville, Miami and Atlanta Center flight advisory areas. Jacksonville Center will assign a Controlled Departure Time (CDT) for unscheduled IFR flights arriving GNV, when this program is in effect. CDT's can be obtained from any flight service station when filing an IFR flight plan to GNV. This Special Traffic Management Program will be in effect:

Saturday	August 30	1400-2200 UTC
Saturday	September 6	1400-2200 UTC
Saturday	September 20	1230-1930 UTC
Saturday	October 4	1230-1930 UTC
Saturday	October 11	1230-1930 UTC
Saturday	November 1	1330-2030 UTC

Flight plans should be filed with the nearest flight service station (FSS) at least 4 hours prior to the proposed time of departure. Include the CDT in remarks section of the flight plan.

Except for emergency situations, Jacksonville Center will not accept IFR flight plans to Gainesville Regional Airport from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

FLIGHT SERVICE STATION INFORMATION

VFR aircraft are encouraged to cancel/activate flight plans with Gainesville FSS when approaching/departing the city of Gainesville, or in person.

FLIGHT PLAN AND PILOT BRIEFING TELEPHONE NUMBERS

(904)-376-7515
1-(800)-343-3405

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL/DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

CED AIR FAIR
SPECIAL TRAFFIC MANAGEMENT PROCEDURES
CEDAR RAPIDS, IOWA
SEPTEMBER 6 & 7, 1986

In anticipation of the large number of aircraft traveling to and from the Cedar Rapids, Iowa, area during the CedAir Fair, the following Special Traffic Management Procedure will be used to enhance safety and minimize air traffic delays at Cedar Rapids Municipal Airport.

****OVERFLIGHTS****

Aircraft not landing in the Cedar Rapids area are encouraged to avoid overflight below 6,000 feet MSL within a 30 nautical mile radius of Cedar Rapids Municipal Airport.

****Automatic Terminal Information Service (ATIS)****

Aircraft landing Cedar Rapids Municipal Airport are requested to monitor ATIS, 124.15 mHz, PRIOR TO CONTACTING Cedar Rapids Approach Control.

****VFR ARRIVALS****

Radar sequencing will be provided to all aircraft landing Cedar Rapids Municipal Airport. Contact Cedar Rapids Approach Control prior to reaching an arrival point (SEE GRAPHIC). DO NOT PROCEED inbound from an arrival point prior to contacting Cedar Rapids Approach Control.

VFR ARRIVAL POINTS	FREQUENCY
Iowa City	119.7 mHz
Newhall	See Graphic
Palo	134.05 mHz
Anamosa	134.05 mHz
Tipton	See Graphic
Marengo	119.7 mHz

****VFR DEPARTURES****

Detailed departure information will be provided at all aircraft parking area entrances. Pilots are encouraged to review this information to enhance safety and expedite departures.

****IFR ARRIVAL/DEPARTURE****

If traffic conditions warrant, a traffic management program will be implemented to balance arrival and departure flows. When necessary, arriving and departing aircraft will be assigned a Controlled Departure Time (CDT).

****FLIGHT SERVICE STATION****

Cedar Rapids Flight Service Station (FSS) is located on the second floor, Room 208, of the Terminal Building and is accessible from the aircraft parking area.

Pre flight and flight planning services are available in person or by telephone:

Cedar Rapids Area	364-7127
Quad Cities Davenport/Moline/ Rock Island	762-5228
State of Iowa Toll Free	1-800-332-5241 1-800-843-8553

Pilots are reminded to cancel their VFR flight plans with Cedar Rapids FSS via radio on 122.55 mHz, 122.2 mHz or transmit 122.1 mHz and advise which VOR is being received:

Cedar Rapids - 117.6 mHz
Dubuque - 115.8 mHz
Iowa City - 116.2 mHz

Waukon - 116.6 mHz
Waterloo - 112.2 mHz
Galesburg - 109.8 mHz

****NO RADIO ARRIVALS/DEPARTURE****

Contact Cedar Rapids Airport Traffic Control Tower for prior approval. Telephone: (319) 364-2334.

****AIRPORT MANAGER'S NOTICE****

Light, single and multi-engine aircraft may be required to park on grass areas of the airport. CAUTION ADVISED while operating on unimproved or grass areas due to rough ground and signs. Pilots are urge to bring their own tie downs for sod areas. Report all incidents or accidents to the Airport Manager as soon as possible.

STUDENT PILOT TRAINING. No touch and go landings, student solo cross country flights or practice instruments approaches will be authorized at Cedar Rapids Municipal Airport, September 6-7.

****AIRPORT CLOSURE****

Cedar Rapids Municipal Airport (CID) is subject to closure to arriving VFR aircraft, September 6-7, if aircraft parking areas become unavailable. Pilots should consider Iowa City Municipal Airport (IOW) as an alternate landing area.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL/DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

SPECIAL AIR TRAFFIC PROCEDURES FOR
1986 FARM PROGRESS SHOW
ALLEMAN, IA SEPT. 30 to OCT. 2, 1986

Due to the heavy volume of traffic generated by the annual Farm Progress Show, which this year will be held near Alleman, Iowa, the following information and special procedures are provided for aircraft arriving and departing the Ames Municipal Airport.

GENERAL INFORMATION

The Ames Municipal Airport has been designated as the official airport of the 1986 Farm Progress Show. This airport is located 2 miles southeast of the city of Ames (Newton VORTAC 292 degrees at 26 miles). An asphalt runway, 13/31, 3492 feet long and 100 feet wide will be the primary runway used. The field elevation is 930 feet MSL. Arriving aircraft FLY LEFT HAND TRAFFIC PATTERN for runway 31 or RIGHT HAND TRAFFIC PATTERN for runway 13, unless directed otherwise by the Tower. Recommended traffic pattern altitude is 800 feet AGL (1730 MSL).

A new paved 4600 feet long concrete runway, 1/19, may be used for limited operations, however, the portion of that runway that is north of runway 13/31 will be used as the primary entry/exit route to the Farm Progress Show aircraft parking area.

Other nearby airports that may be used if the Ames Airport is closed due to reaching capacity, or for any other reason, are the Boone Municipal and Des Moines International Airports. Shuttle bus service will be available between the Ames Airport and the show location near Alleman.

The Federal Aviation Administration WILL OPERATE A TEMPORARY CONTROL TOWER AT THE Ames Municipal Airport between the hours of 7 a.m. to 7 p.m. Central Daylight Time (1200-0000Z) on September 30, October 1 and 2, 1986. The TOWER frequency will be 127.4 MHz and the GROUND CONTROL frequency will be 121.7 MHz. Use the call signs "AMES TOWER" and "AMES GROUND" in radio communications. The temporary tower will be located atop a brick building adjacent to the ramp just north of the wind tee.

The Ames Airport has AWOS-1 weather information available on frequency 126.55 MHz. This broadcast transmits the temperature, dew point, surface wind, altimeter, density altitude and prerecorded remarks. Pilots should tune in and receive this broadcast prior to preparing for landing or departure.

ARRIVAL PROCEDURES

Radio Equipped Aircraft:

1. Contact TOWER when 15 miles from airport.
2. If traffic is heavy and the tower frequency is congested, LISTEN FOR THE APPROPRIATE LANDING INFORMATION. Call the tower when on downwind leg of the traffic pattern.
3. Geographic holding fixes may be assigned to inbound aircraft, if necessary.
4. After landing, turn north on runway 1 if speed permits, otherwise exit onto the parallel taxiway to runway 1 to the show parking area. Then follow directions of flagmen into parking. PROMPT CLEARING OF THE LANDING AREA WILL BE APPRECIATED!
5. Be alert for other aircraft - especially no-radio aircraft - at all times. USE EXTREME CAUTION!

No-Radio Aircraft:

1. Approach the area at least 1000 feet above traffic pattern altitude.
2. When you are able to determine the direction of landing, let down to traffic pattern altitude, pick out an aircraft on downwind leg and follow that aircraft. (If no other traffic is present, fly a normal left or right traffic pattern depending on the runway in use).
3. Watch the temporary tower for appropriate light signals. USE EXTREME CAUTION AT ALL TIMES!
4. After landing, use the same routing and procedures to parking as described for radio equipped aircraft above. PROMPT CLEARING OF THE LANDING AREA WILL BE APPRECIATED!

DEPARTURE PROCEDURES

1. Before taxiing, monitor Ground Control and the AWOS broadcast on 126.55 MHz for departure runway and information. Follow directions of flagmen out of the parking area. Expect to taxi via the north end of runway 19 then to runway 31 or 13 via its parallel taxiway.
2. During busy departure periods do not call for taxi or takeoff clearances. Controllers will initiate any necessary instructions on Ground and Tower frequencies. You may advise Tower when you're number one at the runway and ready for departure. No-radio aircraft should turn toward the tower when ready for departure and watch for a green light. If you are given any instructions with hand signals, OBSERVE THE SIGNALS CAREFULLY!
3. After departure proceed straight-out for at least two miles before making any turns. USE EXTREME CAUTION! Be alert for other aircraft, inbound and outbound, at all times.

IFR PROCEDURES

The IFR arrival and departure service for the Ames Airport is provided by Des Moines Approach Control on frequency 123.9 MHz. If weather conditions permit, IFR arrivals should cancel IFR before 10 miles from the airport in order to sequence into the VFR traffic pattern; and departures planning IFR should depart VFR and pickup their IFR clearance in the air from Des Moines Approach Control. If weather does not permit this, regular IFR service will be provided.

PILOT BRIEFING AND FLIGHT PLAN PROCEDURES

All Flight Service Station services will be provided by the Fort Dodge AFSS. There are only a limited number of public telephones, which are not convenient to the show parking area, available at the airport for weather briefing and flight plan services. You are encouraged, therefore, to use a phone at the Show grounds where more are available and easier to locate. This will also allow greater opportunity for timely processing of flight plans which will be of assistance with the large number anticipated. A special PATWAS recording will be available for the Farm Progress Show. It will be PATWAS #205 and fast file recording can be used to file IFR or VFR flight plans. Dial toll free: 1-800-392-4220.

Everyone is urged to file a flight plan. Pilots with two-way radio equipment should close their flight plans with FORT DODGE RADIO prior to landing. Transmit on 122.1 MHz and listen to the Des Moines VOR 114.1 MHz or Newton VOR 112.5 MHz. Simplex radio frequencies at Fort Dodge Radio are 122.65 MHz and 122.3 MHz.

HAVE A SAFE AND PLEASANT FLIGHT

Turn landing lights on for safety when in the traffic pattern

Weather	AWOS (System and Frequency).

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

a. GENERAL

b. AIRWAYS

c. FLIGHT RESTRICTIONS

d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

FDC 6/2036 FI/P CORRECT U.S. SECTIONAL CHART FOR SEATTLE, 31ST EDITION, DTD 3 JUL 86. CHANGE BAKER FSS /BKE/FREQ 122.4 TO FREQ 122.2.

FDC 6/1788 AK. CURRENT STATUS OF PAVLOV VOLCANO. DRIFTING VOLCANIC ASH FROM PAVLOV VOLCANO SURFACE TO APPROXIMATELY 25 THOUSAND FEET DRIFTING EAST. IFR FLIGHTS MAY BE REROUTED TO AVOID HAZARDOUS ASH AREAS. VFR FLIGHTS INTO VOLCANIC ASH MAY CAUSE ENGINE DAMAGE/FAILURE AND ABRASION DAMAGE TO WING AND WINDSHIELD SURFACES. THIS NOTAM WILL BE UPDATED AS CONDITIONS CHANGE.

FDC 6/1601 FI/P HI CORRECT U.S. SECTIONAL CHART HAWAIIAN ISLANDS 34TH EDITION DATED 5 JUN 86.. CHANGE BRADSHAW NDB IDENT /BSF/FREQ 349 TO FREQ 339.

FDC 6/1067 FDC THE FEDERAL AVIATION ADMINISTRATION HAS PARTICIPATED IN GOVERNMENT ACTIVITIES TO ASSESS AVIATION PROBLEMS WHICH MIGHT OCCUR AS A RESULT OF THE SOVIET NUCLEAR ACCIDENT. NONE OF THE DATA WE HAVE SEEN PROVIDES ANY CONCERN FOR ANY FLIGHTS OF ANY U.S. CARRIERS ANYWHERE IN THE WORLD. THE ONLY AREA WE WOULD BE POTENTIALLY CONCERNED ABOUT IS FLIGHT IN THE VICINITY OF THE REACTOR SITE NEAR KIEV AT ALTITUDES BELOW 20,000 FEET. FLIGHT ABOVE 20,000 FEET AT THIS LOCATION NEAR KIEV OR OTHER FLIGHTS AT ANY ALTITUDE ANYWHERE IN THE WORLD IS NOT EXPECTED TO PRESENT ANY PUBLIC HEALTH OR SAFETY PROBLEMS DUE TO RADIATION CONTAMINATION WHICH MIGHT EXIST AS A RESULT OF THE ACCIDENT. THERE IS NO REASON FOR SPECIAL FLIGHT PRECAUTIONS. NO FURTHER NOTIFICATIONS ON THIS SUBJECT ARE PLANNED.

FDC 6/995 U.S. CUSTOMS REGULATORY CHANGES. AIRCRAFT PENETRATING THE INNER ADIZ FM ANYWHERE IN THE WESTERN HEMISPHERE SOUTH OF THE U.S. MEXICAN BORDER, SOUTH OF 33 DEG NORTH LATITUDE ON THE PACIFIC COAST, SOUTH OF 30 DEGREES NORTH LATITUDE ON THE ATLANTIC COAST, OR SOUTH OF THE INNER ADIZ ON THE GULF COAST, MUST PROVIDE U.S. CUSTOMS AT LEAST ON EHOUR ADVANCE NOTICE OF PENETRATION OF U.S. AIRSPACE. EFFECTIVE APRIL 30, THIS REQUIREMENT WILL BE EXTENDED TO AIRCRAFT THAT HAVE NOT LANDED IN A FOREIGN PLACE AND AIRCRAFT FROM PUERTO RICO THAT ARE NOT FLYING UNDER IFR FLIGHT RULES. FILING A FLIGHT PLAN WITH THE NOTATION "ADCUS" WITH THE U.S. FAA AT LEAST ONE HOUR IN ADVANCE OF PENETRATION OF THE ADIZ WILL SATISFY THIS REQUIREMENT. CONTRACTING U.S. CUSTOMS AT 305-536-6991, MIAMI, FL, OR 714-351-6674, RIVERSIDE, CA, AT LEAST ONE HOUR IN ADVANCE WILL ALSO MEET THE REQUIREMENT. LANDING AND INSPECTION REQUIREMENTS FOR AIRCRAFT ARRIVING FROM FOREIGN PLACES REMAIN UNCHANGED

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 16TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7606/CHICAGO 312-263-2675 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED. NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.
